## FPA-98B Funeral Stainless Mortuary Autopsy Table

The **FPA-98B stainless mortuary table** is designed for the dissection of cadavers and includes a recessed top with eliminates the need for a body tray . Built with a 1" slope the table drains toward one end and into an optional drain bucket which is neatly suspended under the frame . Two hinged covers are provided to securely conceal the cadaver in discrete manner .

During the dissection the hinged covers lock neatly and securely under the table and out of the way .

A PVC stop valve is located under the drain to stop the flow of fluids while emptying the bucket.
