Material: Acrylic / ABS

Water-Repellent

Water-Repellent: water slides fast on the surface.

Smooth

The surface is perfectly smooth.

Cleaning

Easy and quick cleaning

Brilliance

Greater surface brilliance

Green

Environmental Sustainability : reduced water consumption and cleaning detergents.

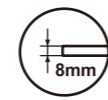

Durability

High resistance to external agents, longer durability.

Resistance

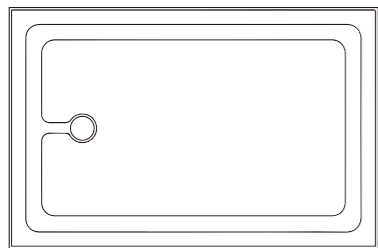

Impact , scratch and abrasion resistance.

Super Thin

Ultra-thin integrated molding edge

## BMC

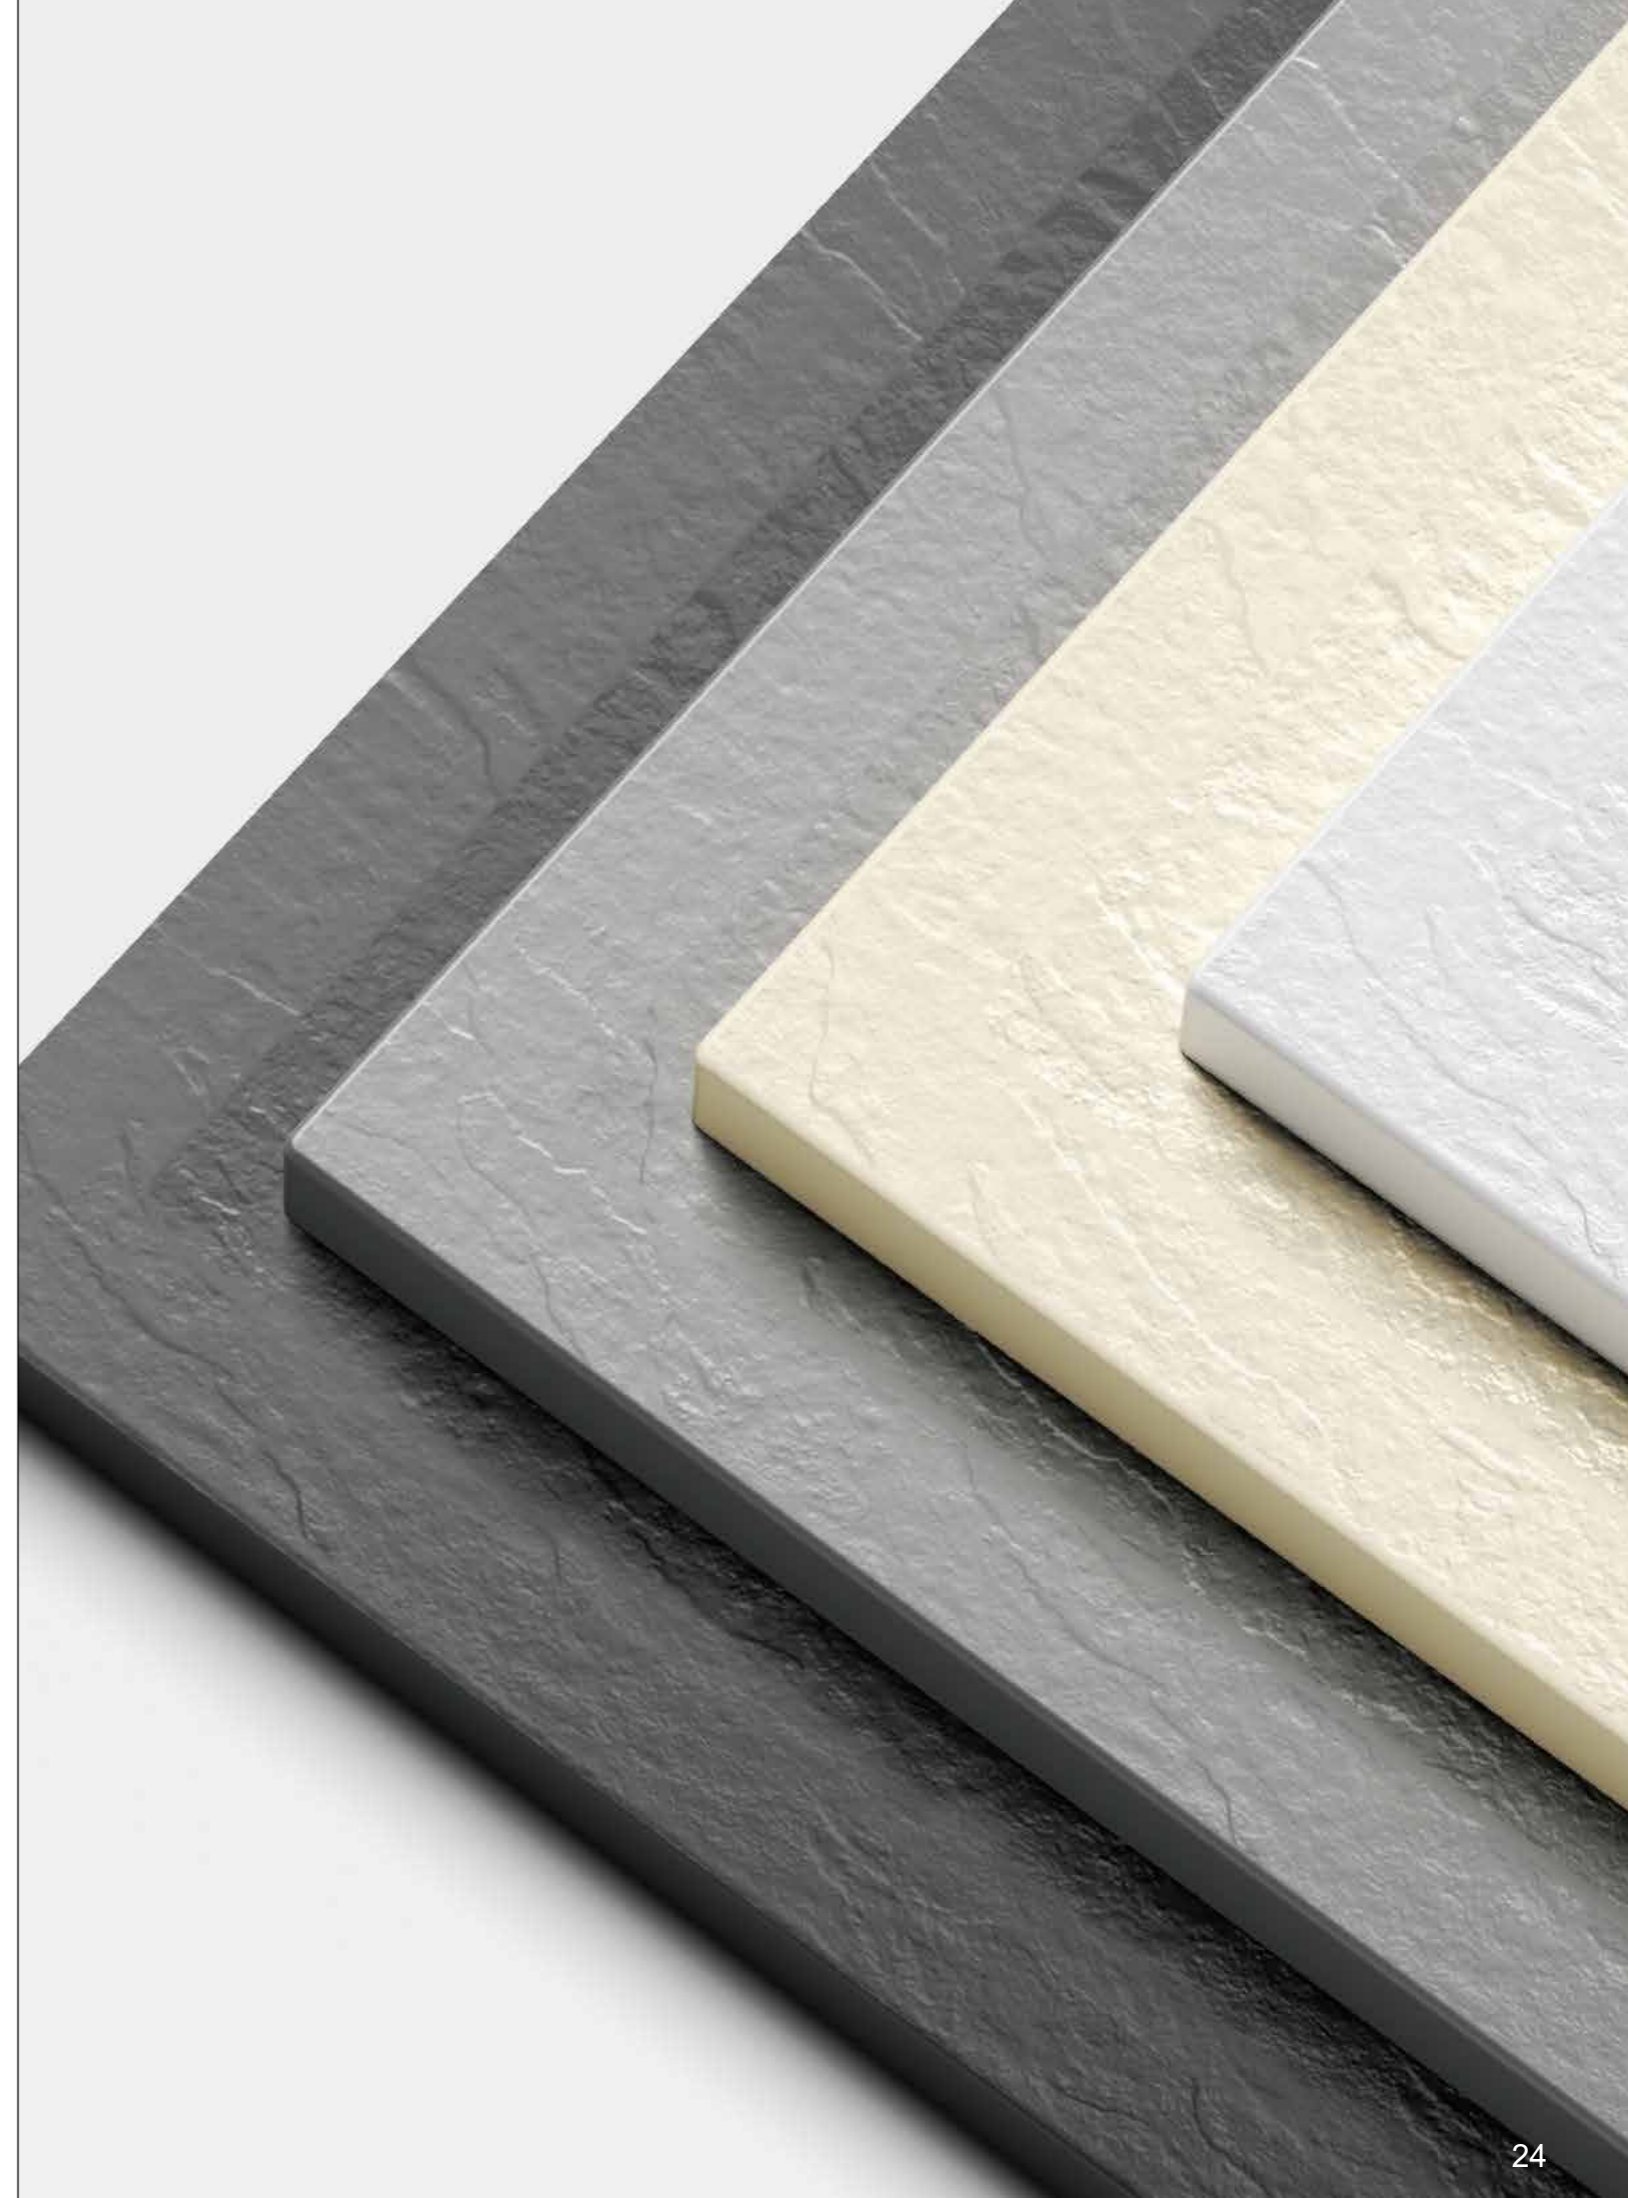

### Artificial stone series

#### 人造石系列

淋浴底盆其出色的材料优点包括高强度、高承载力、坚实耐用，安全防滑及最佳清洁特性。无内部轮廓的大面积立面塑造了简约的整体印象。外部角半径极小，方便铺砖。表面纹理可定制，创造属于你的个性卫浴空间。

The excellent material advantages of the shower basin include high strength, high load-bearing capacity, solidity and durability, safety and anti slip, and optimal cleaning characteristics. The large facade without internal contours creates a minimalist overall impression. The external corner radius is extremely small, making it convenient for laying bricks. The surface texture can be customized to create your own personalized bathroom space.

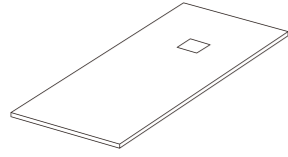

**TOTAL VERSATILITY TO ADAPT  
TO ANY SPACE**

## Sheet Molding Compound SMC系列

### Water-Repellent

Water-Repellent: water slides fast on the surface.

### Smooth

The surface is perfectly smooth.

### Cleaning

Easy and quick cleaning

### Brilliance

Greater surface brilliance

### Green

Environmental Sustainability : reduced water consumption and cleaning detergents.

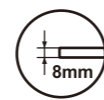

### Durability

High resistance to external agents, longer durability.

### Resistance

Impact , scratch and abrasion resistance.

