Company Profile

公司简介

过去的10多年,北斗星抓住了中国塑料机械高速发展带来的历史机遇,坚持以客户为中心,以员工为根本,基于客户需求持续发展,赢得了客户信任和市场,从一家小的公司,初始资本只有10000人民币的小微企业,稳健成长,成为了年销售额近7000万人民币的中型企业。工厂占地26亩,厂房面积近20000平方米,公司90%的设备出口,如今,我们的塑料机械设备已应用于全球100多个国家和地区。

作为张家港发展最快的企业,我们为各最终客户、经销商及国内客户提供有竞争力的设备和服务,帮助客户在投资开发上获得成功。我们坚持聚焦战略,对公司两大领域“塑料挤出设备,塑料回收设备”持续进行研发投入,以客户需求为根本,使公司始终处于行业前沿。

我们积极致力于社会经济的可持续发展,努力保障提升设备的性能,助力最终用户提升效率、降低能耗,推动低碳经济增长。

我们深信:未来将是一个全球化的世界。北斗星与各客户一起,开放合作,努力构建一个更加高效整合的系统,促进行业与行业、企业与企业、中国与全球的全面合作与发展,激发每个行业,每家企业无限机遇与潜能,推动世界进步。

核心价值观

为客户服务是我们存在的唯一理由,客户需求是我们发展的原动力。

我们的价值主张

为适应全球塑料机械日益增长的需求,北斗星围绕客户需求和科技创新,与业界伙伴开放合作,持续为客户创造价值。

Our core values

Customer service is the only reason we exist, customer demand is the driving force behind our development.

Our value proposition

In order to meet the increase demand of globe plastics machinery, Sevenstars according to customer requirement and technological innovation, open cooperation with industry partners, continuing to create value for customers.

Over the past 10 years, Sevenstars seized the historical opportunity of Chinese plastic machinery development. We insisted the customers as the center, employees as foundation, developed gradually base on their requirement and finally, we win the trust and market from them. We started from a small company, initial capital only 10000 RMB and developed to a annual sales of nearly 70 million RMB of medium-sized enterprises. Our factory covers 26 acres, plant area of 20000 square meters and 90% of equipment export. Now, our plastic machinery and equipment has been used in more than 100 countries and regions around the world.

As the develop fastest company in Zhangjiagang city, we provide competitive quotation and service to final customers, agents all over the world, domestic customers and try to help them success in the investment. We insist focusing on the strategic, research and development to our two main products "plastic extrusion machine, plastic recycling machine" and make our company at the forefront of the industry.

We are actively committed to sustainable socio-economic development, efforts to guarantee the performance of lifting equipment, help end users improve efficiency, reduce energy consumption, promote low-carbon economic growth.

We are convinced: the future will be a globalized world. Sevenstars will be with the customer together, open cooperation, and strive to build a more efficient and integrated system, promoting trade and industry, enterprises and enterprises, China's comprehensive cooperation with the global development and inspire each industry, each company limitless opportunity and potential to promote progress in the world.

WEEE PLASTIC RECYCLING LINE

Application Scope: WEEE waste and ELV waste plastics.

Function Description: The WEEE/ELV mixed plastics after pre-washing (with a density liquid of 1.08g/cm³) were further granulated, sink-floated, washed, dehydrated and finally dried, then the material be used in the next process of electrostatic separation and silicone rubber separation.

Technical Parameters

Capacity	2-3T/H
Power	≤175kW
Worker	2-3
Occupied	240m ³
Condition	380V 50Hz
Size	L30m×W8m×H7.5m
Weight	≤25T

PP MEDICAL INFUSION BOTTLE AND INFUSION BAG PROCESSING LINE

PP医疗清洗线

Silicon rubber sorter

应用范围：

医用废塑料输液瓶和输液袋

功能说明：

医用废旧塑料回收后投入瓶袋分离机，将输液瓶、输液袋分离开，输液瓶、输液袋分别进入破碎机破碎、高速摩擦清洗、脱水后进入漂洗水槽，该过程可高效的去除输液瓶和输液袋表面的油污、胶水，标签纸等杂质。清洗后的塑料经脱水、烘干、风选、去除橡胶后即可得到纯净的PP塑料，从而达到医用废旧塑料回收再利用的目的。

Application Scope:

waste plastics infusion bottle and infusion bag for medical used.

