1 Taking measurements

This process is carried out in the traditional manner, indicating the dimensions on the drawings.

2 Manufacture of the FOXYGEN S stretch ceiling

Each Stretch Ceiling is made to measure by in-house designed computers, with a choice of over a hundred colors and a dozen textures. Cutting and assembly welding is conducted with the absolute millimeter precision. A standard ceiling can be dispatched from 1-10 days, by rapid delivery service.

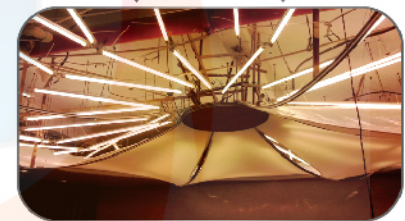

3 Fitting profiles

On site, the peripheral structure is set in place by mechanical means(pegs, screws, stapling) on the wall or ceiling. FOXYGEN has developed some highly multi-variant profiles, with a limited number of options: in this way, ordering, stocking and installation are considerably simplified.

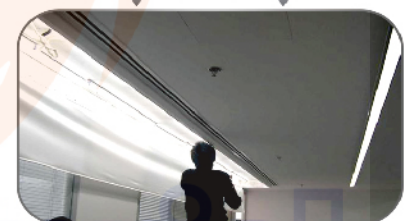

4 Fitting accessories

Finally, the details are seen to: posts, columns, integrated spotlights, chandeliers, LED systems, ventilation, sprinklers...Custom accessories simplify installation and guarantee perfect performance.

5 Installation of FOXYGEN Stretch ceiling film

Prior to installation, the thermo-expandable Stretch Ceiling is made supple by slightly raising the temperature of the surroundings for the time needed to lock the anchor into the profile. The Stretch Ceiling is automatically tensed as it cools, thanks to the thermo-retractable design. The ceiling remains firm with no problems. The site work is completed, with no noise, damage, or rubbish.

6 Removal for renovation and other work

Both installation and removal of the Stretch Ceiling are straightforward: no demolition or finishing when you need a new system, safety installation or IT network for example.

From the technical FOXYGEN or the aesthetic point of view multiplies the benefits

1. An infinity of creative possibilities

- ›› an exceptional choice of colors and performance qualities
- ›› creation of horizontal, vertical or inclined surfaces
- ›› creation of curves and volume
- ›› creative mastery of light effects: diffusion, depth, reflections...
- ›› adaptable to all styles of architecture

2. Rapid assembly and fitting, a clean site

- ›› simple preparatory work, with no removal necessary
- ›› fitting and assembly in a few hours
- ›› a dry working site, no smell, no dust
- ›› no drying required
- ›› premises immediately available

3. Perfect for new build and for renovation

- ›› masks all faults in pre-existing ceilings: cracks, ducts, cables...
- ›› no risk of cracking
- ›› no demolition time required
- ›› return to a perfect surface
- ›› additional comfort both from an acoustic and heat point of view
- ›› extremely rapid set up with no removal necessary

4. Extra comfort

- ›› improvement of temperature comfort by means of insulating cushion of air
- ›› results guaranteed in association with thermal or acoustic insulation
- ›› additional acoustic comfort, a warm, protective atmosphere
- ›› creation of upper space acoustic quality with perforated Stretch Ceiling
- ›› visual comfort, increase in space, a feeling of well-being
- ›› antistatic

