

## YJ-DG3210 Mobile Analog Radiography System

### Features

- ◇ Lovely appearance, and easy to move and operate; Possess all the features of all the mobile X-ray photography machines.
- ◇ The pillar can be rotated right and left  $\pm 90^\circ$ , which can easy to operate in the wards.
- ◇ We incorporate the latest compact high-frequency and high-voltage X-ray generator, which ensure superior image quality, while the skin dose is low , to protect the patient better.
- ◇ Adopt the technology of kV and mAs numeral closed loop control, Real-time control of the microprocessor, which ensure the accuracy and repeatability of the output dose.
- ◇ The parameter can be adjust by the KV and mAs two-button system. High-brightness、 blue screen LCD display. With multiple security protect function such as over-voltage, over-current.
- ◇ With a high-quality knockdown X-ray generator to reduce irradiation, which is

much safer to environment and operator.

- ★ Power:20kW
- ★ Voltage: AC220V  $\pm$  10%
- ★ kV Range: 40~125kV
- ★ mA Range: 10~320mA
- ★ mAs Range: 0.5-320mAs
- ★ Working Frequency:  $\geq$  100kHz
