RUOPEI 2025

WELCOME TO ZHEJIANG RUOPEI CRAFTS CO., LTD

Zhejiang Ruopei crafts Co., Ltd. is a plastic handi-crafts manufacturer established in 2013, specializing in the production and sale of artificial green plants. The company integrates product development, design, production, warehousing, and sales.

The main products include artificial turf, artificial grass balls, grass walls, artificial trees, ground inserts, wreaths, flower baskets, fence railings, and other new material decorative series of artificial green plants. The annual shipment exceeds 2,000 containers.

The company is located in the Majian Industrial Park, Lanxi City, Zhejiang Province. It has a factory area of approximately 30,000 square meters and its own independent mold design team, as well as decades of product development and production experience.

We have strict production process requirements and have passed a series of factory inspections and relevant certification procedures. In 2024, it was certified as a high-tech enterprise by the state.

Due to its excellent product quality and elegant design, the company has established long-term supply relationships with thousands of well-known customers in many countries and regions around the world.

Zhejiang Ruopei, with its all-round strength of "strong R&D, complete product range, fast delivery, stable quality and reasonable price", has become the reliable choice for global artificial green plant purchasers.

The company has introduced an efficient production management system, achieving a leap in production efficiency. The intelligent injection molding equipment works in tandem with the MES full-process control system, ensuring that the error is controlled within a millimeter from raw material proportioning to finished product delivery.

Conventional orders are delivered within 20 days at top speed, and urgent orders are responded to within 72 hours. The flexible production mode with a minimum order quantity of 50 pieces and a 3-day sample-making period meets the diverse demands of global customers.

While other companies offer approximate delivery dates, we ensure punctuality with our smart workshop; while the quality of our peers is merely satisfactory, we define zero defects with our three-level quality inspection system; while the innovation in the market is merely following trends, we lead the next generation with 12 patents.

Relying on our all-round strength in "R&D, production and customization", we set a benchmark in the global artificial plant industry, fulfill our mission of "redefining the beauty of nature through technological innovation", and are determined to become a "world-class well-known brand of artificial plants". We create artificial plant products with greater artistic value and practical functions for the global market.

Injection workshop

The factory has more than 100 injection molding machines on hand, which can complete large-scale order production. Equipped with MES system, it intelligently monitors production status, realizes full process traceability of production, and shortens order delivery cycle by 40%.

There are strict quality inspection standards and processes from raw material inventory (IQC), production process (IPQC) to final shipment (OQC).

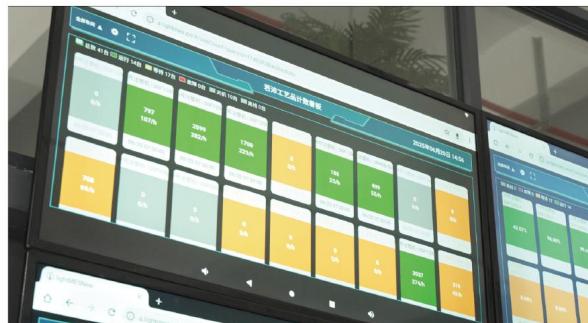

The company is equipped with a professional mold making team that can maintain daily mold usage and new product development. At present, there are about 1000 sets of registered molds, which basically meet the vast majority of market demand. High end customized series: using true tree casting technology to restore more than 300 plant forms, with a maximum selling price of 28000 yuan per item.

Mold Display Area

Sample Room

The warehouse area is approximately 20000 square meters and can accommodate a large number of ordered prod-

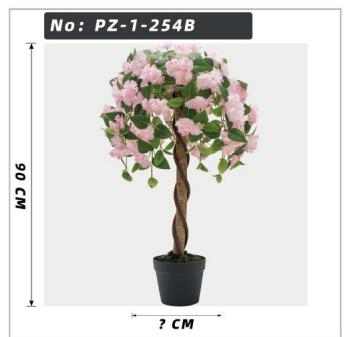

Certificate Display

Only partial certificates (BSCI/SGS/Intertek/SMETA/Invention Patent/Design Patent/Utility Patent/Provincial Science and Technology Small and Medium Certificate/National High tech Enterprise Certificate) are displayed here ..

Through ISO9001 quality management system certification, a three-level quality inspection system has been established, and the products have passed international standards such as EU CE and American ASTM testing.

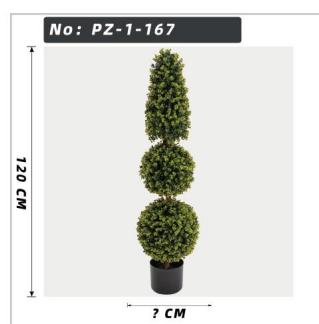

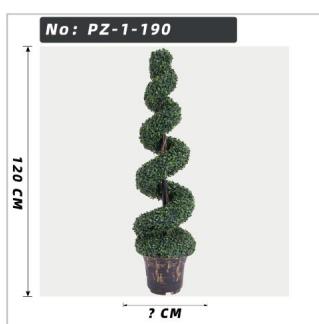

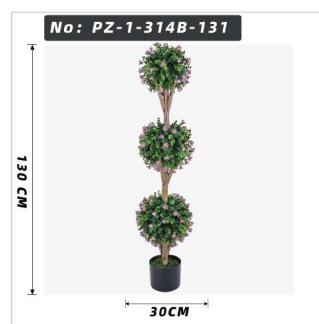

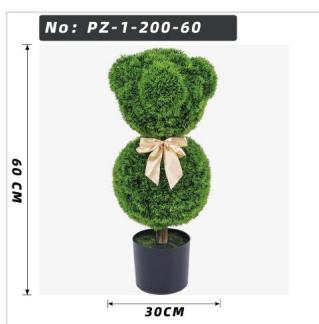

Artificial tree

Ruopei Factory's artificial trees for Europe & America:

Hand-shaped branches with fine vein details; bark restores natural texture, leaves have natural luster, ensuring high realism; suitable for homes, supermarket displays and outdoor landscaping, with flexible application scenarios.

