

Physical Layout Template Usage Guide

1. Prepare the PV array wiring drawing, which must include the string number and the corresponding string position. The first RSD of each string is installed starting from the positive of the string, and the QR code of RSD should be pasted on QR Code Template in sequence.

(Note: For all strings, the first RSD must start from the positive terminal, and the last one should be connected to the negative terminal.)

PV Array Wiring Diagram

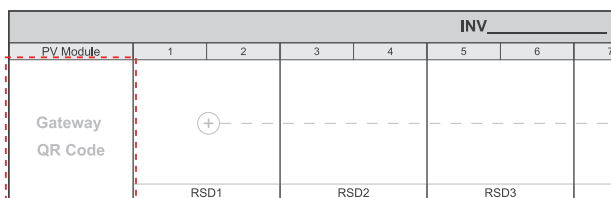

RSD no.

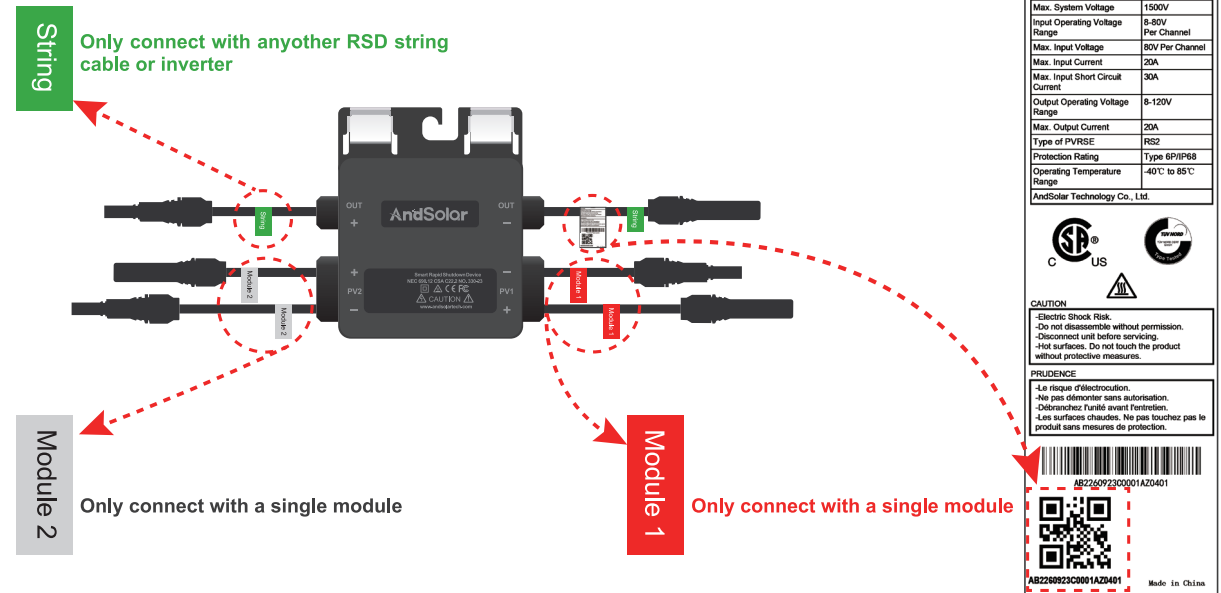

String no.

2. Paste the QR code of the Gateway (ADCU) to the front of the corresponding string on the QR code template.

(Note: Each gateway has at most 20 QR code stickers)

