LIVING ROOM CARPET

When choosing a living room carpet, it is necessary to consider the decoration style, material, size and shape, function, brand and price, as well as the laying method. Carpets should correspond to the style of the living room decoration, and materials such as hand knotted carpets, silk carpets, and wool carpets can be selected. The size and shape are selected based on the size of the living room and the arrangement of furniture. Carpets can add vitality and a warm atmosphere, divide space, and have two laying methods: full laying and area laying. The specific size selection may also vary.
