2022 HONEYWELL USERS GROUP AMERICAS (HUG), May 23-26, Orlando, FL

Registration is open!

The Early Bird conference registration rate of \$995 USD, ends on April 14.

Make sure to save \$ 300 USD and register before April 15.

The preferred method of payment for HUG is credit card.

However, if you have a valid SESP Training Match Fund (TMF) and there is enough fund in it: you can use the fund to register for HUG.

The same is true for A360 contracts, which may include HUG seats.

If HUG seats are available in your A360 contract, why not use those seats to participate?

Contact your Honeywell account manager for more details.

[See HUG AMERICAS web info.](#)

Global Honeywell Academy e-learning Subscription Services

Honeywell Academy is at the forefront of digital learning. Learners are provided access to a variety of training formats and tools throughout their training journey. Our Asynchronous Training (AT) and Modular Training (MT) courses are becoming ever more popular with an engaging user interface, quizzes, hands-on labs, and real-time support from Honeywell Training Specialists.

Honeywell Academy is pleased to offer our entire library of self-paced E-learning training courses to customers as a part of annual subscription services.

[HONEYWELL AUTOMATION SUBSCRIPTION SERVICE](#)

- Over 150 self-paced courses with more than 1,100 hours of learning material
- Covers Experion PKS, Field Device Manager, Trace, ControlEdge, HC900, Experion MX, QCS, and more product lines
- It can be purchased in convenient packs of either 1, 5, 10, 15, or 20 licenses

[HONEYWELL INDUSTRIAL SUBSCRIPTION SERVICE](#)

- Over 650 courses
- Covers Operations, Maintenance, and Environmental Health & Safety (EH&S) topics
- It can be purchased in convenient packs of either 1, 5, 26, 51, or 101 licenses

BENEFITS

- Cost savings and more effective
- No need to pay for each course separately, and you can choose the training course when you need it for maximum flexibility
- Any new releases in that subscription year will be automatically added to the pack without extra cost
- When Honeywell Academy develops new AT/MT courses, they will also be
- added to the subscription pack without any extra cost
- Some exclusions apply

Please contact your local Honeywell Account Manager or Field Service Manager for details.

CLM System Software, APP based CLM - Phase-Out Announcements

CLM is repeatable special product used as AM based and CLM based CLM.

- ✓ The AM-based CLM was introduced in 1996 and has been phased-out in 2016.
- ✓ The APP-based CLM was Introduced In 2000.

Effective April 01, 2022 the following CLM related specials will be phased-out:

- ✓ APP based CLM
- ✓ APP based CLM software R200.2 (functional SW introduced in July 2012)
- ✓ AM based CLM software R360.12 (functional SW introduced in January 2002)

Product lifecycle phases and software support durations are defined by the Standard Product Support Guide as per Customer Resource Manual Tab PD23.

Product Withdrawal Announcement: Safety Manager - FC-TSPKUNI-1624

Overview

This is a product withdrawal notice for the Safety Manager Field Termination Assembly (FTA) FC-TSPKUNI-1624.

Due to obsolescence of components, the FC-TSPKUNI-1624 is no longer available and is replaced by the FC-TSPKUNI-1624R.

Withdrawal Date

The FC-TSPKUNI-1624 is withdrawn from the Safety Manager product line immediately.

Reasons for Withdrawal

The FC-TSPKUNI-1624 has components which are obsolete.

Parts Ordering

The FC-TSPKUNI-1624 will not be produced and is not available from stock anymore. The obsolete FC-TSPKUNI-1624 is replaced by the new FC-TSPKUNI-1624R.

Product Summary

Current withdrawn parts

The table below lists the FTA that has been withdrawn:

SAP material number	Rev	SAP Material Description
FC-TSPKUNI-1624	10	SM RIO SAFE FTA KNIFE, 3-WIRE,24VDC,16CH

Replacement

Replacement for withdrawn FC-TSPKUNI-1624

The table below lists the replacement for the withdrawn FTA:

SAP material number	Rev	SAP Material Description
FC-TSPKUNI-1624R	10	SAFETY UIO FTA KNIFE,3-WIRE,24VDC,16CH,R

The FC-TSPKUNI-1624R is pin-to-pin and backwards compatible with the FC-TSPKUNI-1624.

