Installation Manual

Compatible Model	CToyota CAvalon
Year	2019-2024

8-ETTY-5107-02-00

For safety and to ensure the proper use of product, please ask a rofessional technician to install. Do not disassemble and install it ivately in case of damaging product and installation accidents.

 Please arrange each wiring harness according to the wiring method in this manual, be sure to tie each wiring harness to the vehicle's original iring harness with cable ties. Make sure the wiring harnesses are not ocated at the fasteners or screw holes to avoid the wiring harnesses rushed by the vehicle interior trim panel buckles and screws during the stallation process

Because some of the wiring harness terminals (as indicated by the red lipses below) are not plugged into the wiring harness connectors ring manufacture, please insert terminals into the wiring harness nector first to avoid short circuit between terminals after the wiring nesses have been arranged, then connect other plugs of the wiring rnesses (as indicated by the blue ellipses below) with the original

Check the function display of instrument panel before installation, nether the button of the vehicle is working properly, whether the loors and windows work properly while opening and closing, whether here are scratches on the vehicle internal and exterior surfaces; and ort to the customers in a timely manner if there are any problems.

 During the process of disassembly and assembly, do not carry metal naments and other hard objects with you to prevent damage to the aintwork, seats and interior. Be sure to place the removed trim nents properly to avoid scratching them

All the pictures in this manual are for reference only, vehicle models ith different configurations may have different pictures, but the installation methods are the same.

QTY Picture No. Name 1 Strut 2 ECU 1 set 3 Wiring harness 1 set 4 Power latch 1 Added tailgate 1 (5) switch Other parts 1 set Omitted (screws, brackets, etc.)

. Remove the front left side trim panel and door sill
