# 公司简介 Corporate profile

Henan Probon Tools Co., Ltd. (abbreviated as Probon Tools) is located in Yucheng, Henan, the base of steel tape in China. Probon Tools is an industrial enterprise integrating production and trade, with three production factories under its jurisdiction. The quality complies with national export standards. The performance of production equipment is advanced, various testing facilities are complete, and the company has strong technical research and development capabilities and a complete quality control system. Innovation is the soul of an enterprise. In a fiercely competitive environment, the company leads a hardware industry product development and design team, regularly launching new products, relying on humanized design concepts, organically combining materials, craftsmanship and art, and the development of new products leads the market trend, in line with the requirements of the times. With multiple mature project experience, in-depth research on industry trends and customer needs, Probon provides products with advanced design concepts, exquisite appearance, and excellent quality, which greatly meet the individual needs of different customers, and provide customers with great satisfaction. Probon has provided products and services to many famous buildings all over the world.

## 钢卷尺产品标准：中华人民共和国国家标准

## Quality Standard Tape: Standard of P.R.China GB1063-89

### 示值误差:

### Permissible Tolerance

自零点端起到任意线纹的示值误差应符合下列规定

Tolerance of the value indication from the zero point to any graduation line must accord with the following rule:

Grade I  $\Delta = \pm (0.1 + 0.1 \cdot L) \text{ mm}$

Grade II  $\Delta = \pm (0.3 + 0.2 \cdot L) \text{ mm}$

Note:

$\Delta$  Refers to the tolerance of the value indication. L refers to the length in metre. The most approximate and bigger round-numbered value in metre is adopted in case the length isn't a round-numbered multiple of one metre.

对端面或组合型尺带的示值允许误差绝对值可增大;

Blades of extremity and combination types can increase in the absolute value of the tolerance.

I级: 0.1mm (Grade) II级: 0.2mm (Grade)
