2021.08.25

1. Equipment installation requirements

- 1. The equipment needs to be installed on a flat, solid ground
- 2 Installation environment requirements
- Power requirements: A power supply with a ground wire that meets the standard requires that
- the zero-ground voltage be less than 3V
- Space requirement: The minimum distance between the back cover of the equipment and the
- wall or cabinet must be greater than 30cm, and the minimum distance
- between the right side of the equipment and the wall or cabinet should be
- able to fully open the front door.
- Temperature requirements: when the temperature is below 0 degrees Celsius, please drain the
- water inside the machine and turn off the power of the machine
- Network requirements: Support 2.4Ghz wifi signal, not support 5Ghz wifi signal
- Water supply requirements: Must be pure water, tap water must not be used

2. Material installation and requirements

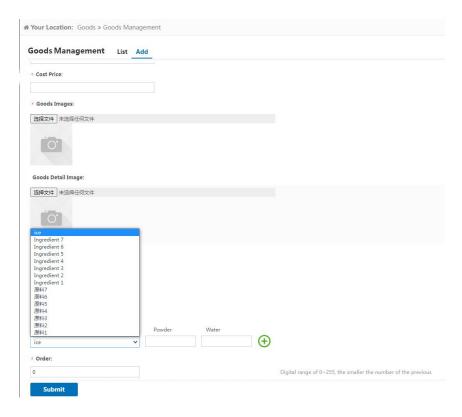

- 1. Open the material carton and check the material list
- 2. Refer to the following pictures and texts to install the material components in the corresponding position
- 3. Add the corresponding raw materials to the material box
- 4. After the powder is assembled, rotate the discharge nozzle 180 degrees so that the discharge nozzle opening faces down
 - 5. Check the coffee bean crusher powder quantity coarse and fine setting knob

2.2.1. Structure introduction

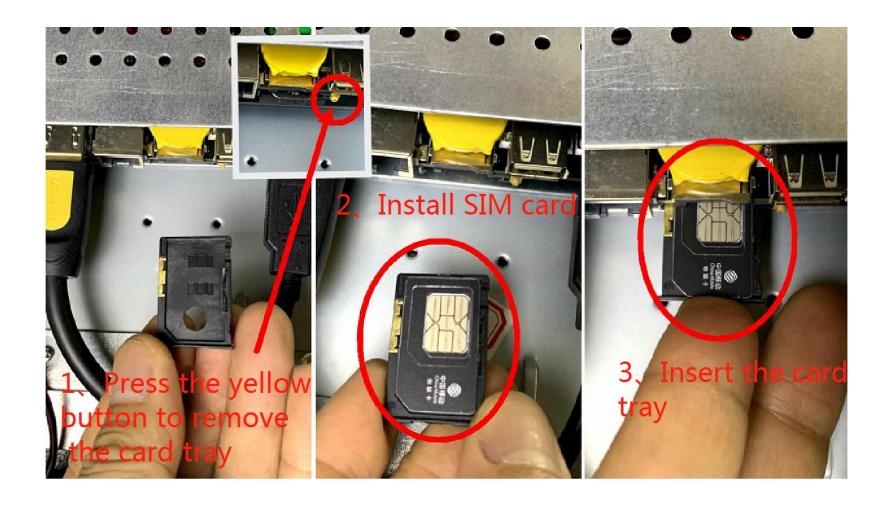

2.2.2. Correspondence between the powder box number and the pipe number in the product formula

The powder box number on the left corresponds to the pipe number in the product formula. For example, powder box 1 corresponds to "Ingredient 1", powder box 2 corresponds to "Ingredient 2", etc.

2.2.3, SIM card installation method

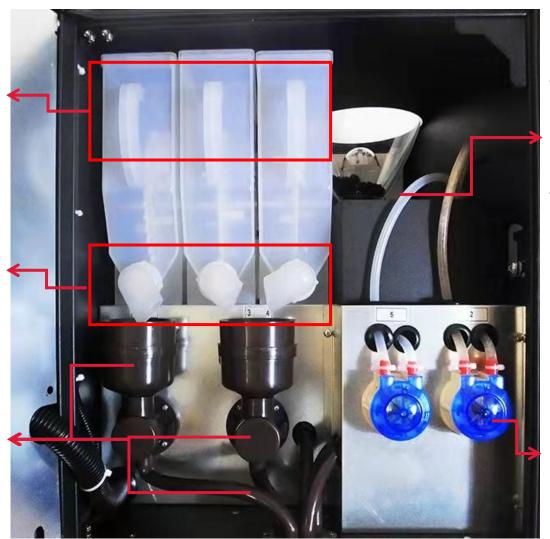

2.2.4. Operation and maintenance requirements

The powder box is recommended to be cleaned with warm water every two months, and then refilled with raw materials after drying

Discharge nozzle, when need to replenish raw materials, need to rotate the discharge nozzle upward

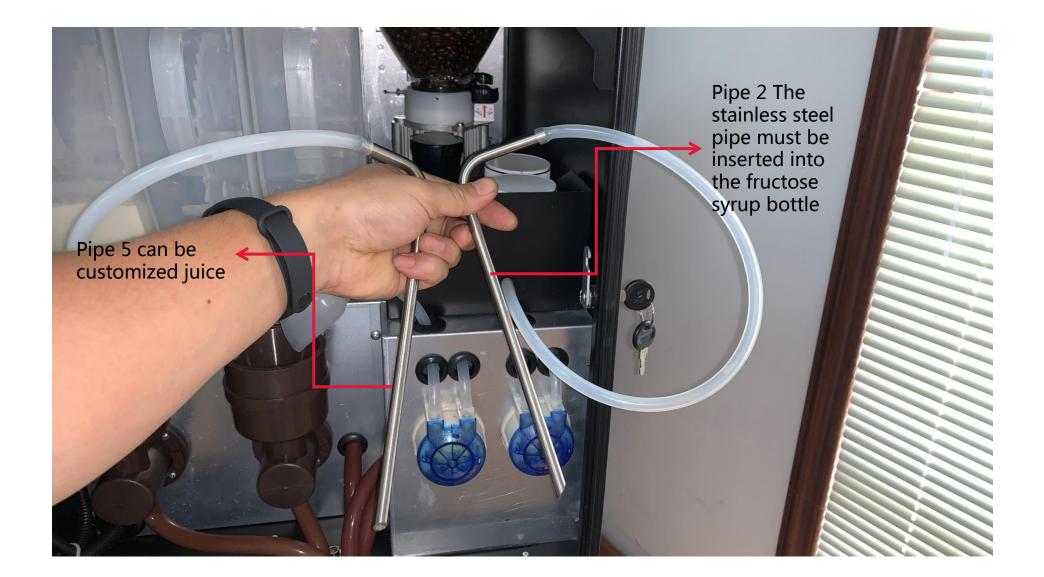

Mixing components and water outlet pipes need to be disassembled and cleaned with warm water every week

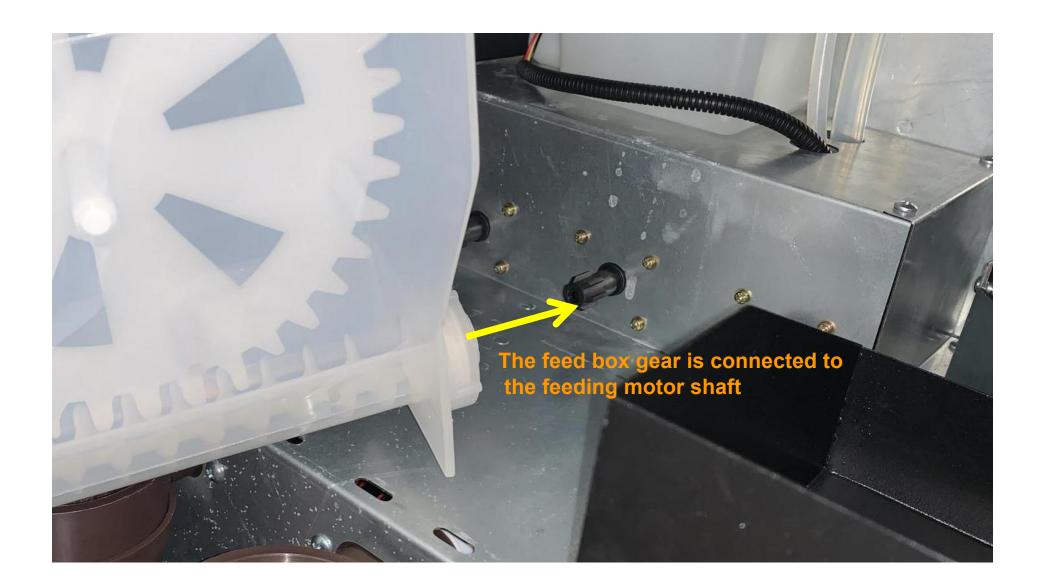

Silicone tube, connected to fructose. It is recommended to replace fructose with hot water before the long-term shutdown, make sugary drinks repeatedly, and rinse the pipe with hot water to prevent sugar from crystallizing in the pipe

