Enterprise Culture

Company Mission

Advancing Animal Husbandry: We are committed to enhancing the field of animal husbandry through innovative solutions that ensure better care and higher productivity.

Core Values

- **Continuous Improvement:** We strive for ongoing growth and improvement in both our operations and product offerings.
- **Collaboration and Mutual Benefit:** We value strong partnerships that deliver mutual benefits to all stakeholders involved.

Company Overview

Integrated Animal Husbandry Solutions: As a leading enterprise, we specialize in the research, development, production, and sales of animal husbandry products and equipment, delivering innovative solutions to our global customers.

Certifications and Commitments:

- We hold FDA food-grade certification, ISO quality system certification, and BSCI management system certification, ensuring our products meet rigorous international standards..
- Our commitment extends to continuous quality improvement and the ongoing development of new equipment.

Integrity and Innovation:

- **Foundational Integrity:** We uphold the highest standards of integrity, which are vital for our long-term success and sustainability.
- **Customer-Centric Approach:** We put the needs of our customers first, adhering to the principle of "Quality First, Customer Foremost," to ensure satisfaction and trust.
- **Innovative R&D:** We prioritize independent innovation, driving research and development with a focus on creativity and technological excellence.

Mobile Milking Machine

Item Model YH-ME700

Operating Vacuum Degree	0.04-0.05MPa (adjustable)
Pulsation Times	60-80 times per minute
Pulsation Rate	60/40
Power	1.5kw, copper wire motor
Volage	220v,50hz
No.of Milking Cow Per Hour	20-24cows per hour
Vacuum Pump Capacity(L/min)	250
Motor Speed	1440rpm per minute

Double-Bucket Milking Machine Accessories List

Item	Quantity	Item	Quantity
Milking Machine Frame	1 unit (includes 2 wheels and 2 handles)	Air Storage Tank	1 unit (includes 2 lids)
Motor	1 unit (includes pulley and belt)	Vacuum Pump	1 unit
Support Rods	2 pieces	Switch	1 unit
Pulsator	1 unit	Vacuum Gauge	1 unit
Pressure Regulator	1 unit	Stainless Steel Buckets	2 units (includes 2 lids)
Transparent Milk Tubes	2 pieces, 2.5m each	Transparent Dual Pulsation Tubes	2 pieces, 2.5m each
Plastic Tube Clamps	6 pieces	Transparent Air Tubes	2 pieces, 0.8m each
Milking Cup Set	2 sets (includes: 240mL plastic claw bowls x 2, stainless steel milking cups x 8, rubber liners x 8, short rubber air tubes x 8)

Product Name	Livestock Drinking Trough
Model	YH-AF-L301A/B
Material	Polyethylene
Dimensions	235cm×60cm×53cm
Drinking Height	53cm
Water Capacity	150L
Flow Rate	25L/Min
Heating Method	heating wire heating
UV Resistance	Grade 8 - 10
Intelligent Temperature Control	Adjustable from 0 - 40° C
Average Daily Power Consumption	7 kWh
Heating Features	Energy-saving, Eco-friendly, Safe, Fast Heating

Product Name	Livestock Drinking Trough
Model	YH-AF-L302
Material	Polyethylene
Dimensions	400cm×60cm×53cm
Drinking Height	53cm
Water Capacity	350L
Flow Rate	50L/Min
Heating Method	heating wire heating
UV Resistance	Grade 8 - 10
Intelligent Temperature Control	Adjustable from 0 - 40° C
Average Daily Power Consumption	10 kWh
Heating Features	Energy-saving, Eco-friendly, Safe, Fast Heating

Calf Feeder A6Pro

Calf Feeder A6Pro

Scope of Application: Suitable for calves from a few days old up to 2–3 months of age.

Product Introduction: An advanced intelligent calf automatic feeding system that enables scheduled, quantitative, and temperature-controlled automatic feeding. It also features automatic pipeline cleaning, enhancing the smart feeding management level of the farm. The system includes multiple built-in expert feeding curves and supports custom modifications to precisely match the growth needs of calves. It increases milk supply in the early stage to promote development and reduces milk supply in the later stage to encourage feed intake and stomach development.

Core Highlights:

- 1. Free-Access Feeding & High-Load Operation :** Supports 24-hour feeding to meet calves’ natural feeding behavior and the high operational demands of farms.
- 2. Precision Feeding :** Delivers milk strictly according to individual calf feeding curves—adequately supporting growth in the early phase and gradually reducing milk volume in the later stage to encourage solid feed intake and gastrointestinal development.
- 3. Intelligent Temperature and Volume Control :** Intelligent Temperature and Volume Control
- 4. Health Monitoring :** Automatically identifies and records each calf’ s milk intake and feeding frequency, enabling timely detection of abnormalities to safeguard health.
- 5. Efficient Cleaning :** Automatically cleans the equipment pipelines at scheduled intervals, ensuring better hygiene, reducing manual workload, and protecting calf health.
- 6. Durability and Corrosion Resistance :** Constructed with 304 stainless steel housing for corrosion resistance and adaptability to various environments; the equipment is durable and easy to maintain, requiring only an annual comprehensive inspection.

Technical Specifications

Rated Power	5KW
Rated Voltage	220V
Inlet Water Pressure	0.2~0.5MPa (Recommended ≤0.3MPa)
Feeding Capacity	100calves
Feeding Ports	4

Equipment Dimensions

	Main Feeding Unit	Feeding Station
Length (CM)	58	135
Width (CM)	130	55
Height (CM)	150	115

Milk Tank Wall:

Displays milk tank status including ambient temperature, humidity, milk temperature, milk concentration, remaining milk volume, and storage duration.

Calf Queue:

Displays calf health status and feeding curves, including total number of calves, number of healthy, subhealthy, and unhealthy calves, feedable calves, and those that have completed feeding.

Feeding Station Management:

Displays the number of current feeding stations, IDs of calves being fed, milk intake per calf, ambient temperature and humidity, and milk temperature.
