

— Rubber/Stainless Steel/Plastic Slatted Floors for Pigs —

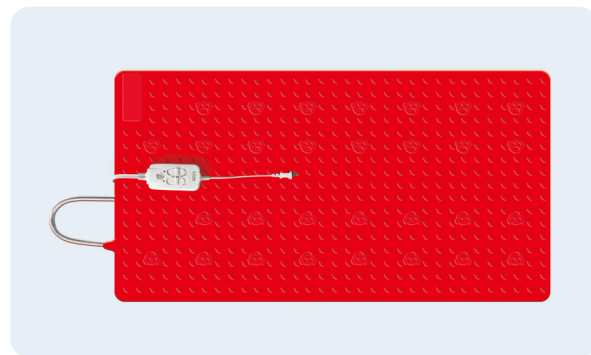

Product Advantage

- **Durable Stainless Steel Construction:** Made of high-quality stainless steel, these heating slats are highly durable, resistant to corrosion and wear, ensuring a long service life even in the humid and harsh environment of pigsties.
- **Efficient and Uniform Heating:** The design enables efficient and uniform heat distribution, providing a stable and warm surface for piglets, which is crucial for their growth and survival, especially in cold weather.
- **Safe Temperature Control:** Equipped with a reliable temperature control system, it can maintain a suitable temperature range, preventing overheating and ensuring the safety and comfort of piglets.
- **Non - Slip Surface:** The surface has a non - slip texture, which can prevent piglets from slipping and getting injured, enhancing their stability when moving on the slats.
- **Easy to Clean and Maintain:** The smooth stainless steel surface is easy to clean, allowing for quick removal of dirt and residues, which helps maintain a hygienic environment and reduces the workload of farmers.

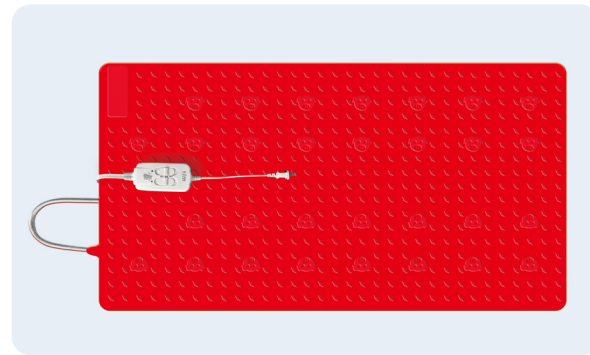

Plastic pig heating plate

Use: It is suitable for heating a variety of animals, and has obvious effects on preventing animal dysentery, enteritis, etc.

Features: corrosion resistance, waterproof and non-slip, long service life, fast heating, energy saving and power saving

- **Size:** 900×500mm
- **Material:** plastic
- **Power:** 60W-120W

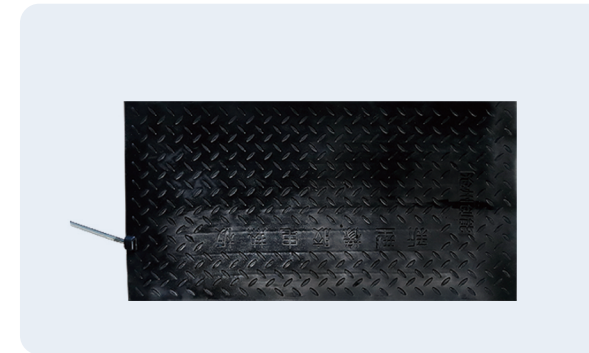

- **Size:** 1000×550mm
- **Material:** plastic
- **Power:** 60W-120W

Rubber pig heating plate

Use: It is suitable for heating a variety of animals, and has obvious effects on preventing animal dysentery, enteritis, etc.

Features: corrosion resistance, water-proof and non-slip, long service life, fast heating, energy saving and power saving

— Rubber/Stainless Steel/Plastic Slatted Floors for Pigs —

- **Size:** 1000×550mm
- **Material:** plastic
- **Power:** 60W-120W

- **Size:** 1500×1000mm
- **Material:** plastic
- **Power:** 60W-120W

Stainless steel electric heating plate for pigs

Use: It is suitable for heating a variety of animals, and has obvious effects on preventing animal dysentery, enteritis, etc.

Features: corrosion resistance, water-proof and non-slip, long service life, fast heating, energy saving and power saving

- **Size:** 900×500mm
- **Material:** stainless steel
- **Power:** 50W-100W

- **Size:** 1000×550mm
- **Material:** stainless steel
- **Power:** 50W-100W

- **Size:** 1500×1000mm
- **Material:** stainless steel
- **Power:** 50W-100W
