

Portable EMG/EP System

Versatile, Compact, and High-Performance

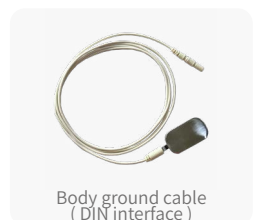

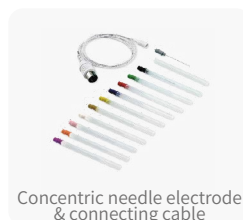

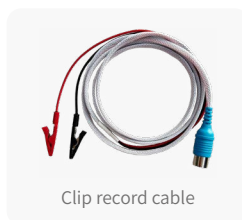

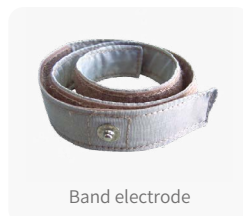

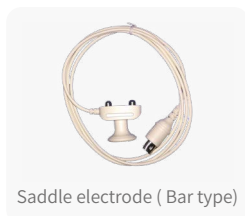

Product Features

- Multi-Functional Testing:**
 Simultaneously supports 3 EMG, 4 EP, and 8 NCV modules, with 1.2/4/8 channel options for full versatility.
- Comprehensive EMG Functionality:**
 Includes conventional EMG, surface EMG, and muscle fatigue assessment.
- Advanced Evoked Potential Testing:**
 Offers PDN/PTN/BCR evoked potential functions and multi-channel ERP analysis.
- Customizable Function Combinations:**
 Choose EMG, evoked potential meter, or a combination of both based on clinical needs.
- High-Precision Transmission:**
 Photoelectric transmission technology ensures anti-interference and artifact-free results.
- Modular & Upgradable:**
 Flexible configuration for easy customization, upgrades, and maintenance.
- Dual-Use Flexibility:**
 Works seamlessly with both desktop and laptop for anytime, anywhere testing.
- Remote Consultation Ready:**
 Optional remote management system for streamlined consultations and data access.

Effortless Neuromuscular Diagnostics
Power and Precision in Every Test

Wireless Surface Electromyograph

Streamlined Muscle Assessment & Stimulation - Anytime, Anywhere

Product Features

- **Simultaneous Multi-Channel sEMG:**
Acquires and records bioelectric signals from up to 16 channels, capturing data from multiple muscle groups at once.
- **Neuromuscular Stimulation:**
Stimulates up to 16 areas simultaneously with customizable stimulation parameters for precise treatment.
- **Wireless Convenience:**
Seamless wireless connectivity for easy use in any clinical environment.
- **Portable Power:**
Powered by long-lasting lithium batteries for maximum mobility.
- **Intuitive Operation:**
Provides real-time voice and text prompts for effortless operation and monitoring.
