Sustainable Fabrics

A piece of light-colored, textured fabric, possibly linen or cotton, is draped over a green plant with several bright yellow flowers. The background is a bright, sunlit field with a large, glowing sun in the upper right corner, creating a warm, golden atmosphere. The overall scene is a close-up, focusing on the texture of the fabric and the vibrant colors of the flowers.

Sustainable Fabrics

Focusing on the green development of the apparel industry, this series of sustainable woven fabrics is crafted from recycled polyester, recycled nylon and eco-friendly yarns with low-carbon and traceable features. It boosts the green transformation of the garment industry, advocates green consumption, and fits the prevailing sustainable development trend of casual sports and lightweight outdoor apparel. This fabric is suitable for eco-friendly jackets, lightweight windbreakers, outdoor coats, casual trousers and light business tops, with outstanding market competitiveness and premium value. Made with refined weaving techniques, the fabric presents a distinct texture, smooth hand feel and neat silhouette. Breathable, wear-resistant and shape-stable, it perfectly integrates eco-friendly social value, commercial value and premium wearing experience.

EG220439

100%Nylon 144cm 105GSM

Bio-based and biodegradable nylon material is environmentally protective and eco-friendly. The fabric has a unique micro-wrinkle texture to the touch, and is structured and crisp, making it suitable for various trench coats, outerwear, jackets, and more.

EG220440

100%Polyester 139cm 109GSM

Bio-based High-permeability (10K/10K) - eco-friendly and sustainable.

It features a subtle micro-wrinkle texture and a deep, sophisticated navy color. The fabric is structured and crisp, holding its shape well, making it suitable for outerwear, trench coats, padded jackets, and down jackets.

