邯郸市宇环紧固件有限公司
Handan Yuhuan Fasteners Co., Ltd

C 企业简介 Company Profile

邯郸市宇环紧固件有限公司销售、制造、仓储为一体的综合性企业，我们拥有先进的设备，专业的技术团队，以质量为标准，以客户需求为依据，为您提供高质量产品。

我们的宗旨是“以质量求生存、以信誉求发展、以服务求效益，质量保证、用户至上”，严格按照质量标准和用户需求组织生产。我们以先进完善的设备、过硬的产品质量，产品畅销全国各地，深得用户信赖和好评。

公司坚持诚信、互利，为客户提供好的服务和实惠的价格。高度决定视野，角度决定观念，思路决定出路，人才是企业的未来，其中不乏天之骄子、社会精英致力提高所有员工业务能力，打造一支业界的高精尖队伍。

邯郸市宇环紧固件有限公司始终坚持“创新，品质，服务，节约，敬业，感恩”12字理念，做好每一个产品和服务！

Handan Yuhuan Fasteners Co., Ltd. is a comprehensive enterprise that integrates sales, manufacturing, and warehousing. We have advanced equipment, a professional technical team, quality standards, and customer needs to provide you with high-quality products.

Our aim is to survive with quality, develop with reputation, and achieve efficiency with service, ensuring quality and putting customers first. We strictly organize production according to quality standards and user needs. We have advanced and complete equipment, excellent product quality, and our products are sold well throughout the country, earning the trust and praise of our customers.

The company adheres to integrity and mutual benefit, providing customers with good service and affordable prices. Height determines vision, perspective determines ideas, and ideas determine the way out. Talents are the future of enterprises, including talented individuals and social elites who are committed to improving the professional abilities of all employees and building a high-precision and cutting-edge team in the industry.

Handan Yuhuan Fasteners Co., Ltd. always adheres to the 12 word concept of "innovation, quality, service, thrift, dedication, and gratitude", and strives to provide every product and service well!

Drill tail wire is a special type of fastener, which is mainly used in steel structures, buildings and other industrial fields to achieve efficient and convenient fixation and connection.

Main purpose

Fixing of steel structure color steel sheets: Drill tail screws are widely used for fixing the color steel sheets in steel structures. They can directly connect the color steel sheets to the steel structure frame, ensuring stability.

Fixing of thin building panels: In simple buildings, drill pins are used to fix thin panels, such as enclosure structures and scaffolding.

Large-scale construction projects: In large-scale construction projects and underground infrastructure construction, drill tail wires are used for deep hole drilling and fixation.

Mechanical equipment and chemical industry: In the machinery and petrochemical industries, drill tail wires are used for the fixation and connection of equipment and structures.

Metal processing and electronic manufacturing: In metal processing, drill tail threads are used to thicken the cutting fluid; in electronic manufacturing, they are used for drilling and lubrication of PCB boards.

Features and Advantages: Efficient and convenient, with high tensile strength and holding power, simple operation, and diverse materials.

Application scenario: Construction industry, metal processing, high-tech field, furniture manufacturing

WEDGE ANCHOR

SLEEVE ANCHOR

The main uses of anchor bolts include anchoring various pipeline supports, connecting and installing other objects, and fixing corrugated guardrails, etc. Anchor bolts are often used for foundation bolt anchoring connections and are widely applied in anchoring mechanical equipment and various pipe rack supports. They are convenient to install on site and can bear loads immediately after installation. When necessary, they can also be disassembled and reused.

Specific application scenarios: Fixing steel structure color steel tiles, supporting mechanical equipment and pipe racks, installing corrugated guardrails.

Types and features: Self-anchoring bolts, expansion type foundation bolts.

Company Philosophy

As the saying goes, "When the mountains are high, people strive to reach the peak." For business development, people-oriented principles are crucial! Employees and customers are the foundation of the enterprise. Mutual cooperation and win-win situations are the company's business philosophy. The company educates people with integrity and builds a spiritual civilization that transcends the times. The company focuses on talent development: it pays attention to the cultivation of management talents, the acquisition of professional technical talents, and the training of skilled operation talents, using human resources advantages to build a powerful team.

Brand Focus

Advanced management concepts have injected tremendous impetus into the company. The success of company management is an unchanging eternal theme, which is the backbone of maintaining the culture of win-win cooperation. Only by integrating management and culture can we steadily move forward. We should enrich the middle-level leadership team of the company with advanced cultural concepts to make it a vigorous, efficient and competent leadership team. With our thoughts and concepts, we should build our brand to make it a world-class brand.

Teamwork

"Simple, practical and efficient" is our service philosophy, and "continuous focus on innovation" is the core pursuit of our enterprise. Guiding the development of the building mechanical and electrical prefabricated piping and hanger industry, establishing a safe and green industry concept, and jointly building a prosperous and healthy market environment are our goals. The company will continuously provide more reliable, more energy-efficient and more innovative product system solutions, contributing to the construction of building mechanical and electrical safety and a better future for the industry.
