关于我们 About us

COMPANY INTRODUCTION

■ 公司简介

汇聚天然营养·优选核心科技·共享品质生活

Gather natural nutrition, optimize core technology, and share quality life

Our company is engaged in the purification and processing of plant active ingredients and applied to capsules, compressed tablets, liquid drops, food and drug dietary fiber application scenarios. The company integrates production, sales and services, and mainly focuses on plant extracts, active ingredient monomers, and plant raw powder. It is a professional company dedicated to the production of plant extracts.

本公司是从事植物有效成分提纯加工而应用到胶囊，压片，液体滴剂，食品药品膳食纤维应用场景的企业。本公司集生产销售服务于一体，以植物提取物、有效成分单体、植物生粉为主，是一家致力于植物提取物生产的专业公司。

Management Idea

经营理念

The company consists of R&D, production, marketing and other departments. The company's R&D center has advanced detection, experiment, and pilot equipment such as high-performance liquid chromatography, gas chromatography, and magnetic drive autoclave; the company's production workshop has a plant extraction production line. And dynamic countercurrent extraction, column separation technology, membrane separation technology, high-efficiency countercurrent extraction, microwave drying technology, spray drying technology and other advanced production equipment, strong technical force, annual output of 500 tons, complete product specifications, stable quality.

The company has a complete set of enterprise quality assurance system and implements strict quality control standards. And passed the ISO9001 international quality system certification. The quality management department is equipped with multiple sets (sets) of gas, liquid phase, ultraviolet and other advanced testing and experimental instruments, and has carried out a detailed division of labor for the three functions of process research, quality assurance and quality testing, and effectively and comprehensively monitor the details of the production process. Advanced quality control ensures the quality of products.

公司下设研发、生产、营销等多个部门，公司研发中心拥有多台高效液相色谱、气相色谱、磁力驱动高压釜等先进的检测、实验、中试设备；公司生产车间拥有植物提取生产线，以及动态逆流提取、柱分离技术、膜分离技术、高效逆流萃取、微波干燥技术、喷雾干燥技术等先进的生产设备，技术力量雄厚，年产量达500吨，产品规格齐全，品质稳定。

公司拥有一套完善的企业质量保证体系，执行严格的质量控制标准。并通过了ISO9001国际质量体系认证。质量管理部配备了多台（套）气体、液相、紫外等先进的检测和实验仪器，并对工艺研究、质量保证和质量检测三项职能进行了明细分工，对生产过程的细节进行有效全面的质量控制，确保了产品的品质。

Mission philosophy

使命理念

To provide customers with satisfactory products is our constant pursuit. The company has a strong experienced engineering and technical team and a young and promising management team. The price and good service have won the trust of users. Guangzhou New Power Pharmaceutical Technology (Guangzhou Shecome Biotechnology) wholeheartedly welcomes your cooperation.

为客户提供满意的产品，是我们始终不变的追求。公司拥有一支强大的经验丰富的工程技术队伍和年轻有为的管理团队，全体员工秉承诚信为先、质量为本的服务理念，坚持“进取求实严谨团结”的方针，以优质的产品、合理的价格、良好的服务，深得用户的信赖。广州新动力医药科技（广州她来了生物科技）竭诚欢迎您的合作。

■ 荣誉证书

Strict Raw Material Traceability System

严苛的原料溯源制度

Advanced R&D and Production technology

先进的研发生产技术

Gather Natural Nutrition

汇聚天然营养

In the selection of product raw materials, the company fully considers the natural environmental factors of raw material planting or breeding, and abides by a set of strict raw material traceability system. Scientifically select high-quality raw materials from all over the world, regard naturalness, safety and health as the first standard to measure product quality, and strictly control product quality from the source.

本公司在产品原料的甄选上充分考虑了原料种植或饲养的自然环境因素，恪守一套严苛的原料溯源制度。在全球范围内科学甄选优质原料，将天然、安全、健康作为衡量产品品质的第一标准，从源头严格控制产品品质。

Optimize Core Technology

优选核心科技

The company specially recruits senior scientific research personnel to engage in product research and development, and gathers a group of senior scientific research talents in the industry. This is a R & D team with high education, high quality, reasonable professional allocation, comprehensive technology and innovation.

