GPS, Wi-Fi, Bluetooth, and cellular technologies work together to allow you to find and protect your pet, giving you the peace of mind you've always needed. With this you can set custom safe zones for your pet.  Also, the LED light to see your pet in the dark and will blink when lost.
## 1 Getting to know your device

### - Front

Status Indicator

## 2 - Back

Power Button

SIM Card Holder

Charging Contacts

## 3 Charging Base

### - Front

Charging LED

- The charging base does two things:
  1: Charge your tracker.
  2: Equipped with home beacon for indoor location. And maximizes tracker battery life when your pet is nearby.

## 4 - Back

USB connector

- It should always be plugged in, powered on, and placed within the boundary of your pet zone where your pets spend most of their time.
## 5 Accessories

| USB cable | User manual |
| --- | --- |
| Collar holder | Sim card helper |

## 6 Insert SIM Card

- Use the helper to take out back cover and insert a Nano SIM. Make sure the SIM card is activated with credits.
## 7 Charging your device

- The LED will show a red light when charging and turns to blue light when fully charged.

Charging → Fully charged

- Please fully charge the battery for at least 1 hour before using.
- When the battery level falls below 20%, it will send a low battery warning message to people on the contact list via text message or APP.

## 8 Switching on and off

- To turn ON– When the device is placed in the charging base, the device will automatically turn on. To converse battery life, the LED won't flash except when performing the actions.
- To turn OFF– Press and hold the power button for 10 seconds. The LED will flash rapidly for a few seconds and then LED off.

## 9 Attach the tracker to your pet's collar