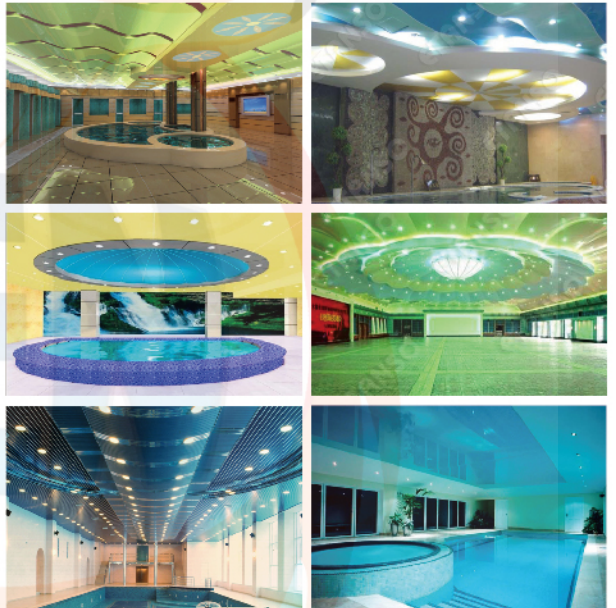

5. Respect for the environment, today and tomorrow

- » Stretch Ceiling and the profiles are 100% recyclable, making use of existing channels
- » non-toxic materials conforming to international standards
- » longevity
- » low transport volumes and weight
- » manufacture: economical energy use
- » no painting required, minimal maintenance
- » guaranteed free of heavy metals, in accordance with EU standards

6. Fire-and-water resistant and durable

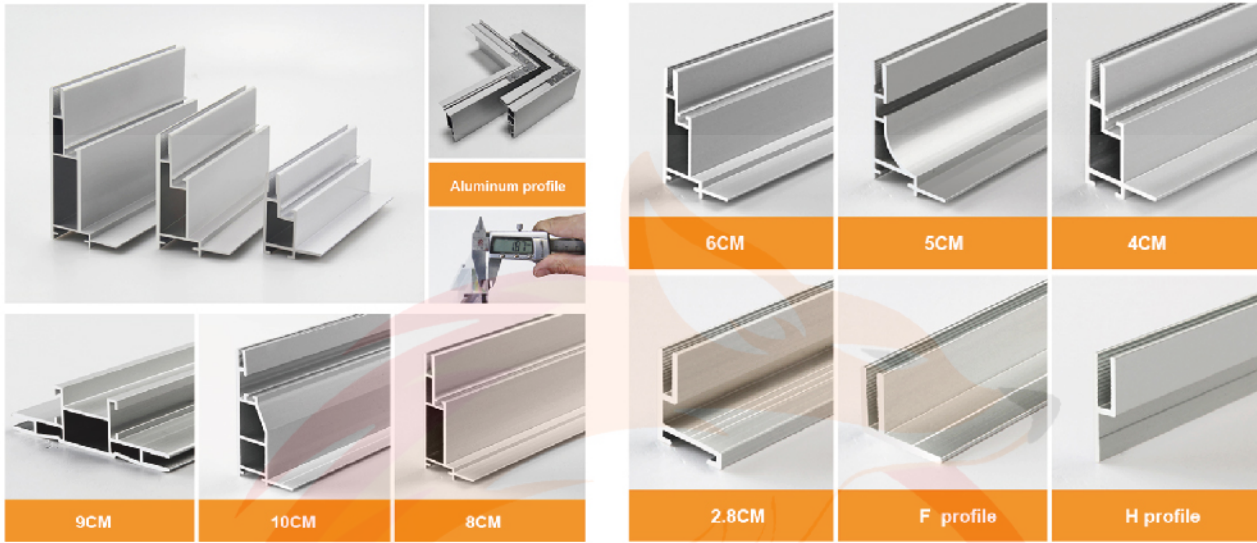

- » mechanically strong, absorbs impacts
- » automatic return to original tension and form(form memory)
- » insensitive to condensation and damp, perfect for humid environments
- » water-tight, protection in the event of damage caused by water
- » registration in terms of reaction to fire in a public place Bs2d0(formerly M1, B1, Assessed to Class O)
- » 15 years FOXYGEN guarantee in accordance with general terms and conditions of sale
- » washable with water or with particular cleaning agents
- » good preservation of aspect
- » considerable temperature stability
- » ceiling origin tracked

