a new water park connection system was created.

CH Inflatables

OUR PERSISTENCE

Welcome to our vibrant castle world. We have 15 years of innovative design and manufacturing experience. Including water park, inflatable slides, inflatable obstacles, inflatable sports, inflatable castles, etc., we have a production workshop of 10,000 square meters. There is a professional design and manufacturing team that can customize your water park as required. CH Inflatables brings joy to every corner of the world!

15 years of unremitting perseverance only to create safe and reliable inflatable products with guaranteed quality for our customers, we promise not to lure customers with low-cost promotions not to make good for the sake of profit. CH Inflatables always adheres to the concept of pursuing innovation, embracing change, integrity, responsibility, and sharing. We will sincerely welcome everyone who chooses us with the most sincere service and the best quality!

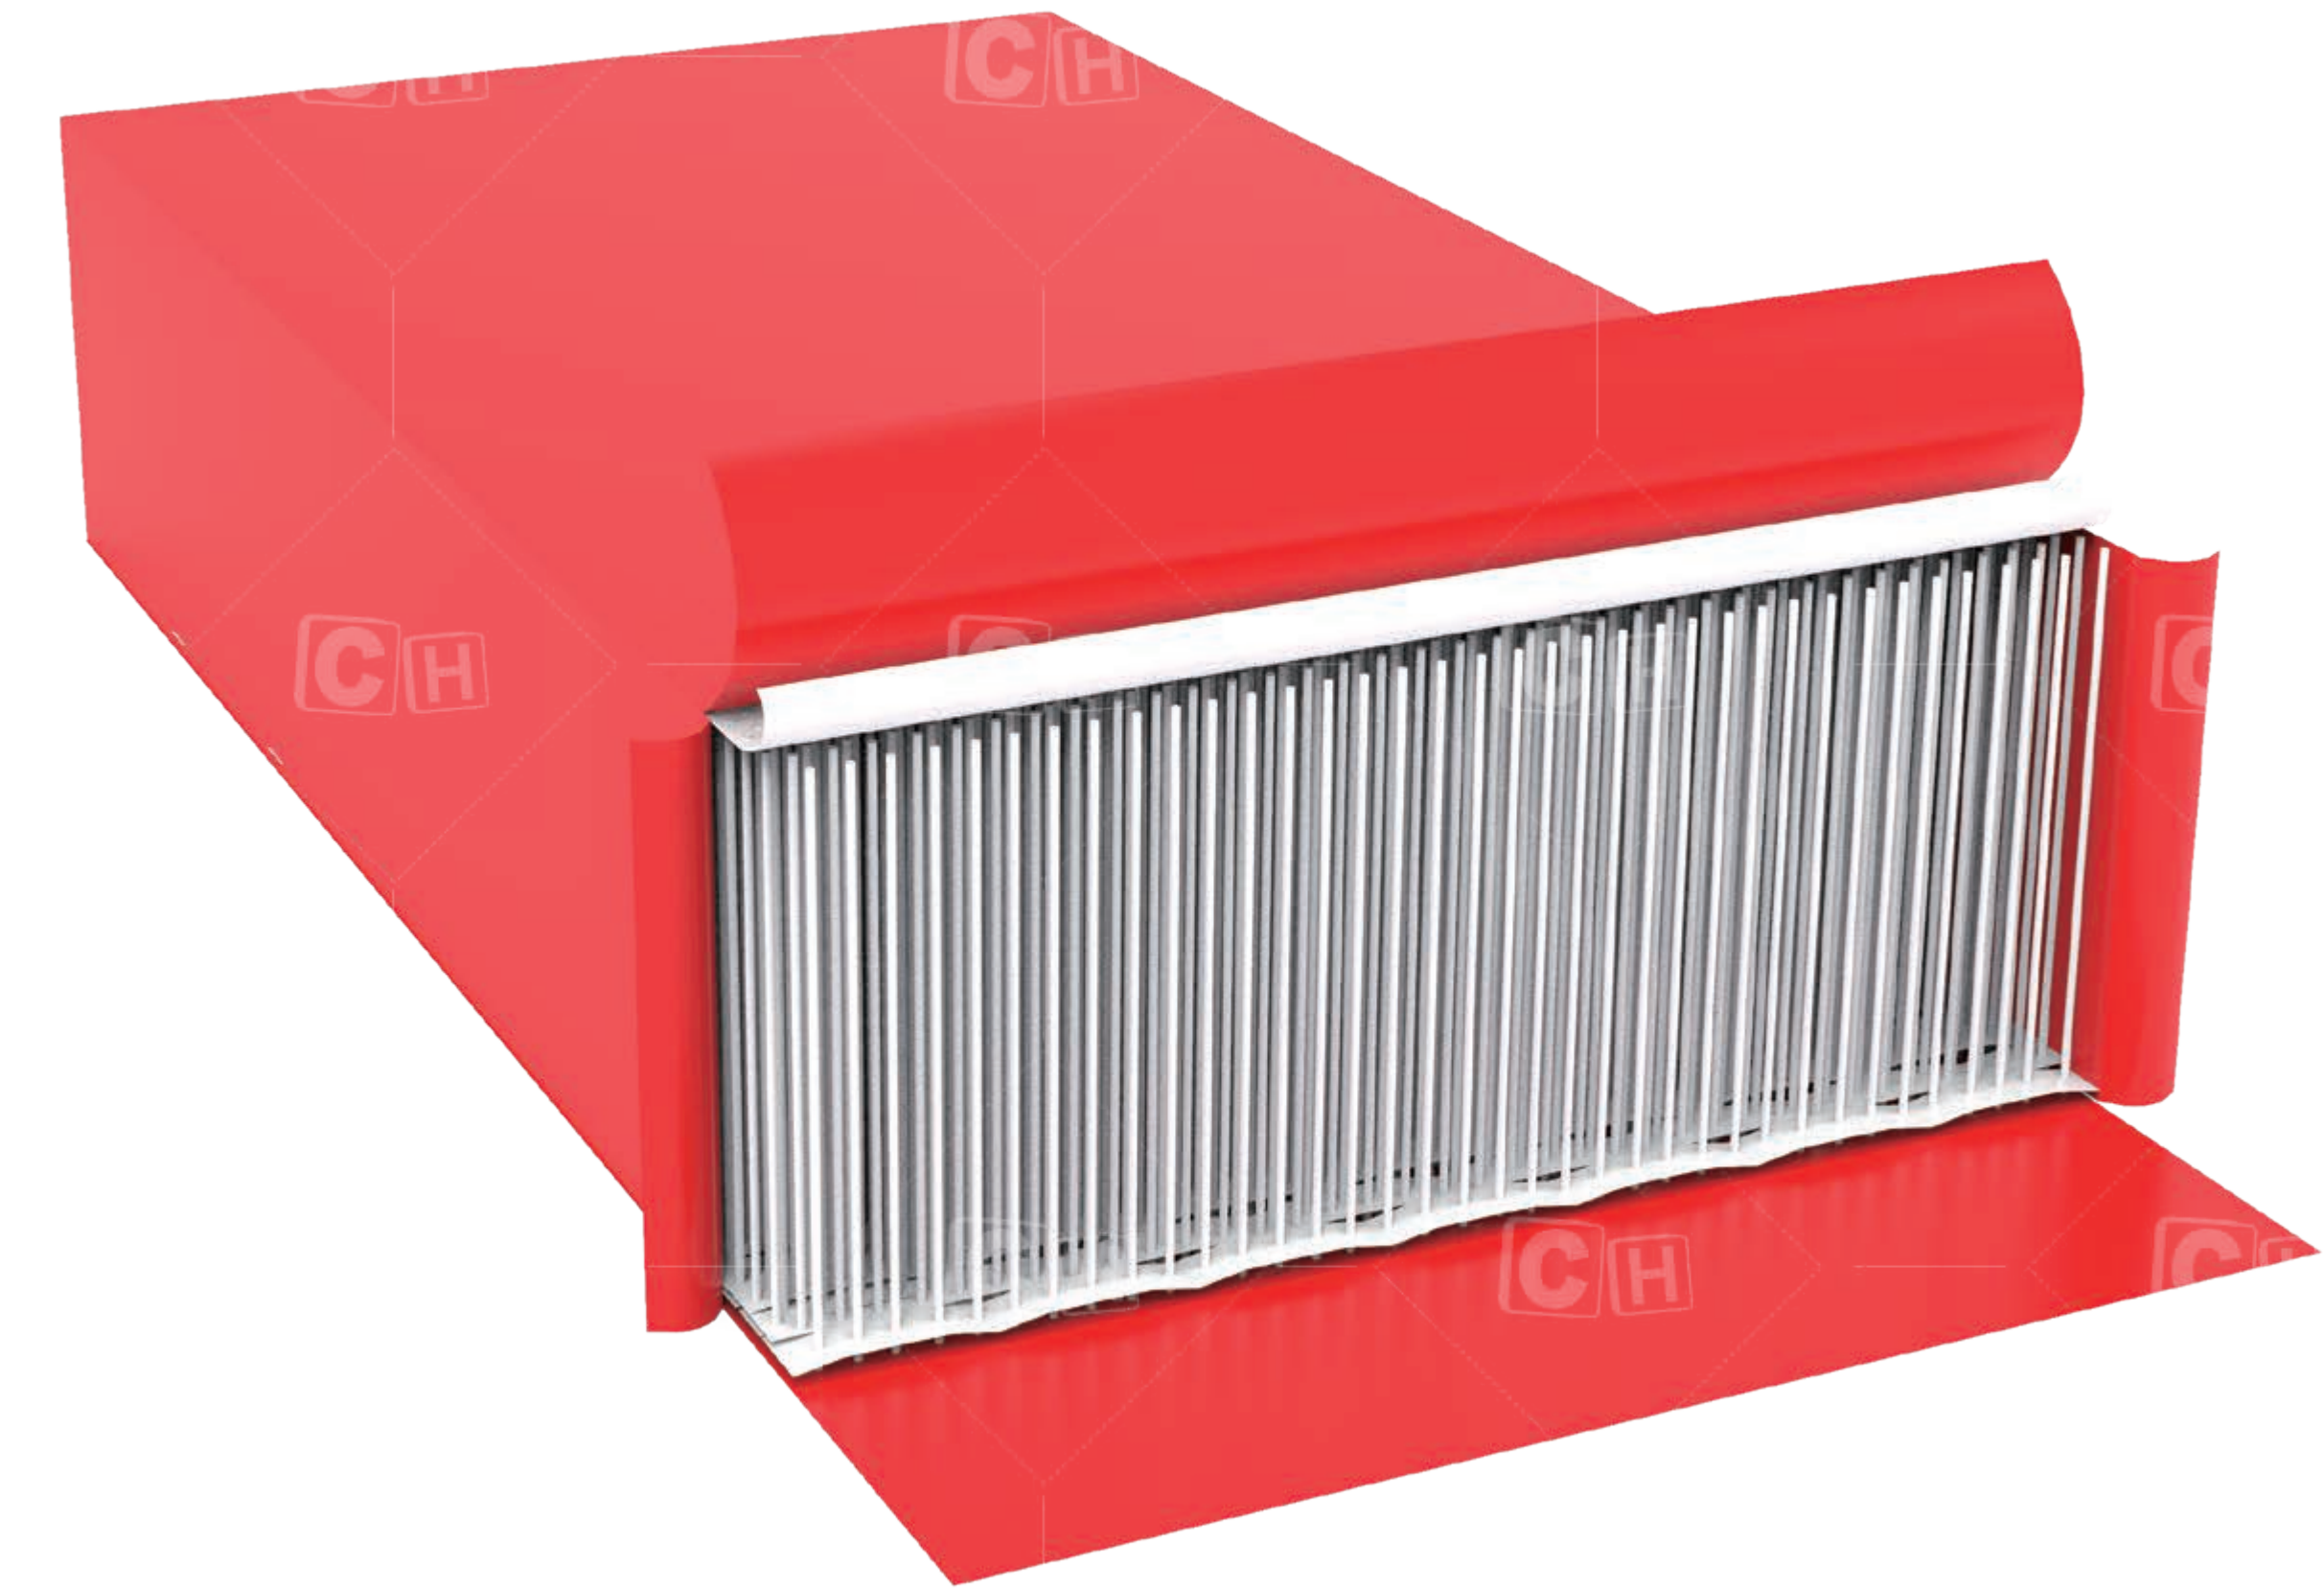

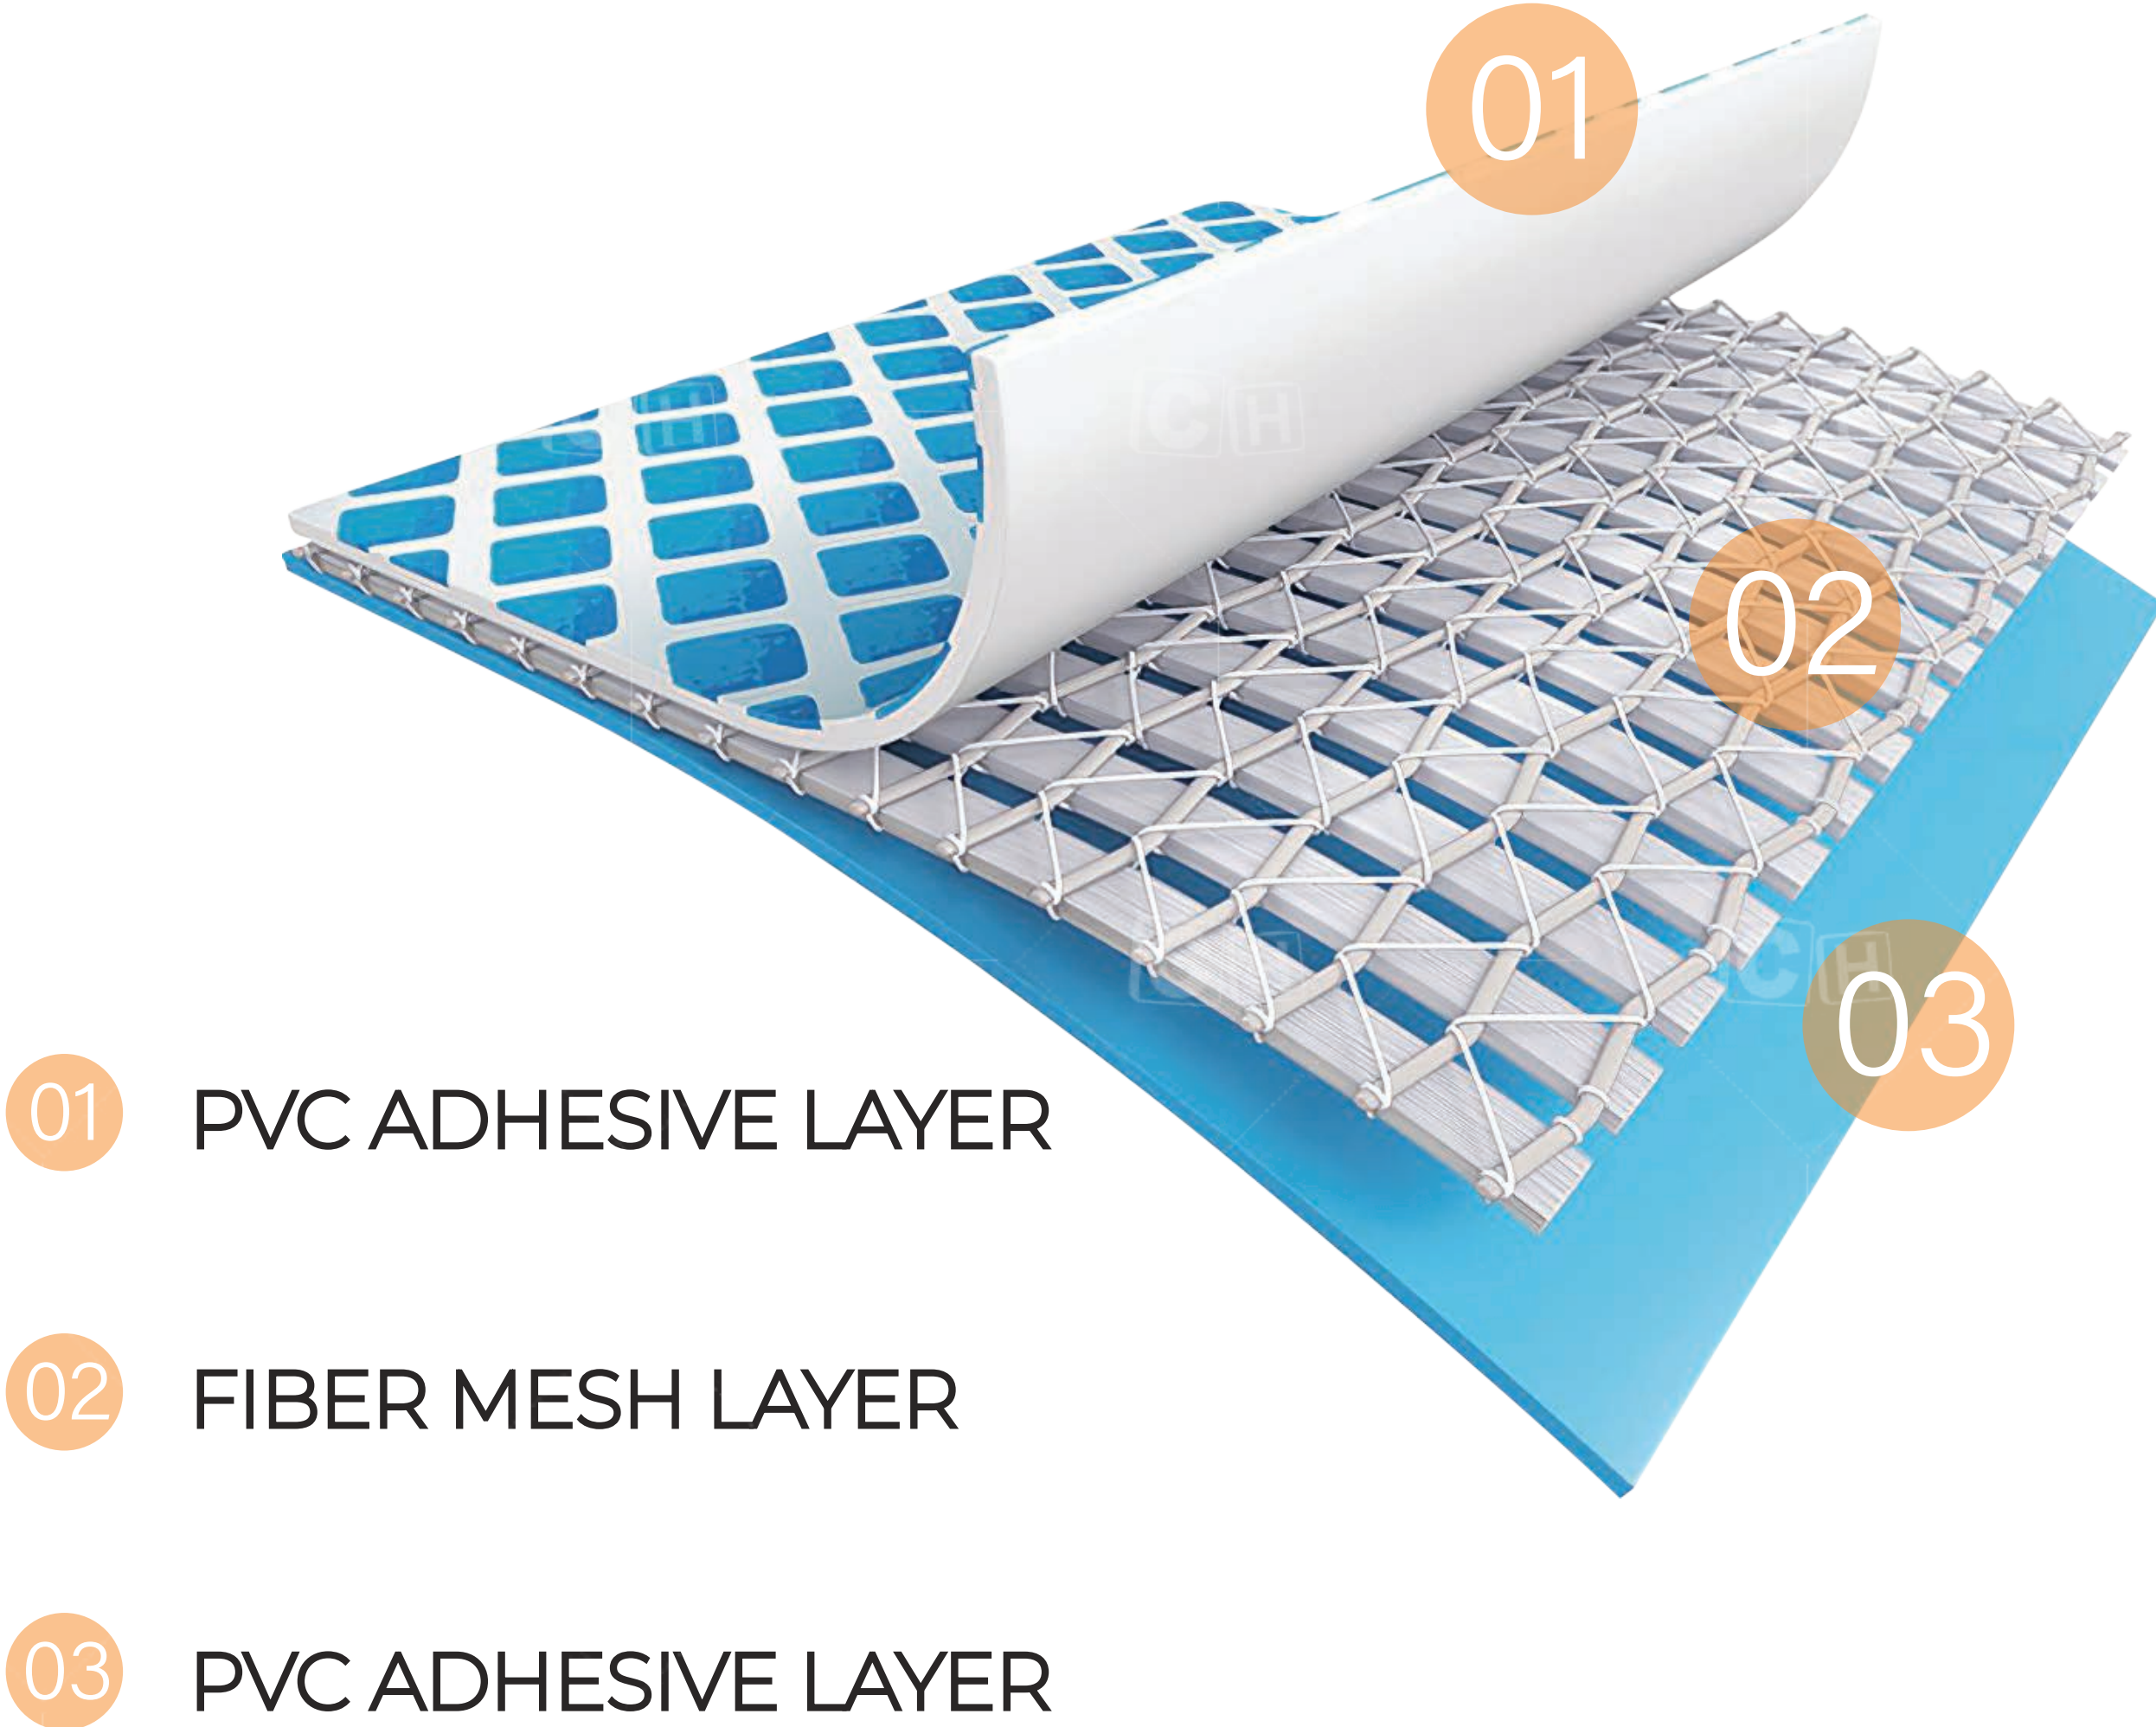

In the past 10 years, CH Inflatable is also known as the leader in commercial water sports entertainment. Our inflatable amusement park system has changed the face of commercial entertainment and promised to continue this transformation into the next decade.