Ordering & Delivery

Ordering & Order Placement

Orders need to be placed via your regional HPS Hubco or your local HPS ISLC.

Lead Time

Normal estimated lead time is 8 weeks.

Questions & Contacts

Should you have any further questions, do not hesitate to contact
Honeywell Safety Management Systems
Offering Management Safety Systems

Lifecycle Announcement – Da Vinci Quality Control System Model 4000 O-Frame Scanners

Legacy parts support will be provided until the end of 2029 for Da Vinci model 4000 scanners which have been upgraded with a model Q4610-00 or Q4610-50 Universal Precision Measurement Processor (UPMP). This applies to the following scanner models sold between 1999 and 2012: 4000, 4000-IPMP, 4000-10, 4000-20, 4000-21, 4000-MX, 4000-RPMP, and 3-4000-GH.

Without the UPMP upgrade, these scanners will be dependent on obsolete components which can no longer be supplied as spare parts, and their ongoing support and/or operation cannot be guaranteed.

Please contact your Honeywell Account Manager to discuss how to best migrate your specific Quality Control System configuration to Legacy or Full support solutions.

Coaxial TPN Parts support and Last Time Buy notification

In System HINTS In 2021, Honeywell notified that all TPN based coaxial nodes will be moved to Phase-out lifecycle phase on December 31, 2025 and supported by early Last Time Buy announcement for impacted parts.

For migration planning of the coax Infrastructure, the following shall be considered:

- September 2021 - Coaxial parts Last Time Buy (LTB) opening
- October 1, 2021 - June 30, 2025 - parts ordering and supply remains unchanged for spares and failure replacements.
- July 1, 2025 - December 31, 2025 - Exchange basis for TPN coax parts orders for failure replacements.
- June 30, 2025 - closure of LTB orders acceptance and spare parts orders
- No later than December 31, 2025 - LTB and spare parts orders shipped to all Customer sites.
- January 1, 2026 - TPN coax parts removal from all P2 Parts Management contracts.
- January 1, 2026 - no replenishment for TPN coaxial parts for P1 Parts Management contracts after usage.

To protect our customers' automation investments, Honeywell developed robust, field-proven, non-disruptive UCN/LCN control modernization strategies. [EHPM Solutions](#), [Experion LCN](#), and C300PM offerings that retain full UCN/LCN functionality, leverage Experion Fault Tolerant Ethernet (FTE), and preserve your plant's control applications and configurations.

Please work with your account team to develop committed migration approaching the deadlines.

For customers willing to purchase impacted coaxial parts in advance , HPS created a list subject to Last Time Buy (LTB).

End of Sale Announcement – 19” Display for Legacy Honeywell Console Furniture

Global supply chain challenges have significantly impacted access to computing equipment and technology used in legacy computing environments. Technology producers are prioritizing materials and production towards modern form factors and offerings, and it has become increasingly difficult to procure components which are no longer widely used in the market.

Due to the inaccessibility of a suitable display from third-party suppliers that meet the requirements of Experion PKS®, the 19” form factor display is no longer available for sale.

Effective immediately, the following model numbers, kits and part numbers utilizing the 19” display type will be phased-out. The model numbers affected include but may not be limited to:

Model Number	Description
TP-FPT191	TOUCH DISPLAY 19" DESKTOP
TP-ZFPCL1-100	UPG FPD LOWER TIER CLASSIC OEP
TP-ZFPCLT-100	UPG FPD LOWER TIER CLASSIC OEP
TP-ZFPCN1-100	UPG FPD LOWER TIER CLASSIC IKB
TP-ZFPCNT-100	UPG FPD LOWER TIER CLASSIC W/TS IKB
TP-ZFPCU1-100	UPG FPD UPPER TIER CLASSIC
TP-ZFPCUT-100	UPG FPD UPPER TIER CLASSIC W/TS
TP-ZFPZNT-100	UPG KIT Z-CNSL 19IN FPD NO TS
TP-ZFPZT1-100	UPG KIT Z-CNSL 19IN FPD WITH TS

Customers with 19” display requirements are encouraged to contact Honeywell Certified Recycled Parts to inquire about available inventory.