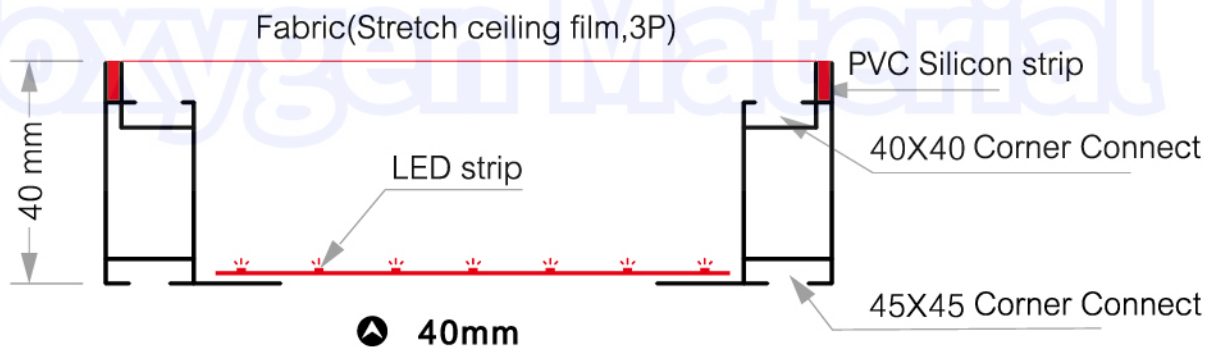

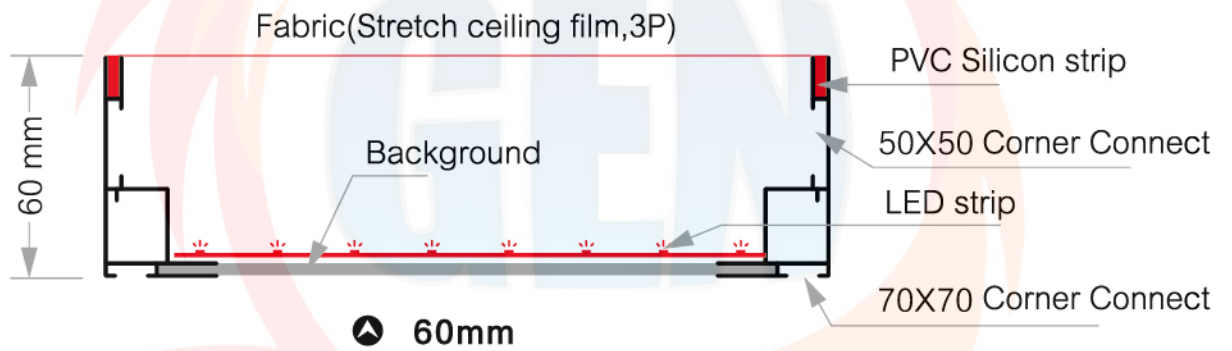

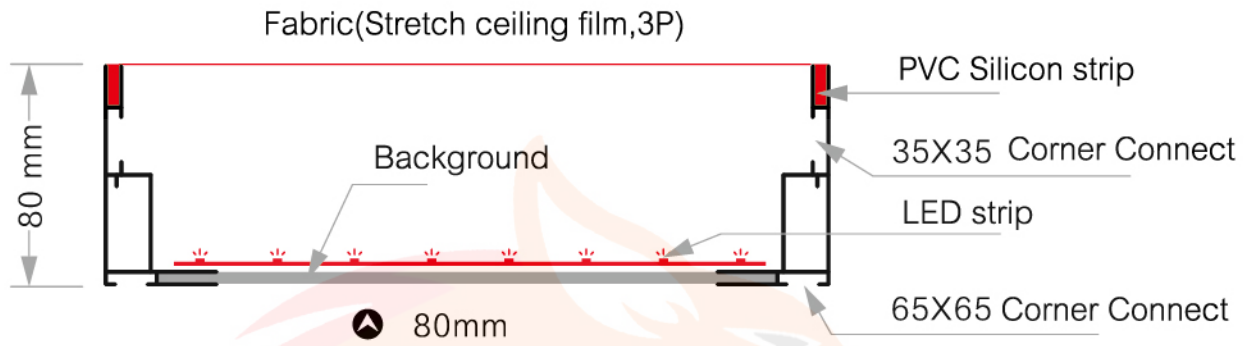

7. Daylight...integrated light

- » back-lighting of all Stretch Ceilings, whether white or colored
- » adaptable to tile ceilings, precisely located light sources and control systems
- » insulation materials increase sonic absorption
- » even without perforation improves acoustic
