# ABOUT US

Since the establishment of Baide Precision in 2011, we have specialized in metal precision machining, providing high-quality, customized solutions for clients worldwide. With the growing demand for baking tool manufacturing services and Wuxi's strategic position as a core hub of China's baking tool industry, we launched a dedicated baking tool manufacturing factory in 2021. Wuxi Hongbei Bakeware Co., Ltd. Leveraging Wuxi's well-developed supply chain ecosystem and over a decade of precision machining expertise, we offer end-to-end customization services, from design drafting to prototype development. Our product range includes, but is not limited to, flat baking trays, French bread pans, hamburger bun pans, and multi-cavity cake molds. To date, we have successfully served clients from over 30 countries worldwide. In addition, our experienced international sales team possesses in-depth industry knowledge and a strong understanding of global markets, enabling us to quickly grasp client needs and deliver tailored solutions. From production to delivery, we are committed to creating an efficient and premium collaboration experience for our clients.

Wuxi Hongbei – Your trusted partner in baking tool manufacturing.

HONGBEI

## HONGBEI Muffin Tray

Integrated design engineered for mass production  
 Consistent heat distribution for uniform baking results  
 Premium non-stick coating for clean release  
 Optimized efficiency with reduced operational cost  
 Robust construction for intensive industrial use  
 Flexible customization to fit diverse production needs

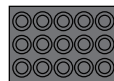

## Customized Muffin Tray

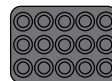

With only a few specifications we can manufacture your customized products

A. Overall Length
B. Overall Width
C. Height
D. Topin Diameter
E. Bottomin Diameter
F. Depth inside
G1/G2. Center-to-center distance

HONGBEI

## HONGBEI Silicone Baking Mold

*Cost-effective alternative to disposable baking paper*

*Reusable design reduces material waste*

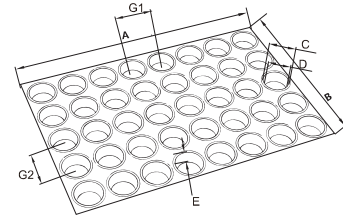

*Heat-resistant with stable performance*

*Food-grade, non-toxic and recyclable materials*

*Environmentally friendly with lower Overall impact*

*Consistent baking results with improved efficiency*

## Customized Silicone Baking Mold

With only a few specifications we can manufacture your customized products

A. Overall Length

B. Overall Width

C. Top-in Diameter

D. Bottom-in Diameter

E. Depth inside

G1/G2. Center-to-center distance

### Single-Side Silicone Mold

1. Non-stick silicone coating on one side
2. Reinforced with fiberglass for stability
3. Ideal for structured baking and easy release

### Perforated Silicone Mold

1. Open / perforated design for optimal airflow
2. Enhances heat circulation and baking efficiency
3. Perfect for crispy crust and consistent results

# HONGBEI

## HONGBEI Baking Trolley

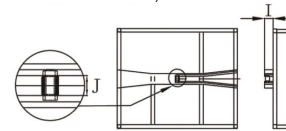

- Heavy-duty structure with stable load capacity
- Smooth mobility for easy handling
- Multi-tier design for efficient space utilization
- Compatible with various trays and production lines
- Durable construction for intensive use
- Customizable size and layer configuration

## Customized Baking Trolley

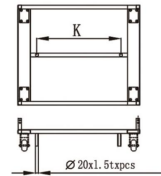

With only a few specifications we can manufacture your customized products

- A.Length of rack
- B.Width of rack
- C.Height of rack(not including caster)
- D.Distance between runners
- E.Height of caster
- F.Width of runner
- G.Height of runner

Information Required for Custom Oven Trolley

- I.Height of top guider
- J.Hook wheel width
- K.C-C of bottom tube (different style)

Select Right Casters

- TPR Wheel
- PU Wheel
- Hi-Temp
- Low-Temp
- Heavy Duty

**Baking Tray Washing Trolley**

CODE	SIZE	MAT.
HBT5485	1200 × 650 × 1850mm	S/S 304 - 1.5mm

# Pan Use & Care

## PTFE Non-stick Products

### Instructions

- Suitable for baking bread products.
- Before first use: clean, dry, apply solid edible oil, heat empty in oven at ~180°C for 8–10 minutes. After cooling, wipe off oil. This improves performance and lifespan.
- Use a soft cloth or scraper to remove residue.
- Clean regularly with warm water and neutral detergent.
- Slight deformation may occur within the first 30–90 days due to thermal expansion and contraction—this is normal.

### Maintenance

- Do not use steel wool, abrasive pads, or chemical cleaners.
- Handle gently to avoid damage to coating.
- Do not leave in humid or sugary environments after use.
- Recommended baking temperature  $\leq 240^{\circ}\text{C}$ . Avoid dry heating and uneven heating.

## Silicone Non-stick Products

### Instructions

- Suitable for high-sugar cakes.
- First use same as above (oil + heating).
- Clean residue with soft cloth.
- Wash regularly with warm water and neutral detergent.

### Maintenance

- Use soft cloth and neutral cleaner.
- Avoid impact and friction.
- Avoid long exposure to moisture, starch, and sugar.
- Temperature  $\leq 240^{\circ}\text{C}$ . No dry heating. Avoid uneven heating.
- When not in use, lightly oil surface, store in plastic bag in dry place.

## Anodized Products

### Instructions

- Clean, dry, lightly oil before first use.
- After baking, clean crumbs with soft scraper or cloth.
- Clean regularly with warm water and neutral detergent.

### Maintenance

- Do not use sharp tools or chemical cleaners.
- Do not soak for long periods.
- Do not freeze dough in refrigeration.
- Handle gently to avoid scratches.
- Recommended:
  1. Temperature  $\leq 250^{\circ}\text{C}$
  2. No empty heating
  3. Avoid uneven heating

## Other Products

- **Hard molds:** Do not use steam cleaning; may cause oxidation.
- **Trolleys:** Do not use high-pressure water; may rust bearings and damage wheels. Use according to product conditions.