Platform End of Sale Announcement – Dell Server and Thin Client Platforms

The following Dell server and thin client platforms will transition to End of Sale status effective May 6, 2022. The affected platforms include the following model numbers and their associated kits:

Model Number	Description	Successor Platform
MZ-PCSV66	SERVER HW DELL R240XL STD RAID1 RACK	Dell R250XE
MZ-PCSV67	SERVER HW DELL R340XL PERF RAID5 RACK	Dell R450

TP-THNCL5-400	RPS 5070E HEXA VID THIN CLNT ORION CNSL	Pepperl+Fuchs BTC12
TP-THNCL5-600	5070 EXT DESKTOP-UNIV THIN CLIENT OS	Pepperl+Fuchs BTC12
TP-THNCL5-700	5070 EXT ICON-UNIV THIN CLIENT OS	Pepperl+Fuchs BTC12
TP-THNCL5-800	5070 EXT Z EZ CL-UNIV THIN CLIENT OS	Pepperl+Fuchs BTC12
TP-THNCL5-900	5070 EXT ORION - UNIV THIN CLIENT OS	Pepperl+Fuchs BTC14

Model numbers for the successor platforms will be communicated in the May 2022 HINTS newsletter.

Note: Successor platforms for dual-screen and quad-screen thin client platforms are expected to be available for sale in May 2022. A platform for thin clients requiring up to six displays is intended for Honeywell release in Q3 2022; please contact your Honeywell account team for details and project requirements.

Experion Compatibility

SIT Version	Supported Experion Version
R200.1	R301, R310, R400 and R430

R6xx	R 400.8	R300.1
R7xx	R5xx	R300.1

What is the System Inventory Tool and why is it needed?

Overview

The SIT provides a comprehensive system inventory documentation solution to support Honeywell's contract renewal process. The tool enables customers to complete their yearly contract renewal online through an automated system, better manage risk, prepare for any migrations, and ensure compliance and continuous evolution of their control system.

After the data is collected, it is uploaded to the System Inventory Tool portal, available at <https://process.honeywell.com>, go to your account and select System Inventory Portal as shown in the instructions in above.

The SIT collects asset data, which is then hosted in a secure Honeywell data center where the customer can view all their control system asset information (both hardware and software) through the System Inventory Portal. And, best of all, the tool is provided free of charge by Honeywell for all contracted and non-contracted sites and does not require an SESP contract or Assurance 360 service agreement.

Automated online contract renewals and more

The SIT was developed to support online contract renewals. Gone are the days of the laborious task of manually reviewing contract renewal worksheets, trying to track changes via emails and phone calls,

and providing results in a timely manner. No more lost notes or questions such as, “What did we do last year?” All updates and notes regarding asset quantities will be captured in the tool and carried forward year after year, making future contract renewals faster and easier.

But contract renewals are just once a year—what else can you do with the tool?

Better management of risks

With the SIT, users are able see all control system assets by each MSID in the Honeywell System Inventory Portal. With this view, product support status is shown for each asset. Do you know if your control system is using outdated equipment or assets, and is no longer supported by Honeywell? Finding answers like this is just a mouse click away in the portal.

When you can see all equipment in a single view via the online portal, you know exactly what hardware and software are running, what is outdated and where improvements could be made—thus better managing risk.

Compliance and continuous evolution of control systems

With the asset topology feature found in the System Inventory Portal, users have insight into the hardware components in each control system, thus avoiding lengthy delays to gather the right information when the system needs to be supported or expanded.

Today, control systems are more complex than ever before and there is limited information on how the different components need to interact. When the entire system can be visualized in one view, it increases awareness that leads to better decision-making.

Support for migrations

Customers have a budget for a migration, and in many cases, it’s “use it or lose it.” So, how will they know where best to invest in their control system?

As a user, can you quickly review every MSID design, topology, and product support status for every asset? If you’ve uploaded your inventory asset data file to the System Inventory Portal, all this and more are just a mouse click away. And did we mention it’s free? That’s right—Honeywell offers this to all our customers at no cost. No contract or service plan of any kind is required.