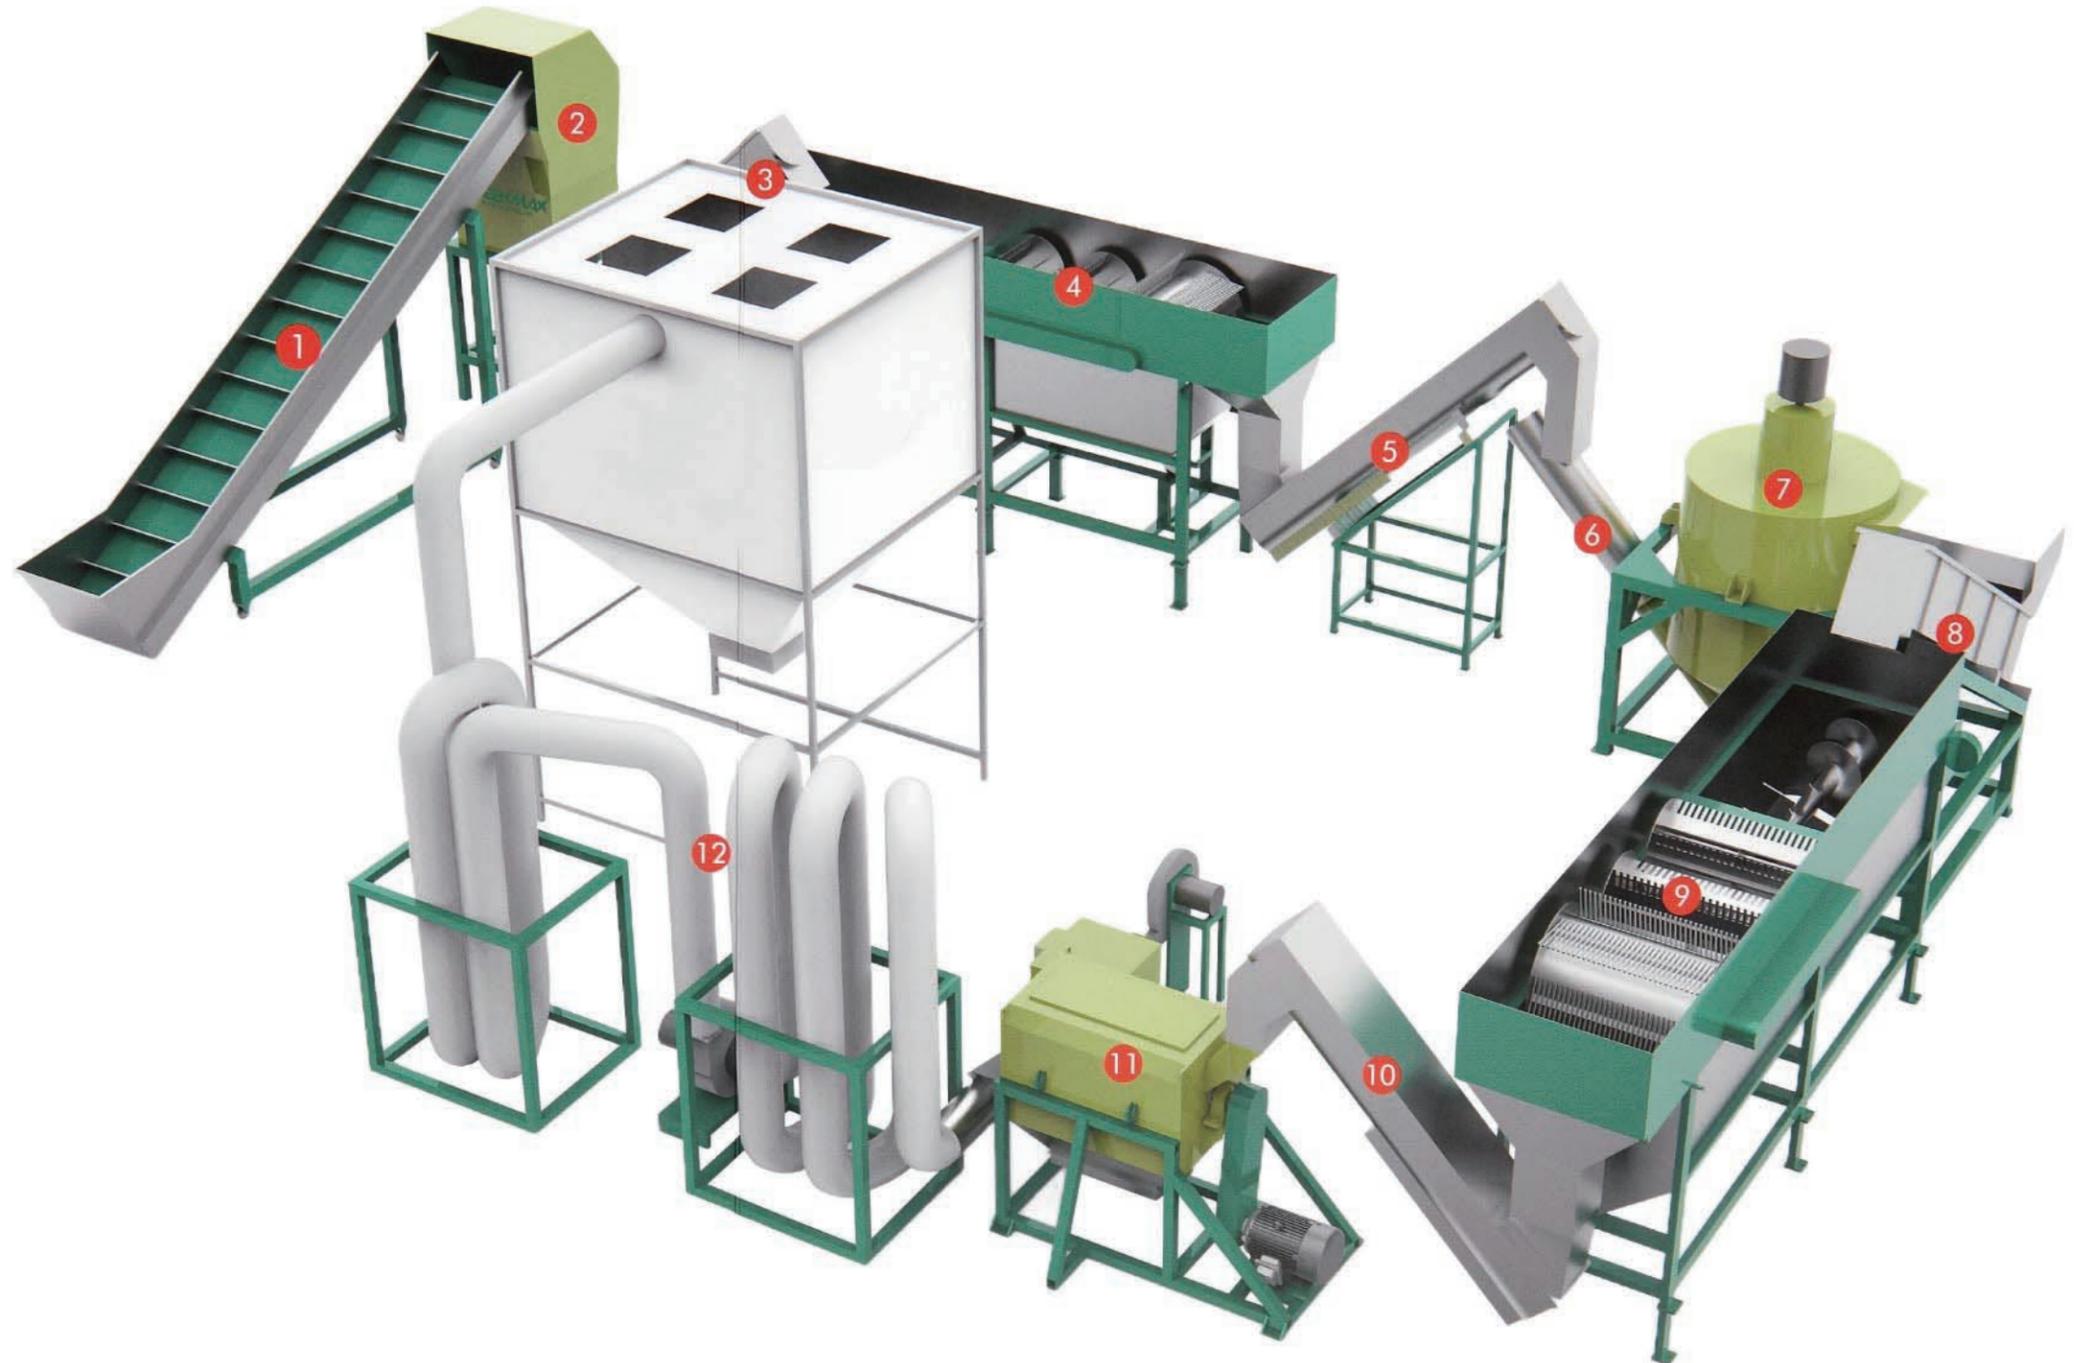

Function description:

After the medical waste plastic was collected, that will be put into the bottle & bag separator to separate the infusion bottle and the infusion bag as well. Then the infusion bottle and the infusion bag are respectively processed with crushing, high-speed friction washing, dehydrating and finally rinsing. These processes can efficiently remove the impurities such as oil, glue and label paper on the surface of the infusion bottle and infusion bag. Then the clean plastic is dehydrated, dried, separated by air flow separation, finally the rubber be removed from the plastics and get high purity PP plastic to achieve the recycling purpose of medical waste plastic.

HAZARDOUS WASTE BARREL & CONTAINER RECYCLING SYSTEM

危废包装容器破碎清洗系统

系统针对危废包装容器(HW49)进行无害化处理，使之成为可再生原料。按处理物料不同可分为以下两类:

The system is designed to deal with hazardous waste container (Hw49), making them into renewable raw material. According to different material being processed, the system can be divided into the following two categories:

A 危废金属包装容器破碎清洗系统

HAZARDOUS WASTE METAL CONTAINER RECYCLING SYSTEM

系统针对危废金属包装容器(200L以下机油桶、油漆桶、机油滤芯等)采用物理处理工艺将物料通过撕碎、磁选、团粒、清洗、干燥等工序将物料表面残留物去除，回收高纯度可再生利用原料(非危险废物)，成套系统自动化控制，安全可靠稳定，并可根据用户需求配置废气处理系统，成套系统符合环保要求。处理量1~5吨/小时。

The system can deal with hazardous waste metal container, material will be processed by shredding, magnet, crushing, washing and drying, hazardous residue and other contamination will be removed and finally you get dry, clean, renewable steel scraps. The whole system is easy to operate, efficient and low power consumption. Capacity range from 1 to 5 ton per hour.

PLASTIC WASHING & SORTING LINE FOR ABS & PP & PE 智慧型塑料分选集成系统

The system can deal with hazardous waste metal container, material will be processed by shredding, magnet, crushing, washing and drying, hazardous residue and other contamination will be removed and finally you get dry, clean, renewable steel scraps. The whole system is easy to operate, efficient and low power consumption. Capacity range from 1 to 5 ton per hour.

Performance & technical indicators

Whole line module: feeding screw, feeding conveying, tearing, rinsing and sorting, dehydration and drying, filtration circulation tank.

Application scope: household appliances/daily groceries/electronics and other fields of a wide range of hard plastics.

Designed capacity: 4-5tons/hour.

Material separation: ≥80%.

Finished products: material diameter ≤22cm-16cm

Finished product quality: cleanliness ≥95%; Water content ≤3-5%.

Circulating water: 7-8 m³ / h.

System operation: PLC control system, man-machine interface

Classified materials: submerged materials with 0° water, floating materials with 0° water

13° submerged mixture, 13° floating mixture

25° submerged mixture, 25° floating mixture

MATERIAL SORTING AND CLEANING TANK FOR ABS & PP & PE

This machine is a 25° salt water washing tank. The torn materials enter the tank for rinsing and separation. The material can flow evenly in the water tank by using the material transfer roller. The mixed metal plastics and small plastic sundries with a density of more than 1.25 are sent out through the bottom screw when they sink into the water bottom; the floating water materials are sent to the dehydrator through the screw for dehydration treatment and then to the 13° brine rinsing pool.

Technical indicators

Brine density : 25°

Length of pool : 8000mm

Width of pool : 1300mm

Height of pool : 1600mm

Capacity of pool : 18m³

Drum Number of rollers : 6PCS, diameter 800mm

Drum speed : 5-8rpm/ min, adjustable by frequency conversion

WASTE WATER RECYCLING MACHINE FOR PLASTIC RECYCLING PROJECT

The technology of dissolved air can be extensively used water supplying and releasing and the waste water processing. it can remove effectively undeposited matter with a big capacity and high efficiency, less land and widely used range. this machine is very suitable to the water processing from petroleum, chemical, papermaking, leather, printing, food and starch industry.

溶气气浮技术近年来广泛应用于给排水及废水处理中，它可以有效地去除废水中难以沉淀的轻浮絮体。处理能力大、效率高、占地少、使用范围广。被广泛应用于石油、化工、印染、造纸、炼油、皮革、钢铁、机械加工、淀粉、食品等污水处理。

SJ DOUBLE STAGE SIDE FORCE FEEDER PELLETIZING LINE SJ系列双阶强制侧喂料造粒机组

SJ series Double Stage Pelletizing Line is mainly designed for processing PE, PP rigid flake or waste film flake. The advantage of the double stage pelletizing line is better melting and the material is more clean after two filtering from screen changers. It is an ideal machine for the kinds of little bit dirty material. For screw L/D varies according to the material condition, for example, rigid material or film flake.

主要技术参数 Main technical specifications

Model 型号	Screw Diameter 螺杆直径	L/D长径比	Main Motor 主电机功率	Output 产量	Cutting Method 切割方式

	160	10	45KW		
Note	The capacity is based on the raw material. The output for rigid flake and film flake are different, as well as the material. We offer solution based on the client's actual requirements. 实际产量根据处理原料不同，会有所变化。				

SJ SERIES PP/PE/PET FILM COMPACTOR PELLETING MACHINE

优异的节能技术

机械结构: 专用于薄膜及薄片物料的螺杆结构设计, 具有优异的排气、塑化能力和节能效果

动力系统: 选用先进的永磁同步伺服电动机(MAX=315kw)直联驱动, 破碎机可选电主轴直驱驱动, 同比变频电机节能10-15%

温控系统: 采用节能型电磁感应加热系统, 加温响应速度快, 能耗低, 保温效果好

Excellent energy-saving technology

THE MECHANICAL STRUCTURE: The screw will be designed suitably according to thin film or very light and thin flakes, which insure the machine has excellent exhausting, plasticizing and energy saving effect.