Ground-planting plant

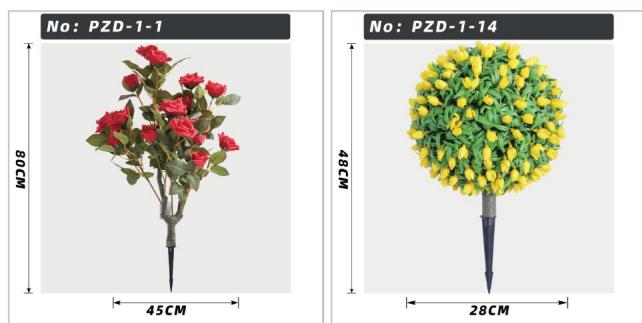

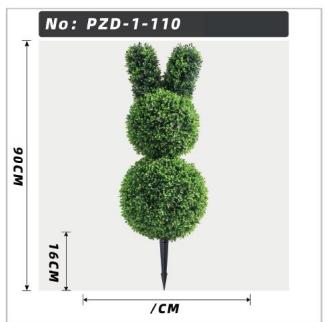

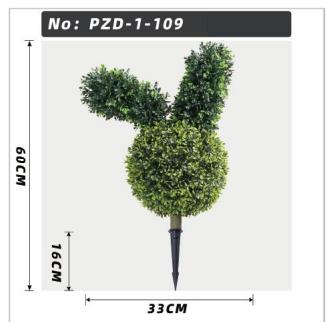

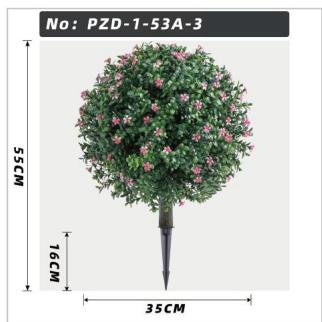

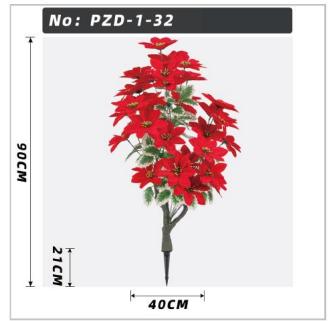

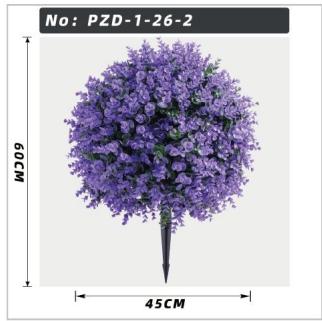

Types of ground plug components

In 2024, ground penetrating plants are beginning to become popular in the market, and our company is keenly seizing market opportunities to conduct extensive research and development as well as generation.

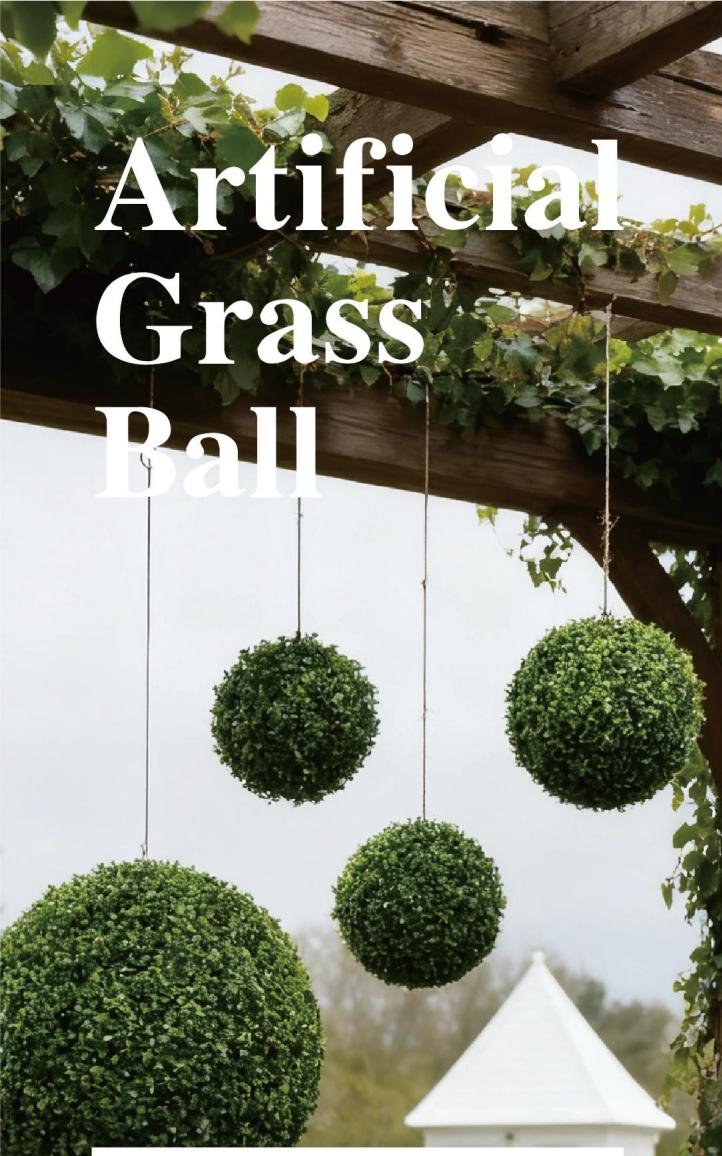

In the past year of 2024 and 2025, nearly 400 different types of ground plugs have been developed, far exceeding the research and development speed of peers, and with extremely high cost-effectiveness, winning the favor of nearly 100 high-quality customers.