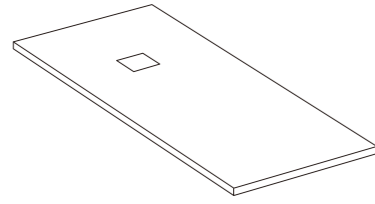

### Super Thin

Ultra-thin integrated molding edge

## INSTALLATION INSTRUCTION

安装说明

卷尺  
Measuring Tape

铅笔  
Pencil

水平尺  
Spirit Level

泥铲  
Trowel

胶粘剂  
Adhesive

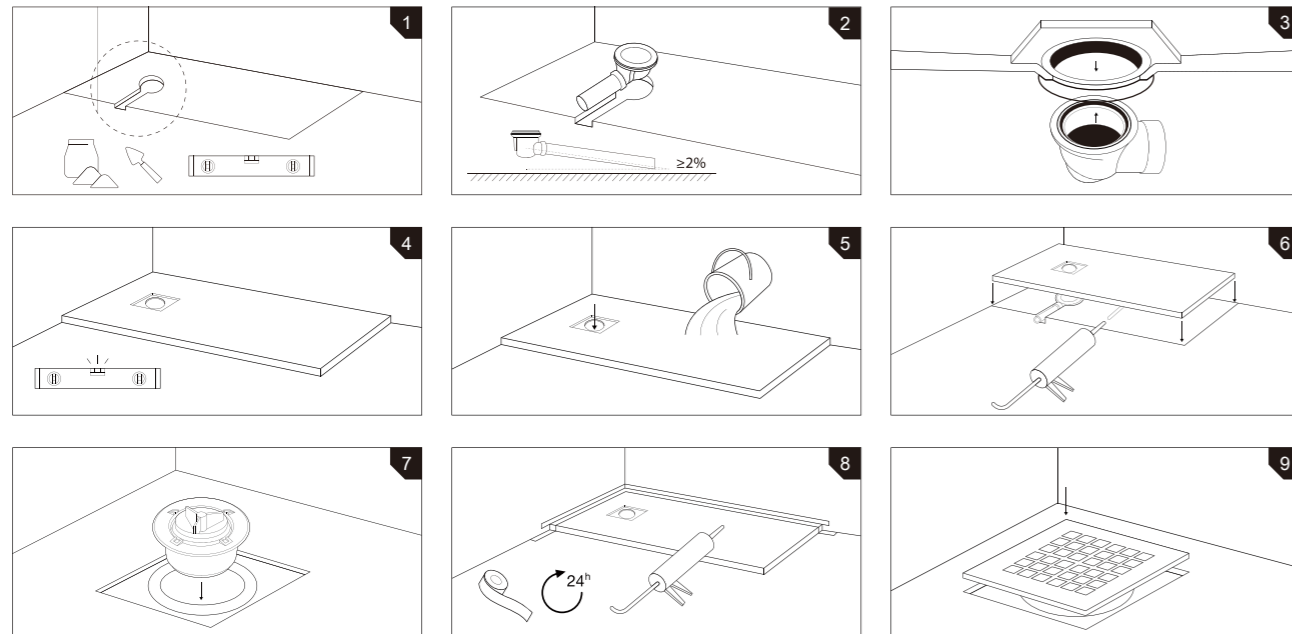

胶带  
Masking Tape

水泥和细沙  
Cement And Fine Sand

桶  
Bucket

取下塞孔周围区域的保护罩，以及托盘与墙壁接触的两侧。确保正确的配件连接在废物管的顶部，并将废物配件固定在淋浴盘的塞孔周围。

如果你将托盘直接安装在地板上，请将其与垃圾捕集器对齐，以确保其适合位置。用铅笔勾勒出托盘边缘的轮廓，这将帮助你确定在哪里涂抹砂浆。如果您的淋浴盘套件包括墙壁密封条，将其固定在与墙壁相遇的托盘两侧。

如果没有，用你的填缝枪，在托盘边缘涂上一层薄薄的硅树脂，形成一个水密封。根据制造商的指导方针，拆除剩余的塑料覆盖物，并将废物出口固定在疏水阀上。这可能是你可以简单地从上面对齐，或者你可能不得不从托盘下面导航，以确保配件。

如果您的淋浴盘套件包括一个墙壁密封条，将其固定在托盘与墙壁接触的两侧。如果没有，用你的填缝枪，在托盘边缘涂上一层薄薄的硅树脂，形成一个水密封。

Remove the protective covering in the area around the plug hole, and on the sides where the tray will meet the wall. Make sure the correct fittings are attached to the top of the waste pipe and secure the waste fittings around the plug hole of the shower tray. If you are installing the tray directly onto the floor, line it up over the waste trap to make sure it fits into place. Outline the edge of the tray with your pencil - this will help you to determine where to spread the mortar. If your shower tray kit included a wall sealant strip, secure it to the tray at the sides where it meets the wall. If not, use your caulking gun and apply a thin layer of silicone to create a watertight seal along the edge of the tray. Remove the rest of the plastic covering and secure the waste outlet to the trap, according to the manufacturer guidelines.

This may be something you can simply tighten into place from above, or you may have to navigate from beneath the tray in order to secure the fittings. If your shower tray kit included a wall sealant strip, secure it to the tray at the sides where it meets the wall. If not, use your caulking gun and apply a thin layer of silicone to create a watertight seal along the edge of the tray.

## INSTRUCTION FOR USE OF REPAIR KIT

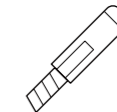

维修工具的使用说明

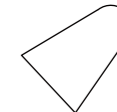

凝胶涂层(200毫升)  
Gel-coat (200mL)

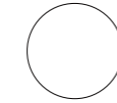

固化剂(15mL)  
Curing agent (15mL)