THE POWER SYSTEM: it adopts the advanced permanent magnet synchronous servo motor(MAX=315kw), which is driven by the direct connection, and crusher also can choose direct drive by motor spindle, which can save about 10-15% more than converter control motor.

THE TEMPERATURE CONTROL SYSTEM: it adopts the combination of energy-saving electromagnetic induction heating system, and the heating speed is fast and also with low energy consumption and good heat preservation ability.

极佳的人机操作环境

操作: 采用PLC人机操作界面及4G物联网技术, 支持一键启动、一键停机、故障预警、远程维保等

温度: 机身采用全包覆外罩设计, 并采用优异的隔温材料和水冷却系统, 操作环境温度升小

噪音: 传动系统选用高品质静音减速机及低噪音电机直联驱动, 运行噪音低

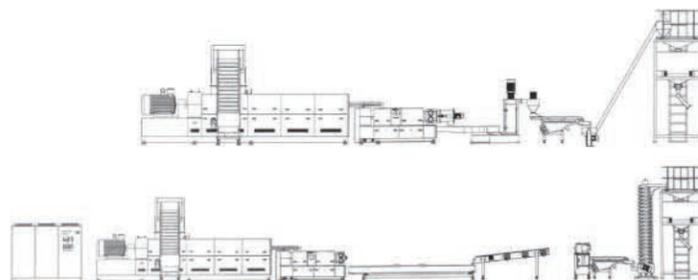

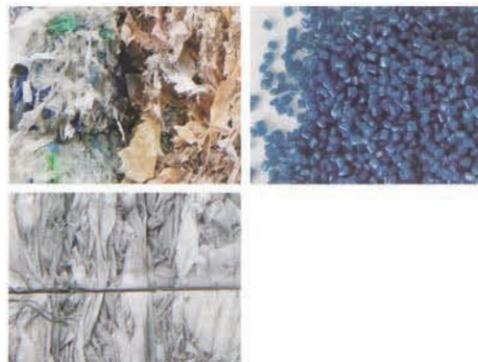

劳动强度: 换网单元可选装自动刮刀过滤器、柱式反冲洗换网器或柱式大面积换网器, 可不停机不断条换网, 劳动强度大幅降低

Excellent man-machine operation environment

OPERATION: it adopts PLC man-machine operation interface and 4G iot technology, which supports one-button start up, one-button stop, failure warning, remote maintenance, etc..

TEMPERATURE: the machine body is designed with full cover, with excellent insulation material and water cooling system, and the operating environment's temperature rise is very small.

NOISE: The drive system adopts high quality mute reducer and use low noise motor to drive directly. **THE LABOR INTENSITY:** The mesh change work unit can choose to install automatic scraper filter, column type backwash die head or column type large area die head, which can change the mesh continuously without stop the machine, and thus the labor intensity is greatly reduced.

主要技术特点

生产能力: 150-1000kg/hr

机型范围: 螺杆直径从Φ85-200mm, 根据物料特性、洁净程度的不同可设计为单阶、双阶, 根据原料不同可选配模面水环切粒或水冷拉条切粒形式

周边设备: 冷却系统、液压系统、真空系统、循环水系统、烟气回收系统等均采用模块化设计

Main technical features

PRODUCTION CAPACITY: 150-1000kg/hr.

MACHINE MODEL: The diameter of the screw is from 85mm to 200mm. According to the material characteristics and cleanliness degree, it can be designed as single stage, double stage and third-stage, and the cutting method can be die face watering cutting or pulling strip cutting method.

PERIPHERAL equipment: cooling system, hydraulic system, vacuum system, circulating water system and gas recycling system, and they are all using modular to control.

SJ SERIES OF THREE STAGE WET MATERIAL GRANULATION EXTRUSION UNIT

SJ系列三阶水料自动上料排气型挤出造粒机组

Our company produces the three-stage water automatic feeding exhausting extruding and granulating machine group, is professionally designed for broken washing PP, PE film-Unit feeding is consisted of the forced feeding unit, greatly reduces the manual labor intensity and the accident rate, and increase production at the same time. This machine set of screw barrel is processed by the special hardening has good wear resistance, high output characteristics. Third-stage unit can be arranged into "Linear" or "T" style according to the workshop space to save the space as much as possible for the customer. After two times of filtering the impurities, this unit makes the grains more solid, smooth and pure. As soon as this type of unit is presented, it is accepted by the customers. Now it is widely promoted.