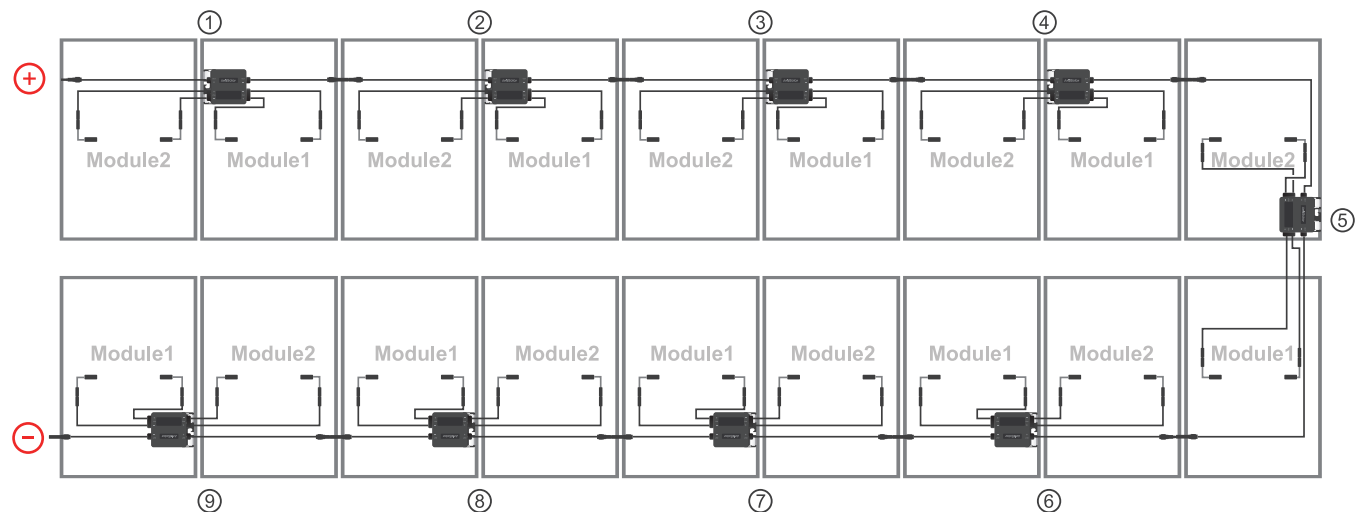

3. Please peel off the QR code from the RSD label and stick it into the corresponding position on the QR code template.

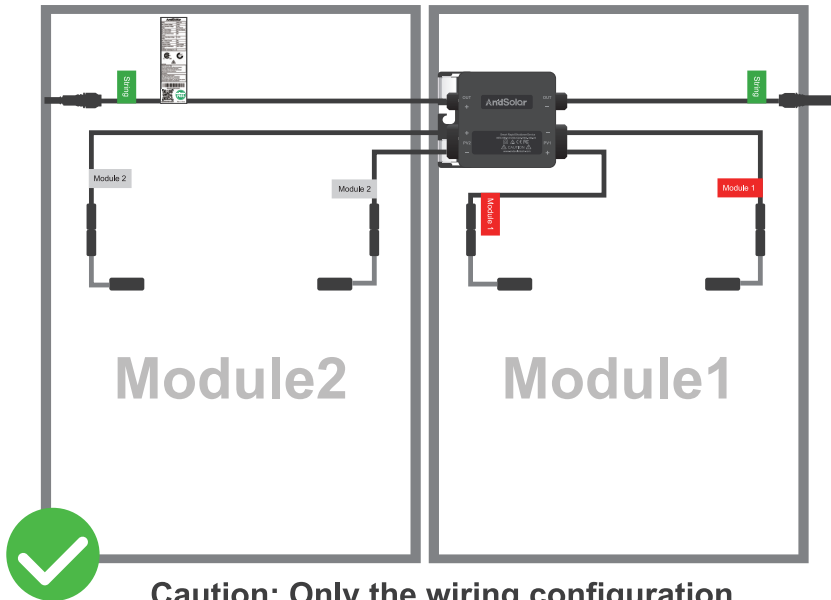

4. PV String Arrangement Sample

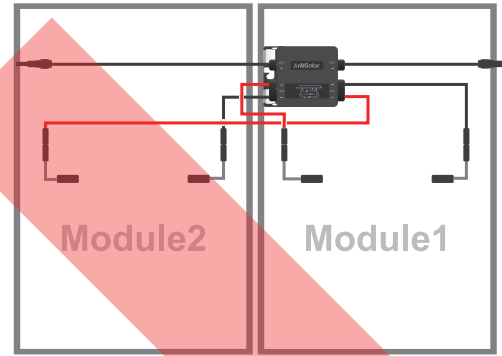

RSD No. ① should be installed starting from Positive(+) terminal, with the final RSD ending at the Negative(-) terminal.

