

DY-30-1-24V

Machine vision light controller operating instructions

1. Controller Classification and Naming

DY-30-1-24V

Features:

Input Voltage of Controller: AC 100~240V

Rotatory Switch: 1 rotary switch, which are easy to adjust the brightness immediately and visibly.

Apolar Style: Frees you from numbers or values, and saves your time.

Delicate design: Aluminum Alloy shell, elegant, durable and excellent for heat dissipation.

Package included:

Analog Controller * 1,

220A/10A cable * 1,

4-PIN green terminal male plug * 1.

2. Specifications

Model	DY-30-1-24V (16-24V)
Brand Name	HIFLY
Warranty(Year)	1-Year
Lighting solutions service	Lighting and circuitry design
Place of Origin	Guangdong,China
Type	MANUAL SWITCH
Max. Load Power	30W
Certificates	CE, RoHS
Application	Brightness adjustable
Input Voltage	AC 100-240V
Style	Analog Dimmer
Adjustment Range	RF 0~100% Dimming

3.Dimensions
