IMPORTANT SAFETY INSTRUCTIONS SAVE THESE INSTRUCTIONS

⚠ WARNING!

► When using electric products,basic precautions should always be followed,including the following.This manual contains important instructions for model Go-E22 that must be followed during installation,operation and maintenance of the unit.

SAVE THESE INSTRUCTIONS

► This manual contains Important safety and operating instructions

- 1.Read all the instructions before using this product.
- 2.This device should be supervised when used around children.
- 3.Do not put fingers into the electric vehicle connector.
- 4.Do not use this product if the flexible power cord or EV cable is frayed,has broken insulation,or any other signs of damage.

SAFETY PRECAUTIONS

Thank you for your purchase. It is recommended to read this manual before use.

⚠ CAUTION!

This symbol indicates what the user should pay attention to. Improper operations can lead to user security issues or a degree of hardware damage.

⚠ WARNING!

This symbol indicates what the user should pay attention to.The parts inside the product are arisk of shock to persons.

⚠ CAUTION!

- Do not immerse the AC charging connection device in water
- It is forbidden to step on the charging cable, pull the cable, bend or knot the cable
- Do not drop the control box or press heavy objects on its surface
- It is strictly forbidden to place the equipment near objects that will produce high temperature during charging
- The operating ambient temperature of the equipment shall not exceed -30 ℃~+50℃

⚠ WARNING!

- Do not use the device when the charging line is damaged
- Only for electric vehicle charging
- This product must be well grounded when used
- Do not use external wires or adapters
- Never put your fingers into the charging plug
- This product does not contain user maintainable parts, Please do not attempt repair and maintenance by yourself
- If the device cannot be charged normally according to the operation manual, please contact the seller or replace it

PRODUCT OVERVIEW

1 Cable

2 Control Box

3 LED Indicators

4 Button

- 1.If no grounding is detected after power-on, long press for 3 seconds to disable grounding detection.
- 2.Long press for 5 seconds after power-on to reset Wi-Fi function.

LED BEHAVIORS

Green LED	Chasing	Charging
	Solid	Charging Complete
	Breathing	Scheduled
Blue LED	Solid	Standby
	Flashing	Connected
Red LED Flashing		
Ground fault Charging Status LED flashes red two (2)times		Overcurrent Charging Status LED flashes red five (5)times
Overvoltage Charging Status LED flashes red three (3)times		Overtemperature Charging Status LED flashes red six (6)times
Undervoltage Charging Status LED flashes red four (4)times		Leakage Charging Status LED flashes red eight (8)times

SPECIFICATIONS

Basic product parameters					
Rated Output	Power	3.5kW	7kW	11kW	22kW
	Current	16A Max	32A Max	16A Max	32A Max
Rated input	Phases	Single Phase	Single Phase	Three Phase	Three Phase
	Voltage	220~240V		380V	
	Frequency	50Hz			
Recommended Operating Conditions	Ambient Temperature	-25℃ to +45℃			
	Relative Humidity	5%~95%			
Security Protection	Multiple Protection	Over/Under voltage protection & Temperature protection & Over current protection & Current leakage protection & Grounding protection			
	IP Rating	IP65			
Other	APP Control	Yes			
	Regulations	IEC/EN 62752		IEC 61851	
	Applicable scene	indoor/Outdoor			
	Cooling method	Natural cooling			
	Equipment dimension	237*103*53mm(L*W*H)			

PACKING LIST

AC EV Charger * 1	User Manual * 1

INTRODUCTION TO USE

Start Charging

End Charging

PRECAUTIONS

- Please follow the steps in the pictures carefully
- The current switching and setting of the schedule time must be done before the vehicle connector is inserted into the vehicle inlet, otherwise it cannot be set during the charging process

-04-

STORAGE

- If the product is not used immediately after purchase, it should be stored in a dry and well-ventilated indoor place, or stored in a dry and well-ventilated indoor place during short-term or long-term storage. Do not store in a humid environment or a place exposed to sunlight.
- The equipment operates under normal operating conditions and usually does not require special maintenance during its service life. If you have any questions, please contact the manufacturer.

SAFETY FEATURES

LEAKAGE PROTECTION

- When the leakage protection is activated, the device needs to be unplugged and restarted.
- Improper connection of the equipment-grounding conductor can result in a risk of electric shock.Check with a qualified electrician or serviceman if you are in doubt as to whether the product is properly grounded. Do not modify the plug provided with the product. If it does not fit the outlet, have a proper outlet installed by a qualified electrician.

OVER-CURRENT PROTECTION

- When the current exceeds exceeds the maximum safety value, device needs to be unplugged and restarted.

OVER-VOLTAGE PROTECTION

- When the voltage exceeds a certain value, the protection is activated and restored The voltage recovers automatically after it is stabilized.

UNDER-VOLTAGE PROTECTION

- When the voltage falls below a certain value, the protection is activated and restored The voltage recovers automatically after it is stabilized.

TEMPERATURE PROTECTION

- When the temperature of the control box exceeds 85℃, the protection will be activated and restored automatically once the temperature has decreased to 70℃.