DOUBLE ELBOW EVA SLIPPER & SHOES PELLETIZING LINE EVA专用型双挽式造粒机组

补充说明 Additional Remarks

针对EVA造粒日益凸显的工作量，工作时段与成本的需要，将核心部件加强，工艺改进，机器更耐用。按产量提供多种型号的选择。另提供20L小型量产，7.5L实验型机组。

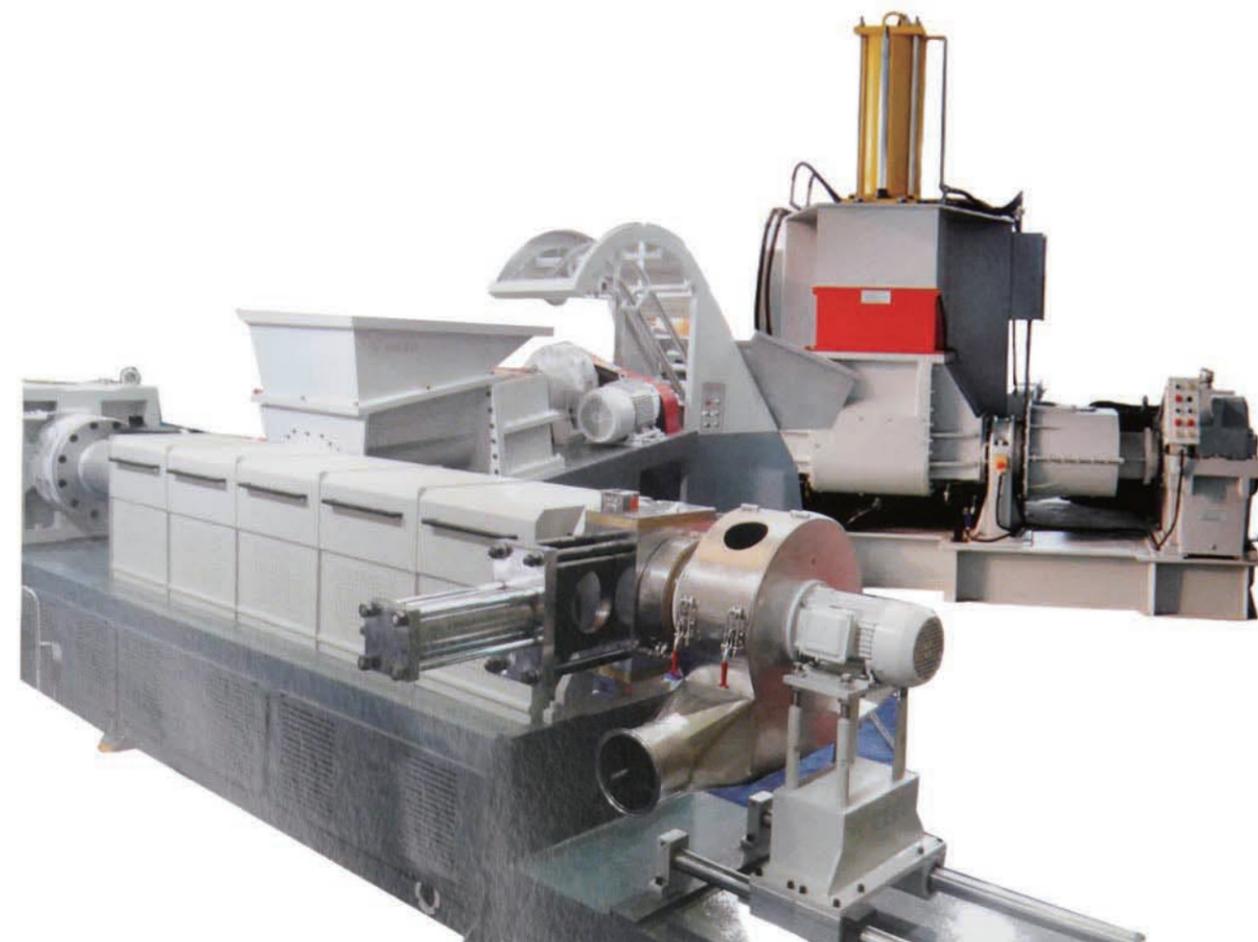

Due to the increasing workload and cost of EVA granulation, we strengthen the core components, process improvement to make machine more durable. We provide the choice of various types of production, also offer 20L minitype production and 7.5L experimental unit.

HIGH FILLING MASTER BATCH PELLETING MACHINE 高填充母粒

技术信息:

- 1.载体:以PE,PP,POE,EVA等为载体
- 2.填充料:各种填充料,如碳酸钙,硫酸钡,滑石粉
- 3.填充比例:碳酸钙,滑石粉等无机填充料填充量可达到85%-90%

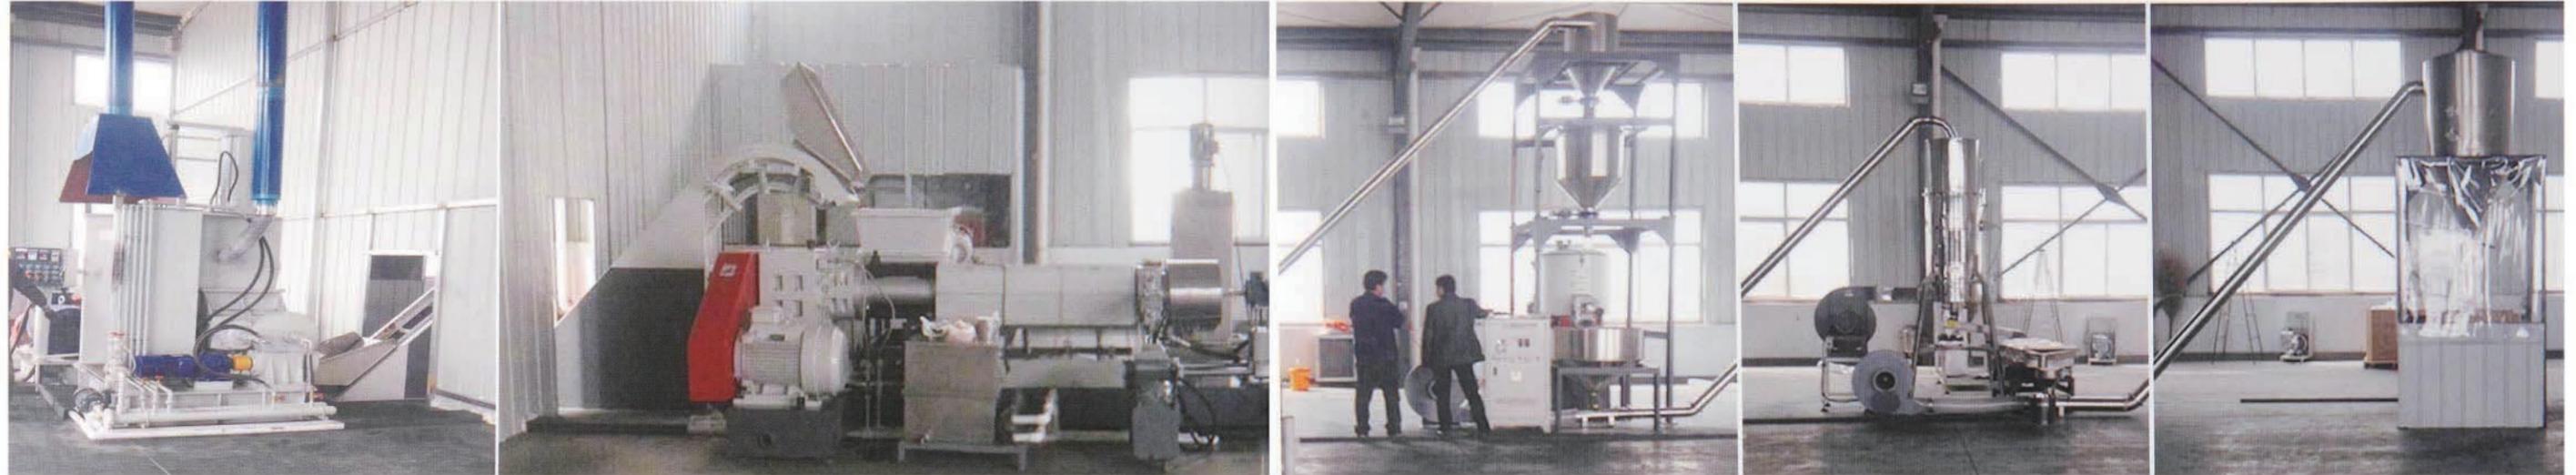

造粒工艺:密炼机-提升机-锥双强制喂料机-单螺杆挤出机-热切辅机

Technical information:

1. Carrier: PE, PP, POE, EVA etc
2. Filler: various fillers such as CaCO₃, barium sulfate, Na₂SO₄, Talc etc
3. Filling ratio: inorganic fillers like CaCO₃, Talc etc mix at 85%-90% maximum ratio.