Peristaltic pump

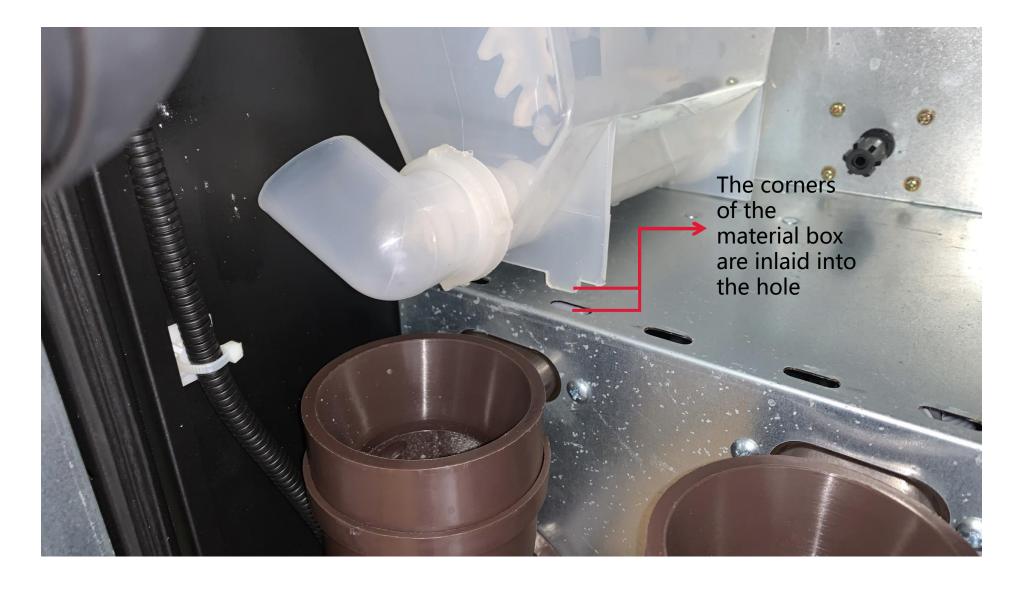

2.2.5. The use of peristaltic pump

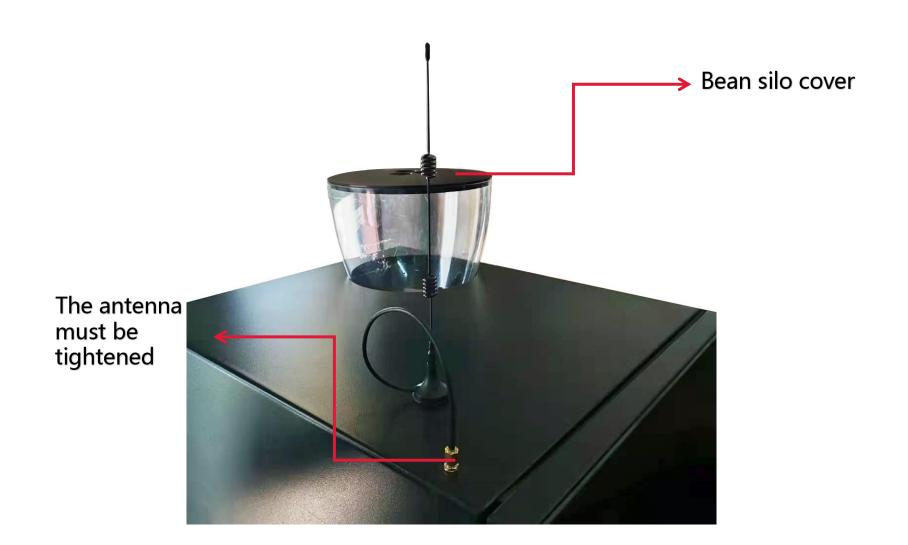

2.2.6. The installation of the material box (1)

2.2.6. The installation of the material box (2)

2.2.7. Install the antenna

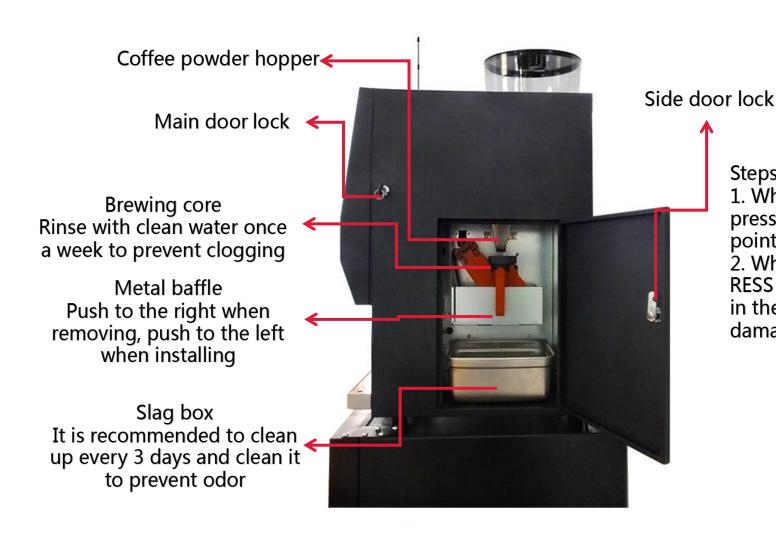

2.2.8, Introduction of Fresh Grinders

2.2.9. Coffee powder amount and powder diameter

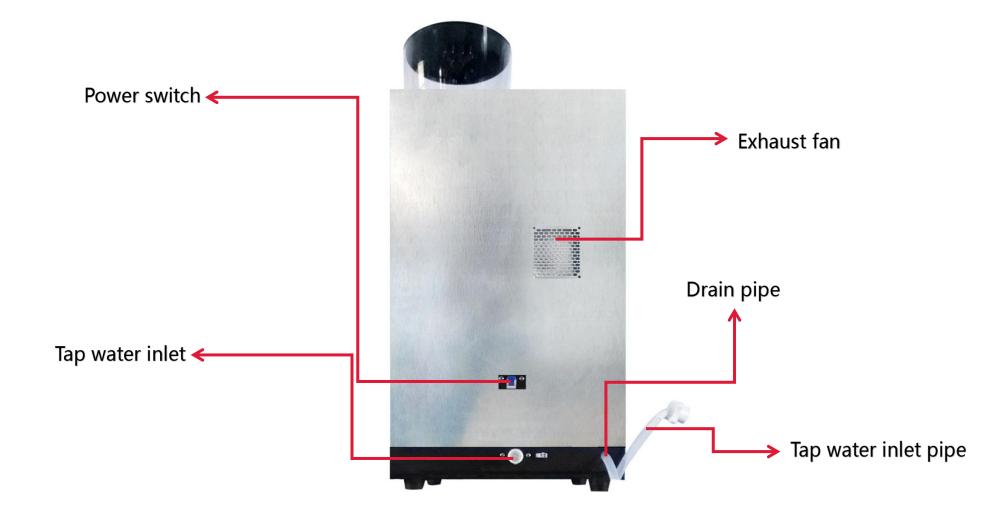

2.2.10. Brewing core operation and maintenance requirements

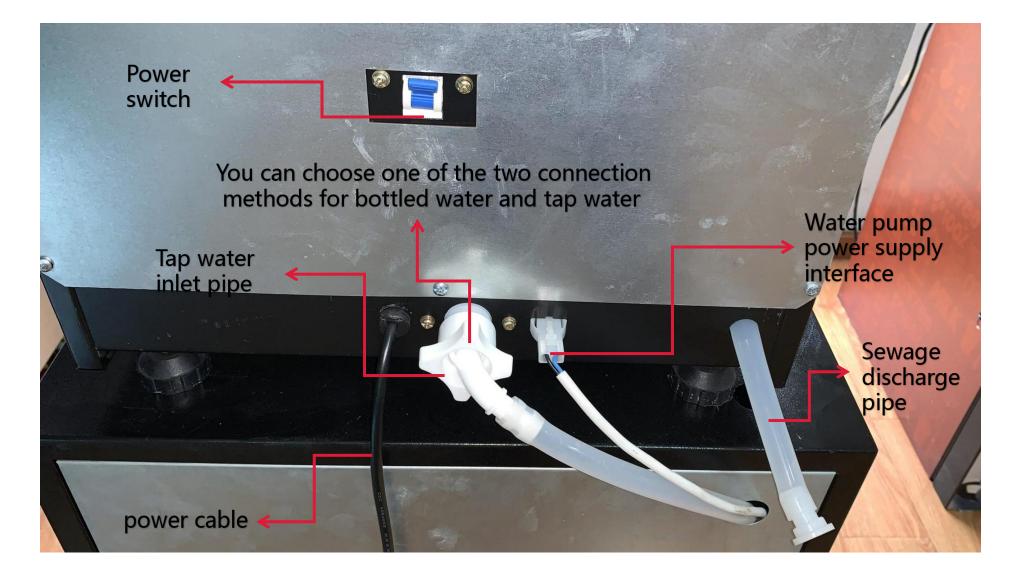

Steps to disassemble the brewing core
1. When disassembling, hold the handle, press the PRESS switch with the female pointing downwards and pull out
2. When installing, you must press the RESS switch with your thumb down to push in the brewing core, otherwise it will cause damage to the brewing core