We believe that with our in-depth research and continuous investment, this series of artificial plants will go to thousands of households and become an indispensable product for courtyard decoration.

Artificial Grass Ball

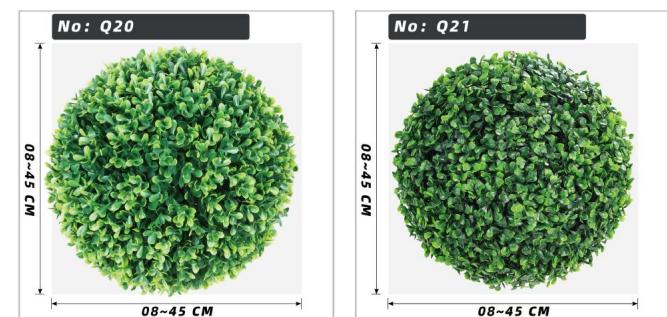

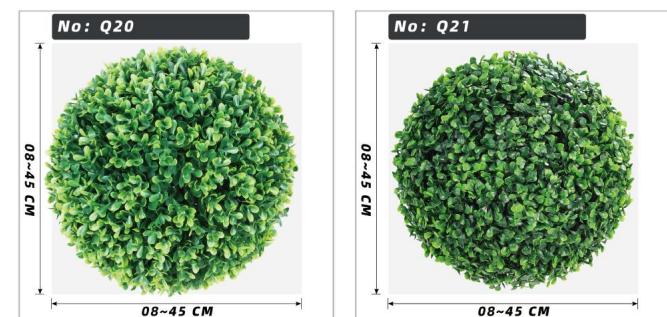

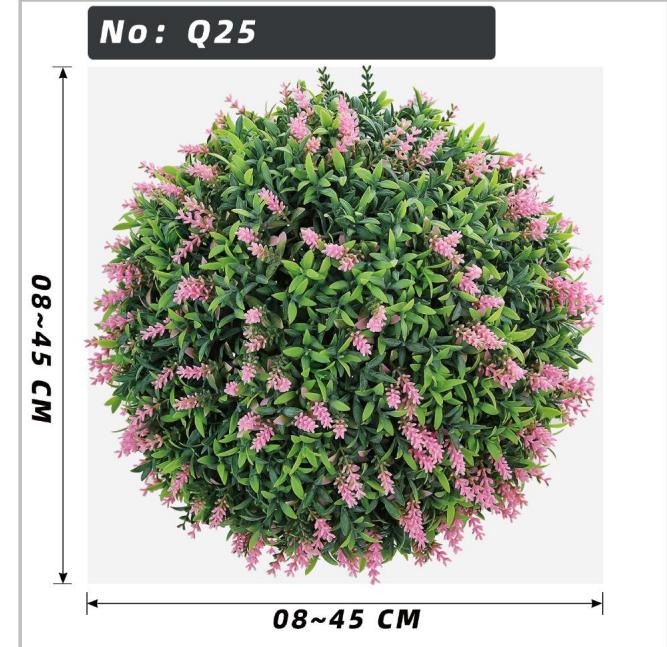

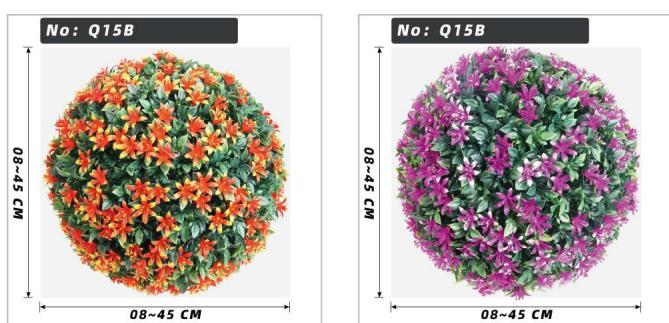

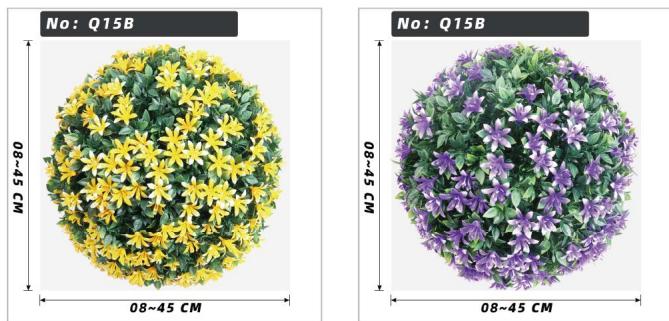

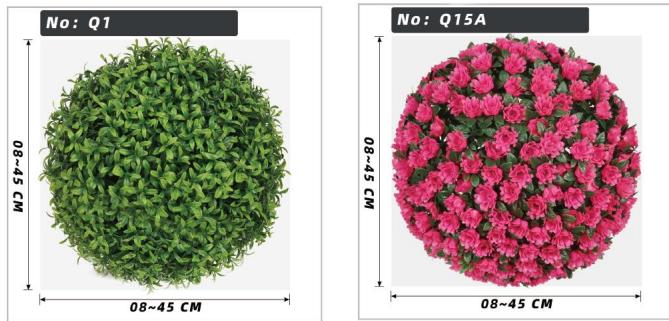

Compliance-friendly:

Certified by EU CE and US FCC, free of formaldehyde/heavy metals, meeting European and American green decoration standards with smooth customs clearance.