Granulating Process: Kneader-Conveyor-Conical Forcing Feeder-Single Screw Extruder -Hot Cutting Auxiliary Machine

INNER AND OUTER SHIELD CABLE MATERIALS PELLETIZING LINE 内外屏蔽电缆料造粒线

◆造粒工艺:密炼机——提升机——锥双喂料机——单螺杆机组——水环切粒——助剂加入系统——高混机——沸腾床——震动筛——料仓

◆Granulating process: Kneader-- Conveyor--Conical Force Feeder--Single Screw extruder-- Agent adding--High speed mixer--Boiling dryer--Vibrating screen--Silo

技术特点

1、基础配方成分:树脂、炭黑、分散剂、交联剂、偶联剂及其它助剂。

2、基础工艺路线:

先上述原料准确计量加入密炼机中混合均匀后,喂入单螺杆,经单螺杆造粒。交联型产品可以在高速混合机中加入交联剂。

3、适应的产品:内外屏蔽电缆料等。

Technical Characteristic

1.the basic formula ingredients: resin, carbon black, dispersant, cross-linking agent, coupling agent and other additives.

2. basic processing route

The raw material first accurate measurement in banbury mixer mixing, feeding single screw,single screw granulation.Crosslinking products can join in the high speed mixer crosslinking agent.

3.Application: inside and outside the shielded cable material, etc.

LOW SMOKE ZERO HALOGEN CABLE MATERIALS PELLETIZING LINE 低烟无卤电缆料造粒线

Technical Characteristic

1.Basic ingredients: resin particles (Eva, PE), flame retardants (aluminium hydroxide, magnesium hydroxide, etc.), additives powder (flame retardant association effect agent, lubricant, antioxidant, etc.), fertilizer granules (silicone masterbatch, etc.), auxiliary liquid (coupling dispersant).

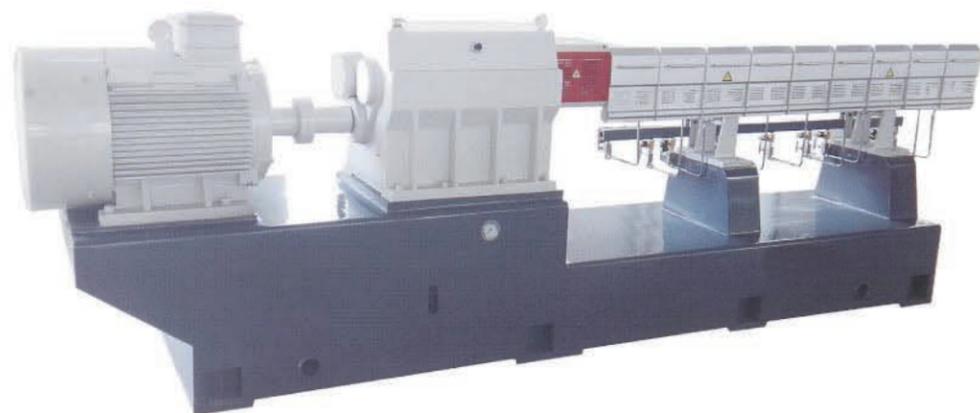

2.basic processing route:

Flame retardants and metering feed additives powder first high-speed mixer, and adding additives liquid, powder surface coupling dispersion, surface treatment after adding resin, after mixing into the mixer for mixer, the mixer evenly into double cone feeding machine, after the double order machine mixing granulation.Considering the characteristics of the material easy to moisture absorption, therefore, optimizing the air-filled keen way of granulation.

3.Application: high and low temperature low smoke zero halogen cable material,radiation crosslinking low smoke zero halogen cables, high flame retardant cable material, etc.

技术特点

- 基础配方成分:pvc树脂粉,加工油(DOP,TOTM等),填充粉体(碳酸钙等),助剂粉体(稳定剂\润滑剂等),功能粉体(流动改性剂\阻燃协效剂)
- 基础工艺路线:各原料计量喂入高混机,加工油分两次加入。将混合好的物料喂入到双阶机组(锥形双螺杆挤出机组、平行异向双螺杆挤出机组);物料在挤出机组中熔融塑化后,经过模具挤出成条状,再选择水拉条或风冷热切的造粒方式切成颗粒。
- 适应的产品:各类PVC物料。

Technical Characteristic

- Based formula ingredients: PVC powder, the processing oil (DOP, TOTM, etc.), filling powder (calcium carbonate, etc.), additives powder (stabilizer, lubricant, etc.), functional powder (flow modifier \flame retardant)
- Basic processing route
Each material measuring mixing in high speed mixer, processed oil twice to add in.The blending material is fed into two stage extruder (conical twin screw extruder, counter-rotating twin screw extruder). The material is melt and plasticizing, then become strands after die. These strands are cut into granulas by air hot cutting or water strand cutting .
- Application:Kinds of PVC compounds.

