挖掘机支重轮 TRACK ROLLER

单、双法兰的支重轮适合于从3T至200T的履带式挖掘机和推土机等特种机械，在卡特、小松、日立、神钢、现代等公司的推土机、挖掘机上都得到广泛的应用；
双圆锥式密封和终生润滑设计，使得托支重轮在任何工作条件下都具有较长的寿命和完美的使用性能；
热锻造处理制造的轮壳获得卓越的内部材质纤维流分布结构；
差动式淬火或通过式淬火热处理，保证一定的热处理硬化深度，起到良好的抗裂功效。

推土机支重轮 TRACK ROLLER

Single Flange TRACK ROLLER and Double Flange Carrier Roller is applicable to special model of crawler type EXCAVATORS and BULLDOZERS from 3T to 200T. It is widely applied in BULLDOZERS and Excavator of CATERPILLAR, KOMATSU, HITACHI, KOBELCO, HYUNDAI and etc;
The design of Double-Cone Sealing and Lubrications for life makes the TRACK ROLLER long life and perfect performance under any working condition;
Hot Forging Roller Shell gains distinguishing inner material fiber flow distribution architecture;
Differential-Type Hardening and Through-Type Hardening assure the depth under Heat Treating and the crack controlling.

Having wide choice range, the idler is applicable to special model of crawler type excavators and bulldozer from 3T to 200T. It is widely applied in bulldozers and excavators of Caterpillar, Komatsu, Hitachi, Kobelco and Hyundai etc.
Have different manufacturing technology, like casting and welding.
Use precision processing technology and special heat treatment technique to reach best wear-resistance and have maximum extent loading capacity as well as anti-cracking.
