Ultra-Sleek Design

The surface power track socket features a sleek, curved design, exuding elegance and sophistication with a mere thickness of 16.5mm. In contrast, the recessed mount power track features a super-slim 1.5mm profile, lying nearly flush with the surface to create a tidy and unobtrusive workspace. Whether installed in the kitchen, living room, or study room, it adds a touch of contemporary style to your home decor.

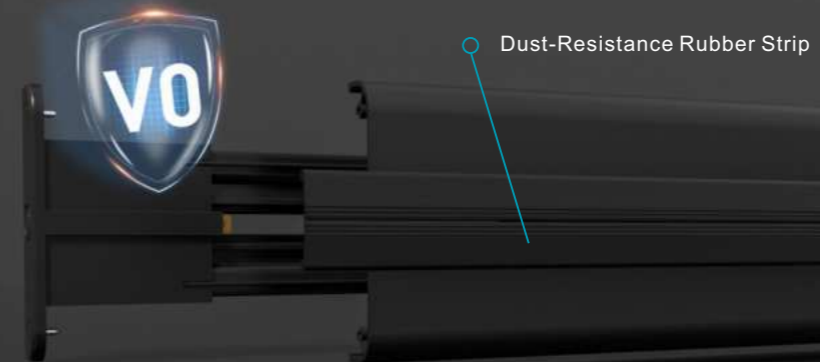

Advanced Functionality

Experience a new level of electrical safety at home with the advanced sliding power access. Simply rotate 90° clockwise to activate the power, offering enhanced convenience and safety. The design allows for power access at any point along the track, providing unmatched flexibility in your electrical usage.

