

Hangzhou Jiayun
Import and Export
Co., Ltd.

公司简介 Company Profile

Our affiliated factory, Hangzhou Hongbo Machinery Manufacturing Co., Ltd., was established in 2015. To further expand into overseas markets, we founded Hangzhou Jiayun Import and Export Co., Ltd., which is an integrated industrial and trade enterprise.

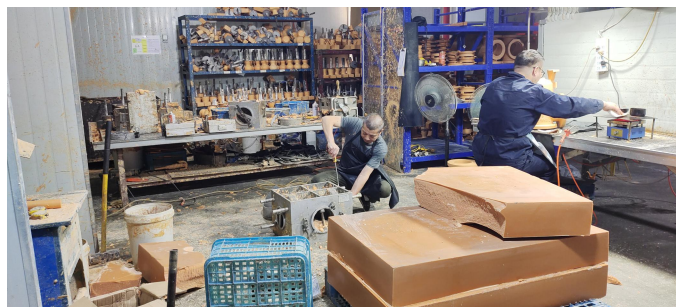

Our enterprise specializes in producing precision steel castings for materials such as carbon steel, stainless steel, duplex steel, and alloy steel series. We consistently adhere to the principle of quality assurance and prioritize customer satisfaction.

Our company focuses on producing precision steel castings, with an annual supply capacity of over 5,000 tons of precision castings and various finished cast products. We have two production lines for low-temperature wax and medium-temperature wax to meet the casting needs of different customers. Our products have a wide range of applications, covering almost all applicable fields in the equipment manufacturing and machinery manufacturing processing industries. Our products are mainly used in wear-resistant pumps, alkaline pump series, automobiles and trucks, engineering machinery, mining machinery, forklifts, agricultural machinery, ships, petroleum machinery, construction, pump valves, electromechanical equipment, hardware tools, electrical equipment, and other industries.

Additionally, our company possesses advanced testing equipment, including spectrographic analyzers, to ensure that the material composition meets customer requirements. We are also equipped with heat treatment furnaces to guarantee the mechanical properties of our products.

With exceptional quality and outstanding service, we look forward to collaborating with you for mutual development and shared success. We eagerly anticipate your cooperation.

理化分析检验 Physical and Chemical Analysis and Inspection

We possess professional testing equipment such as spectrographic analyzers, tensile strength testers, bench microscopes, portable microscopes, Shore hardness testers, and Brinell hardness testers. Whether it's hardness, metallography, tensile strength, or raw material composition, we can ensure that they meet your requirements.

We fully customize our production according to the materials, process technology, quality, and other requirements provided by customers. Additionally, based on customers' requirements for the performance and applications of the components, we provide ODM development services, offering a one-stop service that includes product research and development, design, production, and delivery.

达成合作的流程 The process of achieving cooperation

Looking forward to cooperating with you.
