Product Introduction

--Electric bifolding garage door

The electric folding door is suitable for large industrial factories, private garage and high-end shopping malls at the entrance. The 55% design is in line with the overall aesthetic feeling and can achieve a good use experience.

The door body is composed of more than two groups of interconnected (door) windows, with black DM sealing safety protection device around the door; special folding door window power system, good stability and accurate braking; special control system for safety voltage.

Product Introduction

---electric upper folding door anti-V series

Performance: anti-V electric folding door, open height is greater, 37 minutes design beautiful and practical, customized high-end motor, high safety, anti-fall design, center of gravity on both sides.

Performance: with heat preservation, wind proof, dust, dustproof, sound insulation, lighting and other functions, convenient lifting, occupy less space, can be used as a garage door, beautiful and generous, but also as a ventilation partition, flexible up and down, high safety

Product Introduction ---electric bi folding window

The appearance is beautiful atmosphere, to bring good visual beauty to our products. Fold to the top to increase ventilation and view.

Folding multi-point stop, good stability, more convenient cleaning; single and double glass, heat insulation, reduce sun damage, reduce external

noise

The choice of ventilation is more flexible. Realize the upper and lower circulation ventilation function, ventilation mode is more reasonable, can enjoy natural ventilation, human comfort is also greatly improved.

Suitable for bars, cafes, stalls and other occasions. Its air tightness is better than the fixed window and the flat window.

Product Introduction

---electric external flip door

Main structure: chassis beam, column, sash, electric pneumatic rod, pipe pile motor, etc

Scope of application: industrial plant, garage, shopping malls, etc

Performance: with thermal insulation, wind protection, dustproof, sound insulation, lighting and other functions, the overall panel design, can be used as a garage door, but also as a ventilation partition, flexible turnover, high safety

Product Introduction

---electric folding door

The appearance is beautiful atmosphere, to bring good visual beauty to our products. Electric folding design, automatic induction function, full of sense of technology.

Also can be remote control, good stability, light and heavy duty two solutions, tailored to your size for you. This door body has: manual, electric, remote control, dust prevention, corrosion resistance and other properties.

Suitable for shopping malls, office buildings, factories, supermarkets, airports and other high-end places, high-end and simple coexist, fashion and convenience together. It's a good commercial choice.

It is a new type of door body specially developed when the two sides of the wall hole and the top space position is not enough, which can be divided into two folding, four folding and other forms.

Product Introduction

---automatic door

- Automatic door configuration function:
 1. Patent aluminum alloy frame with reasonable structure.Beautiful and generous
 - 2 It can be matched with various automatic door sensors in the European and Asian versions.Adaptive pattern diversification.
 - 3., Configuration, installation.Save labor.Avoid commuting to the site.
 4. EPDM rubber seal.Strong sealing, no air leakage, heat insulation
 5. Different style, optional color, and strong surface variability

Product Introduction ---manual upfolding window

The appearance is beautiful atmosphere, to bring good visual beauty to our products. Fold to the top to increase ventilation and view.

Folding multi-point stop, good stability, more convenient cleaning; single and double glass, heat insulation, reduce sun damage, reduce external noise.

The choice of ventilation is more flexible. Realize the upper and lower circulation ventilation function, ventilation mode is more reasonable, can enjoy natural ventilation, human comfort is also greatly improved.

Suitable for bars, cafes, stalls and other occasions. Its air tightness is better than the fixed window and the flat window.

Product Introduction ---manual vertical sliding window

Can be used in a small window ventilation place, beautiful and simple, with a safety lock button, high safety, manual pull design, convenient and quick, can be multi-point stop, clever design.

Space saving: up and down pull design, occupy less space, excellent ventilation effect, optional screen window, mosquito heat insulation.

Create a more transparent and tidy family. Durable, colorful and smooth, paired with interior decoration style or doors and windows

Pull-type glass window can be used for kitchen, partition, toilet vents, but also for takeout window to facilitate the sale of products.

Product Introduction

---Manual external flip window

Main structure: the left and right
upper fixed border

Scope of application: takeaway
window, milk tea shop takeaway
shop, ticket office, etc

Opening mode: through the hydraulic
lever buffer, manually open the upper and
external lift window by 90 degrees, to
maximize the opening parallel to the
ground, can be used as a awning

Hanging windows play a good
protection in our life and are easy to
clean, the main advantage is that it
prevents rain from soaking into the
room. Although it rains, you can always
open your windows for ventilation.

Product Introduction

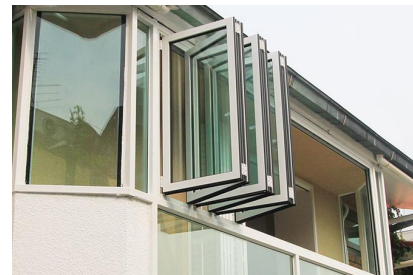

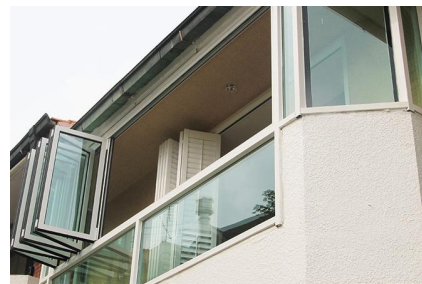

---folding door

folding door is an open sliding door with a folded structure connected by multiple door panels. Each door fan uses a whole piece of glass, aluminum alloy profile frame, wide vision, excellent lighting, elegant appearance, novel style. When using, the push and pull is convenient, which not only saves the occupied space of the door, but also provides effective lighting and ventilation, presenting a fashionable, high-grade style.

Solved the traditional door and window system sealing, dustproof, sound insulation and other problems, so that the system has a good thermal insulation effect.

Product Introduction --- folding window

Can be installed in the building installation and interior decoration in harmony, not only beautiful and generous, no effect on lighting and balcony ventilation effect and viewing

Save space: fold glass track width is very small, need to occupy windowsill very small space only, make curtain and screen to install more convenient

It is very easy to move around. Also fold the door to create a more transparent and tidy family. Durable, colorful and smooth, paired with interior decoration style or doors and windows

Folding glass window has a protective effect, effectively avoid children falling from buildings and falling objects and other accidents