EG220381

100%Cotton 144cm 11.8OZ

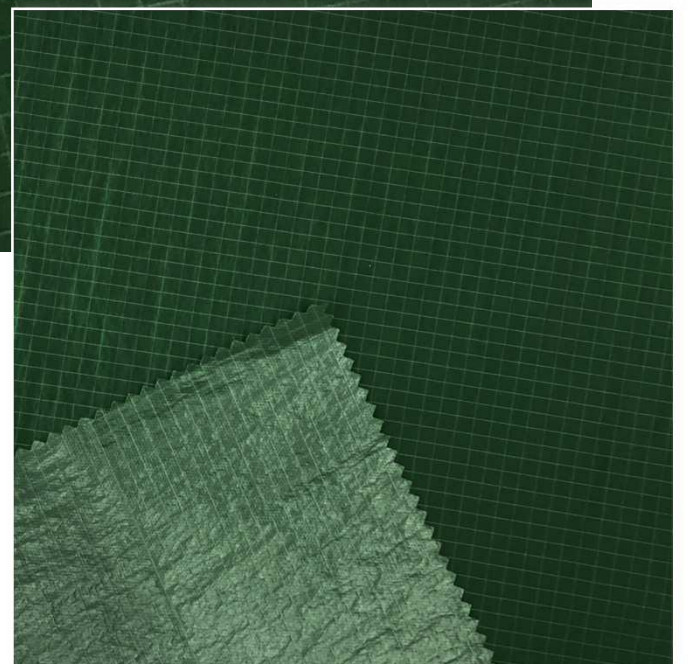

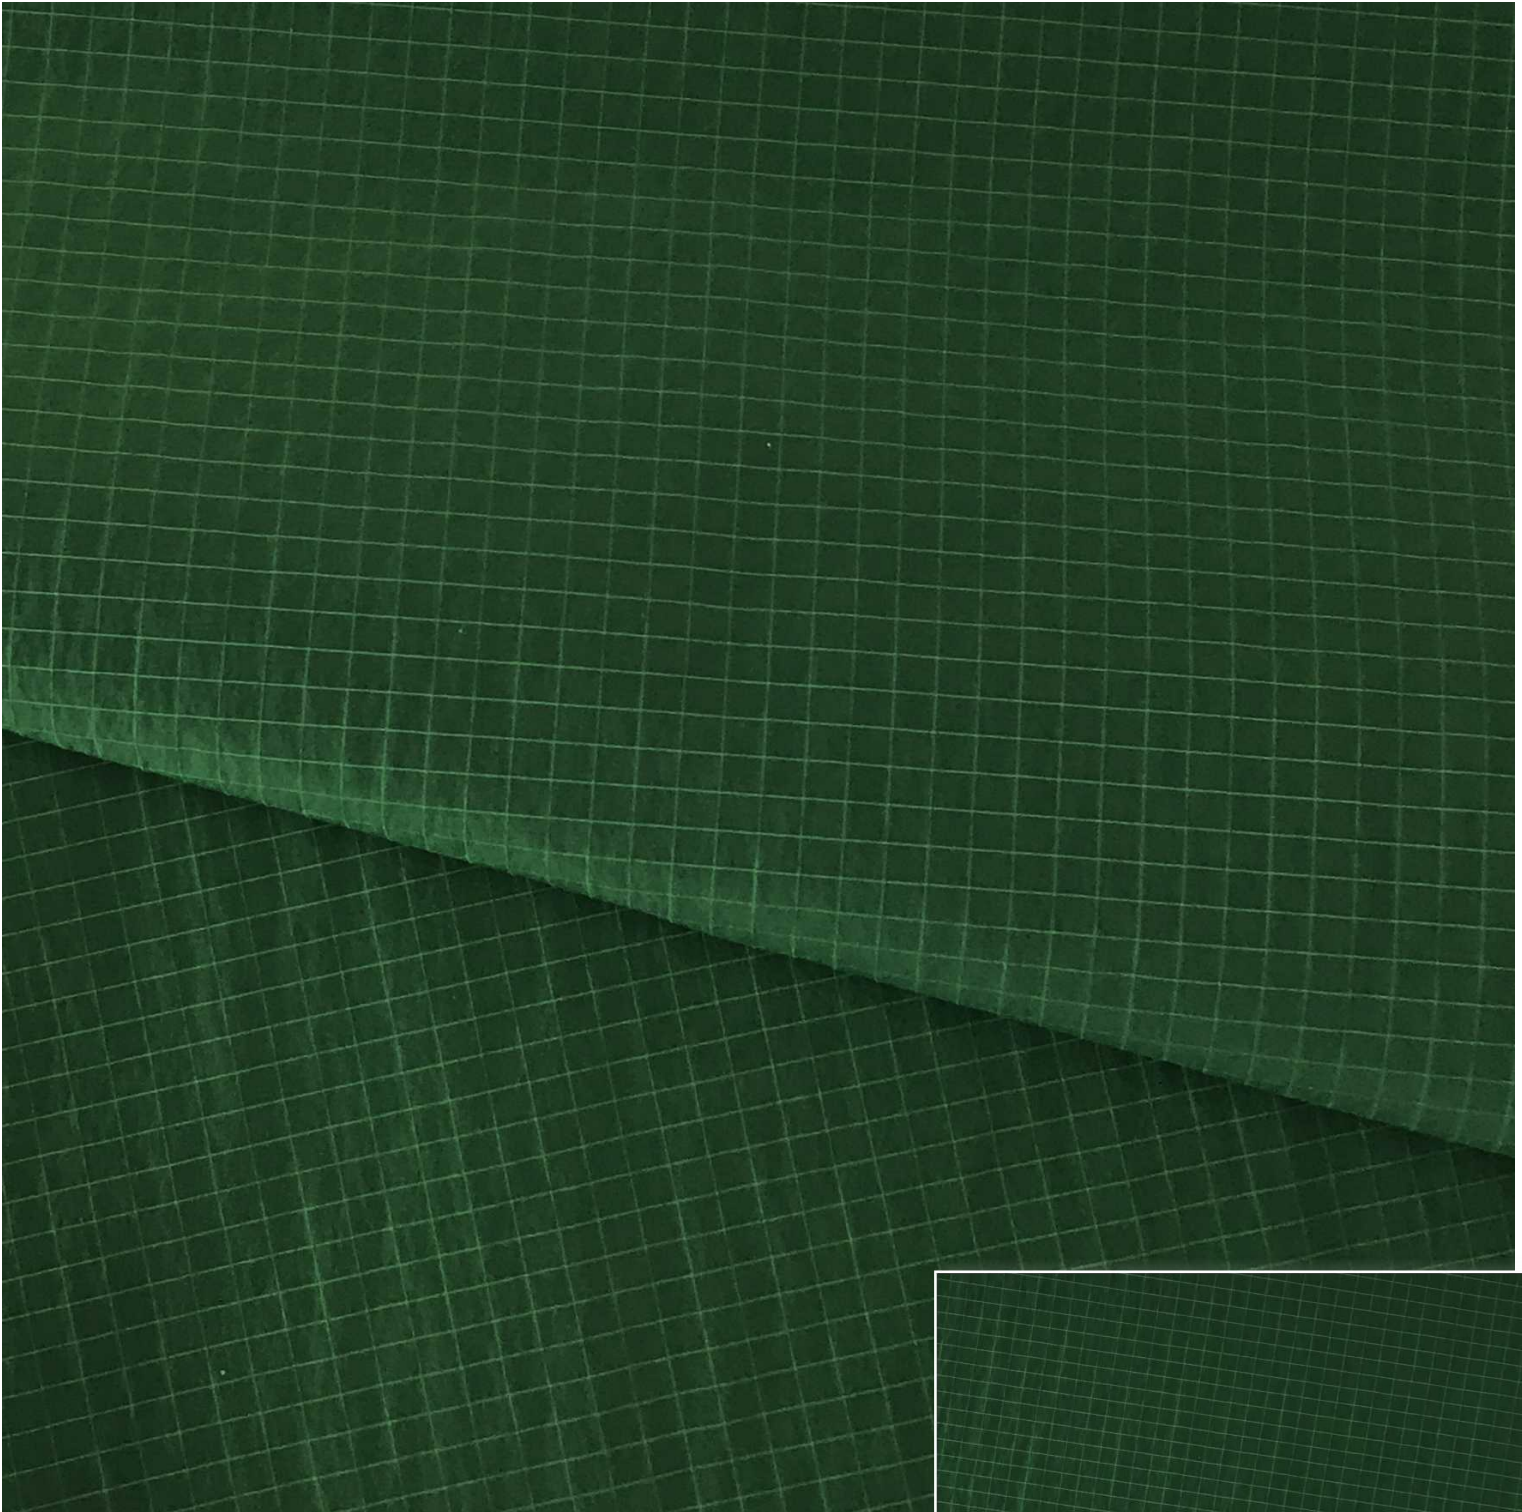

EG220381-1

Natural Plant-dyed Denim utilizes advanced cyclic extraction technology to extract pure plant-based dyes from natural plants, providing all-natural care at all times.