2.2.11. Introduction to the back cover structure (1)

2.2.12. Introduction to the back cover structure (2)

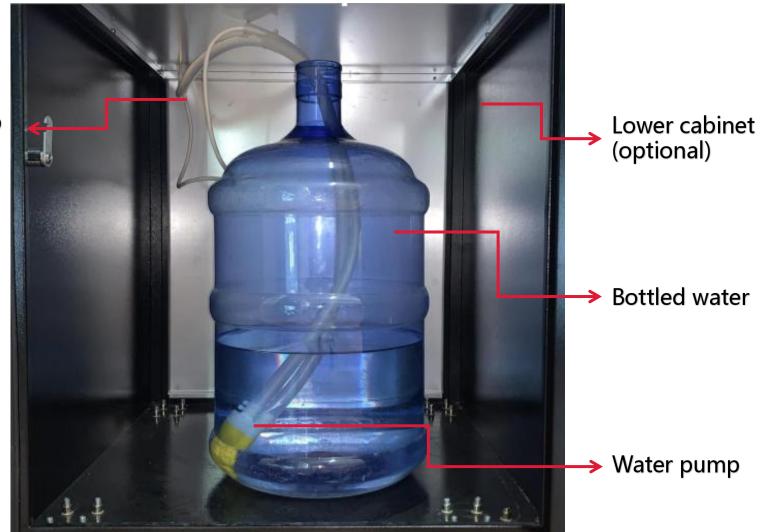

2.2.13, Bottled water connection method

Water pump power cord

Precautions:

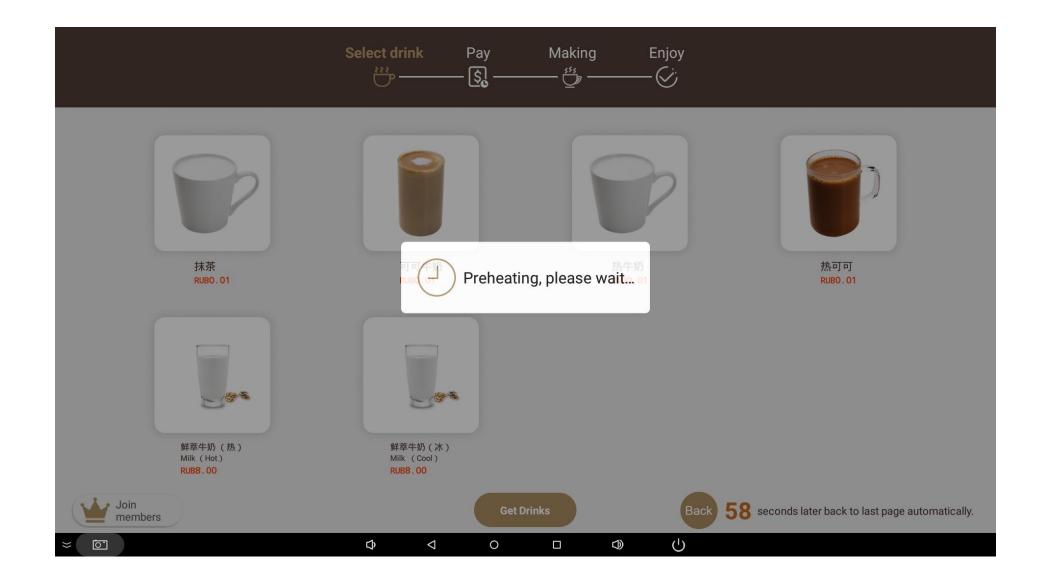

- 1. Bottled water must be assembled before starting up
- 2. The pump must sink to the bottom of the barrel
- 3. The pipe cannot be bent