At the same time, it also maintains a good in-depth cooperative relationship with many famous R&D laboratories and manufacturers around the world.

本公司专门聘请资深科研人员从事产品研发，汇聚行业内一众资深科研人才。这是一支具有高学历、高素质、专业配置合理、技术全面、锐意创新的研发队伍。同时还与全球诸多著名研发实验室、厂商保持着良好的深度合作关系。

OEM/ODM

Service Flow of Imported/exported Products

进口/出口流程

General Trade Customs Clearance Process

一般贸易清关

WE DEVOTED TO PROVIDING HIGH - QUALITY PRODUCTS, PERFECT SERVICE, FAST DELIVERY.

01 SOFTGEL 软胶囊

Fully automatic capsule drying equipment line; Having advanced production technology for vegetarian soft capsules.

全自动胶囊干燥设备线; 拥有先进的素食软胶囊生产技术。

02 CAPSULE&TABLET 硬胶囊&片剂

5 or more drug production lines; Can produce various dietary supplements for both vegetarian and halal food.

5条及以上药品生产线; 可生产素食和清真各类膳食补充剂。

03 POWDER 粉剂

Antioxidant powder 抗氧化粉

Probiotic powder 益生菌粉

Fruit and vegetable powder 果蔬粉

Weight loss meal replacement powder 减肥代餐粉

04 SPORTS NUTRITION 运动营养

CREATINE POWDER 肌酸

NMN

■ β-烟酰胺单核苷酸

The full name is β-nicotinamide mononucleotide, which is a naturally occurring biologically active nucleotide.

$C_{11}H_{15}N_2O_8$, NMN converted to NAD⁺, lack of NAD⁺ is closely related to multiple pathologies, including type 2 diabetes, obesity, heart failure, Alzheimer's disease, cerebral ischemia, beneficial liver fibrosis.

The world's largest biomedical literature database PubMed and Wikipedia and TCM famous works.

Origin: In 2013, David Sinclair, a professor at Harvard Medical School, discovered through experiments that NMN can be directly converted into NAD⁺, and reported in international authoritative scientific journals such as "Cell", "Nature" and "Science".

全称β-烟酰胺单核苷酸，是一种自然存在的具有生物活性核苷酸。

$C_{11}H_{15}N_2O_8$, NMN 转化为NAD⁺, 缺乏NAD⁺与多种病理密切相关，包括2型糖尿病，肥胖，心力衰竭，阿尔茨海默病，脑缺血，有益肝纤维。

全球最大的生物医学文献数据库PubMed及维基百科与中医名著利

源起：2013年，哈佛大学医学院教授大卫·辛克莱通过实验发现NMN能够直接转化为NAD⁺《Cell》、《Nature》和《Science》等国际权威科学期刊上报道