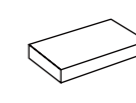

刮刀  
Scraper

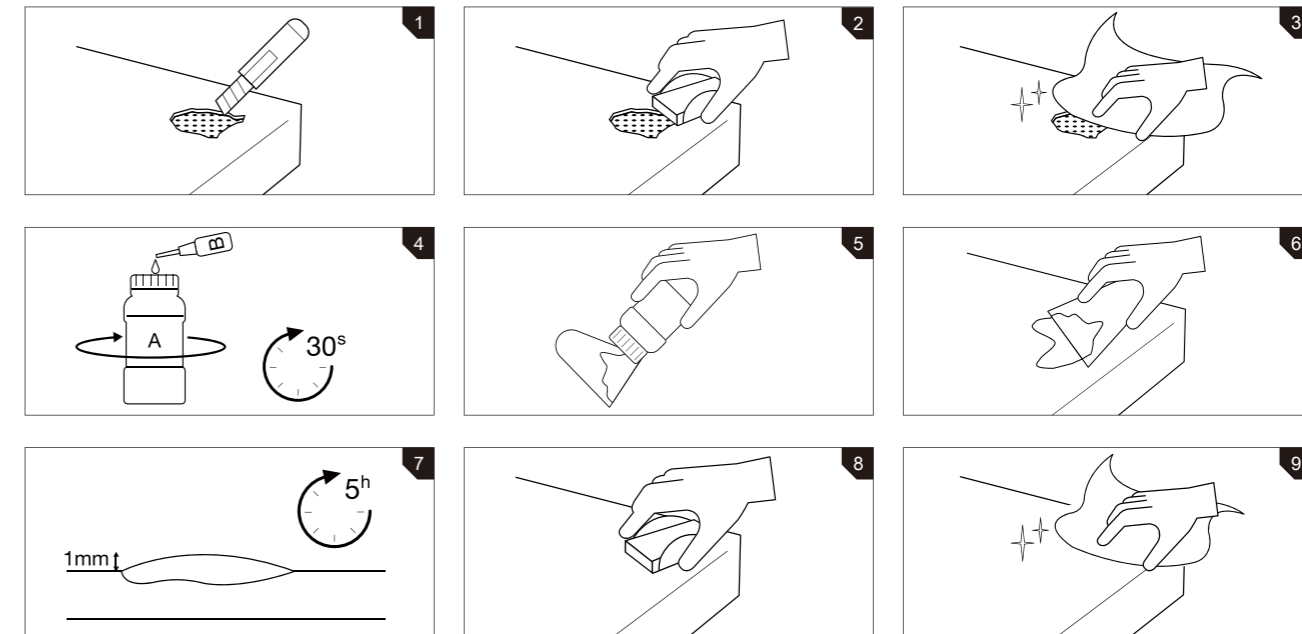

刮板  
Scraping Plate

砂纸(32µm)  
Sand paper (32µm)

泡沫块  
Foamed Block

将淋浴盘表面清洗干净。用刮板刮掉缺陷部位的凝胶涂层。用砂纸把泡沫块包裹起来，然后用砂纸打磨缺陷区域。用干燥的无纺布清洁表面，然后用无纺布在水中涂抹丙酮或乙醇。表面必须完全清洁和干燥。

将修补胶衣与固化剂按以下比例配制(胶衣:固化剂= 25:1)，用刮板取适量修补胶衣将破损部位固定平整。

注:

1. 刮刀板上不要涂太多修复胶。
  2. 记住要把缺陷区域固定平整。固定边缘位置时，避免修复胶涂层向侧面流动。
  3. 用刮板刮掉多余的修复胶。
- 最后晾干5个小时。再次用砂纸打磨该区域，保留其表面纹理。然后用干燥的无纺布清洁表面，然后用无纺布在水中涂抹丙酮或乙醇。

Clean the surface of the shower tray very well. Scrape the gel-coat on the defect area off with scraper. Use the sandpaper to wrap the foamed block around, then sand the defect area. Clean the surface with a dry lint-free cloth, then apply for acetone or ethyl alcohol in water with the lint-free cloth. Surface must be totally clean and dry.

Confect the repair gel-coat and curing agent by the following proportion (gel-coat : curing agent = 25 : 1). Take some repair gel-coat with the scraping plate to fix the broken position flat. Notes: 1. Don't take too much repair gel-coat on the scraping plate. 2. Remember to fix the defect area flat. When fixing the edge position, avoiding the repair gel-coat flow to the side. 3. Use the scraping plate to scrape the excess repair gel-coat. Finally let it dry for 5 hours. Again sand the area with sandpaper, retain the surface of its texture. Then clean the surface with a dry lint-free cloth, then apply for acetone or ethyl alcohol in water with the lint-free cloth.
