Factory Profile

We have advanced machinery at home and abroad, high printing precision,
excellent quality, excellent equipment, and advanced technology.

As a high-tech anti-counterfeiting printing enterprise, we have about 20 year
production expreience, A variety of different production equipment, independent
R&D capabilities.Mainly produces all kinds of high-efficiency, practical and
economical products.

We have about 50+ employees, a daily output of about 10,000 pieces, and a factory
area of about 1500+ square meters. We provide one-stop service and welcome you
to customize products.

PRODUCTS
INTRODUCTION
主营产品

OEM/ODM
As a high-tech anti-counterfeiting printing enterprise, we can provide you with one-stop services

1 Hologram Sticker
Generally less than 16CM, the maximum can be 64CM

2 Self-adhesive Label
Generally less than 16CM, the maximum can be 64CM

3 Security Certificate
Optional A3/A4/A5 size or customized size

4 Security Thread
The minimum size can be made 0.3mm

5 Tickets/Voucher
You can choose 80g, 180g, 200g coated paper

6 RFID Card
Optional CR-80(85.6mmx54mm)
CR-90(92mmx60mm)
CR-100(98.5mmx67mm)

HOLOGRAM STICKER

We focusing on high difficulty anti-counterfeiting technology. More than 50+ ultra high security features with near-impossible to copy.

Diamond Fragment Technology

Drift Technology

Big angle Laser

Cat'Eye pearl Interference Figure

Apposition different images

Symthesized Dynamic holograph

Color QR Code

Silver scratch off bar

HQD

Scratch Here

2D Hologram
Naked-eye 3D effects with limited viewing angles using simple reflection and refraction principles

Serial Number
A unique code for marking and identifying products

UV Fluorescence
Under UV light, a pattern or color change appears

Scratch Off
Scratch the silver to get the corresponding enquiry number

Cat's-eye Interferogram
The 3D convex lens is completely visible on the flat material without any bumps when touched by hand
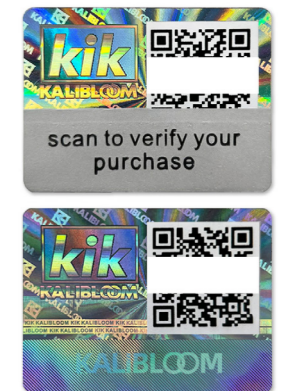

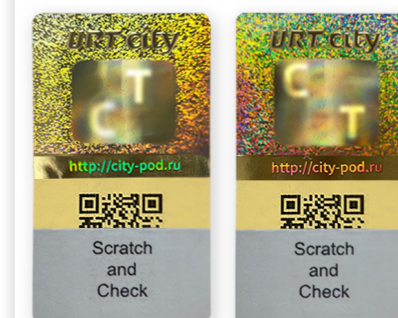

Mohr Encryption
Requires decryption card to see hidden messages

3D Relief Hologram
Instead of refracting light, it projects information about the object accurately through the light as a 3D image

Drift Technology
Patterns will follow the drift when rotating the label

QR Code
By scanning the QR code you can get the embedded encrypted information

Product Showcase

We are proficient in various difficult anti-counterfeiting technologies and every anti-counterfeiting production process, and strictly control quality from every step of product production.

Scratch Off

Scratch the silver to get the corresponding enquiry number

Laser Holographic Label:

- Generally less than 16CM, the maximum can be 64CM
- Ordinary regular shape, Special irregular shape
- Health products/food/clothing/electronic products/auto parts daily necessities/drinks, etc.

QR Code

By scanning the QR code you can get the embedded encrypted information

SELF-ADHESIVE LABEL

We focusing on high difficulty anti-counterfeiting technology. More than 50+ ultra high security features with near-impossible to copy QR-Codes.

Double layer

This part without glue

Waterproof surface

Variable QR code

Anti-counterfeiting texture

Tamper Evident
Tamper evident technology shows "VOID," "VOID OPEN," or custom text when removed
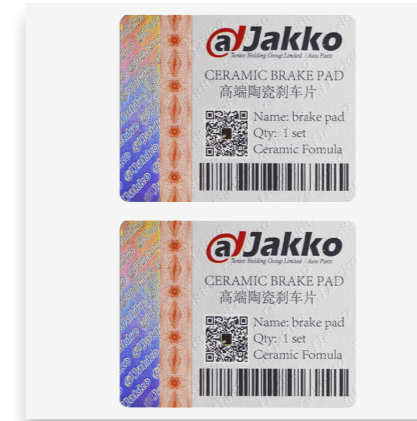

Hot Stamping Holographic
Holographic hot stamping into the label, play the role of a esthetic anti-counterfeiting

UV Fluorescence
Under UV light, a pattern or color change appears

Emboss
The pattern or text creates a three-dimensional sensation to the touch and to the eye

Microtext
The use of a magnifying glass allows you to see the text

Scratch Off
Scratch the silver to get the corresponding enquiry number
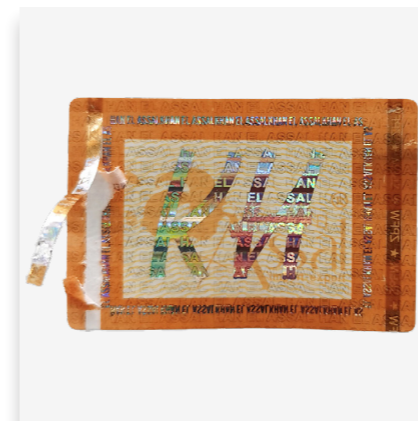

Laser Thread
Metal wire embedded inside the label, special custom production

Double Layer
Uncovering the surface reveals the information hidden underneath

Anti-counterfeiting Texture
3D effect on flat materials without any bumpiness when touched by hand

Product Showcase

We are proficient in various difficult anti-counterfeiting technologies and every anti-counterfeiting production process, and strictly control quality from every step of product production.