“

NMN对视神经有很好的保护作用，可以明显抑制视网膜脱落等病症的加重。NMN对于NAD+的补充和线粒体修复能力，能够保护卵母细胞质量，从而延缓女性的生殖衰老。

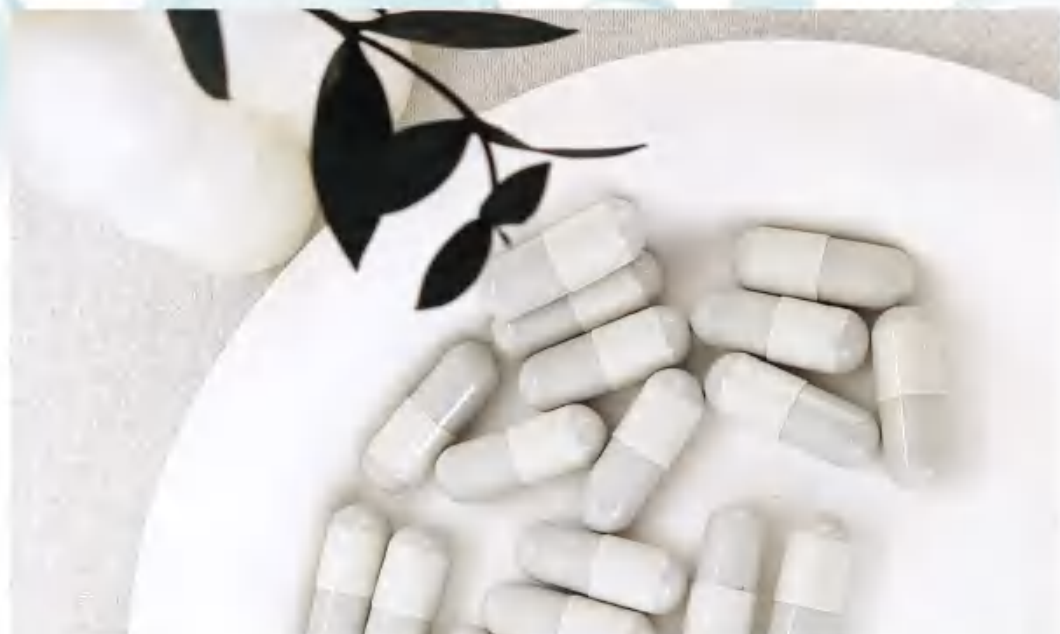

NMN has a good protective effect on the optic nerve, and can significantly inhibit the aggravation of retinal detachment and other diseases. NMN's ability to supplement NAD+ and repair mitochondria can protect the quality of oocytes, thereby delaying female reproductive aging.

Maca

■ 玛卡

Maca is the rhizome of the cruciferous plant *Maca maca*, also known as beetroot or Peruvian ginseng. It is native to the Andean plateau in South America. Its fleshy root is short conical and the outer skin is purple, cream or yellow. Experiments have proved that Maca can improve human sexual function parameters and enhance sexual behavior, but the mechanism of Maca improving sexual function has not yet been clarified. Maca is rich in alkaloids, arginine and fructose. Alkaloids can stimulate the reproductive system and increase the number of sperm, while arginine is an important component of amino acids in sperm, which can improve the activity of sperm.

玛卡是十字花科植物玛卡独行菜的根茎，又称甜菜根或秘鲁人参，原产于南美洲安第斯高原，其肉质根为短圆锥形，外表皮呈紫色、奶油色或黄色。已有实验证明玛卡能改善人的性功能参数，增强性行为，但玛卡改善性功能的作用机理尚未明确。玛卡中有丰富的生物碱、精氨酸和果糖。生物碱能刺激生殖系统，促使精子数量成倍增加，而精氨酸是精子中氨基酸的重要组成部分，能提高精子的活性。

Curcumin

■ 姜黄素

Turmeric is a commonly used medicine, and its main bioactive components are curcuminoids and volatile oil. The former has the effects of lowering blood fat, anticoagulation, anti-oxidation, choleric, and anti-cancer; while the latter mainly has anti-inflammatory, antibacterial, and cough-relieving effects. Curcuminoids exert their anti-cancer effects by inducing the differentiation of malignant tumor cells, inducing tumor cell apoptosis and inhibiting the various stages of tumor growth, and are widely used in clinical practice. Curcumin is a plant polyphenol extracted from turmeric, and it is also the most important active ingredient for turmeric to exert its pharmacological effects.

姜黄为常用药，其主要生物活性成分为姜黄素类和挥发油。前者具有降血脂、抗凝、抗氧化、利胆、抗癌等作用；而后者主要起抗炎、抗菌以及止咳作用。姜黄素类通过诱导恶性肿瘤细胞分化、诱导肿瘤细胞凋亡及对肿瘤生长各期的抑制效应来发挥其抗癌作用，临床应用十分广泛。

姜黄素是姜黄中提取的一种植物多酚，也是姜黄发挥药理作用最重要的活性成分。

Ashwagandha

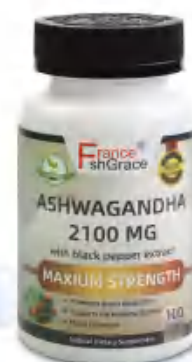

■ 南非醉茄

Ashwagandha, also known as Indian ginseng (Ashwagandha), also known as winter cherry, hypnotic nightshade. Although its scientific name is "Ashwagandha", it is actually an authentic medicinal material that is native to India and can be seen everywhere. Ashwagandha is recognized for its significant antioxidant capacity and immune-boosting properties. Additionally, ashwagandha has been used to induce sleep.

