Schematic diagram of the installation guide

1. Install the electrostatic sticker

Install the electrostatic sticker on the Windshield in the dotted area as shown in the figure,avoid the edge of the glass and select a smooth and clean area on the glass for installation.Please wipe the glass clean before installation, and squeeze the air bag between the static reduction sticker and the glass during installation.

2. Install the TF card

Insert the TF card into the recorder card slot

【Note】 Please use a high-speed TF card (Class 10 or above)(up to 128GB)

3. Connect the power cord

Connect the power cord to the power connector of the recorder.Gently pull the power cord to ensure that the power cord is firmly connected to the interface.

05

Schematic diagram of the installation guide

4. Recorder installation

Hold the base of the bracket upright, facing the windshield. Peel off the protective film of the high-temperature adhesive at the base of the bracket and paste it into the dotted frame of the electrostatic sticker. Press the base of the bracket by hand to make sure that the adhesive is in close contact with the electrostatic adhesive.

5. Cabling and connecting the power supply

As shown in the figure, arrange the power cord along the top of the windshield, the A-pillar, and the storage box of the passenger seat near the cigarette lighter, connect the car charger, and insert the cigarette lighter.

Prompt:

* Use the cable crowbar in the box to bury the power cord under the A-pillar sealing strip.

* The location of the cigarette lighter may be different for different vehicles, and the picture is for reference only

6. Tune and test

* Start the engine and check if the machine is installed correctly.

* The recorder is connected to the APP when it is turned on, and the APP previews the level of the screen and observes the front AB pillar as the reference point to adjust the angle.

06

Mobile APP download

1. For the first time to use the recorder, please download the APP software with your mobile phone

2. After starting the car to turn on the recorder into working mode, find the WIFI name starting with

* FC_XXXXX * in the phone settings, enter the password 12345678 connect.

3. After the connection is completed, enter the APP, the time of the recorder will be synchronized with the time of the current mobile phone, and the video files and photo files on the TF card will also be synchronized to the APP, and the files can be browsed and deleted. Whether you need to format the TF card on the APP, you need to determine whether the TF card files need to be saved. (Be sure to format it for the first time you use it on the product, and format it once or twice a month on a regular basis)

Tips: When formatting the TF card, please back up your important videos or photos first to avoid the loss of important files.

07

Precautions

Please read all precautions and online guides before using this product to ensure proper and safe use.

- This product is a driving assistance product designed to record external images of vehicles and does not have the function of ensuring user driving safety. During the use of this product, any driving accidents or losses caused by product malfunctions, information loss, or operation of this product are not related to our company. Please read all precautions and online guides before using this product to ensure proper and safe use.
- Due to differences in vehicle conditions, driving styles, driving environments, etc., some functions of this product may not be able to be used normally. Power failure, use in an environment beyond normal temperature and humidity, collision, etc., may cause the recording to not proceed normally, and this product does not guarantee that all videos will be completely saved under any circumstances. The driving video recorded by this product is for reference only.
- Please install this product correctly, do not block the driver's line of sight, do not block the airbag, otherwise it is easy to cause product failure and personal injury.
- Please use the car charger, power cord and other accessories that are standard with this product to avoid use failures caused by inconsistent specifications. The company is not responsible for any damage caused by the use of non-standard car chargers and power cords.
- The device should not be subjected to water droplets or splashes, please keep the device dry to avoid causing battery failure.
- Do not subject the device to strong shocks or vibrations that could damage the device, which could cause malfunction or unusability.
- Do not use chemical solvents or detergents to clean this device.
- Please keep this product away from strong magnetic fields, which may cause damage to the device.
- It is forbidden to use this product in a high temperature environment above 60℃ and a low temperature environment below 20℃.
- After the device works for a while, the case temperature will rise, please touch it carefully.
- Please use this product to the extent permitted by law.