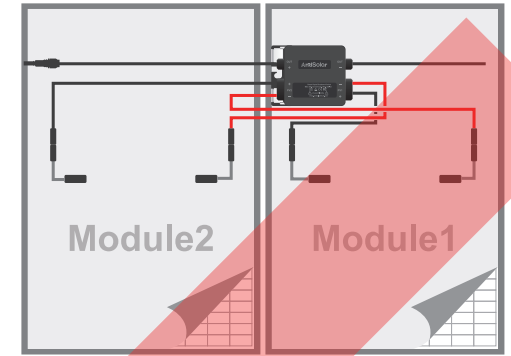

Warning: Incorrect wiring may result in serious damage.

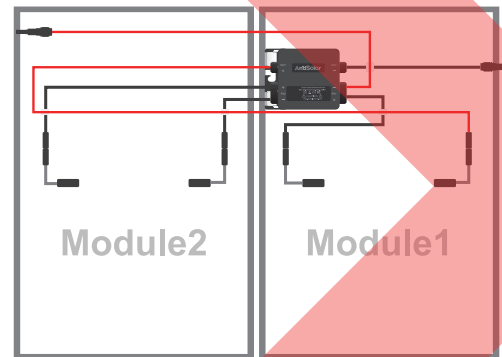

Caution: Only the wiring configuration shown above is correct.

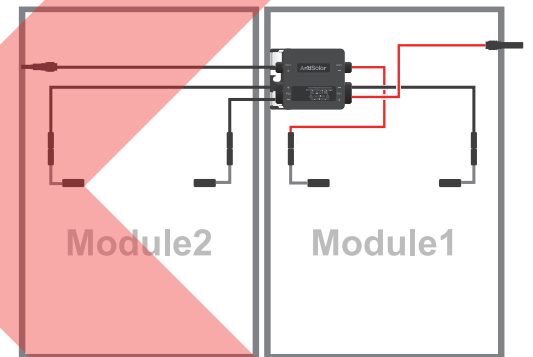

① Module1+ and Module2+ reversed

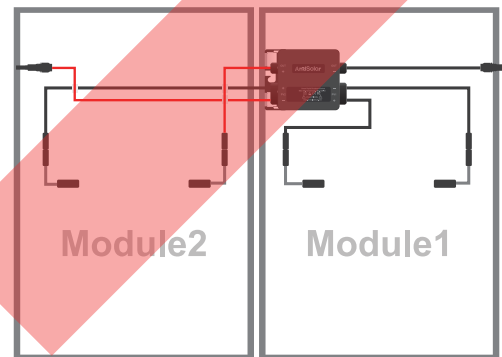

② Module1- and Module2- reversed

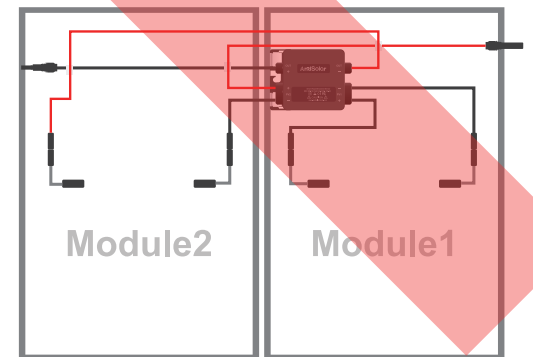

③ Module1- and OUT+ reversed

④ Module1+ and OUT- reversed

⑤ Module2- and OUT+ reversed

⑥ Module2+ and OUT- reversed

Note: Damage to the RSD caused by incorrect wiring is not covered under the Andsolar warranty.