Ashwagandha contains alkaloids, steroidal lactones, ashwagandhalide and iron. Alkaloids have the functions of calming pain and lowering blood pressure. Ashwagandha has anti-inflammatory effects and can inhibit the growth of cancer cells. It can also be used for chronic Inflammation such as lupus and rheumatoid arthritis, reduce leucorrhea, improve sexual function, etc., and also help the recovery of chronic diseases.

南非醉茄，也称为印度人参（Ashwagandha），也有叫冬樱花，催眠睡茄。虽然其学名为“南非醉茄”，其实它却是印度土生土长且随处可见的地道药材。南非醉茄被公认拥有显著的抗氧化能力和增强免疫力的。此外，南非醉茄已被用于诱导睡眠。

南非醉茄内含生物碱、甾类内酯、南非醉茄内酯和铁，生物碱有镇静止痛、降血压的功能，醉茄内酯有消炎的作用可以抑制癌细胞生长，还可用于慢性发炎如狼疮及风湿性关节炎，减少白带，提高性功能等等，还有助于慢性疾病的康复。

Glutathione

■ 谷胱甘肽

Glutathione is an antioxidant in the body that is a natural enemy of free radicals.

It may really make you whiter, more beautiful, and younger, it is glutathione.

Glutathione, how important it is. Glutathione is an antioxidant that exists in the human body itself. It is a real free radical "harvester" that can reduce damage caused by oxidative stress. It is mainly composed of 3 amino acids: glutamine, cysteine and glutamate acid. The level of glutathione in the human body is affected by many factors, including diet, environmental toxins, stress response, etc. Its content will also decrease with age.

谷胱甘肽是一种体内的抗氧化剂，它是自由基的天敌。

它可能真的可以让你变白，变美，变年轻，它就是谷胱甘肽。

谷胱甘肽，有多重要。谷胱甘肽，是人体本身存在的抗氧化剂，是货真价实的自由基“收割机”，能减少氧化应激带来的损伤，主要由3种氨基酸组成：谷氨酰胺、半胱氨酸和谷氨酸。

人体内谷胱甘肽水平受多种因素影响，包括饮食、环境毒素、应激反应等，它的含量随着年龄的增长也会下降。

KETO

■ 生酮

The ketogenic diet is considered one of the most effective ways to lose weight quickly. In fact, this nutritional approach has a solid foundation for losing unwanted pounds and restoring health. As you can see, it may even improve cardiovascular health. The main purpose of this diet is to drastically reduce carbohydrate intake so the body starts using ketone bodies produced by the liver for energy. With lower glucose levels and changes in body energy, weight loss can be significant.

This condition was first identified in fasting people; initially, the ketogenic diet was used to treat epilepsy patients. Only recently have researchers started recommending it for weight loss.

生酮饮食法被认为是快速减肥最有效的方法之一。事实上，这种营养的方法有着坚实的基础，可以使人减掉多余的体重，恢复健康。正如你所看到的，它甚至可以改善心血管健康。这种饮食的主要目的是大幅度减少碳水化合物的摄入，因此身体会开始使用肝脏产生的酮体作为能量。随着葡萄糖水平的降低和机体能量的变化，体重就会显著下降。

这种情况最初是在禁食的人群中发现的；最初，生酮饮食法被用于治疗癫痫患者。直到最近，研究人员才开始推荐用它来减肥。

CoQ10

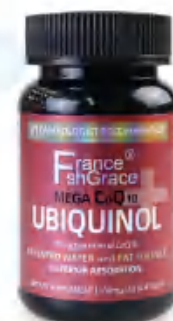

■ 辅酶Q10

Coenzyme Q10 (CoQ10, also known as coenzyme Q10) is a benzoquinone compound (similar in structure to vitamin K), which was first isolated from beef heart mitochondria in 1957 by Frederick Crane in Wisconsin, USA. The identification and synthesis of the chemical structure was completed in 1958.

