# A Word from the Founder and General Manager

Laudtec was born out of a searching trip to Hong Kong, back in 2008, when my small business met a bottle neck, I went there to see and observe.

Discovering how smartphones are changing the way people communicate and socialize, I had the epiphany of doing something connected with it. From one small step, to now an established global supplier, it has been a journey full of commitments in actions.

Through working with us, you will see we put actions in where our words are, our team is passionate on delivering what makes you smile and at ease.

Thank you.

Design & Manufacture  
Since 2008

In the year 2008, Laudtec's headquarter was established in Shenzhen, China.

Our company consists of four manufacturing facilities and a branch company in Chongqing. We focus on the design and production of accessories for communication devices, such as phone cases, tablet covers, laptop sleeves, VR cases, gaming accessories, and related products.

Our manufacturing facilities have obtained certifications of GRS, Sedex, ISO9001:2015, and BSCI, and products are approved by Reach, RoHS, CE, FCC, Military drop test, FDA, PAHs, and Prop 65 standards.

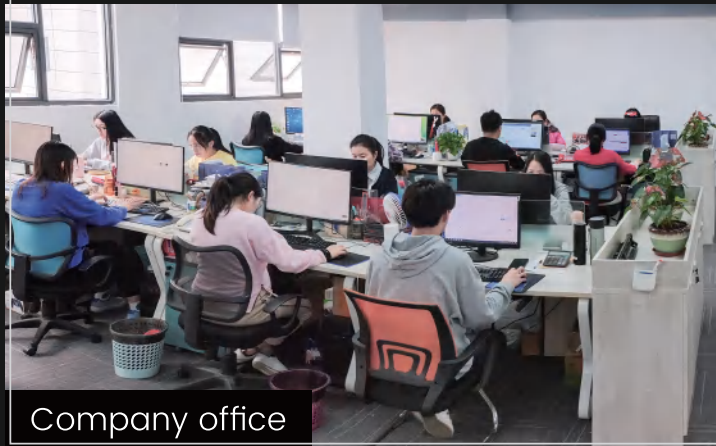

Our operations have been audited by SGS, TUV, Intertek, and BUREAU VERITAS.

The factory spans an area of 9,300 square meters, equipped with 8 CNC machines, 10 automatic foam EVA injection moulding machines, 28 injection molding machines, 15 production lines, and staffed by 391 workers. This robust setup enables us to achieve a daily production capacity ranging from 20,000 to 50,000 units.

We maintain a strict quality control process, ensuring that all our products undergo 100% inspection. In the event of any quality issues, we offer a no-questions-asked refund policy. We are eagerly building long-term partnerships with our esteemed customers.