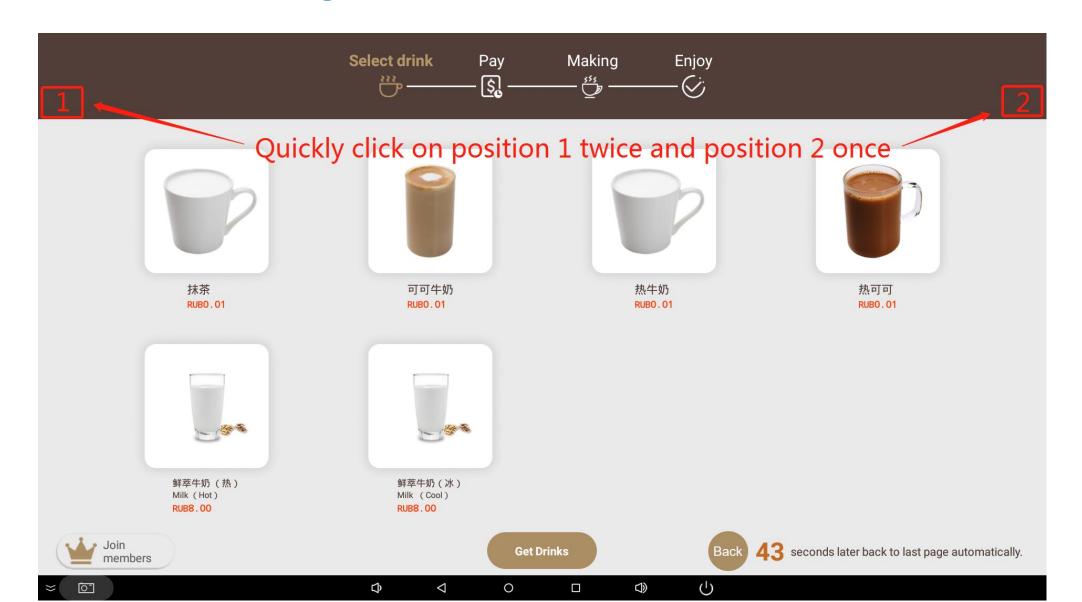

3, software interface

- 1. Switch account
- 2. Related settings and records
- 3. Order introduction

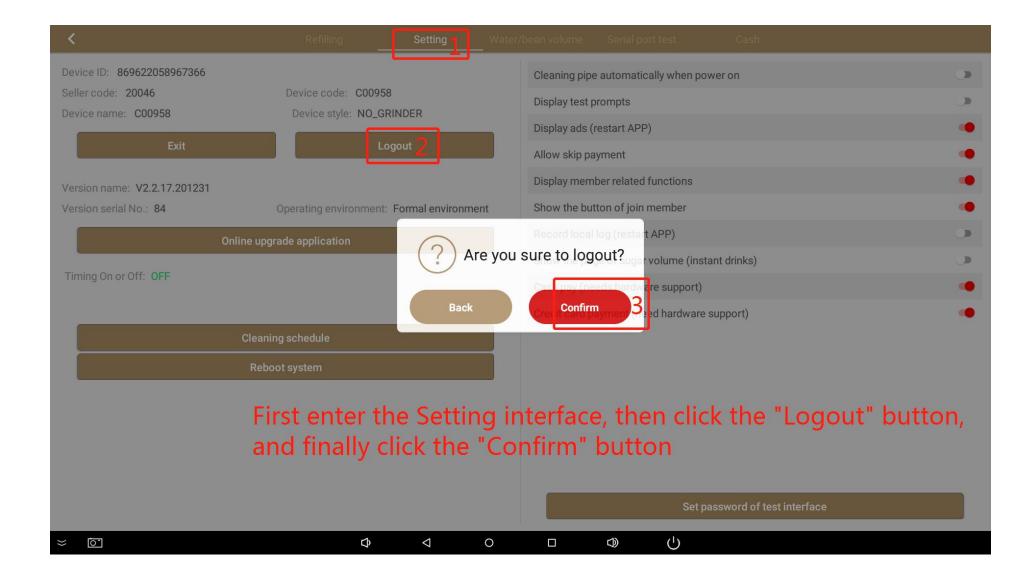

3.1.1. The water in the water tank is heated

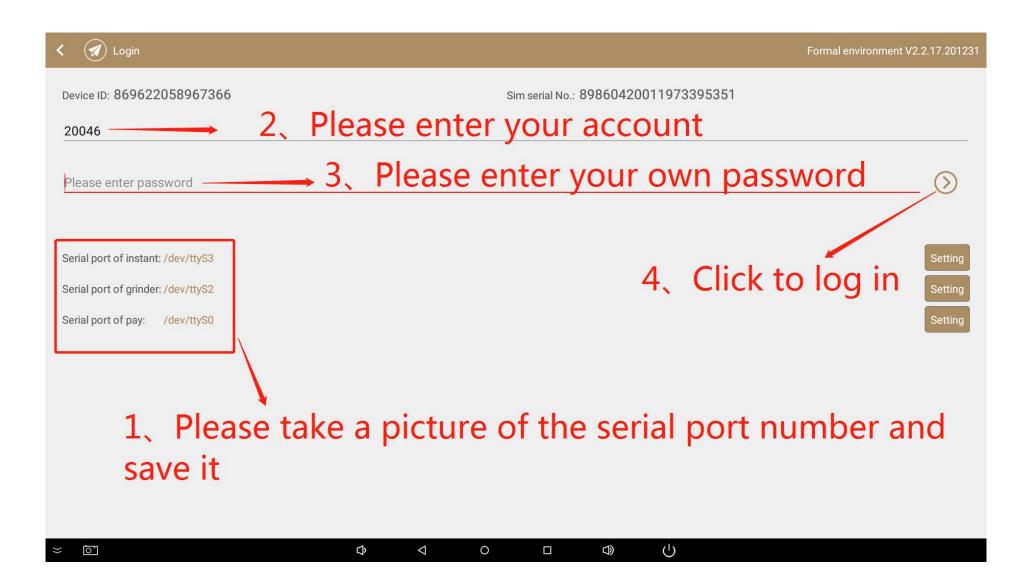

3.1.2.1. Switch login account

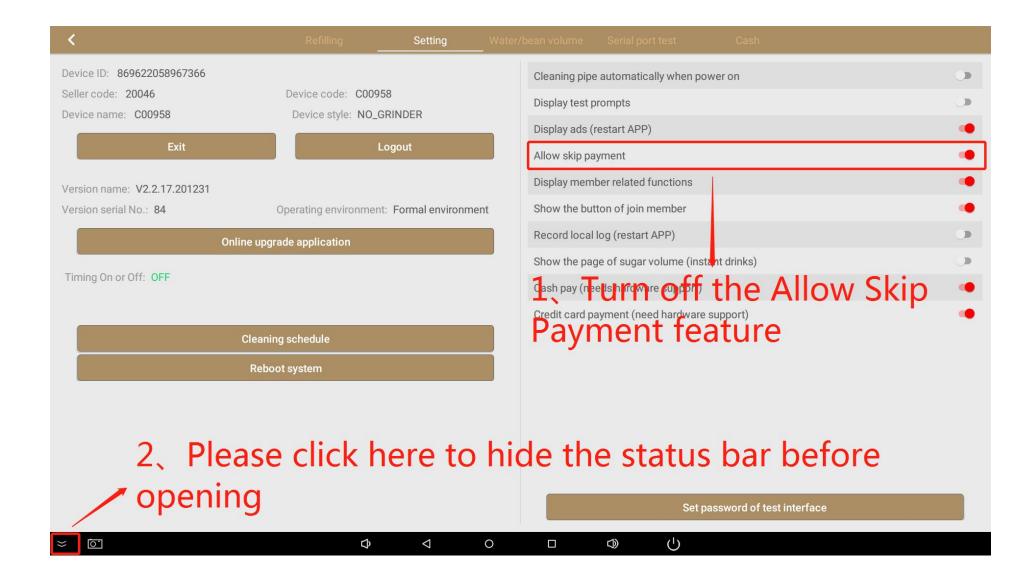

3.1.2.2. Switch login account

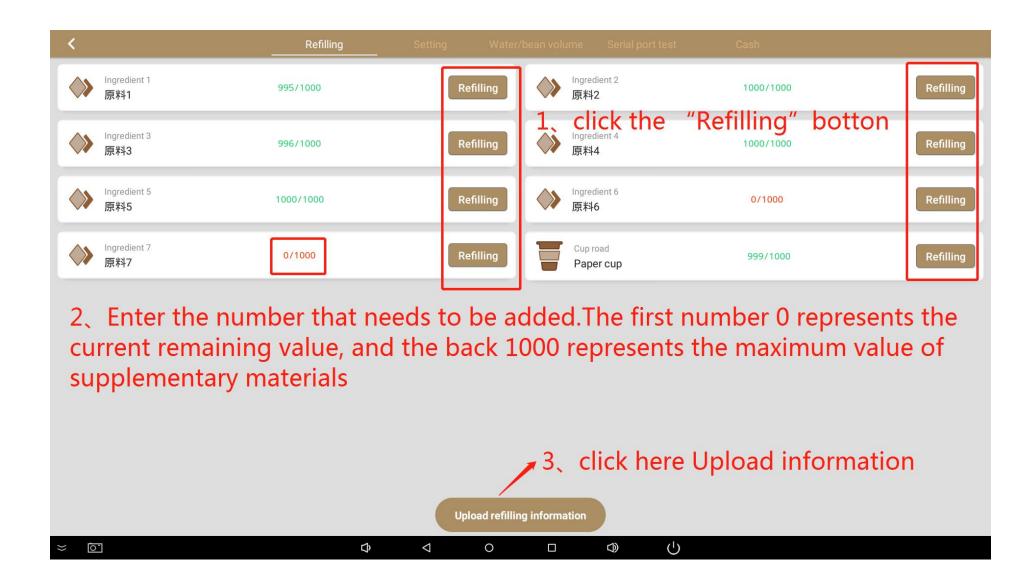

3.1.2.3. Switch login account

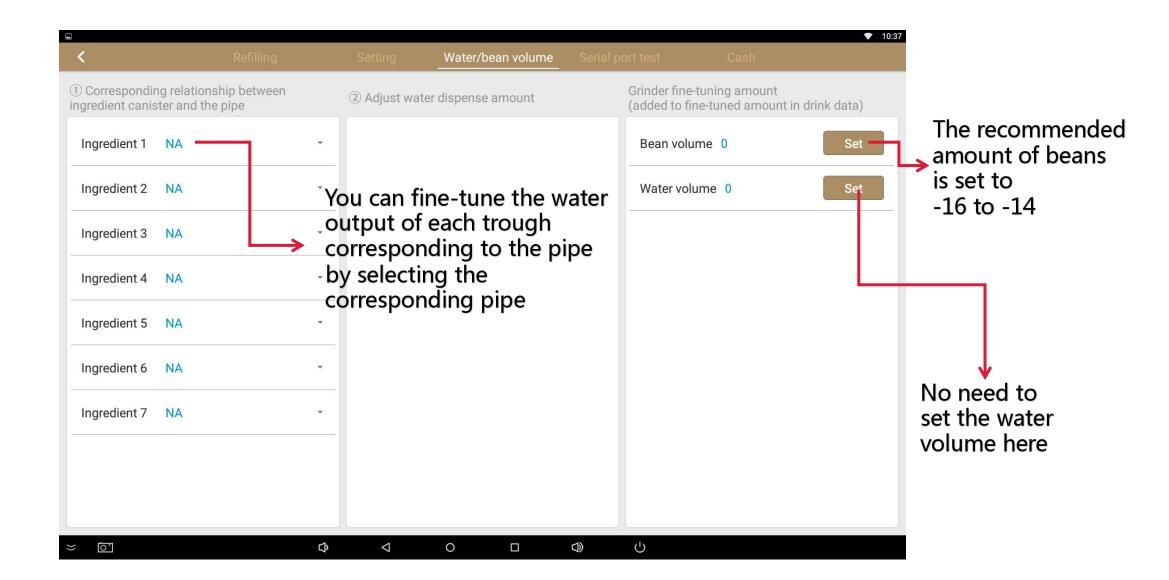

3.2.1, Function setting

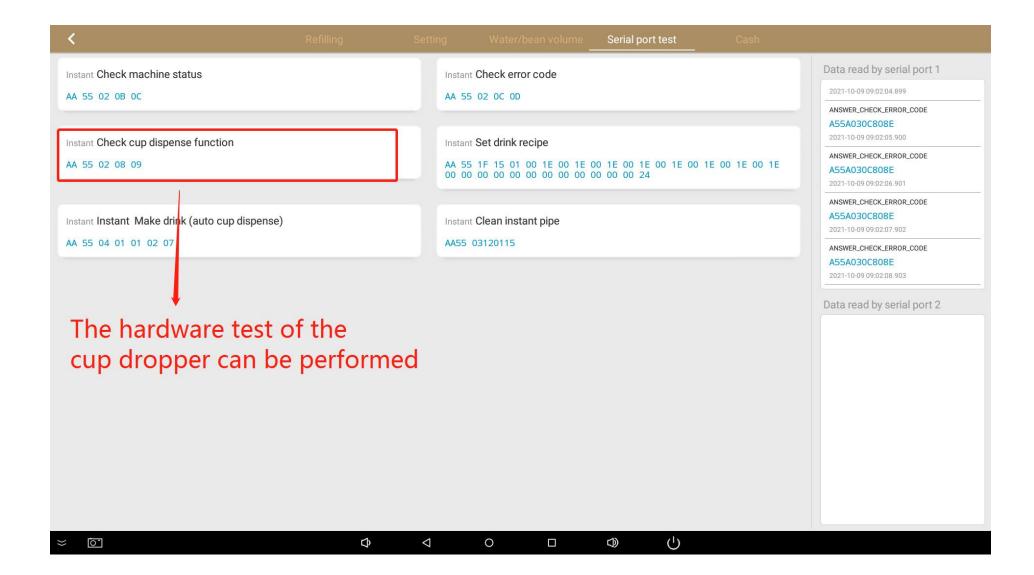

3.2.2. Material quantity supplement setting

3.2.3. Water volume and bean volume settings

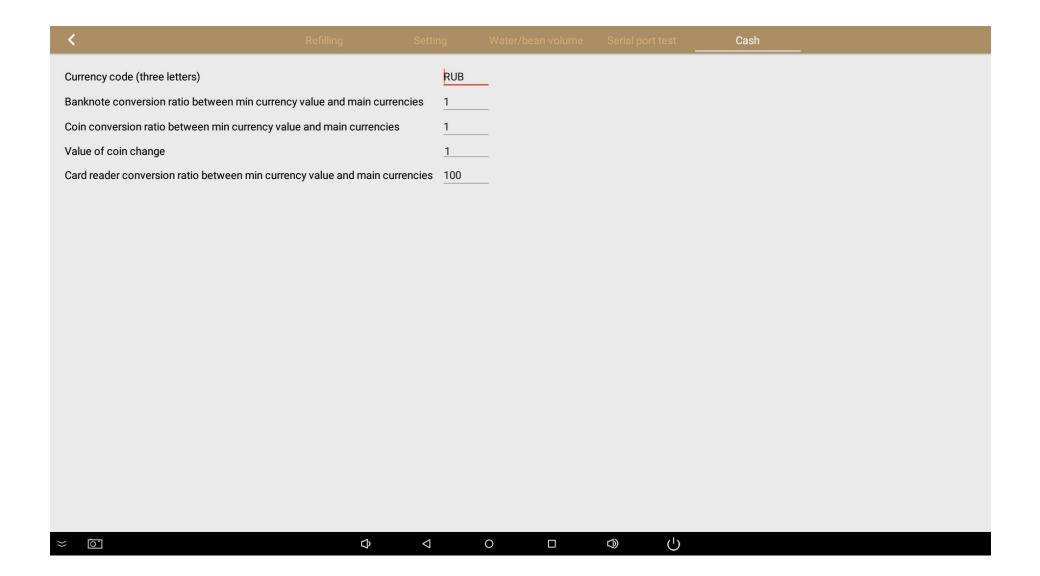

3.2.4, Serial test