Coenzyme Q10 is an important intermediary role in the mitochondrial electron transport chain, mainly involved in the synthesis of adenosine triphosphate (ATP), which provides energy for muscle contraction and other important cellular functions, so it can affect all cells, especially those with high energy requirements, such as The heart, lungs, liver, kidneys, spleen, pancreas and adrenal glands are extremely important for health.

辅酶Q10 (CoQ10, 又称辅酵素Q10) 是一种苯醌类化合物 (结构类似于维生素K), 于1957年由美国威斯康辛州的Frederick Crane首次从牛心线粒体中分离出来。化学结构的鉴定和合成于1958年完成。

辅酶Q10是粒线体电子传递链的重要中介角色, 主要参与三磷酸腺苷 (ATP) 合成, ATP为肌肉收缩和其他重要的细胞功能提供能量, 因此能影响所有细胞, 特别是高能量需求的细胞, 如心脏, 肺, 肝, 肾, 脾, 胰腺和肾上腺, 对于健康极为重要。

Fish oil

■ 深海鱼油

Omega-3 fatty acids belong to polyunsaturated fatty acids in unsaturated fatty acids, which can reduce blood lipids and prevent thrombosis. While unsaturated fatty acids lower cholesterol, triglycerides, and low-density lipoproteins, high-density lipoproteins are also reduced. Unsaturated fatty acids are prone to lipid peroxidation, thus producing free radicals and activated oxygen, which may cause certain damage to cells and tissues. In addition, omega-3 polyunsaturated fatty acids can also inhibit immune function. Omega-3 fatty acids are extremely important for the health of the nervous and cardiovascular systems, can improve cognitive performance, and reduce the incidence of heart disease, stroke and cancer.

omega-3脂肪酸属于不饱和脂肪酸中的多不饱和脂肪酸，它具有降低血脂、预防血栓形成的作用。不饱和脂肪酸在降胆固醇、甘油三酯、低密度脂蛋白的同时，高密度脂蛋白也降低。不饱和脂肪酸易产生脂质过氧化的反应，因而产生自由基和活化氧等物质，对细胞和组织可能造成一定的损伤，此外，omega-3多不饱和脂肪酸还有抑制免疫功能的作用。

Omega-3脂肪酸对神经及心血管系统的健康极为重要，能提高认知能力，降低心脏病、中风和癌症的发病率。

Fish Oil Omega-3 Series

Fish oil is a kind of nutrient extracted from fish fat. The main component of fish oil is unsaturated fatty acid, which can regulate blood lipid and reduce cholesterol and triglyceride.

鱼油是从鱼类脂肪中提取的一种营养物质，鱼油里的主要成分是不饱和脂肪酸，能够调节血脂，可以减少胆固醇、甘油三酯。

Lutein

■ 叶黄素

Lutein is one of the carotenoids in the pigments of the human eyeball (macula and retina), similar to β -carotene and vitamin A. Also considered the "vitamin of the eyes," it is used to prevent eye diseases such as degenerative macular degeneration, cataracts, and retinitis pigmentosa.

In daily life, when our eyes are exposed to light, they can be adjusted by the eyes. However, blue light can penetrate to the fundus, to the retina and macula. Lutein has the effect of anti-blue light, which can protect eye tissue from damage.

Broccoli, spinach, kale, corn, bell peppers, kiwi fruit, grapes, orange juice, zucchini, pumpkin, etc. are common foods rich in lutein.