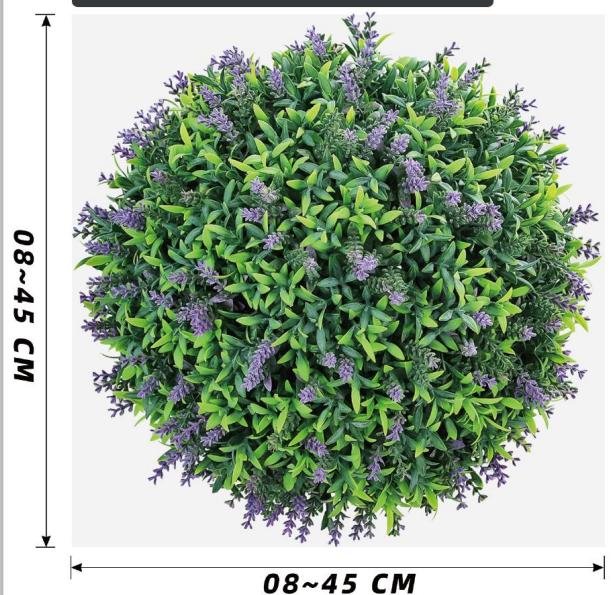

2. Weather-resistant & durable: No deformation at -25°C to 50°C, UV-resistant without fading for 3 years, no watering/trimming needed, saving high maintenance costs.

3. Versatile for scenarios: Suitable for courtyard decoration, mall ceilings, festival setups, reusable to reduce replacement costs.

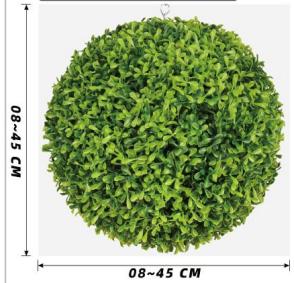

4. Stable supply chain: Supported by China's industrial chain, 15-day delivery guaranteed, controllable profits against market fluctuations.

Flower basket

Four trends of artificial flower baskets in Europe and America:

1. Eco-friendly materials lead, with recycled PE/PLA as the mainstream, meeting green consumption needs;
2. Diverse scenarios, suitable for courtyard decoration, supermarket displays and office corners;
3. Localized design, integrating local plant elements like lavender and hydrangea, plus soft vintage details;
4. Modular design, supporting DIY combinations, some embedded with mini LEDs to enhance atmosphere.

SMALL POT SERIES:

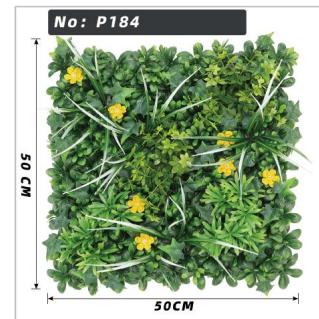

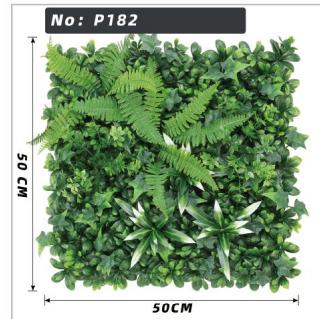

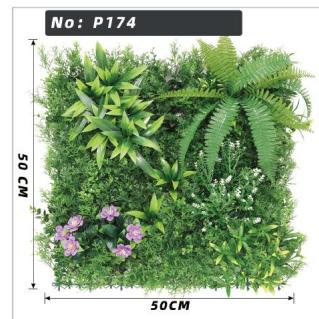

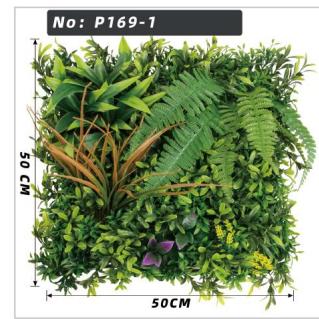

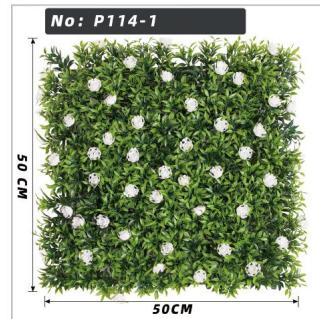

The subcategories of products included in this series

| No. | Series |
|-----|------------------------|
| 1. | Phalaenopsis |
| 2. | Succulent potted plant |
| 3. | Ferns potted plant |
| 4. | Flower bouquet |
| 5. | Grass potted plant |