CARBON MASTER BATCH / WHITE MASTER BATCH PELLETIZING LINE

炭黑母粒/白母粒造粒线

造粒工艺

密炼机——提升机——锥双喂料机——双阶机组——风冷热切辅机

Process

PACKING SCALE

Granules scale

Model	LCS25DKT2-B
Weighing range	20-30kg/bag
Weighing speed	≤120bag/hour
Precision	±0.05kg
Sealing mode	Vacuum heat-sealing, sewing

Big bag packing scale

Model	LCS1TD-KT2-H
Weighing range	500-1200kg
Weighing speed	10-20bag/hour
Precision	±0.2%
Bag type	Big bag, jumbo bag
Application	Granules, pellets, grains, powder

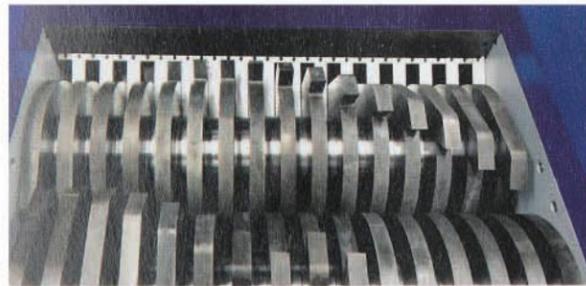

GL SERIES DOUBLE SHAFT SHREDDER GL 系列双轴撕碎机

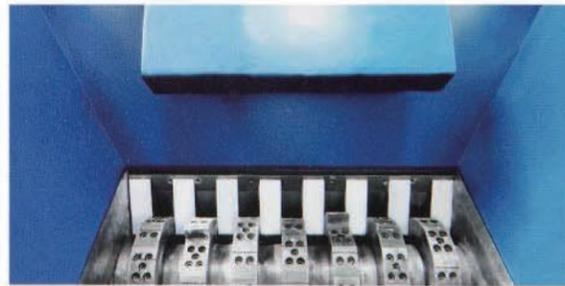

双轴撕碎机搭配单轴撕碎机和输送带，可组成简易破碎线。
Integrating a double shaft shredder with single shaft shredder and conveyer to setup ashredding system.

性能特点 Features

- Knives adopt alloy steel 42CrMo realizing heavy-duty size reduction.
- Driving torque is evenly distributed to the shaft, thanks to splined teeth and hex shaft
- Main electrical components are sourced from trusted brands such as Siemens and Schneider
- Auto-reverse system re-oriens rotor direction when motor overload & material jam

双轴机刀体(标配)，刀片厚度可选。
Standard rotor with customizable knife thickness.

可拆卸刀片，最大化减少换刀时间。
Detachable knives reduce knife replacement time significantly

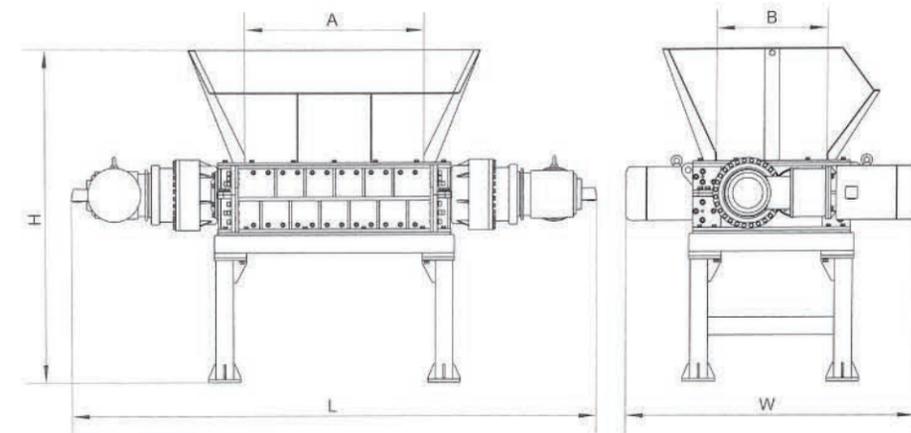

两台独立电机驱动加上高安全系数减速机产出超高扭矩
Two independent drives with gear reducers bring high torque

推料装置(可选)辅助推送物料，提高产量，
Optional to pair a vertical pusher for hollow and oversized materials.

PC SERIES STRONG PLASTIC CRUSHER

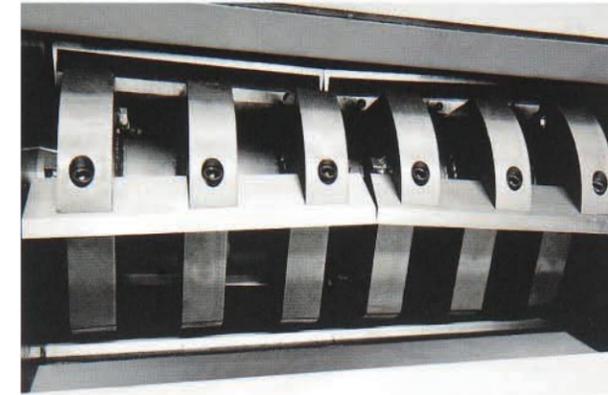

PC大型破碎机

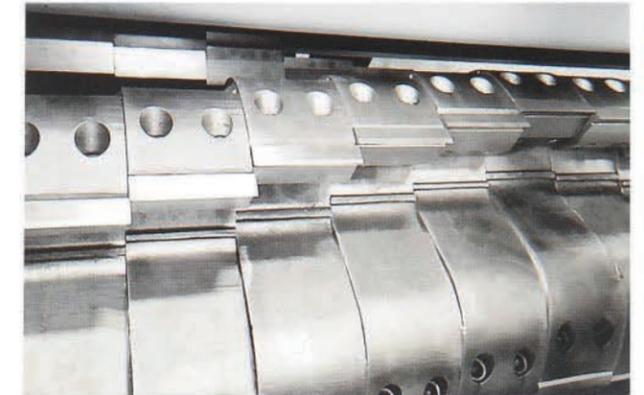

破碎机搭配撕碎机和输送带，可组建成简易破碎线。
Integrating a crusher with shredder and conveyor to set up a crushing system.

应用范围 Applications

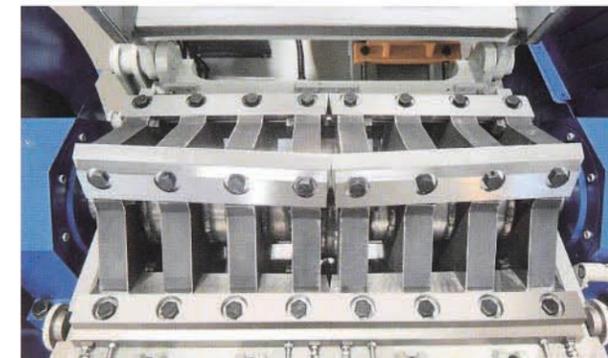

- 塑料:块、薄膜、管材、PET瓶、胶头料、注塑和挤出生产的次品等。
- Plastic lump, sheet, film, pipe, bottle, sprue, runner, reject, etc

V型刀(标配), 适用于各种塑料成型制品。
V rotor(standard), applicable for general plastic waste
动刀和定刀采用D2合金。
Rotary and counter knife adopts D2steel