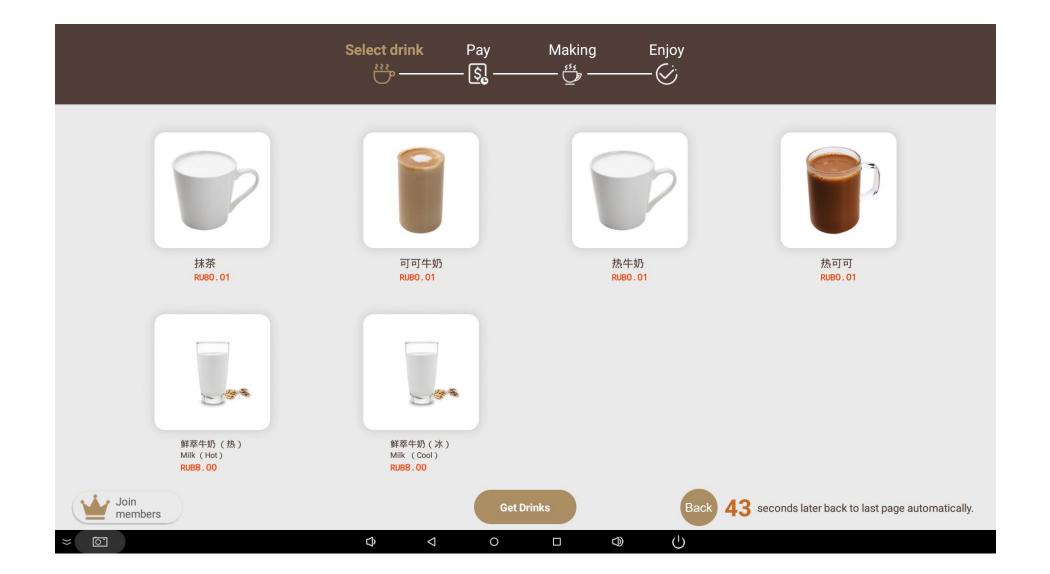

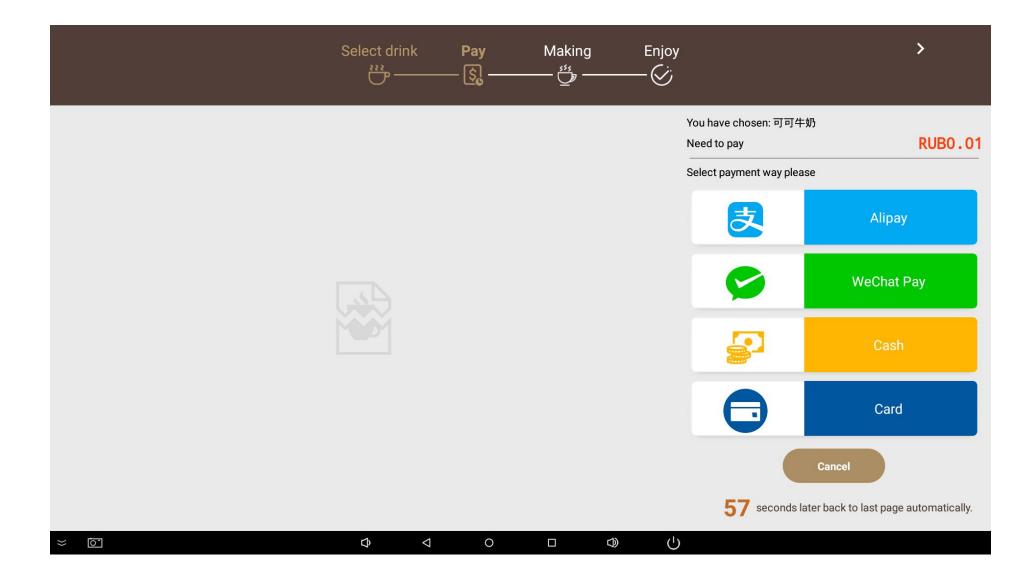

3.2.5. The Cash interface needs to be taken and saved

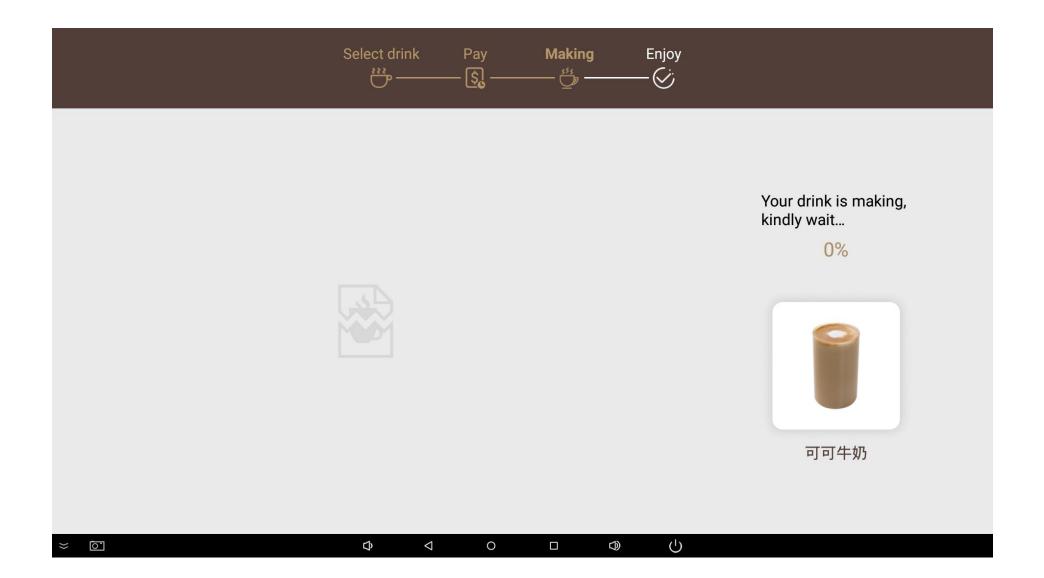

3.3.1. Trading interface introduction

3.3.2 Payment interface introduction

3.3.3. Drink preparation waiting interface

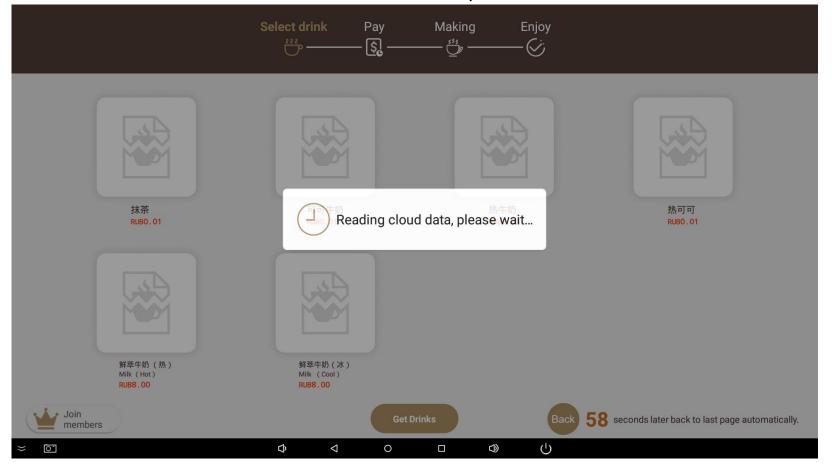

4. Common faults and solutions

- 1. Network failure
- 2. Insufficient material failure: E01, E02, E03 code
- 3. Report E11 code
- 4. Report E0002 code
- 5. Common setup issues

4.1. Network failure

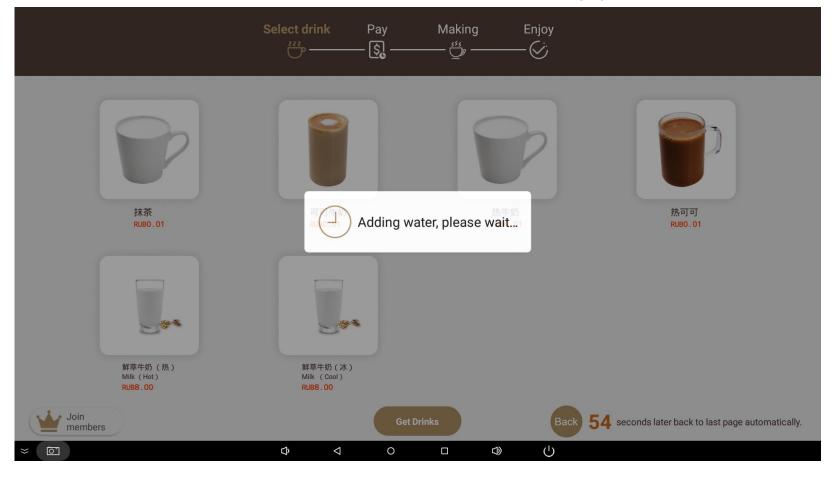

- We need to check the network status. For example, the
- status of the SIM card, whether the SIM card is installed, whether