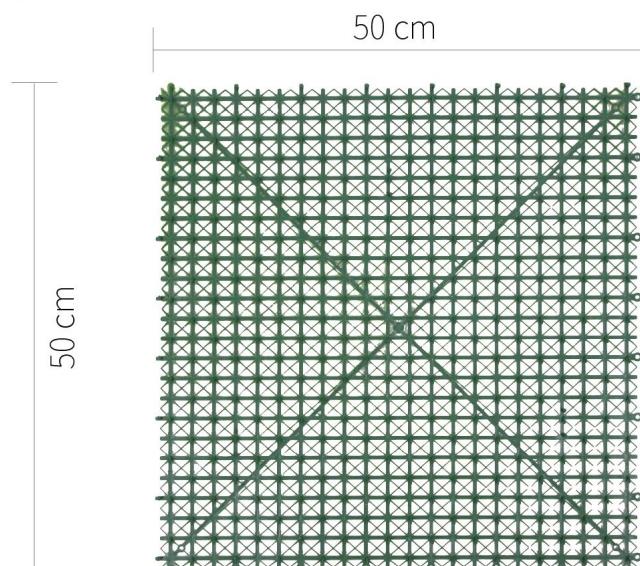

Artificial lawn

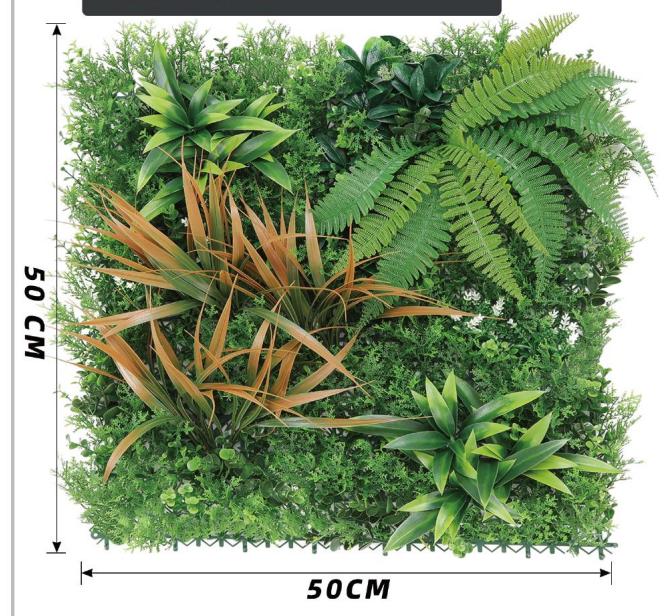

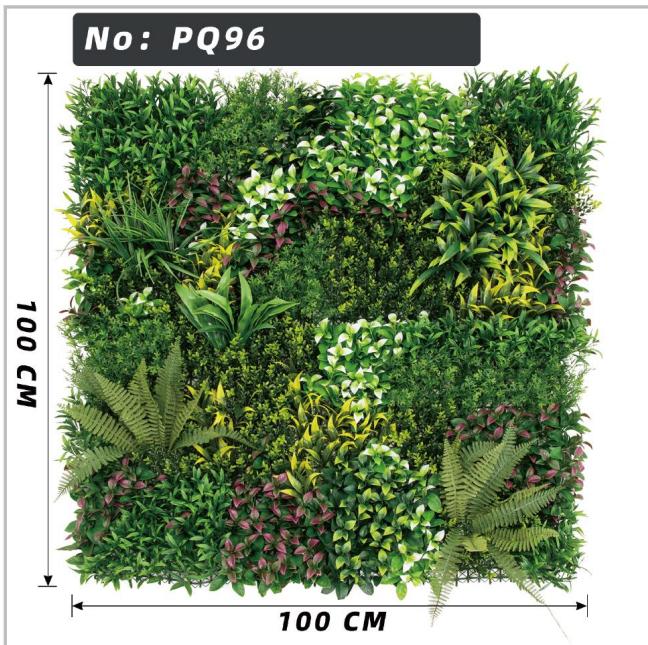

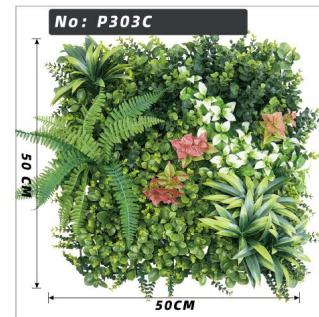

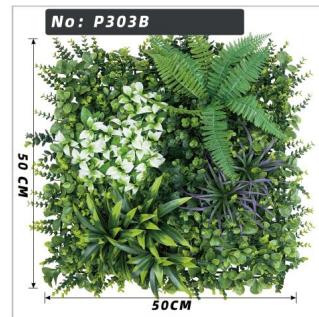

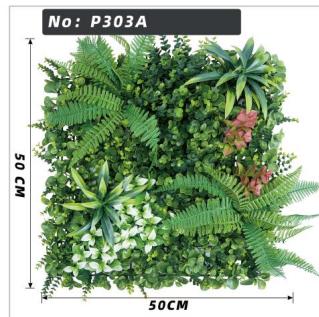

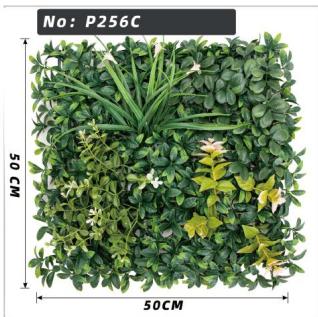

Our factory's lawn flooring is made of high-quality and environmentally friendly plastic and advanced technology, combined with artificial grass, making the overall appearance very realistic.