HIGH-QUALITY RAW MATERIALS

We use high-quality raw materials, which is non-toxic and tasteless, anti-ultraviolet, anti-aging, flame retardant, in line with international standards. PVC mesh cloth is a product made of transparent PVC film and mesh cloth. The mesh in the middle can be clearly seen through the PVC film. It has a strong three-dimensional sense, and feels soft. It belongs to environmental protection and low toxicity products.

MATERIAL ANALYSIS

MATERIAL PROPERTIES

- 1. Excellent weather resistance and extended service life.
- 2. Enhanced chemical resistance.
- 3. With anti-ultraviolet and anti-oxidation properties.
- 4. Flame retardant, fireproof
- 5. Excellent tensile, tearing and peeling resistance.

CH all inflatable products and water park products use three-layer seams and super-durable two-layer PVC high temperature heat sealing, so that the product has a longer service life.

EXCELLENT SERVICE

CH Inflatables provides a full range of support, Includes assistance in licensing, installation, business planning, custom design services and maintenance, we continue to strive to provide customers with the highest level of service and support, If you want the best product and enjoy the best service, please choose to cooperate with the most professional supplier.

OUR ADVANTAGE

INNOVATIVE TECHNOLOGY

In addition, any of our products can be connected to our runway and water park using our proprietary connection system.

We have developed a game rule that proves to change our industry. The modular combination system provides multiple angles and unlimited possibilities for water park design. The modular combination system allows the layout of the water park to be changed quickly and easily, which allows your water park to develop, so adding new exciting new components is also very simple and easy. Using our system, you can start with the smallest aquatic product layout and then use all existing components as the product grows in size.

CONNECT THE SYSTEM

All our parts (such as handles, anchor rings) They are all replaced by high temperature heat sealing instead of glue heat sealing, so it is not easy to peel off. The use of CH Inflatable creates the original Copper buckle and anchor ring connection system, making the entire water park very stable.

METICULOUS WORK

We reinforce each weak point (such as Heat seal, internal baffles, connection points). The fixed anchor ring is connected with 316 stainless steel for hardware accessories, and the service life in water is longer than other metals.

PRODUCT TESTING

After all products are completed, they need to be inflated for 48 hours to check the tightness of the product and ensure that the product is shipped to the customer without problems.

OUTSTANDING VALUE

When considering the purchase of a water park, it is important to analyze the return on investment over a period of 3 to 5 years, not just the initial cost. Of course, you can find some cheap alternatives that are cheaper than ours, but most cheap products may last less than a season. CH Inflatables products are 1 to 3 times better than any counterfeit brand. This means that the service life is three times the original, And the return on investment is great, the time it takes is less, the income is faster, and the problem of maintenance will also be reduced. This is the reason for choosing CH Inflatables.

THREE-YEAR WARRANTY

Product warranty for 3 years, lifetime maintenance. The repair kit is distributed with the packaging. If you encounter problems, please contact our factory, and we will teach you the correct repair method.

ONE-STOP SERVICE

We can provide all the necessary accessories needed to install the product, such as life vests, bungee cords, water bags/sandbags, ropes, etc.

THIRD-PARTY CERTIFICATION

Every product of CH Inflatables is tested for leaks and field tests to ensure that the products meet safety standards. Our products have passed third-party certification, have CE certification, and have reached the EU standard EN14960. We strongly recommend that customers request proof of compliance when considering any supplier.