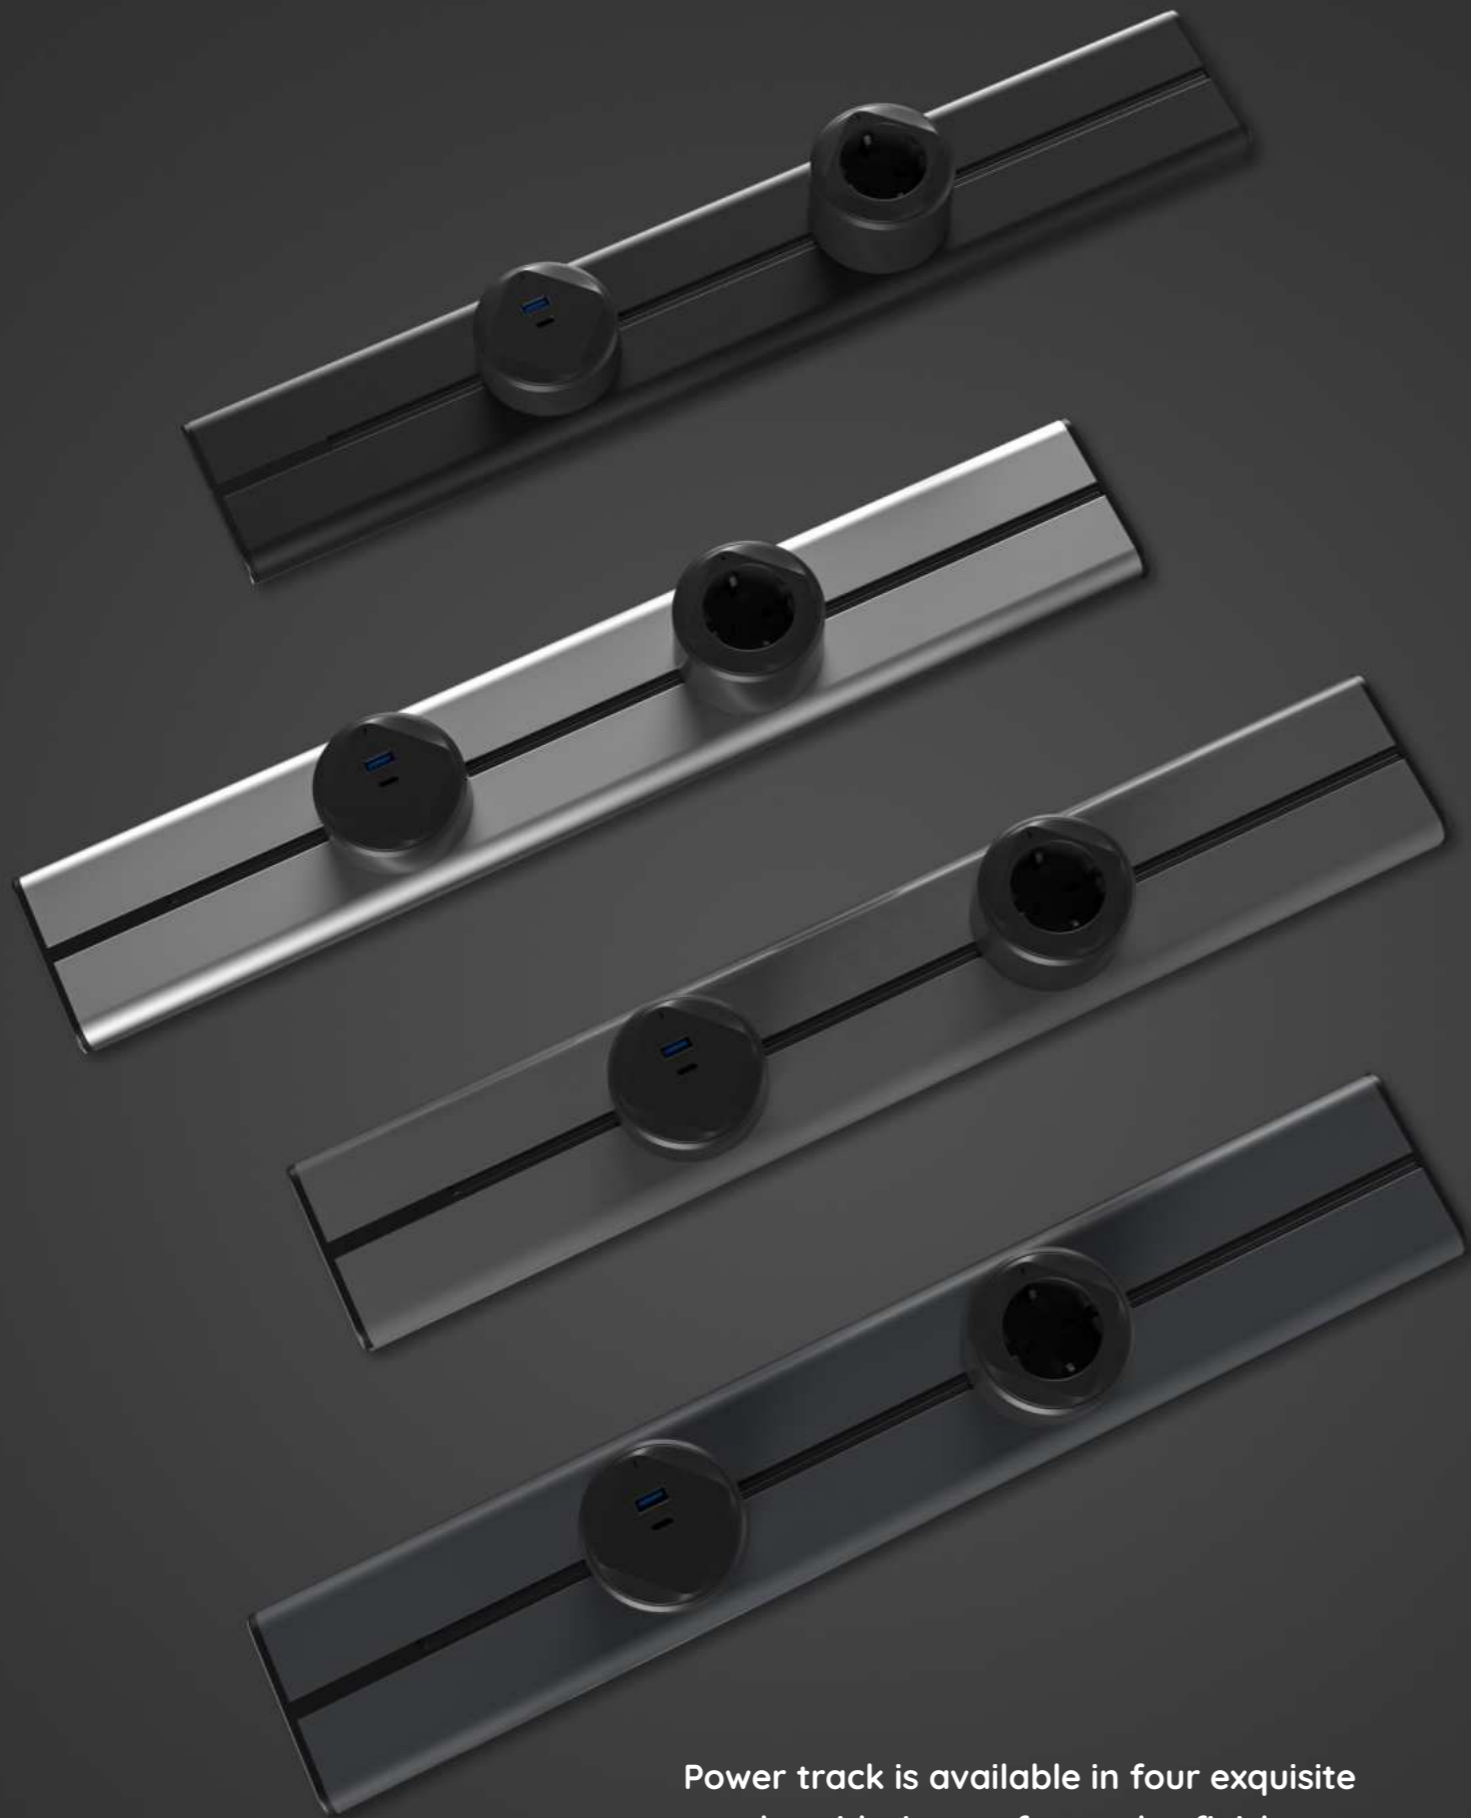

Ergonomic and Minimalist Aesthetics

Featuring a distinctive blend of a circular exterior and a square interior, this design aligns with ergonomic principles while showcasing minimalist elegance. The integrated rotary module enhances safety and reliability, perfectly complementing the streamlined aesthetics.

Comprehensive Protection

Enjoy unparalleled peace of mind with our multi-layered protection system. The casing is crafted from V0-grade flame-retardant PC material and incorporates concealed grooves for neutral and live wires. Additionally, the integrated rubber strip provides effective resistance against dust, ensuring maximum safety for you and your family.

Power track is available in four exquisite anode oxidation surface color finishes:

- Black
- Silver
- Gray
- Slate Gray

Surface Mount Power Track Specifications