50 cm

No: P178

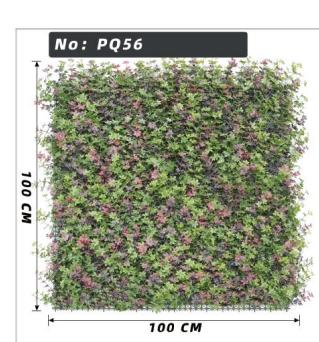

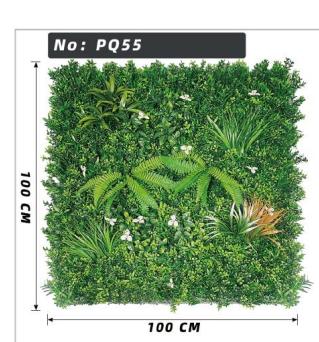

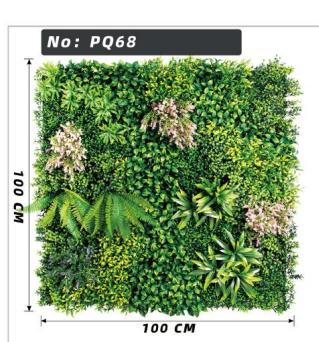

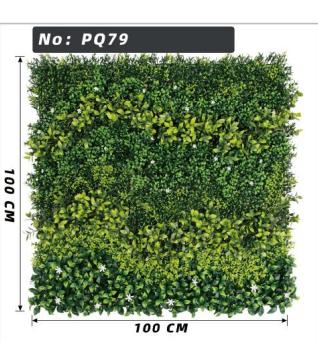

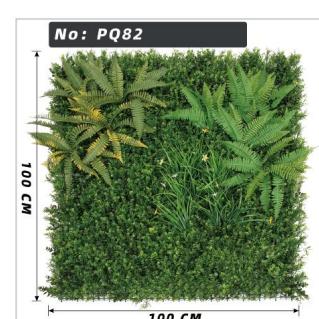

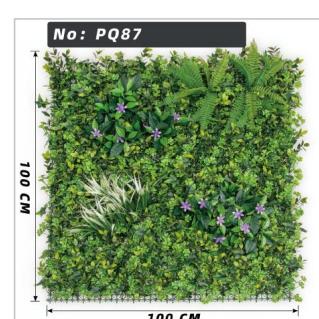

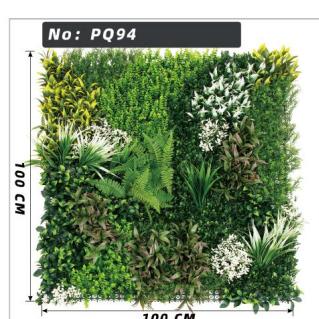

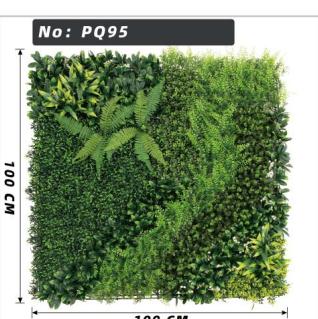

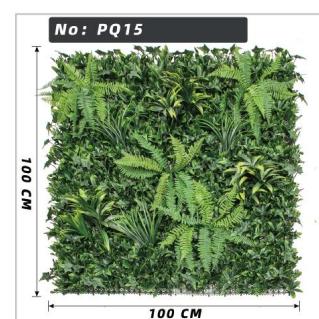

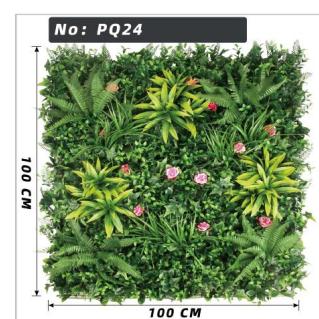

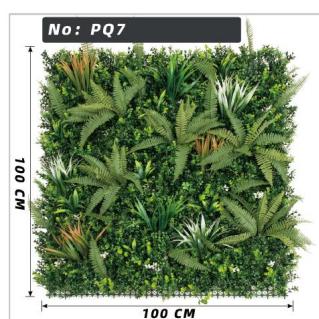

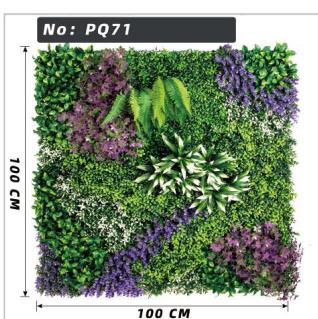

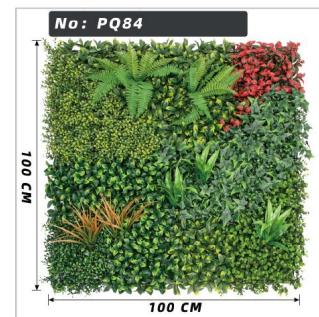

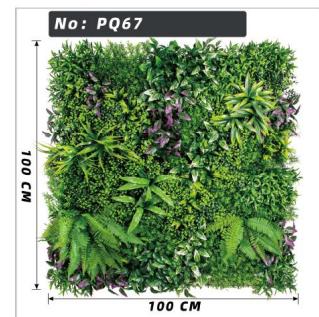

1M * 1M series lawn:

Larger lawns have more diverse grass types, and the decorative effect will be better.

Suitable for company logo decoration, shopping mall decoration, and home decoration, it is not only lifelike, but also has the natural advantage of being maintenance free.

Grass wall

Ruopei's artificial grass walls for Europe & America:

Hand-planted grass with natural layers, suitable for home, supermarket and outdoor scenarios;

Made of recycled PE + UV-resistant material, more durable with -25°C low-temperature resistance; CE/FCC/REACH certified;

15-day delivery + overseas warehouses in Europe & America;

Supports size and style customization, ensuring worry-free procurement.