EG210113

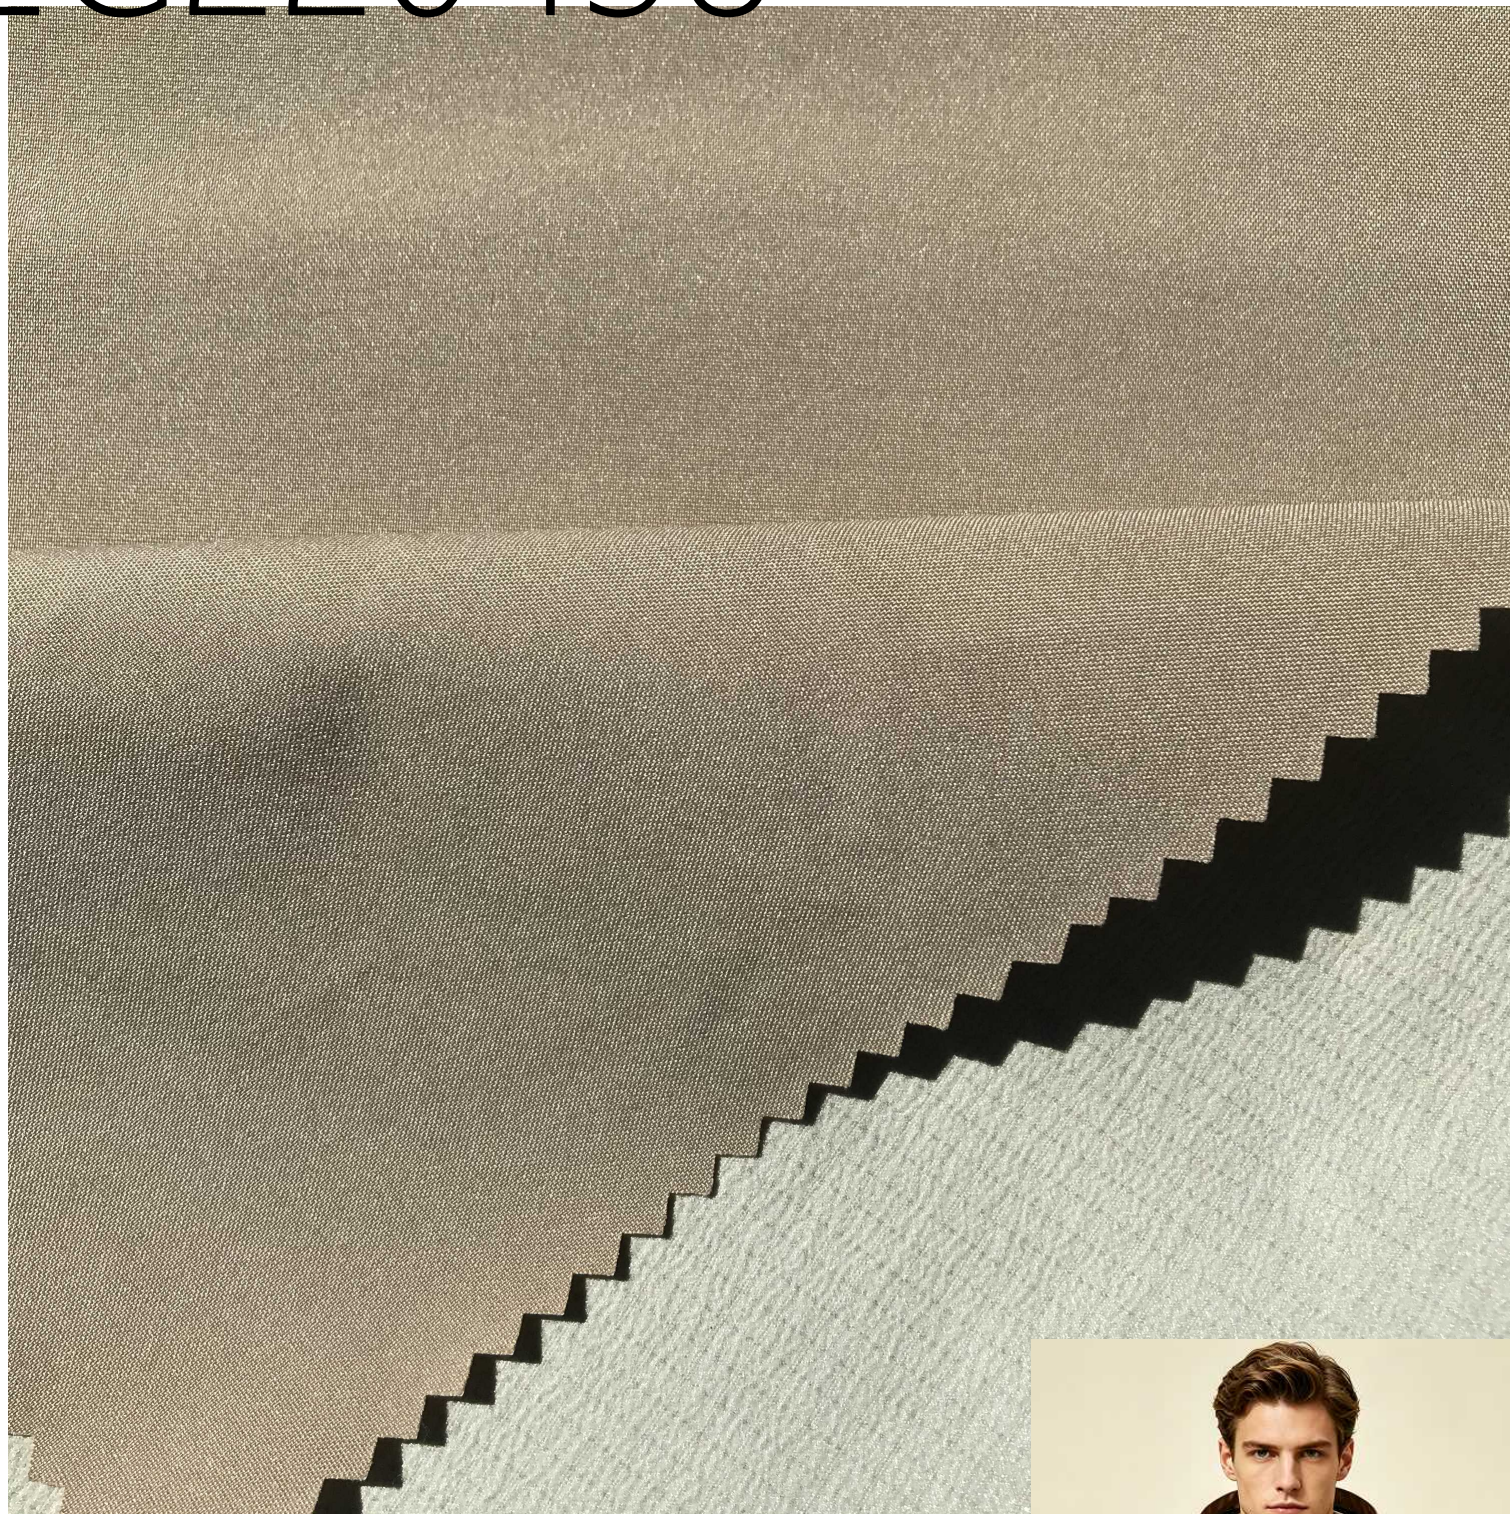

100%RECYCLE Nylon 142cm 95GSM

Recycled Nylon is eco-friendly, recycled, and sustainable. It features a small grid texture, which is both fashionable and classic. The dark green color adds a trendy touch to the fabric, making it suitable for jackets and outerwear.

EG220438

100% Nylon 145 g/m² 132 cm

The integration of high technology and eco-friendliness allows for the enjoyment of windproof and waterproof functionality without any burdens. The use of biodegradable and highly transparent film aligns with the concept of natural environmental protection. The yarn is made of nylon 66, greatly enhancing the fabric's abrasion resistance, making it fearless in the face of outdoor challenges. The low-key color on the surface reflects a desire for a peaceful and comfortable lifestyle in harmony with nature. The relaxed sensation reveals itself, releasing stress through every step.

EG240103

39%Reed 59%Poly 2%SP
191GSM 140cm

Natural reed fiber material, environmentally friendly and healthy, breathable and comfortable, woven with a soft touch, delightfully skin-friendly, with slight spandex elasticity, enhancing fabric plasticity. The surface features a classic checked pattern, elegant and refined, suitable for shirts and jackets, offering endless possibilities.