叶黄素 (Lutein) 是人类眼球 (黄斑部与视网膜) 色素组成的类胡萝卜素之一, 与 β -胡萝卜素及维生素A类似。也被认为是“眼睛的维生素”, 被用来预防退化性黄斑部病变、白内障以及视网膜色素病变等眼部疾病。

日常生活中我们眼睛受到光线照射时, 能被眼睛调节, 然而蓝光却可穿透至眼底, 直至视网膜和黄斑部。叶黄素则有抗蓝光的作用, 可保护眼睛组织免于伤害。

绿花椰菜、菠菜、羽衣甘蓝、玉米、甜椒、奇异果、葡萄、柳橙汁、西葫芦、南瓜等, 都是生活中常见且富含叶黄素的食物。

Collagen

■ 胶原蛋白

Collagen peptide is a kind of small molecule collagen that is easier to be absorbed by scientists. It is a small molecule peptide formed after collagen is treated with artificial protease. The relative molecular mass is several hundred to several thousand, and it is not cut by the small intestine. Direct absorption, the human body can be effectively absorbed and utilized after consumption, and the absorption rate can reach 90% or more, which has higher efficacy than collagen. Collagen peptides can enhance the activity of antioxidant enzymes such as superoxide dismutase and catalase, and reduce the level of lipid peroxidation product malondialdehyde.

胶原蛋白肽是科学家经过研究证实更容易被人吸收的一种小分子胶原蛋白，是胶原蛋白经过了人工蛋白酶处理以后形成的小分子多肽，相对分子质量为几百至几千，不被小肠切割直接吸收，人体食用后能够被有效的吸收利用，吸收率可达到90%甚至以上，相对于胶原蛋白，具有更高的功效。胶原蛋白肽能够增强超氧化物歧化酶、过氧化氢酶等抗氧化酶的活性，降低脂质过氧化产物丙二醛的水平。

Vitamin B C D E

■ 维生素

Vitamins are also known as vitamins. Generally speaking, they are life-sustaining substances. They are a type of organic substances necessary to maintain human life activities, and are also important active substances to maintain human health.

Vitamins are present in small amounts in the body, but they are essential. Vitamins are certain small amounts of organic compounds necessary for the nutrition and growth of humans and animals, and play an extremely important role in the metabolism, growth, development and health of the body. If there is a long-term lack of certain vitamins, it will cause physiological dysfunction and certain diseases. Generally obtained from food. There are dozens of kinds found at this stage, such as vitamin A, vitamin B, vitamin C and so on. 维生素又名维他命，通俗来讲，即维持生命的物质，是维持人体生命活动必需的一类有机物质，也是保持人体健康的重要活性物质。

维生素在体内的含量很少，但不可或缺。维生素是人和动物营养、生长所必需的某些少量有机化合物，对机体的新陈代谢、生长、发育、健康有极重要作用。如果长期缺乏某种维生素，就会引起生理机能障碍而发生某种疾病。一般由食物中取得。现阶段发现的有几十种，如维生素A、维生素B、维生素C等。

Chondroitin

■ 软骨素

Chondroitin generally refers to chondroitin sulfate, also known as Kangdeling, which is a white or light yellow amorphous powder chemical.

It is mainly used in arthritis, eye drops, etc. It has the effect of relieving pain and promoting cartilage regeneration. It has a certain effect on improving senile degenerative arthritis and rheumatoid arthritis, and can improve joint problems. It has been proven that chondroitin can supplement the soft tissue structure of joints through oral administration. Clinically, taking chondroitin can effectively relieve the pain and inflammation of arthritis, and at the same time, it has the effect of delaying joint aging.

软骨素一般指硫酸软骨素，别名康得灵，是一种白色或淡黄色非晶形粉末的化学品。

主要应用于关节炎、滴眼液等，具有止痛，促进软骨再生的功效，对改善老年退行性关节炎、风湿性关节炎有一定的效果，可以改善关节问题。软骨素已被证实可经由口服而达到补充关节软组织结构的效果，临床上服用软骨素可以有效的纾解关节炎的疼痛及发炎现象，同时具有延缓关节老化的作用。
