

Traffic Safety

About Us

Tiantai Yongsheng Traffic facilities Co.,Ltd. is a factory dedicated to the production of rubber material facilities products and the development of products using exclusive rubber production technologies. We are a domestic production base for the large-scale production of rubber transportation facilities, integrating production, processing, and customization. The company also integrates chemical products and relies on high-quality rubber materials to establish a foothold in the rubber traffic facilities market.

With over 2,000 tons of rubber traffic facilities annually, our products are mainly exported to the United States, Australia, Canada, United Kingdom, Spain, Italy, the Netherlands, South Korea, Russia, Germany, etc. Many of our cooperative customers in dozens of countries sell rubber traffic facilities and rubber ramps and have become important suppliers of their traffic facilities in China.

We are a company committed to building long-term partnerships with our customers all around the world. Our goal is to be your primary source for all kinds of traffic safety and parking lot products. Our tenets are integrity, Innovation, Diligence and Humanity.

Tiantai Yongsheng Traffic facilities Co.,ltd, established in 2011 , is a professional engaged in the research, development, sale and service of Speed bump, cable protector , curb ramp.

Selling well in all cities and provinces around China, our products are also exported to clients in such countries and regions as America , Europe and Australia. We also welcome OEM and ODM orders. Whether selecting a current product from our catalog or seeking engineering assistance for your application, you can talk to our customer service center about your sourcing requirements.

Portable Speed Bump

EYE CATCHING STRIPE

Reflective Stripes on Both Sides

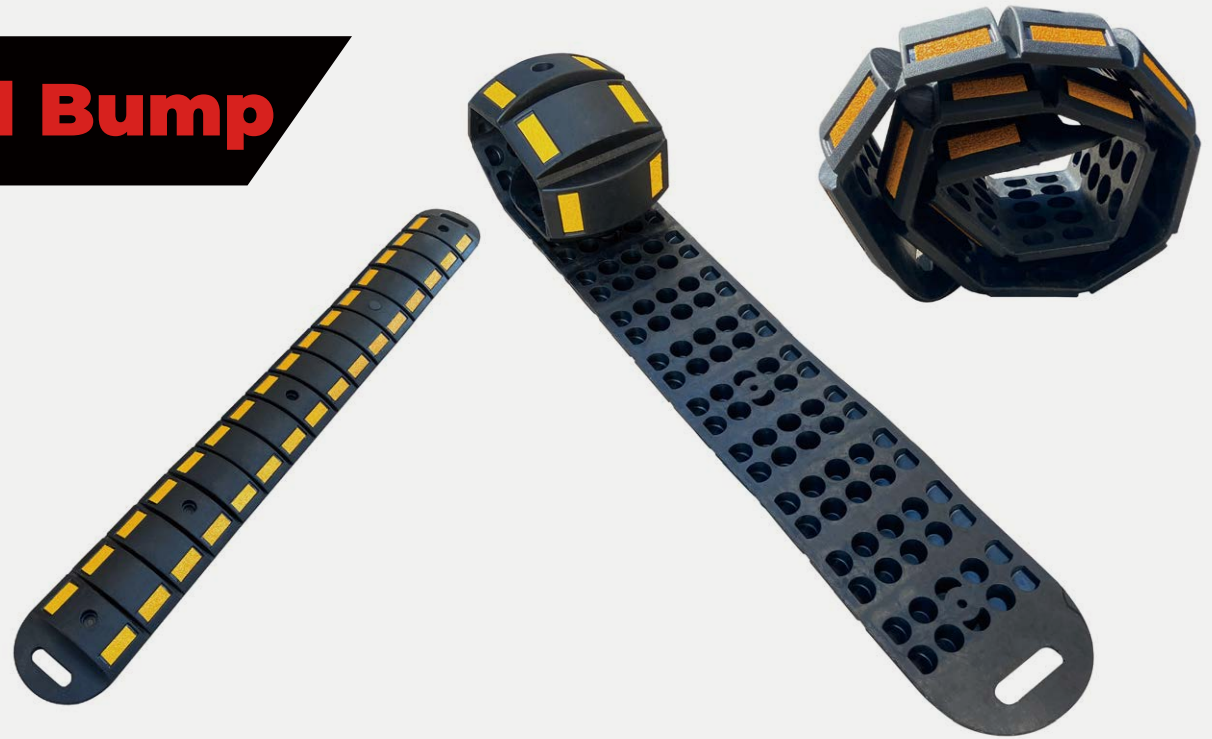

Anti-slip Mat In The Back

- The highly visible system is designed for temporary speed control applications, where it is desired to slow traffic speeds to 40km/hr. The secret behind the success of the system is its unique 'waffle-style' rubber underlay, which maximises adhesion to the road surface as vehicles traverse..It has been designed for use around highway work zones to assist in reducing speeds and therefore creating a safer work environment for road workers.