Multi Layer Label

Labels can be torn and glued separately and repeatedly, and you can view the contents printed inside the label.

Self-adhesive Label :

- Generally less than 16CM, the maximum can be 64CM
- Ordinary regular shape, Special irregular shape
- Health products/food/clothing/electronic products/auto parts daily necessities/drinks, etc.

NFC RFID Tag

A wireless communication technology that enables short-range data transmission by touching a device

SECURITY CERTIFICATES

We focusing on high difficulty anti-counterfeiting technology. More than 50+ ultra high security features with near-impossible to copy QR-Codes.

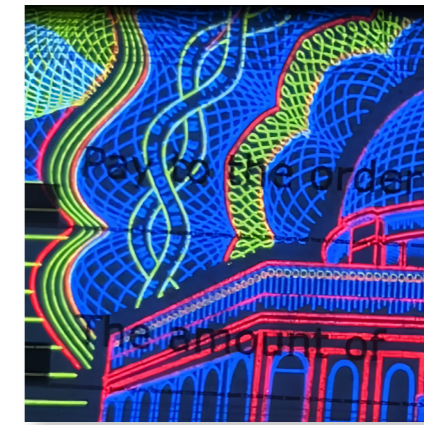

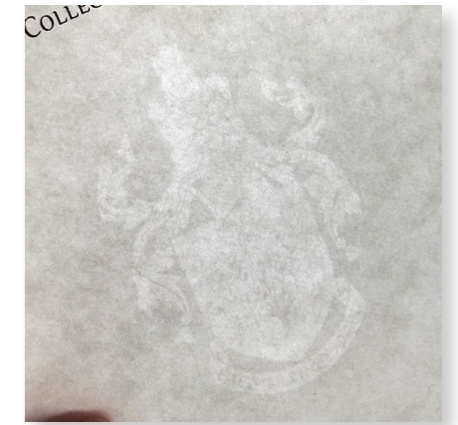

Hollow Out serial Number

Serial number

CMYK-Printing

Twisted cord pattern

Watermark effect

Anti-copy

Laser hot stamping

UV fluorescence effect

Holographic Stamping
Holographic hot stamping into the paper, play the role of a esthetic anti-counterfeiting

UV Fluorescence
Under UV light, a pattern or color change appears

Custom Watermark
Embed text or patterns into paper, which can be seen through light
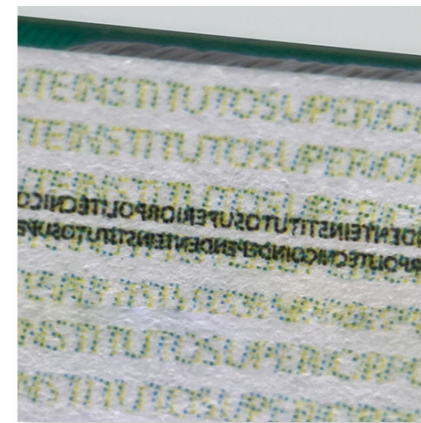

Microtext
The use of a magnifying glass allows you to see the text
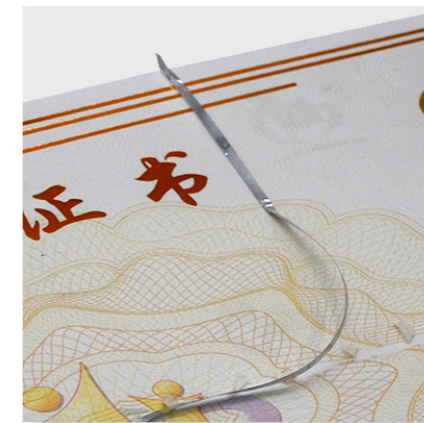

Security Thread
Metal wire embedded inside the paper, special custom production

UV Fibers
Fibers that fluoresce when irradiated with ultraviolet light

Anti-copy
Unable to get pattern by scanning or copying

Gold Foil Stmaping
Can add unique style and texture to certificates

3D Pattern / Guilloche
3D effect on flat materials without any bumpiness when touched by hand

Product Showcase

We are proficient in various difficult anti-counterfeiting technologies and every anti-counterfeiting production process, and strictly control quality from every step of product production.

Product Application

We also provid certificate holders customization services, which can be used with certificates for graduation, ceremony, corporate awards.

Anti-counterfeiting certificate features:

- Optional A3/A4/A5 size.
- Self-adhesive paper/fiber paper/safety thread paper/invisible watermark paper and other materials.
- Usually used in graduation certificates/honorary certificates/greeting cards/calendars, etc.
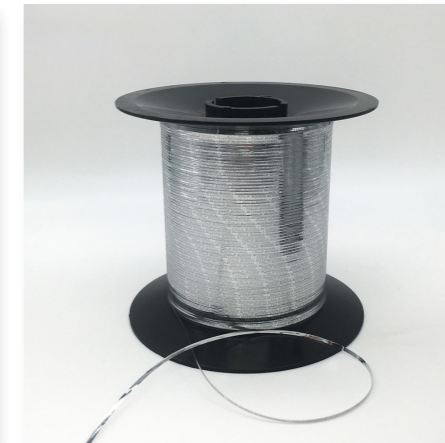

SECURITY THREAD

Optical tamper-evident drawstrings, which allow the product to be sealed and easily unsealed, as well as being tamper-evident.