Fence

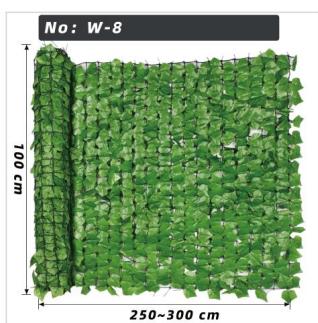

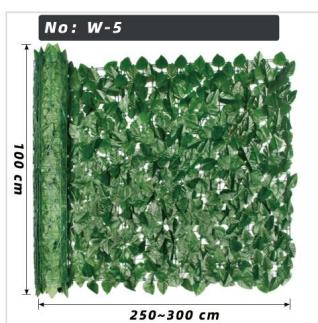

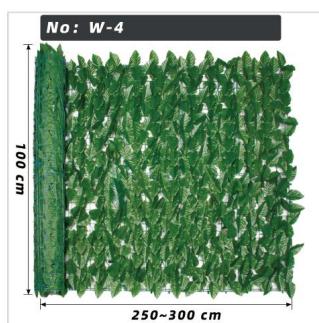

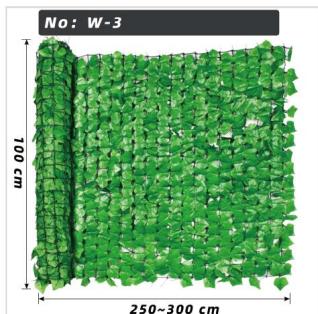

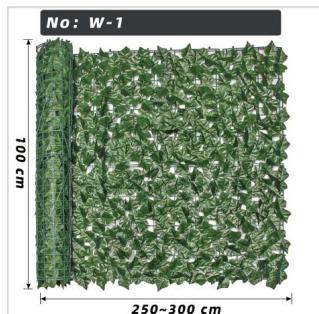

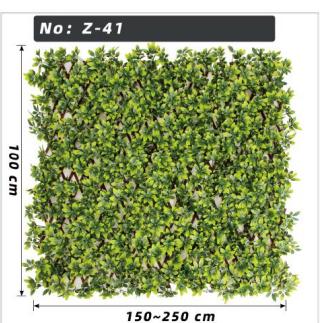

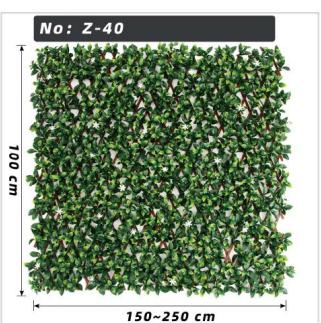

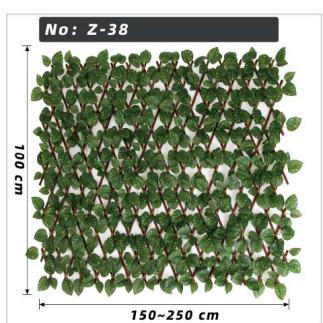

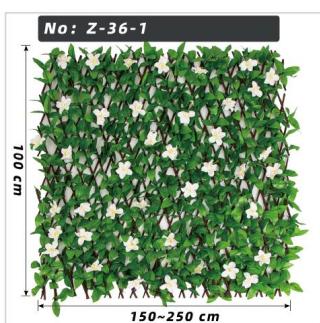

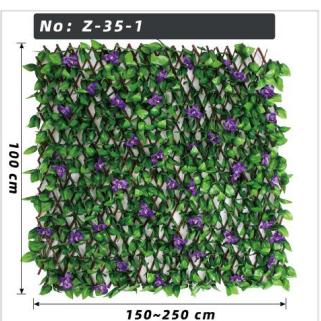

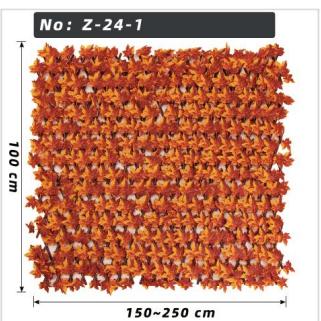

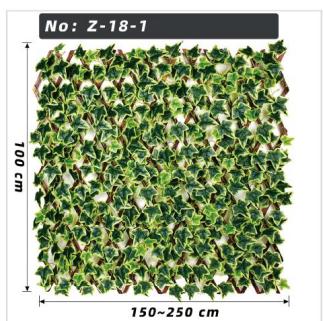

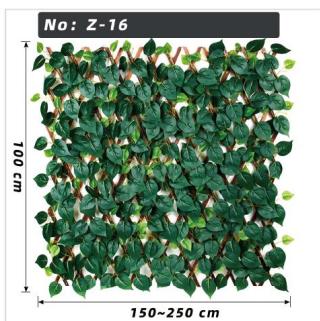

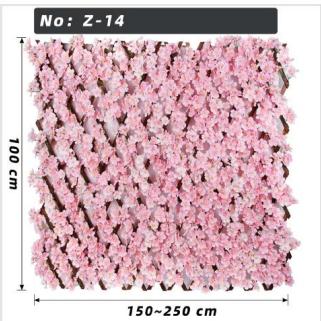

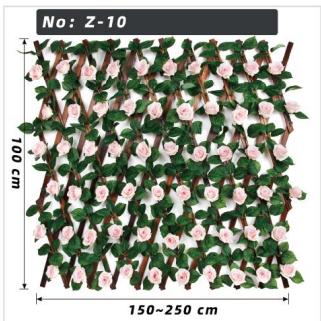

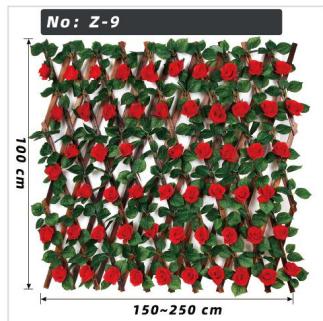

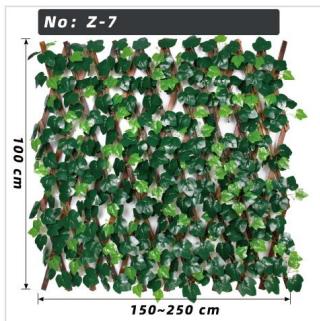

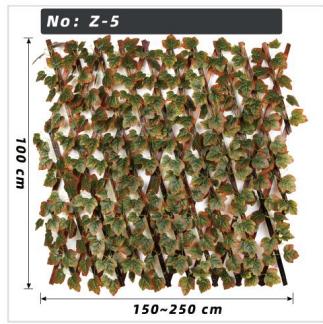

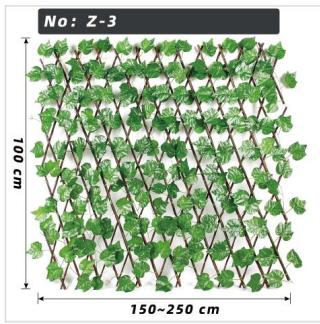

Passed European and American certification to avoid REACH regulations and wooden quarantine barriers.

Ultra durable: No deformation from -30 °C to 60 °C, no fading after 5 years of exposure to sunlight.

Zero maintenance and cost saving: anti moth, can be cleaned with clean water.

Supply chain stability: controllable profits, resistant to market fluctuations.

Rattan cane

As a new type of material that combines decoration and practicality, simulated rattan has advantages covering durability, maintenance costs, environmental attributes, design flexibility, and other dimensions. It not only meets the needs of individual consumers for convenience and beauty, but also meets the compliance and stability requirements of commercial scenarios and foreign trade markets.

