Product name	Switch for automobile refitting		
Product Overview			
LED Light	Red	DC maximum voltage	30V
Product Polarity	SPST	DC minimum voltage	3V
Switching Function	ON-OFF	Maximum contact load	AC125V/10A, 12V/20A, 24V/10A
Number of Terminals	Five	Break load maximum contact	DC 1500V 1 minute
Condition with lights	Double Lights	Working Cycle	5 minute 1 time
Size	49.57*24.4*49mm	Life cycle no load	20000 times
Mounting Dimensions	37.2*21.2mm	Life cycle with load	10000 times
Weight	30g	Contact Material	Copper
Maximum Continuous Load	AC 125V/10A, 12V/20V, 24V/10A	Operating temperature	+30K
Maximum load and time	DC 12V/23A, 24V/11.5A	Protection level	IP66
Minimum current load	0	Material	Environmentally friendly materials
Application	1.Cars, motorcycles, buses, ships, RV, yachts and so can be used. 2.Control all kinds of electrical equipment in the car to open or close. 3.CE certified.		
Advantages	1.Ultra-luxury high-end automotive refitting switch, with LED working indicator. 2.CE certified quality, environmental protection and flame retardant material. 3.12-24V volt car for general use, suitable for refitting all the equipment in the control car. 4.Output short circuit protection, overload protection, polarity reverse protection, multiple protection.

Output: 30A

Material: PBT+PC

Terminal: M5

How it works: each fuse has a rating on the specification, when the current exceeds the rating will fuse. If a fuse is properly placed in the circuit, then the fuse will self-fuse and cut off the current when the current abnormally rises to a certain height and temperature, thus playing the role of protecting the safe operation of the circuit.

Application

High temperature resistance

Corrosion resistance

Environmentally friendly materials

Widely used on the car,suv,motor,homes,bus,yacht,ship,etc.

WATERPROOF CIRCUIT BREAKER

FUNCTION: Suitable for overload protection of the car audio / video system, avoiding excessive current, protect the electrical device, apply by connecting the audio power line, used in place of an in-line fuse holder. Manual open circuit push button, self-test and manual replacement, no fuse change problem.

OPEN CIRCUIT PROTECTION: When the current reaches the cut-off value, the long handle will automatically open to cut off the power supply. Generally, the short-circuit condition will jump out. After the fault is eliminated, press the long handle back to the original position to form a path.

MANUAL POWER OFF: We need to disconnect the circuit when refitting, directly press the elliptical red button on the fuse, then the long handle will automatically pop up to cut off the power supply. Connect the same as above, then press the long handle back to the original position.

YJ-WBS026-4

Product name	350A Battery Switch
Material	Copper+Plastic
Screw diameter	10mm
Operating current	350A /ON-OFF
Voltage	DC 32V
Function	Protect the power supply

YJ-WBS002

Product name	4-Speed Battery Switch
Material	Plastic
Size	140*140*85mm
Weight	600g
Continuous current	175A
Function	Protect the power supply

YJ-WBS001

Product name	250A Battery Switch
Temperature	-40° C~+60° C
Continuous current	250A
Function	Protect the power supply

YJ-WBS017

Product name	300A Battery Switch
Material	ABS+metal
Size	60*45mm
Operating current	300A
Voltage	DC 12-24V
Function	Protect the power supply

YJ-WBS021

Product name	300A Battery Switch
Material	Copper+Plastic
Screw diameter	10mm
Operating current	300A
Voltage	DC 32V
Function	Protect the power supply

YJ-WBS024 /-300

Product name	250A Battery Switch
Size	93.2*66.8mm
Screw diameter	10mm
Operating current	250A /300A
Voltage	DC 12-24V
Function	Protect the power supply

YJ-WBS020

Product name	250A Battery Switch
Material	Copper+metal
Screw diameter	10mm
Operating current	250A
Voltage	DC 12V
Function	Protect the power supply

YJ-WBS009-100/-200

Product name	100A Battery Switch
Material	Plastic+Copper
Screw diameter	8mm /10mm
Operating current	100A/200A
Voltage	DC 12-24V
Function	Protect the power supply

YJ-WBS009-100A/-200A

Product name	200A Battery Switch
Material	Plastic+Copper
Screw diameter	8mm/10mm
Operating current	100A/200A
Voltage	DC 12-24V
Function	Protect the power supply

YJ-WBS010

Product name	100A Battery Switch
Material	Plastic+Copper
Screw diameter	8mm /10mm
Operating current	100A
Voltage	DC 12-24V
Function	Protect the power supply

YJ-WBS027-275 Battery Switch

Wide Range of Use

OFF

ON

Description of goods

Size: 68*68*30mm	Rated current: 600A	Continuous current: 275Amps DC
Max voltage: 48V-60Volts DC	Dielectric strength: 1500VAC/1min	Screw diameter: 10mm

Application: this series of products are mainly used in automobile battery rotating switch power off. Battery-operated switches for automobiles. High-current full-car power-off rotary switch. A power-off switch for farm vehicles. This modified speed car combination switch. It can be used as the on/off key of all kinds of electrical equipment added inside and outside the car. Quick and easy to disconnect the battery, good quality, easy to install, easy to operate

YJ-WBS018

Battery Separator with Voltage (corrugated model)

Product name	140A Battery Switch with Volt
Size	66.5*66.5*52.2mm
Screw diameter	6mm
Operating current	140A
Voltage	DC12-24V
Function	Protect the power supply
Waterproof grade	IP67

YJ-WBS011

12V/140A Battery Isolator

Product name	140A Battery Switch
Size	68*68*52mm
Screw diameter	6mm
Operating current	140A
Voltage	DC12-24V
Function	Protect the power supply
Waterproof grade	IP67

YJ-WBS026-1

Product name	300A Battery Switch
Material	Copper+Plastic
Screw diameter	10mm
Operating current	300A
Voltage	DC 32V
Function	Protect the power supply

YJ-WBS035

Dual Battery Isolation Intelligent Controller

Product name	140A Battery Switch
Size	68*68*52mm
Screw diameter	6mm
Operating current	140A
Voltage	DC12-24V
Function	Protect the power supply
Waterproof grade	IP67
