# ▶ Factory profile

.....

The factory is located in the hometown of beige marble in China, which has unique advantages in natural resources.

For more than ten years, we have been focusing on the development of inorganic terrazzo technology, daring to innovate, learning advanced production technology at home and abroad, combining the concept of environmental protection and innovation, using mine tailings and surplus materials to develop green circular economy, and developing unique inorganic ecological raw stones.

# ▶ Factory profile

01

## Unique advantages

The beige marble mine with the largest storage capacity in China, Portuguese beige white sand beige, has an annual output of 5 million square meters, ensuring sufficient and stable supply.

02

## Industry advantage

A leader in the domestic inorganic stone industry, with more than ten years of experience in producing inorganic terrazzo stones, the quality is more stable.

03

## Price advantage

The production volume is the first, with a number of patented production technologies, labor and material costs are controllable, platform-based direct supply reduces intermediate links, and the cost performance is the highest in the country.

04

## Service advantage

Provide construction technical guidance, engineering board processing supporting services, more flexible project docking

# ▶ Product Introduction

## 1. Exterior Wall Stone Series

## 2. Inorganic Terrazzo Series

# ► Product Introduction

## Green & Environmental friendly

---

Terrazzo does not need to be fired in the whole production process, has low energy consumption, no pollution and zero emissions, and has achieved true green environmental protection, circular economy, energy saving and emission reduction.

# ► Application and Process

.....

Scope of Application

Suitable for villas, real estate projects, commercial plazas, hotels, guesthouses. Convention and exhibition centers, schools, hospitals, clubs and other places inside and outside walls and floors.

Special Application

Composite insulation board, easy to install, light and safe, moisturizing, heat insulation, energy saving and emission reduction.

Surface Technolog

The surface technology of the product can be made into matte surface, bright surface, lychee surface, sandblasted surface, brushed surface, antique surface, washed surface, etc.

# ► Application and Process

Terrazzo is widely designed and used in high-end clothing stores, luxury stores, high-end restaurants, shopping malls, subway stations, airports, etc.

# ► Application and Process

According to the mix and match of various materials and the choice of color, the decoration in any space will look harmonious and fashionable.

# ► Application and Process

Applied to major construction projects and won unanimous praise.

# ▶ Win-Win Cooperation

We have a wide range of products and new products are constantly released. We focus on customers and produce high-quality products according to their needs.

The mine is stable, the price system is stable, large projects are shipped quickly, and the production and inventory are sufficient.
