

ANASCO GLOBAL TRADING CO.,LTD.

Item	Product	Application	
1	Soda Ash Dense	Used in raw materials for other chemicals, glass, light industry, daily chemicals, building materials, chemical industry, food industry, metallurgy, textile, petroleum, national defense, medicine, etc.	  
2	Soda Ash Light	Used in industrial fields such as chemical, pharmaceutical, food, light industry, textile, as well as daily life	  
3	Sodium bicarbonate	Used in food additives, medicine, film making, tanning, mineral processing, smelting, metal heat treatment, fiber, rubber industry, etc.	  
4	Sodium Sulphate	Used in Ceramic, glass, detergent, etc.	  

ANASCO GLOBAL TRADING CO.,LTD.

5	Sodium chlorite	Used in cotton spinning, linen, pulp bleaching, food disinfection, water treatment, disinfection, algae killing and fish medicine manufacturing, etc.			
6	Sodium benzoate	Used in food preservatives, medicines, dyes, etc.			
7	Tri sodium phosphate	Used in food processing, chemical industry, textile, printing and dyeing, paper making, power generation, etc.			
8	Disodium Phosphate	Used for manufacturing citric acid, softener, flame retardant, glaze, pigment, food industry, and producing industrial water treatment agents, printing and dyeing detergents, etc.			
9	EDTA-2Na	Used in dyes, food, medicine, etc.			

ANASCO GLOBAL TRADING CO.,LTD.

10	EDTA-4Na	Used in the textile industry for dyeing, water quality treatment, color photography, pharmaceuticals, daily chemical industry, papermaking and other industries	
11	Potassium hydroxide	Used in desiccant, absorbent, oxalic acid and various potassium salts, also used in electroplating, sculpture, lithography, etc.	
12	Manganese Sulphate Monohydrate	Used in the secondary battery industry, etc.	
13	Calcium chloride	Used for desiccant, road dust collector, antifogging agent, fabric fire retardant, medicine, food, calcium salt, etc.	
14	Ammonium chloride	Used in medicine, dry battery, fabric printing and dyeing, detergent, dyeing assistant, tin and zinc plating, tanning, candle making, binder, chromizing, precision casting, etc.	

ANASCO GLOBAL TRADING CO.,LTD.

15	Ammonium bicarbonate	Used as nitrogen fertilizer, food starter, plastics and rubber industry, pottery making, chrome tanning and synthetic catalyst, etc.		
16	Sulfamic acid	Cleaning agent		
17	Oxalic acid	Used in plastics, printing and dyeing, medicine, etc.		
18	Melamine	Used in plastics, coatings, textiles, etc.		
19	Methyl Acetate	The main uses are resins, coatings, inks, paints, adhesives, organic solvents for the production of leather, polyurethane foam blowing agents, tin and so on.		

ANASCO GLOBAL TRADING CO.,LTD.

20	N-Butyl Acetate	Used in spray paint, artificial leather, film, nitrocellulose, gum and other solvents, as well as in the preparation of spices and drugs	
21	Methylene chloride	Used in manufacture safety film, polycarbonate, paint solvent, metal degreaser, aerosol spray agent, polyurethane foaming agent	
22	Trichloroisocyanuric acid	Used in sterilization and disinfection of drinking water, swimming pool water, industrial circulating water, sewage and other water quality	
23	Activated carbon	Used for gas separation and refining, gold extraction, water purification, food and beverage decolorization, etc	
24	Aluminium Sulphate	It is used as a precipitant for rosin sizing agent, wax lotion and other sizing materials, a flocculant in water treatment, a retention aid for foam fire extinguishers, and is used to produce alum and aluminum white	

ANASCO GLOBAL TRADING CO.,LTD.