Model	Length	Width	Height	Weight	Material	Capacity	Reflector

Portable Rubber Speed Bump

- The highly visible system is designed for temporary speed control applications, where it is desired to slow traffic speeds to 40km/hr.
- Made of 100% durable solid rubber, Easy take to use and take away after using. Install on ground with 5 pre-holes to use for a long time
- It has been designed for use around highway work zones to assist in reducing speeds and therefore creating a safer work environment for road workers.

Rumble Bar

Rumble Bar-30

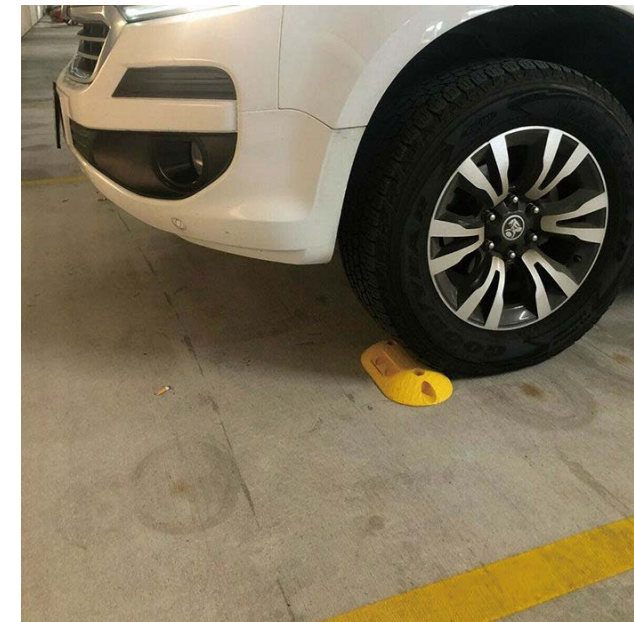

Rumble Bar-60

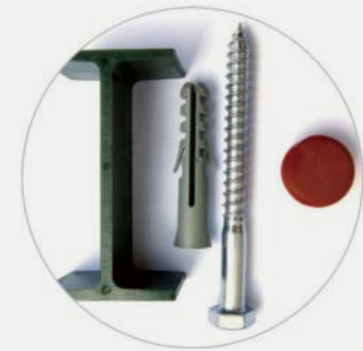

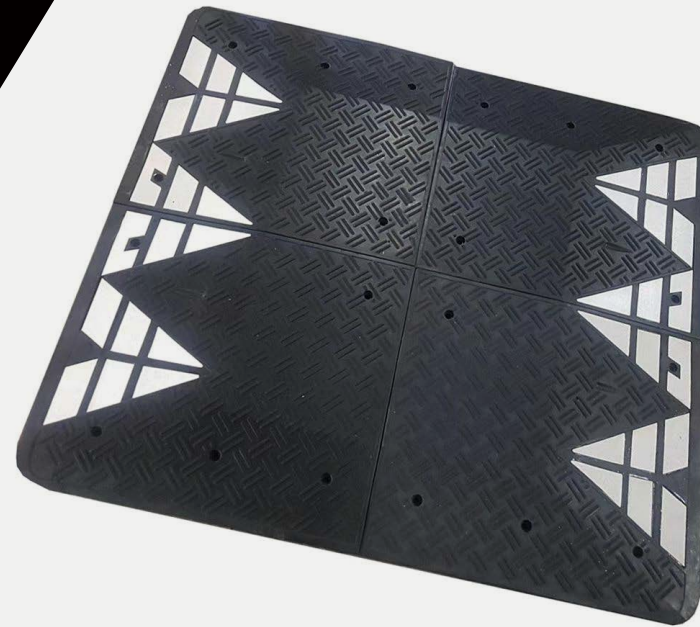

● Rumble Bars are made of ABS material and widely used on the road to lower the speed or a road direction guide.