EG240123

60%Nylon6 40%SON 244GSM 134cm

Classic Reborn, utilizing Sorona material, pursues naturalness and environmental protection, realizing a recycled economy. The high-strength N6 enhances fabric functionality, adding comfort in outdoor environments and enriching the variety of occasions suitable for wearing. It's perfect for both outdoor adventures and commuting.

EG240341

Sorona/Poly 158GSM 144cm

Cotton-like touch, skin-friendly and breathable, enhanced with Sorona's natural material for environmental health and eco-friendliness. It features memory fabric properties, leaving no marks, and comes in a moderate thickness suitable for shirts, pants, and dresses.

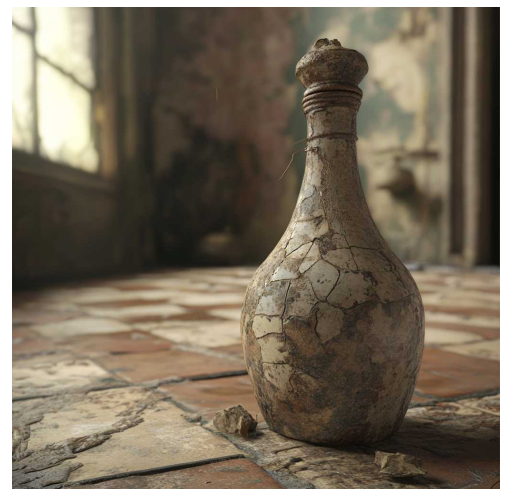

EG240219

50%SON 50%Recycled Poly

150GSM 148cm

Recycled polyester material combined with Sorona, a natural raw material, is environmentally friendly and healthy, pursuing sustainable development. Its knitted structure provides softness and elasticity, while being skin-friendly and breathable. It can be used for diverse styles and designs such as shirts and skirts.
