Magnet shower set, no need screws
DUSCHY PATENT: NO. 201720779204.9

Fitting instructions

If there are boreholes in the wall from an old shower rail, it is recommended to seal them by using silicone or similar (not included).

- Carefully clean the wall surface where the rail is to be attached. The surface must be dry.
- Use a pen to make a mark on the wall where the rail is to be attached. Use a spirit level if needed.
- Remove the protective paper from the adhesive tape on the backside of the shower rail (figure a).
- Make sure that the soap dish holder is at the bottom of the rail. Press the rail against the marked spot on the wall. Press firmly for at least 15 seconds along the entire rail. When the shower rail is mounted, it cannot be moved.
- Mount the slider from the top (figure b).
- Mount the soap dish at the bottom (figure c).

Please note that during the first 24 hours after installation, you should not place a handshower in the slider and not put any shampoo in the soap tray. Avoid exposing the rail to water during this time.