1. There are cat eyes on the both sides and easy to see them at night
2. Three different sizes for your choice
3. ABS material can be supported about 20 tons
4. Easy to install

Model	Length	Width	Height	Weight	Material	Capacity
Rumble Bar-30	300mm	170mm	50mm	1.5kg	Rubber	15,000kg
Rumble Bar-60	600mm	170mm	50mm	3.0kg	Rubber	15,000kg

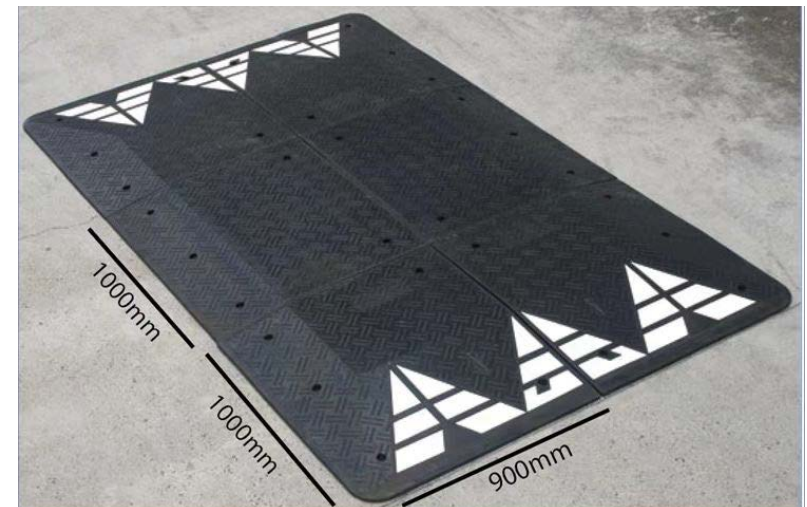

Speed Cushion

Rubber Speed cushion accessories

- Rubber Speed Cushions are made of recycled rubber tires. Rubber is lighter and easier to work with than asphalt and concrete, significantly minimizing the number of hours that need to be invested to install the solutions. Embedded reflective material increases visibility and safety, day or night.

Model	Each section Length	Each section Width	Each section Height	Each section Weight	Material	Capacity

PVC Traffic Cone _Black Base

- The PVC cone could be twisted and pressed in 180 degrees. It could also reinstate when you make its top touch the floor, with high flexibility against the run over and impact of the cars. Because of good weather resistance, it won't deform in high temperature 65°C and craze in low temperature -30°C.

Model	Height	Base Size	Reflective film Size	Weight	Material	Color
PCV45R	450mm	280*280mm	80mm*1	1.6kg	PVC+Rubber	Red&Black
PCV70R	700mm	360*360mm	100mm*2	2.8kg	PVC+Rubber	Red&Black

PE Traffic Cone

- Blowing Traffic cone, made of PE material and Rubber black base with different height and weight, there are 50cm, 75cm and 100cm for your choice. Base and cone can be locked together with special design, can be packed separately.
- Can be made of different colors and height, weight for your choice.
- Interlocking design for cone and base, easy to install and shipping.
- Can be fix the LED light on top of the cone.
- More competitive price with good quality.

Model	Height	Base Size	Reflective film Size	Weight	Material	Color
PE50R	500mm	280*280mm	100mm*1	1.5kg	PE+Rubber	Red&Black

Collapsible Cone

Collapsible from 70cm to 5cm

With super reflection at night

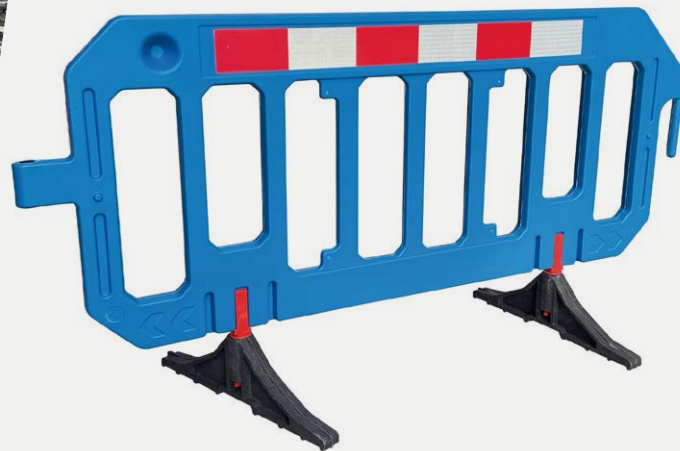

Top LED Light Stored in Base

- Collapsible traffic cones are highly visible during the day, even more so at night since they are illuminated from the inside by a battery powered LED light. It could be collapsed so take up very little room in a vehicle when not in use.

