

Guangzhou Qili Environmental Equipment Co.,Ltd.

GLOBAL OZONE&OXYGEN EQUIPMENT SUPPLIER

Recommended reason

Have you ever encountered this situation when using other disinfection products?

Need to store a large amount of disinfected items

Did not disinfect in time, epidemic was discovered after the occurrence

Has been sterilized, but it still produces disease

Need to prepare different antibiotics and disinfectants

The problem of clenbuterol and Sudan red

Disinfection link consumes a lot of manpower and material resources

Spray Ozone Water System Solve a variety of troubles by one machine

- ① **Humanized design**
Movable, easy to operate, just connect water inlet
- ② **Metal integrated water gun**
High pressure, reducing labor costs
- ③ **Meet health standards**
Safe and hygienic, no secondary pollution, no chemical disinfectants
- ④ **Improve farming efficiency**
Ozone water can provide a clean environment and kill bacteria
- ⑤ **Beneficial to animals**
Ozone water can promote animal growth, reduce fat consuming, improve eggs quality

Product introduction

Spray Ozone Water System

Prepare high concentration ozone water and clean the breeding ground. Eliminate the odor of the space and reduce the growth of bacteria. Provide environmental sanitation in farming sites.

Product application

- **The main application of this product is poultry and livestock farms.**

Wash the floor and space with high concentration of ozone water, can effectively disinfect farms, remove odors, kill germs and prevent diseases, reduce prophylactic drug use and provide environmental sanitation for breeding sites.

- **Agriculture**

Used for watering flowers and pots; vineyard and apple orchard planting and landscaping.

About us

Guangzhou Qili Environmental Equipment Co., Ltd. is a high-tech enterprise dedicated to research, development, design, production and sales of ozone equipment. Specializing in ozone technology research, ozone equipment design and manufacturing, ozone application engineering design and ozone system equipment installation, commissioning, operation and maintenance. In the modern fish pond breeding, kitchen cooking fumes, water treatment, air treatment and other related fields have a wealth of experience! Qili air source, oxygen source, pipeline-specific, ozone water machine, oxygen generator, ozone detector and other products are sold at home and abroad.