- the antenna is intact, and whether there is poor contact

4.2.1, Fault code E01

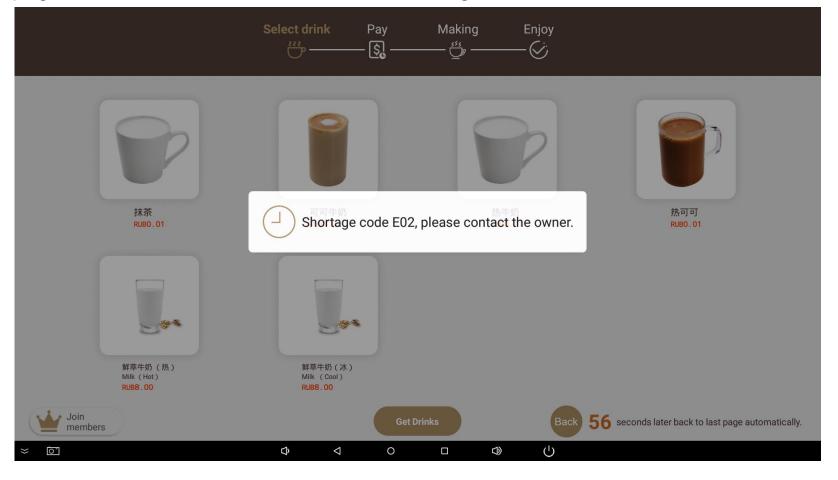

- Insufficient water in the equipment, check whether the bottled
- water is sufficient, check whether the water pump sinks to the
- bottom of the bucket, and check whether the water pipe is bent

4.2.2, Fault code E02

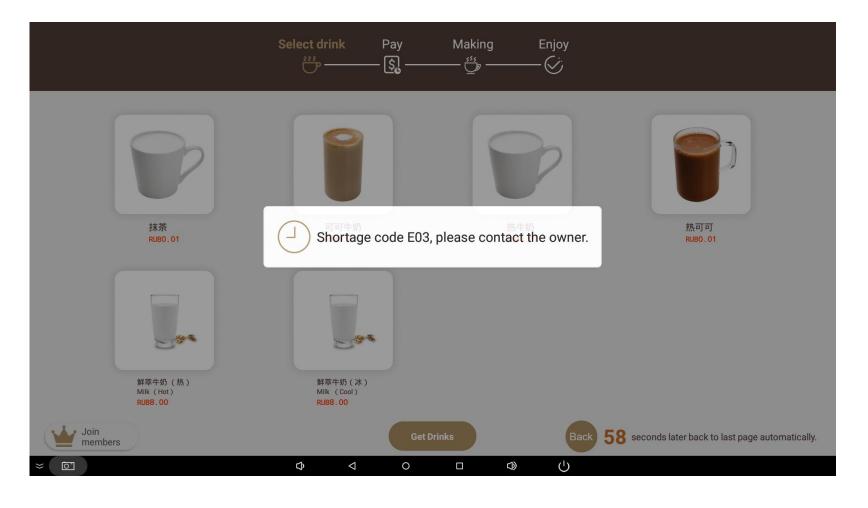

- Insufficient paper cups, check whether the paper cups are
- enough, enter the APP management interface, "Refilling"
- page checks whether it has been "Refilling"

4.2.3, Fault code E03

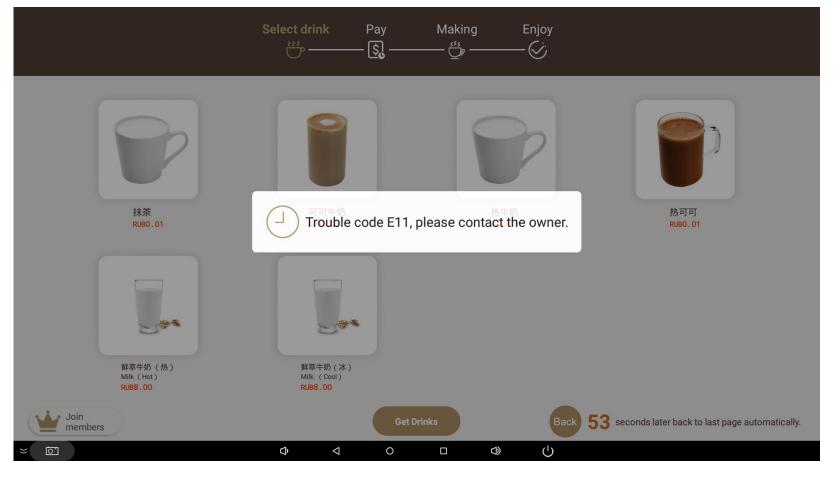

- At the same time lack of water and cup, the inspection
- method is the same as above