ACCESSORIES

The air blower has CE, UL, SGS certificates

FIXING AND INSTALLATION

INSTALL

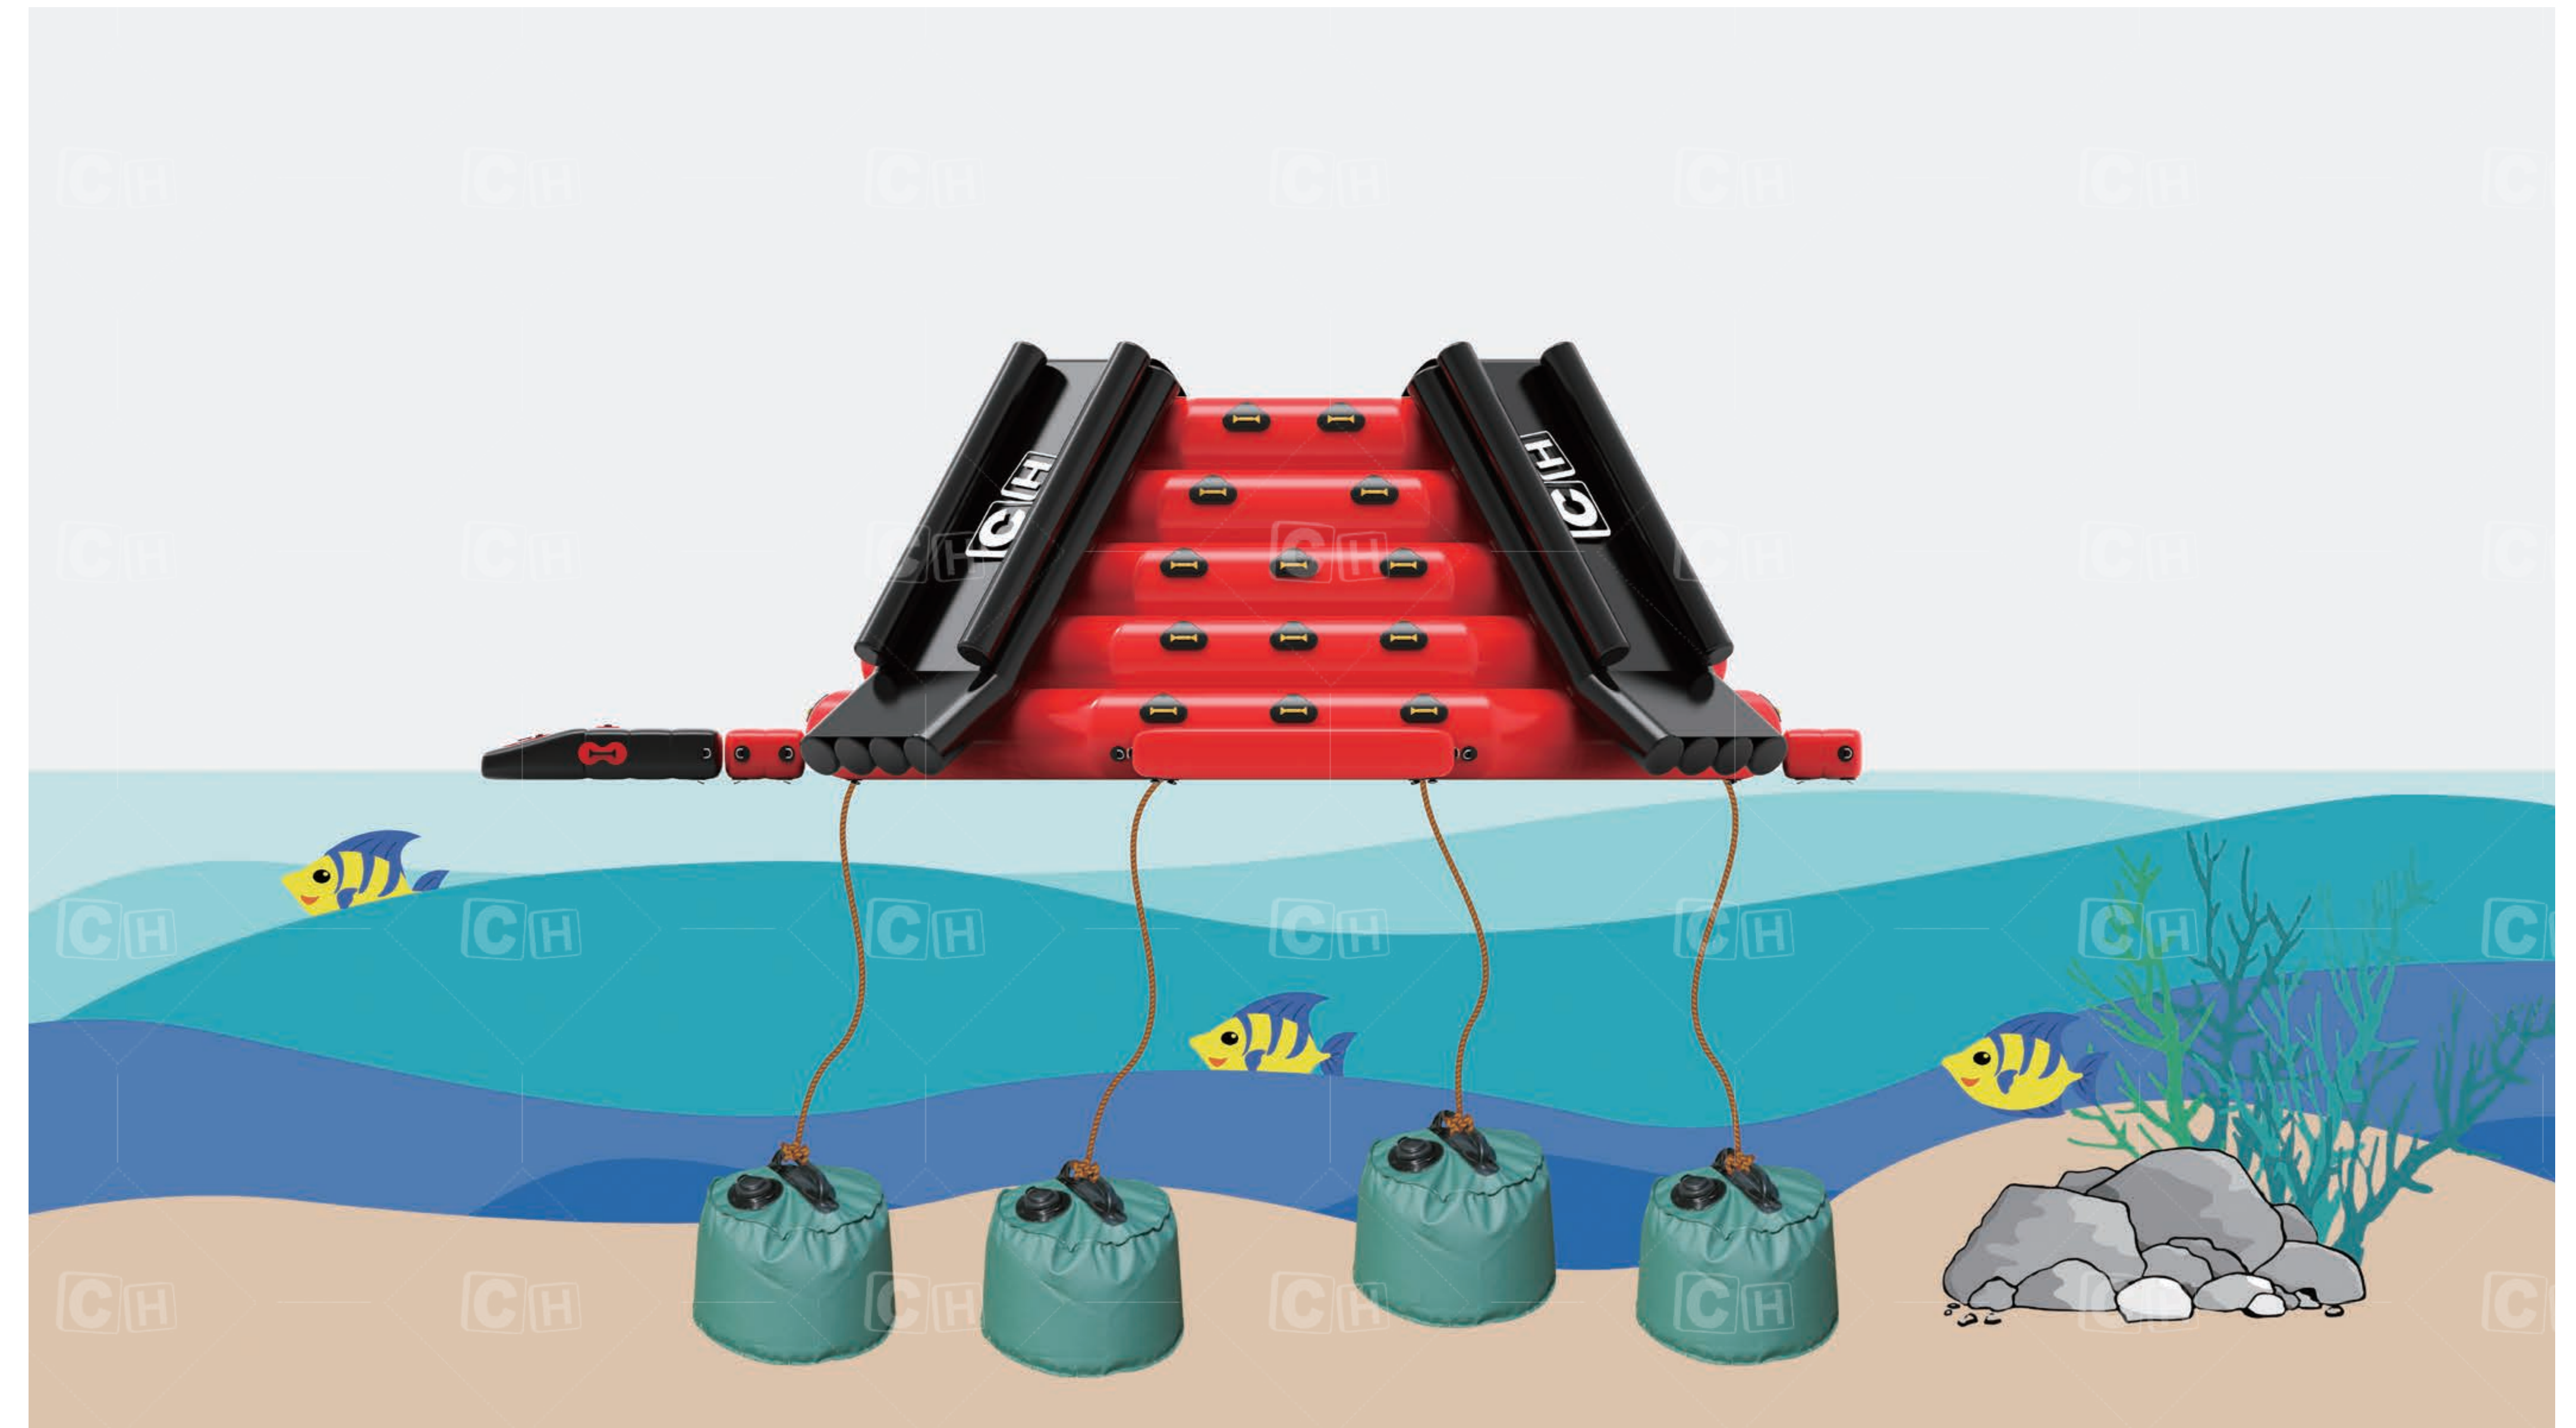

- 1) Unpack the water park, find the valve and open it.
- 2) Insert the nozzle of the air pump into the valve and lock it in place by turning with clockwise. Turn on the air pump and inflate each part. When the inflation is up to 85%, please remove the air pump and turn it counterclockwise to disengage it, and then cover with material.

