### Schematic diagram of the installation guide

- 1. Install the electrostatic sticker**  
Install the electrostatic sticker on the Windshield in the dotted area as shown in the figure,avoid the edge of the glass and select a smooth and clean area on the glass for installation,Please wipe the glass clean before installation, and squeeze the air bag between the static reduction sticker and the glass during installation.
- 2. Install the TF card**  
Insert the TF card into the recorder card slot  
【Note 】 Please use a high-speed TF card (Class 10 orabove)(up to 128GB)
- 3. Connect the power cord**  
Connect the power cord to the power connector of the recorder,Gently pull the power cord to ensure that the power cord is firmly connected to the interface.

### Schematic diagram of the installation guide

- 4. Recorder installation**  
Hold the base of the bracket upright, facing the windshield. Peel off the protective film of the high-temperature adhesive at the base of the bracket and paste it into the dotted frame of the electrostatic sticker. Press the base of the bracket by hand to make sure that the adhesive is in close contact with the electrostatic adhesive.
- 5. Cabling and connecting the power supply**  
As shown in the figure, arrange the power cord along the top of the windshield, the A-pillar, and the storage box of the passenger seat near the cigarette lighter, connect the car charger, and insert the cigarette lighter.  
Prompt:  
\* Use the cable crowbar in the box to bury the power cord under the A-pillar sealing strip.  
\* The location of the cigarette lighter may be different for different vehicles, and the picture is for reference only
- 6. Tune and test**  
\* Start the engine and check if the machine is installed correctly.  
\* The recorder is connected to the APP when it is turned on, and the APP previews the level of the screen and observes the front AB pillar as the reference point to adjust the angle.

### Precautions

**Please read all precautions and online guides before using this product to ensure proper and safe use.**

- This product is a driving assistance product for the purpose of recording the external image of the vehicle, and does not have the function of ensuring the user's driving safety. The Company has nothing to do with the Company for any damage caused by product failure, loss of information, driving accident Please read all precautions and online guides before using this product to ensure proper and safe use, caused by operating this product, or any losses caused by the user during the use of this product.
- Due to differences in vehicle conditions, driving styles, driving environments, etc., some functions of this product may not be able to be used normally. Power failure, use in an environment beyond normal temperature and humidity, collision, etc., may cause the recording to not proceed normally, and this product does not guarantee that all videos will be completely saved under any circumstances. The driving video recorded by this product is for reference only.
- Please install this product correctly, do not block the driver's line of sight, do not block the airbag, otherwise it is easy to cause product failure and personal injury.
- Please use the car charger, power cord and other accessories that are standard with this product to avoid use failures caused by inconsistent specifications. The company is not responsible for any damage caused by the use of non-standard car chargers and power cords.
- The device should not be subjected to water droplets or splashes, please keep the device dry to avoid causing battery failure.
- Do not subject the device to strong shocks or vibrations that could damage the device, which could cause malfunction or unusability.
- Do not use chemical solvents or detergents to clean this appliance.
- Please keep this product away from strong magnetic fields, which may cause damage to the device.
- It is forbidden to use this product in a high temperature environment above 140° F. and a low temperature environment below -4° F.
- After the device works for a while, the case temperature will rise, please touch it carefully.
- Please use this product to the extent permitted by law.

### FCC

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

This device complies with part 15 of the FCC rules Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and  
(2) This device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator & your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