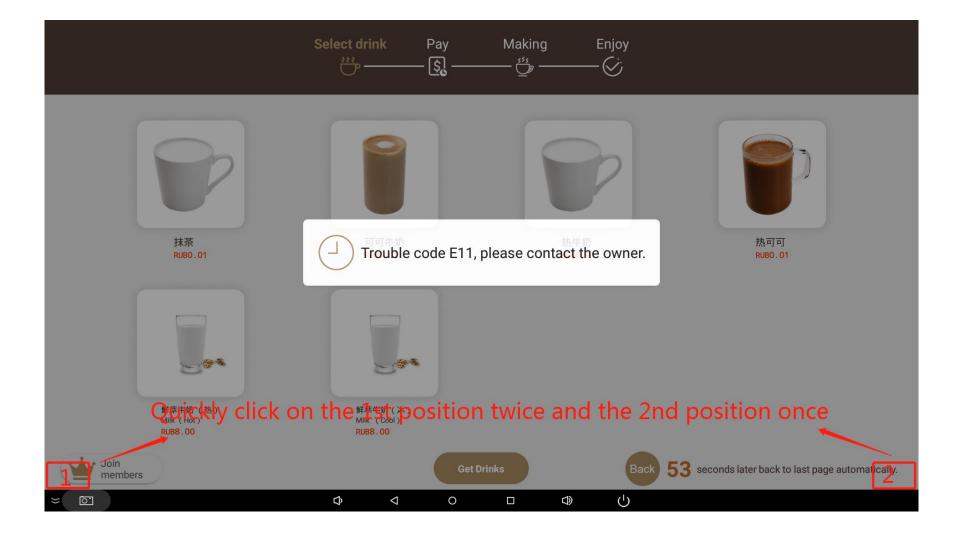

4.2.4, Fault code E11

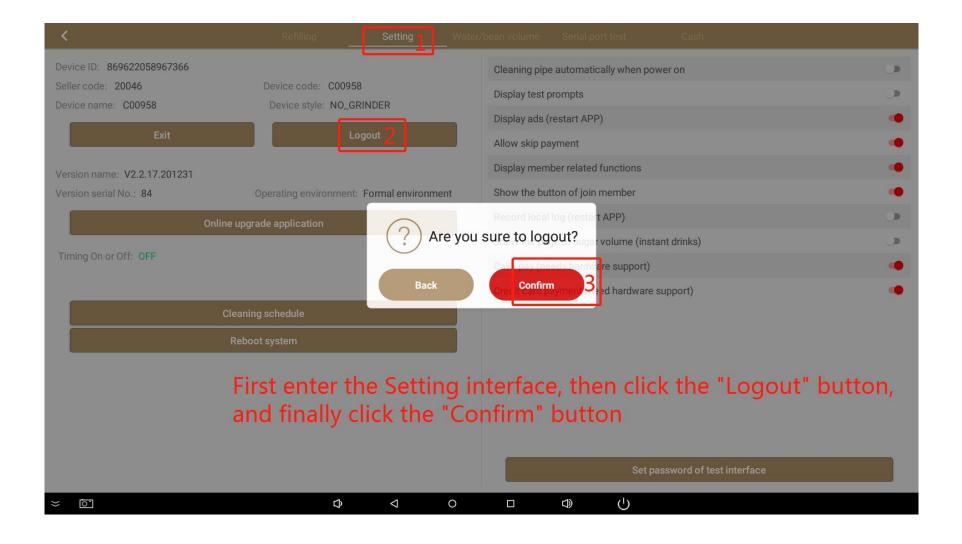

- The fault code E11 means that the communication is not
- smooth, you need to check whether the serial port number
- is set incorrectly, and whether the main board is powered on

