Installation Guide

Installation steps

1. Wall panel cutting measure the size as needed cut with a handsaw.

2. Apply adhesive on the back apply structural adhesive evenly on the back of the wall panel.

3. Install on the wall install the wall panels in sequence, align the male and female clips, and connect them to the wall.

4. Close joint strike with a hammer to make the wall panels fit tightly.

5. Fixed with brads install metal clips on the idle side and fix them with a brad.

Folding steps

1. Measure with a ruler, mark the position to be bent, and use a grooving machine to make grooves along the marks on the panel.

2. Heat the grooved areas evenly with a heat gun, then bend to the desired angle as the temperature rises.

3. Bend to the desired angle, let it sit for a while, and once it cools down and stabilizes, it can be installed.
