

07 EW-03

CE FC RoHS

EW-03 beacon with an IP68 rating and long-lasting button cell battery that lasts over 3 years. Say goodbye to battery replacements and enjoy worry-free protection from water damage.

EW-03 Home Beacon equipped with temperature-sensing capabilities. This sleek and lightweight device is perfect for indoor positioning applications, whether you're looking to track the movements of residents in a nursing home or monitor the temperature in various rooms, our Bluetooth beacon can provide you with the precise data you need.

This beacon is not only highly accurate and convenient to use, but it also allows for easy tracking and monitoring through both an APP and PC interface. With just a few clicks, you can view the location, battery level, signal strength, and temperature data of each beacon, providing you with all the information you need to make informed decisions and optimize your operations.

The beacons provide indoor locations information for room-by-room statistics.
