Custom fastener solutions
expert

Company profile

Dongguan Yuhuang Electronic Technology Co., Ltd. was established in 1998, is a production, research and development, sales and service in one of the industrial and trade enterprises. It is mainly committed to the research and development and customization of non-standard hardware fasteners, as well as the production of various precision fasteners such as GB, ANSI, DIN, JIS, ISO, etc.

Our company has two production bases, Dongguan Yuhuang covers an area of 8,000 square meters, and Lechang Yuhuang covers an area of 12,000 square meters. We have a professional service team, technical team, quality team, domestic and foreign business team, mature and perfect production chain and supply chain. As well as advanced production equipment, precision testing instruments, strict quality management, and advanced management physique. We have passed ISO9001, ISO14001 and IATF16949 certification, and all products comply with REACH, ROHS standards.

Our products are exported to more than 40 countries around the world, and we have established good cooperation with many well-known enterprises at home and abroad, such as Xiaomi, Huawei, KUS, SONY, etc., and our products are widely used in 5G communications, aerospace, electric power, energy storage, new energy, security, consumer electronics, artificial intelligence, household appliances, auto parts, sports equipment, health care and other industries.

We are experts in non-standard fastener solutions, providing one-stop hardware assembly solutions. We adhere to the quality and service policy of "quality first, customer satisfaction, continuous improvement, and excellence" and serve our customers sincerely. We can provide you with various types of screws, washers, nuts, lathe parts, precision stamping parts, etc. . We provide customers with personalized customized services, focus on technology and product innovation, and create higher value for customers. Your satisfaction is our driving force!