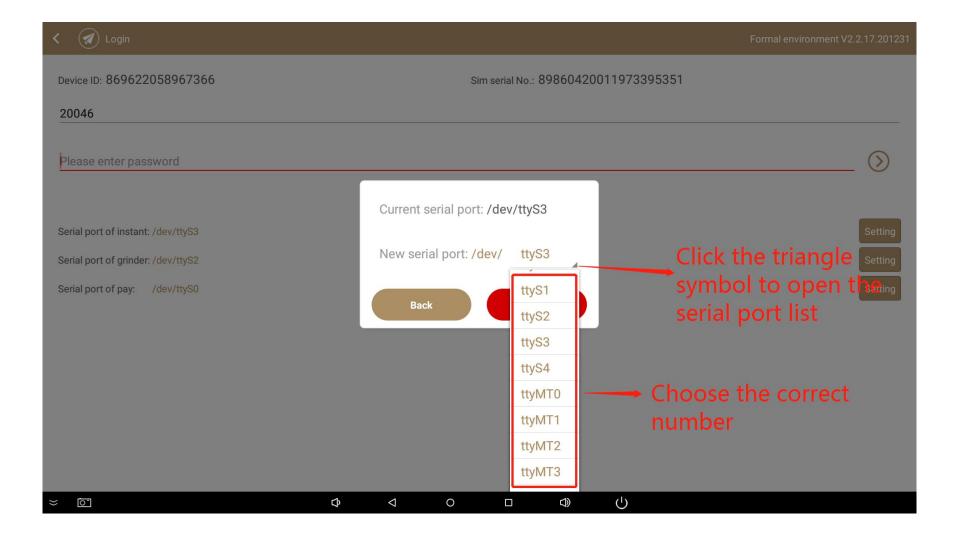

4.3.1.1. Modify serial port number

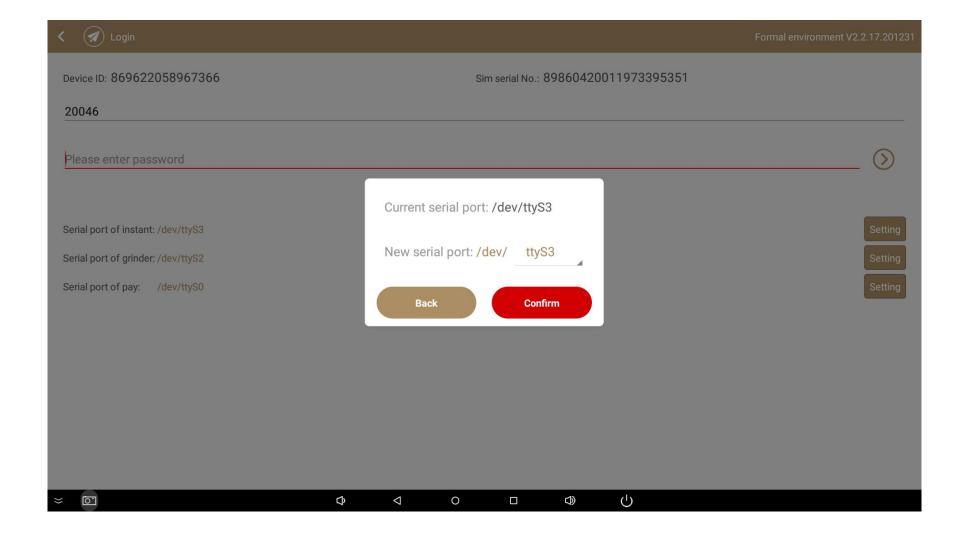

4.3.1.2. Modify serial port number

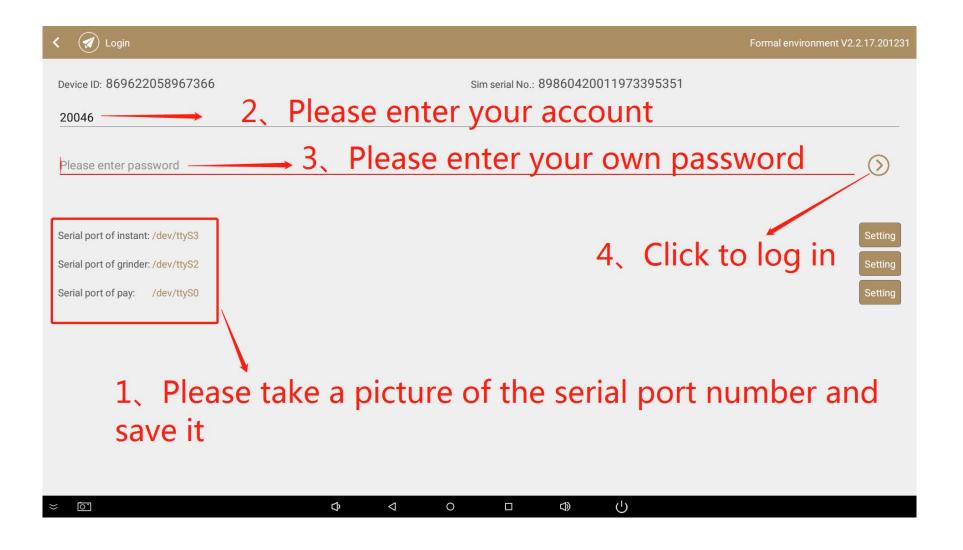

4.3.1.3. Modify serial port number

4.3.1.4. Modify serial port number

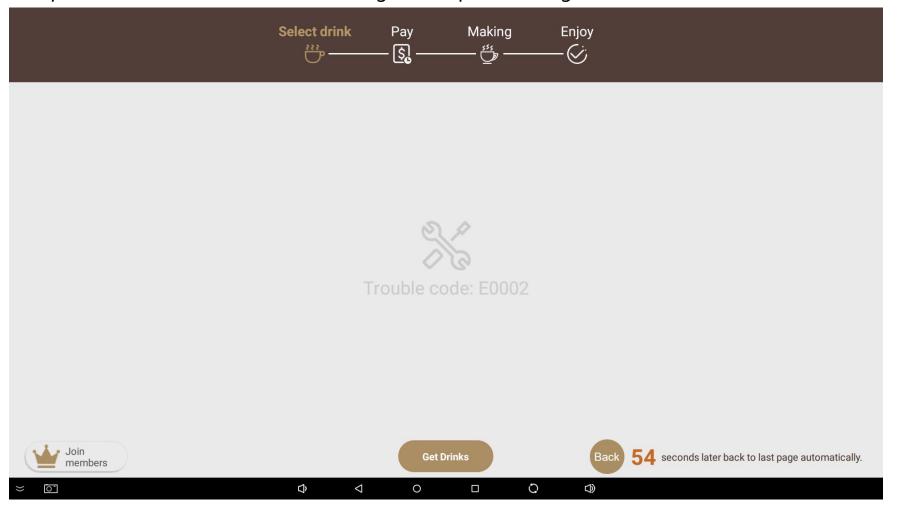

4.3.1.5. Modify serial port number

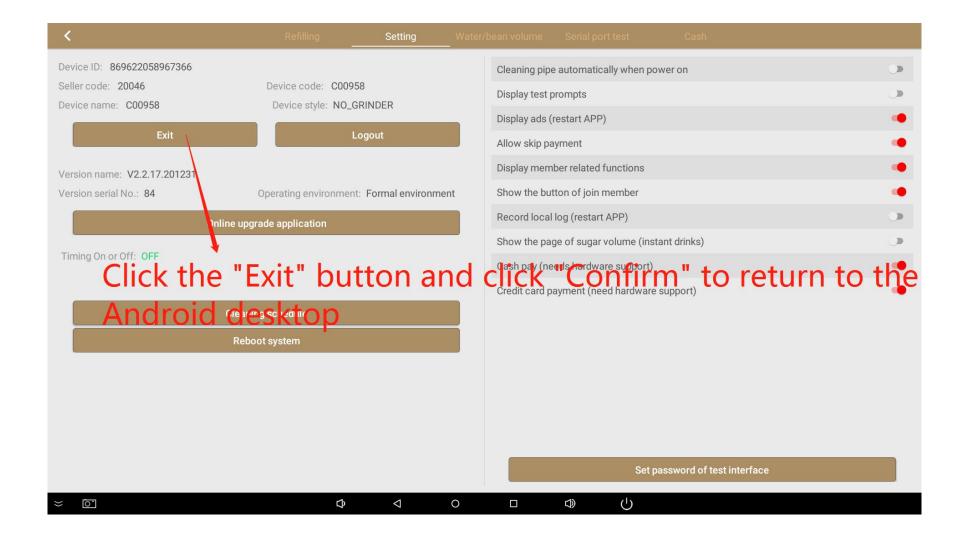

4.4. Fault code E0002

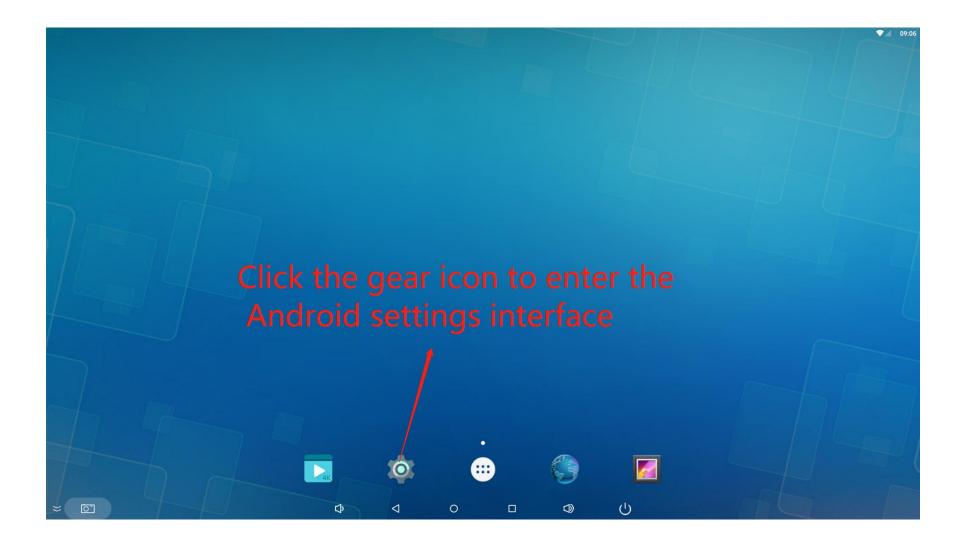

- E0002 represents back-office management fee arrears,
- please contact the sales manager for processing

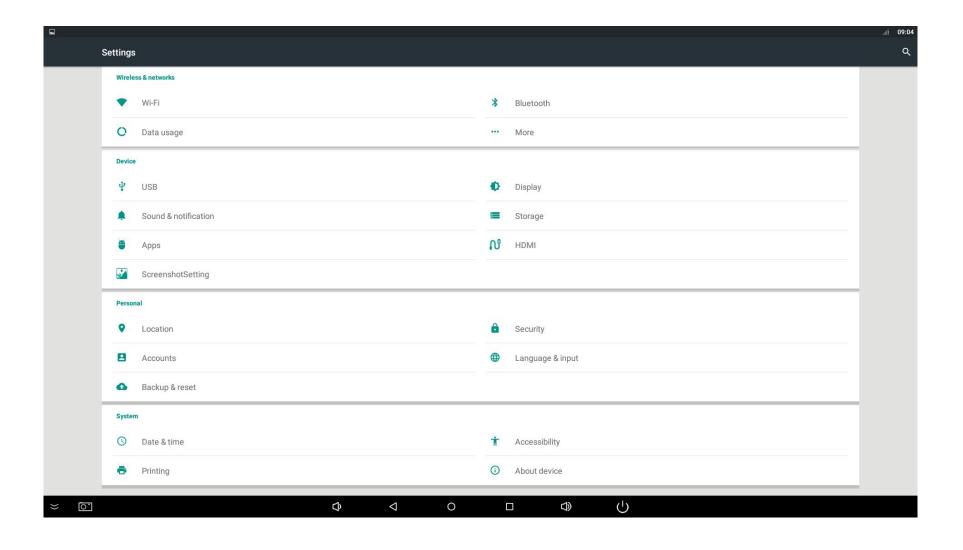

4.5.1. Turn on the wifi function

4.5.1.2. Turn on the wifi function

4.5.1.3. Turn on the wifi function

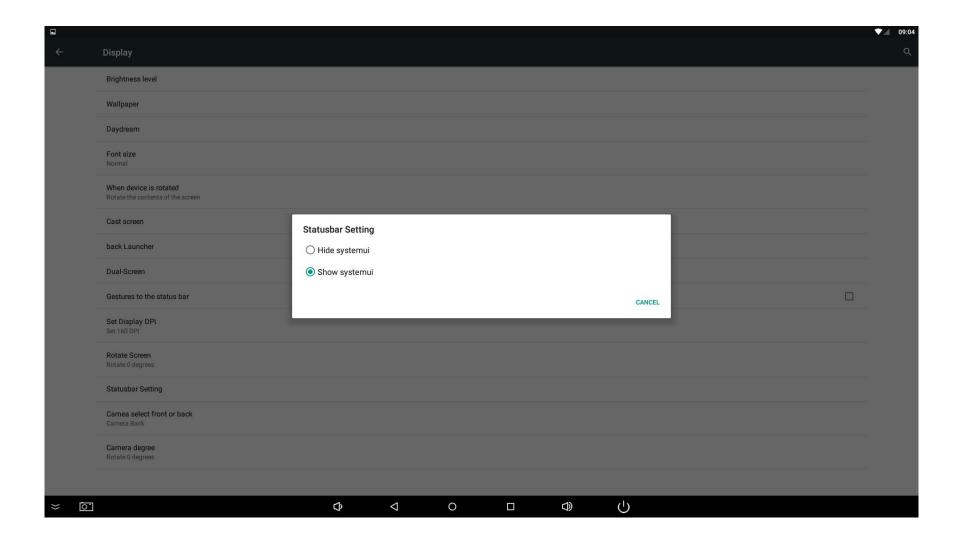

4.5.1.4. Turn on the wifi function

4.5.2.1. Open and close the status bar

4.5.2.2. Open and close the status bar

5. After-sales service

• Our working hours :

• Working day 8:00 —— 17:30

• Contact information :

• whatsapp: 18971011161

THANKS!