1. Super durability: Suitable for all scene environments, with a lifespan far exceeding that of natural rattan:

Using PE, PVC or bio based composite materials, it can withstand temperature differences of -30 °C~60 °C and has a UV resistance level of UV40+

2. Extremely low maintenance cost: time-saving and labor-saving:

3. Environmental sustainability:

With the promotion of EU ESPR regulations, China's "dual carbon" goals and other policies, the environmental attributes of simulated rattan have become a key advantage for its market expansion.

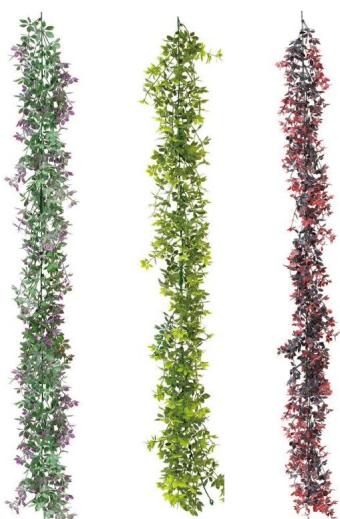

Series 1

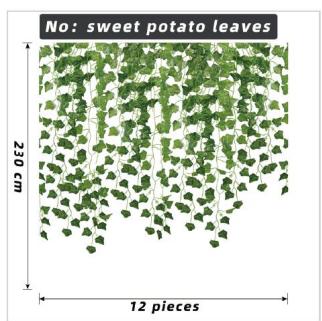

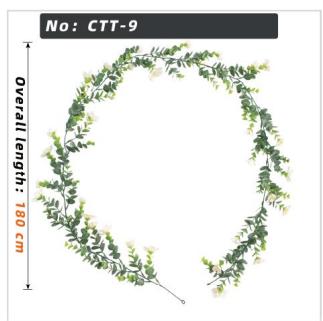

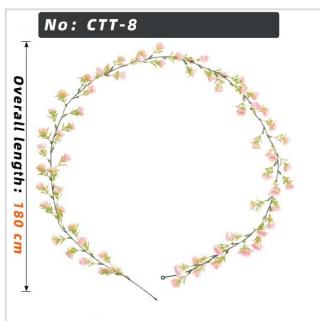

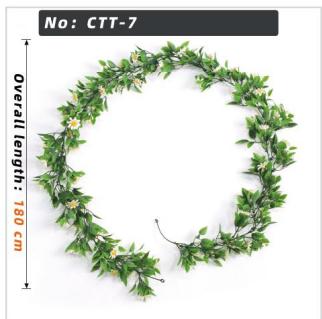

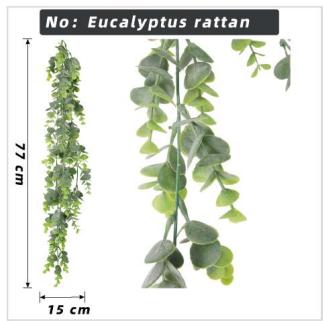

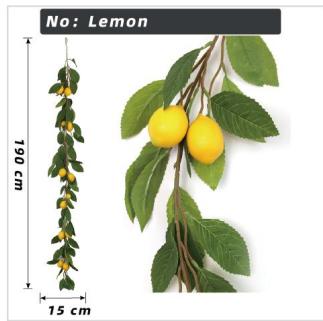

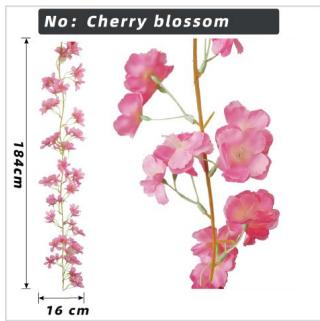

120cm

CTT-2

170cm

Artificial animal

1. Eco-centric, with recycled PE/PLA and degradable styles popular, fitting green policies;
2. Scenarios expanded to homes, cafes, malls;
3. Simulating local species like N. American raccoons, European holly;
4. Some have movable tails/leaves for interactive fun.