C型刀辊, 多重刀片分布, 针对处理特厚和特硬的塑料。
C rotor excels in processing tough and thick plastics

外置轴承允许带水破碎。
Outbound bearing allows wet granulation

专配高效节能电机和强大动力源。
Equips energy efficient motor and powerful hydraulic drive

PVC/PET/PE/PP SOFT FILM AND HARD PIECES MULTIFUNCTIONAL ONLINE CRUSHER

主要配置特点

- 此机型特殊设计, 4排回转刀, 3排固定刀。
- 回转刀部分采用斜剪式左右交错切断粉碎, 不仅增加效率, 亦能减少电刀负载。
- 开放式设计, 筛网架使用气缸控制, 清料快捷、便利。
- 本机可配合PVC压延机使用, 可做3个入料口, 正前方手动投料, 入方可用于不良品卷料自动牵引粉碎, 上方可与压延机边料在线牵引粉碎多功能设计可为客户降低成本、减少浪费。

Performance Feature

- The model's design is special, with 4-row of rotary cutter and 3-row of fixed rotary cutter.
- Rotary cutter partly uses oblique shear type to cut into pieces, which not only increase the efficiency, but also reduce the load of electrotome.
- Open type design, screen frame uses air cylinder for control, which is quick and convenient for clearing materials.
- The model could be used with PVC casting line. It could have three material inlets. Manual feed intake from the right ahead and the inlet could be used for defective products. Materials automatic traction crushing, the upside could conduct online traction with rim charge of calendar to crushing, the upside could conduct online traction with rim charge of calendar to crush multifunctional designs to reduce cost and waste for customers.

Model	Working range of diameter	Main motor	Production capacity
HRWS-800	It can process PE/PVC pipe with diameter from 110-800mm Length : 1000-6000mm	37kw*2set	Around 800-1500kg/hour
HRWS-1200	It can process PE /PVC pipe with diameter from 110-1200mm Length : 1000-6000mm	55kw*2set	Around 2000-3000kg/hour

VERTICAL BALER 大型立式打包机

- ◆采用按钮集中控制, 可选装遥控器
- ◆上置式液压系统设置, 节省空间
- ◆液压传动, 双缸运行, 平稳有力
- ◆四面门都可以打开
- ◆双轴电机设计, 带动两个油泵, 效率更高

- ◆Centralized control buttons used, remote control operation available
- ◆Overhead type hydraulic system Settings, save a space
- ◆Hydraulic transmission, duplex operation, smooth and strong
- ◆Adopting unique to lock the door, quick, convenient and safe

HORIZONTAL BALER 卧式打包机

Cable Granulating & Copper Separating Recycling System

PCB Board Recycling

First stage of PCB board recycling granulates PCB board to 20 mesh through first wind separation system, the powder that are smaller than 20 mesh, we collect them to avoid environment pollution. The second static electric separation system separates copper and PC powder, the copper purity reaches to 70-75%. The system is completely automatic, easy to operate and convenient on maintenance.

MD-160 BLADE SHARPNER

VOCS DEODORIZATION SYSTEM

VOCS除味系統

离线式VOC除味系统
Offline voc deodorization system

特点

- 物理法除味设计、绿色环保降本;
- 集除味、干燥、均化、三功能于一体;
- 智能化控制系统, 人机界面操作简便;
- 根据产线要求可选配在线、离线式及容量。

应用范围

VOCS除味设备广泛应用于汽车材料、医疗材料(如PP、PE、PA、TPV、TPU等高分子改性材料); 通过物理法将残留在塑胶原料中的VOC脱挥发出来, 达到符合行业或厂家对产品的要求。

在线式VOC除味系统
Online voc deodorization system

Features

- Physical deodorization design, green environmental protection and cost reduction;
- Integrating odor removal, drying, homogenization, and three functions into one;
- Intelligent control system, user-friendly human-machine interface operation;
- Online, offline, and capacity options are available according to production line requirements.

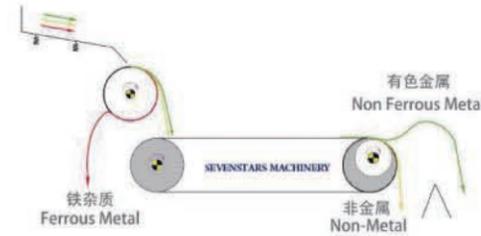

Applied range

VOCS deodorization equipment is mainly used for widely used automotive materials, medical materials (such as PP, PE Polymer modified materials such as PA, TPV, TPU, etc. By physical methods, the residual amount of VOC is volatilized to meet the requirements of the industry or manufacturer for the product;

主要技术参数 Main technical specifications

型号 Model	容量(L) Capacity	产量要求(KG/H) Production requirements	总功率(KW) aggregate capacity	外形尺寸(L*W*H) Overall dimensions
SX-VOC2000	4000L	≤500	150	按场地
SX-VOC3000	6000L	≤600	150	按场地
SX-VOC4000	8000L	≤800	225	按场地

EDDY CURRENT SEPARATOR 涡电流分选机

Eddy Current Separator using rare earth magnets arranged into a super high-speed rotor producing repelling eddy currents to separate nonferrous materials, typically used to separate aluminum, brass and copper etc non-ferrous metal from various of recyclable crushed material scraps. Widely used in plastic, glass, timber, foundry sand, solid waste, incinerator ash, electronic scrap, automobile shredder residue, shredded end-of-life domestic application etc recycling industries, can give a more valuable product.

可选装 磁滚筒 & 不锈钢分选机 Drum Magnet & Stainless Steel Separator Optional

型号 Model	给料 Feeding			处理能力 Capacity m ³ /h	总功率 KW
	皮带宽度 Belt Width	有效分选宽度 Separation With	物料大小 Material Size		
WDL-50	700mm	500mm	>1mm ²	6	4.8
WDL-65	850mm	650mm		15	5.8

COLOR SORTER FOR PLASTIC MATERIALS

Metal Separator For Extruder

The metal separator is installed at the inlet of the extruder to avoid large metal copper, iron, aluminum and stainless steel from jamming the screw, reducing the number of filter replacements, protecting the screw, improving production efficiency, and ensuring product quality.

EPS HOT PRESS

PRODUCTION CAPACITY

100-200kg per hour

EPS COLD PRESS

PRODUCTION CAPACITY

100-300kg per hour