Retractable road cone is small in size, easy to operate and carry. The vertebral body is made of waterproof and reflective Oxford cloth. It is flexible and has the advantages of anti-aging, heat resistance, cold resistance, no cracking color and long service life. The base is made of PE material and the body is with a good reflection at night for its reflective bands.

Plastic Fence Barrier

Red&Yellow&Blue Chapter 8 Barrier

Free standing with
360°swivel feet

Connection is quick
and easy to use

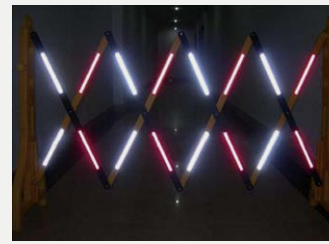

About Our Barrie

- 1, Manufactured in High Density Polyethylene: These barriers are blow moulded.
- 2, Barriers' high visibility colours act as an early warning of hazards for both pedestrians and road users, with an additional reflective strip to enhance visibility after dark or in poor weather conditions.
- 3, The Color Of Leg Can Be Customized
The color of leg can. be customized to RED/YELLOW/BLUE, The foot can rotate freely for easy stacking, free standing with 360 swivel feet.
The special structure of the sole of the foot increases friction and has a grip effect, and can be used on steeper roads.
There are grooves in the middle of the feet to allow water to flow through

Water-filled Barriers

- **Traffic Management:** Water-filled barriers are primarily employed to delineate lanes, redirect traffic, and create safe work zones in construction areas.
- Construction Sites:** In construction sites, these barriers act as protective shields, separating workers from ongoing construction activities and potential hazards such as heavy machinery or falling debris.
- Event Management:** During events, concerts, or festivals, By strategically placing these barriers, event organizers can manage pedestrian flow, restrict access to restricted areas, and ensure the safety of attendees.

Water-filled Barriers

WB05&06

WB19

- Three-hole water barriers are hollow plastic objects installed on highways and urban roads where cars and roads are prone to collision, such as: road turns, roadside booths, toll booths and entrances and exits of elevated roads, parking lots, communities, gardens, gas stations, municipal engineering sites, etc., which play a role in isolation and collision prevention.

Rotational three-hole water barriers are made of highly elastic and high-strength imported PE plastic. When a car collides with the equipment, it can effectively reduce the impact force. Water or sand is added to the hollow to increase the deadweight. Reflective film can be attached to its surface to make it more eye-catching at night.

Traffic Vertical Panel

FDT06

FDT07

FDT01

The engineering components at the bottom have high resilience, which will not cause damage to people and vehicles when it is impacted. Large area 3M reflective film, better warning effect at night; smaller base size, suitable for more road scenes; good weather resistance, impact resistance, high temperature and severe cold.

- The entrance sign is crafted with sturdy construction, ensuring its long-lasting use in various settings.
- The road diverter sign is an ideal choice for installation in underground, parking lots and more.
- The traffic direction sign has bright colors, making it easily visible and understandable from a distance.
- The traffic cone is convenient to install and does not require additional tools or equipment.
- The warning sign is resistant to wear, allowing for extended use without losing its effectiveness.

Plastic Chain Post

- **HIGH-VISIBILITY WARNING COLORS:** Designed with White and red stripes to maximize visibility, these stanchions serve as an effective warning signal. Easily connect them using the included S-hooks and chains to create a clear safety barrier.
- **DURABLE, HIGH-QUALITY MATERIAL:** Crafted from high-strength PP and PE materials, these traffic cones are built to resist sun damage, fading, corrosion, and cracking.
- **STABLE & FILLABLE BASE:** Each traffic cone features a fillable base that holds up to 8 lbs of water or 12 lbs of sand, providing excellent stability even in severe weather conditions. The base is designed with convenient inlets and outlets for easy filling and drainage.
- **MULTIPURPOSE DESIGN:** Standing 32 5/8" tall, these delineator cones are versatile and ideal for use in parking lots, construction zones, garages, stadiums, and hotels.
