Intelligent Security System Escort For Treatment

Comprehensive Treatment Mode

- HD
- Sequential HD
- IUF

* RCM

- **Real-time clearance monitoring**
The treatment guidance such as Urine clearance, Urea concentration decrease etc can be checked during the treatment, which can provide the treatment prescription.

* BPM

- Measure the blood pressure and heart rate of the patients, which can decrease the operation burden of the medical staff.

Real-time Leak Monitoring

- Balance system for real-time leak monitoring to ensure the safety of patient.

Back-up Power

- Blood circuit runs for more than 40 minutes.

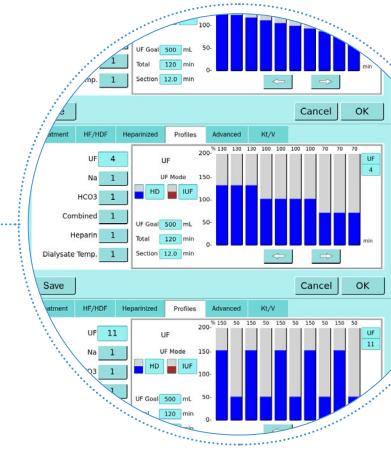

Alarm LED

- The IV pole integrates three color alarm LED such as red yellow green, which can be checked from distance with clear version .

Multi-treatment Profiles, Providing Personalized Treatment

- Sodium profile
- UF rate profile
- Bicarbonate profile
-
- Heparin flow profile
- Dialysate flow profile
- Dialysate temperature profile

* Bicart Holder

- Using Bicart online, avoid microbial contamination of B fluid.

Information System RJ45 Interface

- The information management system can be connected through the RJ45 interface, so that realize intelligent and refined management of the entire treatment process.

Technology Empowers Hemodialysis

Intelligent Operation

- 12.1 inch LCD+touch screen, multi-language operation interface.
- Adjust the level of venous bubble catcher automatically to prevent blood pollution and reduce dialysis risk.
- Convenient process for sequential dialysis (Dialysis \leftrightarrow IUF) and high-low sodium sequential dialysis.

Safe & Effective Treatment

- The hydraulic, blood circuit and monitor system can be mandatory self-test, so that ensure the safety treatment.
- Ultrasonic and optical detector on venous ensures the safety of blood return.
- Dialysate configuration feedback control system to ensure accurate dialysate concentration.
- Advanced capacity balance feedback control system, ensures UF precision.

Visual Intelligent System

- Preset automatic switch time and disinfection mode, and record all disinfection.
- Dynamic tracking and monitoring functions such as arterial pressure, venous pressure and transmembrane pressure can respond to abnormal situations on time and alarm.

Powerful Compatibility

- Can be operated with Various brands of filters.
- Compatible with various brands of dialysis powder, bloodline and other hemodialysis consumables.