25	Ammonium Acetate	Used as an analytical reagent, meat preservative, and also used in pharmaceuticals. It can also serve as a buffer and provide acetate ligands.	
26	Ascorbic Acid food grade	Used in the food industry, analytical chemistry, agriculture, forestry, animal husbandry, medicine, etc	
27	Calcium bromide liquid	Used for oil drilling, as well as for manufacturing ammonium bromide, photosensitive paper, fire extinguishing agents, refrigerants, etc.	
28	Caustic Soda	Used as an acid neutralizer, masking agent, precipitant, precipitation masking agent, color developer, saponification agent, peeling agent, detergent, etc	
29	Citric acid monohydrate	Used in the food and beverage industry as an acidifier, flavoring agent, preservative, and preservative. It is also used in the chemical industry, cosmetics industry, and washing industry	

ANASCO GLOBAL TRADING CO.,LTD.

30	D-glucose Monohydrate	Used in the food, beverage, pharmaceutical, and leather industries		
31	Dipotassium phosphate anhydrous	Corrosion inhibitors used as antifreeze agents, nutrient agents for antibiotic culture media, phosphorus and potassium regulators for fermentation industry, feed additives, etc.		
32	Ferric Ammonium Oxalate	Calcium and magnesium precipitants, electroplating industry		
33	Ferrous Sulfate	Used for making iron salts, iron oxide pigments, mordants, water purifiers, preservatives, disinfectants, etc		
34	Magnesium chloride	Inorganic raw materials are important in the chemical industry and can also be used in metallurgy, construction, machinery, pesticides, and other fields.		

ANASCO GLOBAL TRADING CO.,LTD.

35	Magnesium Sulphate	Used for building materials, pharmaceuticals, industry, agriculture	
36	Mono Propylene Glycol	Used for food additives, cosmetics, frozen liquids, etc	
37	Mono Sodium Glutamate	Making seasonings and the pharmaceutical industry	
38	Potassium Carbonate	Used in inorganic industry, medicine, printing and dyeing	
39	Potassium Sorbate food grade	Used for anti-corrosion of food, cosmetics, and feed	

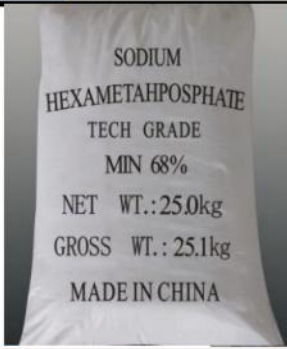

ANASCO GLOBAL TRADING CO.,LTD.

40	Sodium Acid Pyrophosphate food grade	Mainly used as a rapid fermentation agent, moisture retention agent, quality improver, for baked goods such as bread, biscuits, and meat.			
41	Sodium Bisulphite	Mainly used as a bleaching agent, preservative, antioxidant, and bacterial inhibitor			
42	Sodium bromide liquid	Used in the photosensitive industry, spice industry, printing and dyeing industry, etc			
43	Sodium Citrate	Used in medicine, food, beverage, electroplating, photography and other fields			
44	Sodium Formate	Used in the production of insurance powder, oxalic acid, and formic acid			

ANASCO GLOBAL TRADING CO.,LTD.

45	Sodium Gluconate	Used for steel, construction, cleaning, food additives, etc			
46	Sodium Hexametaphosphate SHMP	Mainly used in the food industry as a quality improver, pH regulator, metal ion chelating agent, adhesive, and expansion agent			
47	Sodium Metabisulphite food grade	Used in industry, printing and dyeing, electroplating, and food industry			
48	Sodium Silicate liquid	Used in manufacturing, washing, textile, etc			
49	Sodium Sulphite anhydrous	Used as a stabilizer for artificial fibers, fabric bleaching agent, photographic developer, dye bleaching deoxidizer, fragrance and dye reducing agent, lignin remover for papermaking, etc			

ANASCO GLOBAL TRADING CO.,LTD.

50	Sodium Thiosulphate	Used for medical and leather applications, etc	  
51	Sodium tripolyphosphate	Used as a moisture retention agent, quality improvement agent, pH regulator, and metal chelating agent	  
52	Sorbitol	Used in industries such as food, daily chemical, pharmaceutical, etc	  
53	Stannous sulfate	The main use is for tin plating or chemical reagents	  
54	Xanthan gum	Used for food, oil, medicine, etc