Quickly locate assets

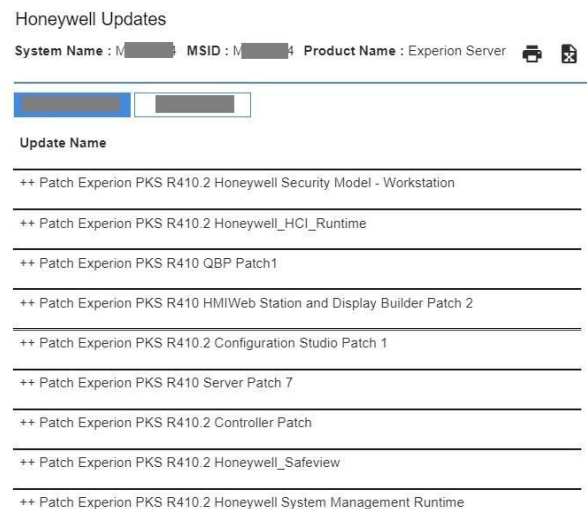

All assets are listed by Site > MSID and user-defined system names, and because each system name is assigned to its respective MSID, finding systems is easy—even if you don't know the MSID name.

What can collected asset data tell you?

Keeping track of the patches and updates installed on servers and stations can be a time-consuming task. It requires logging into each server or node and checking through the control panel to see which patches and updates have been installed.

Now, if you’ve run the SIT and uploaded an asset inventory file to the portal, just click on the server or console station and a complete list of all installed applications, patches and updates will be displayed in an easy-to-read table.

Need to find out which version of boot firmware is installed on a C300 controller? Just click on the MSID, select the controller and a table will display everything you need to know. Want even more

Honeywell Updates

System Name : M... MSID : M... Product Name : Experion Server

++ Patch Experion PKS R410.2 Honeywell_Safeview
++ Patch Experion PKS R410.2 Honeywell System Management Runtime

flexibility? Export the data to an Excel spreadsheet and sort it or create a pivot table for convenient viewing.

What data does the tool collect?

The SIT is designed to capture details of the existing system hardware and software versions, including servers, stations, controllers, I/O modules, node details, installed applications, and switch models.

How can you view your data?

The System Inventory Portal allows customers and certain Honeywell account managers to see their account asset data. Within the portal, users can see all servers, stations, controllers, nodes, and switch hardware, as well as detailed information about each. Depending on which asset they're viewing, they can see the serial number, F/W, BIOS, installed software, support status, and much more.

To access the portal, go to honeywellprocess.com/support and login with the same credentials used when you registered.

Not registered? No problem! Registration is free and takes less than a minute. Once you are registered, login and select the Support tab, then select the System Inventory tab.

Who can see your data?

All inventory data is viewable by only the customer, the customer's account manager, and Honeywell GTAC. In the event you call for support, GTAC can quickly obtain needed information such as F/W version, BIOS version, hardware rev, etc. No one else can ever see the data—not even other Honeywell employees.

What data is collected?

When you log into the System Inventory Portal, you will see a list of sites. Select a site and there are three icons: Licensed Software, Shipped Hardware, and Inventoried Assets.

Licensed Software	Shipped Hardware	Inventoried Assets
List of all licensed software shipped by Honeywell to the customer. Includes TPS BLDR, EBR, Experion PKS, GUS, PHD, and DOC 3000 licenses.	A complete list of every piece of hardware shipped by Honeywell to the customer, sorted by most recently shipped. Includes product part number, description, serial number, and date shipped.	Comprehensive list of all assets on each control system. Includes servers, stations, controllers, LCN nodes, and switches.

Note: Software releases not listed in the table are in “Phased Out” lifecycle status. The HPS Product Support Guide for Control, Safety and Monitoring Systems is available for download following link below

[HPS PRODUCT SUPPORT GUIDE FOR CONTROL, SAFETY AND MONITORING SYSTEMS](#)

Definitions:

“Software Package” means any HPS software product developed for the specific functional release of system software.

“Standalone Software” means any HPS software product developed for independent operation from a system software functional release.

“System Software” means machine-readable data and executable programs used to define the functionality of the HPS control system and standard hardware products, but does not include firmware, operating system, application software or other software products.