FIXING

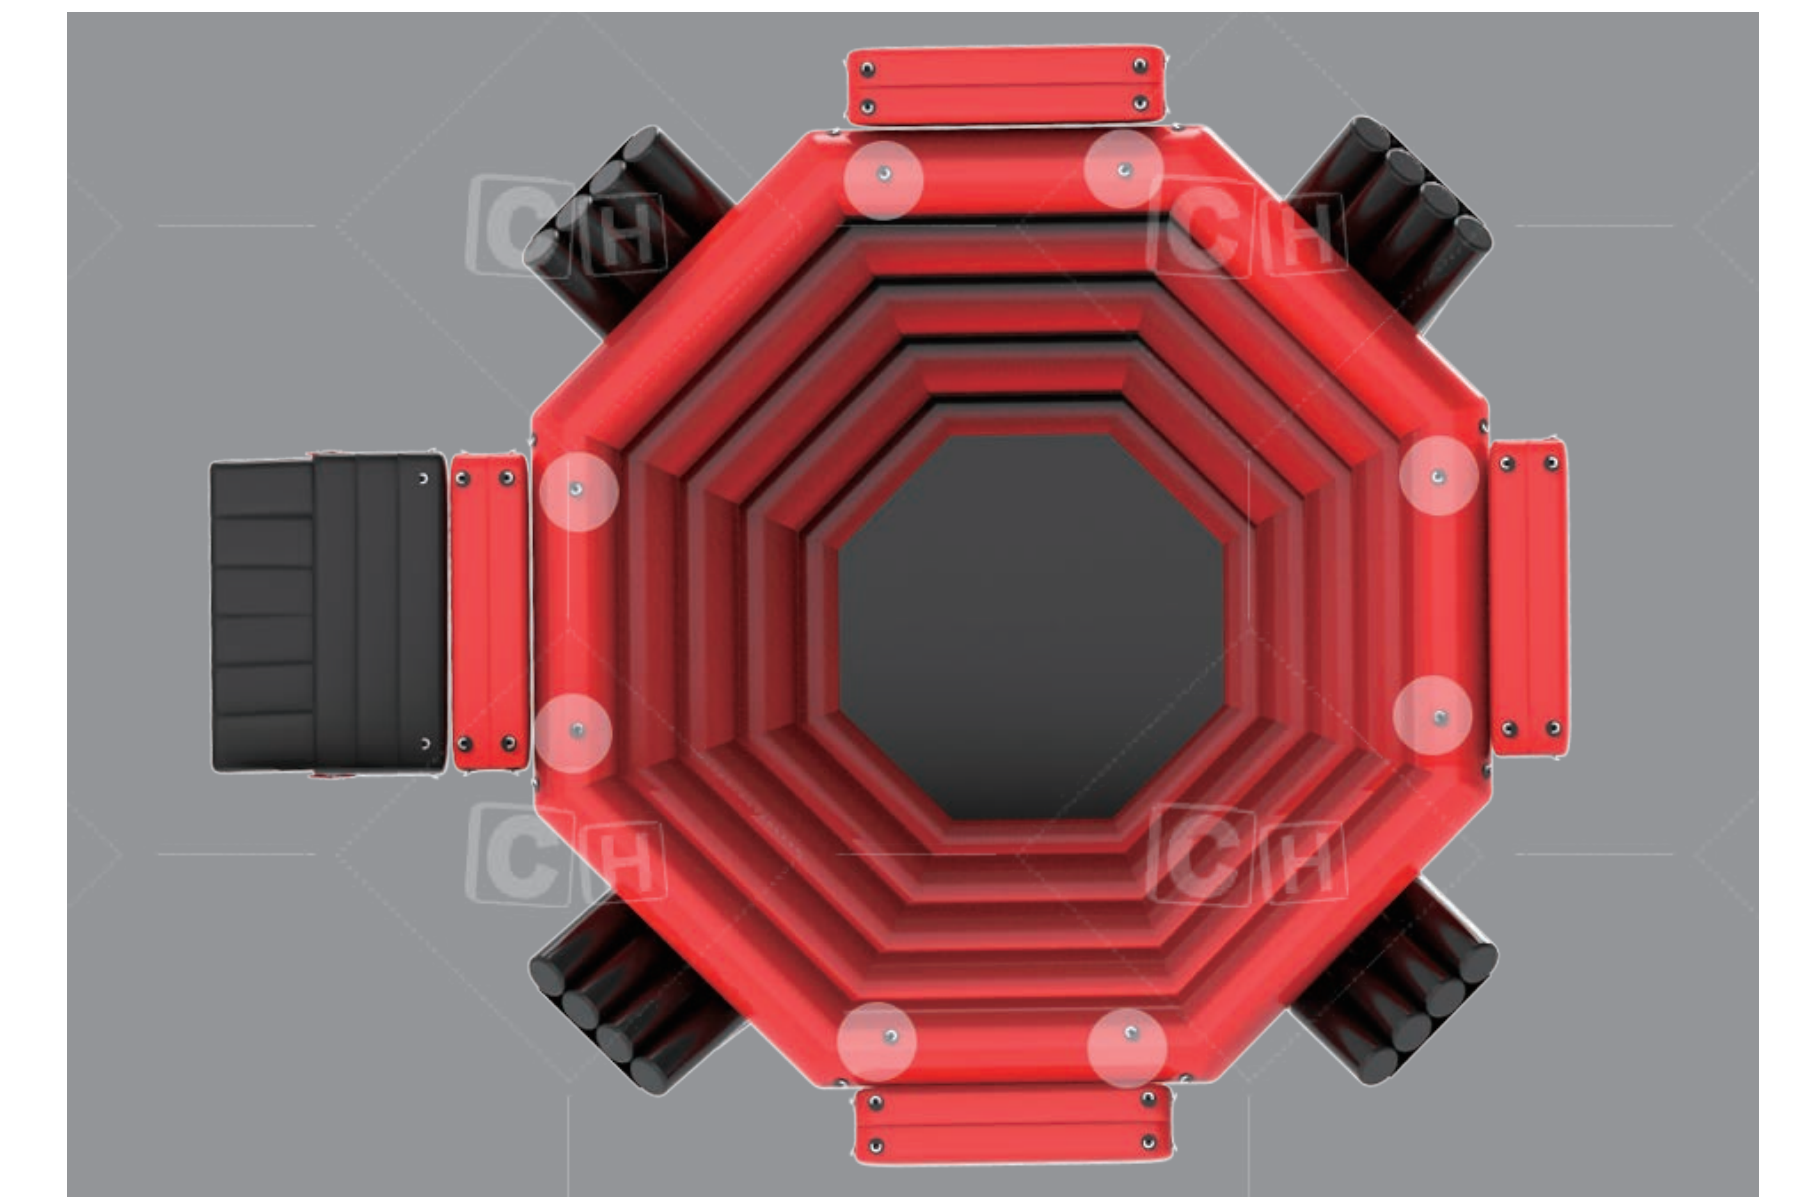

- 1) Fixing the professional customized water bag in the water which is near the section products. Let the diver using the buoy to fix the fixed point on the water park

CONNECTING EACH SECTION

- 1) Connect with ropes for those parts with D ring on the bottom. Each section might with different quantities of D rings, please contact each D ring with ropes if possible.
- 2) Inflate every section, put them on the water which near the sea bay. Please connect each section by the proposal of the water park. Using the D rings on each bottom of the section and connects with ropes and stable by water bag.
- 3) The section with top eyelets should be connected with the fixing rope which passing through the eyelets. After connecting the parts, use one side hook to join them together with other side ring

FIXED WATER BAG

BOTTOM SCHEMATIC

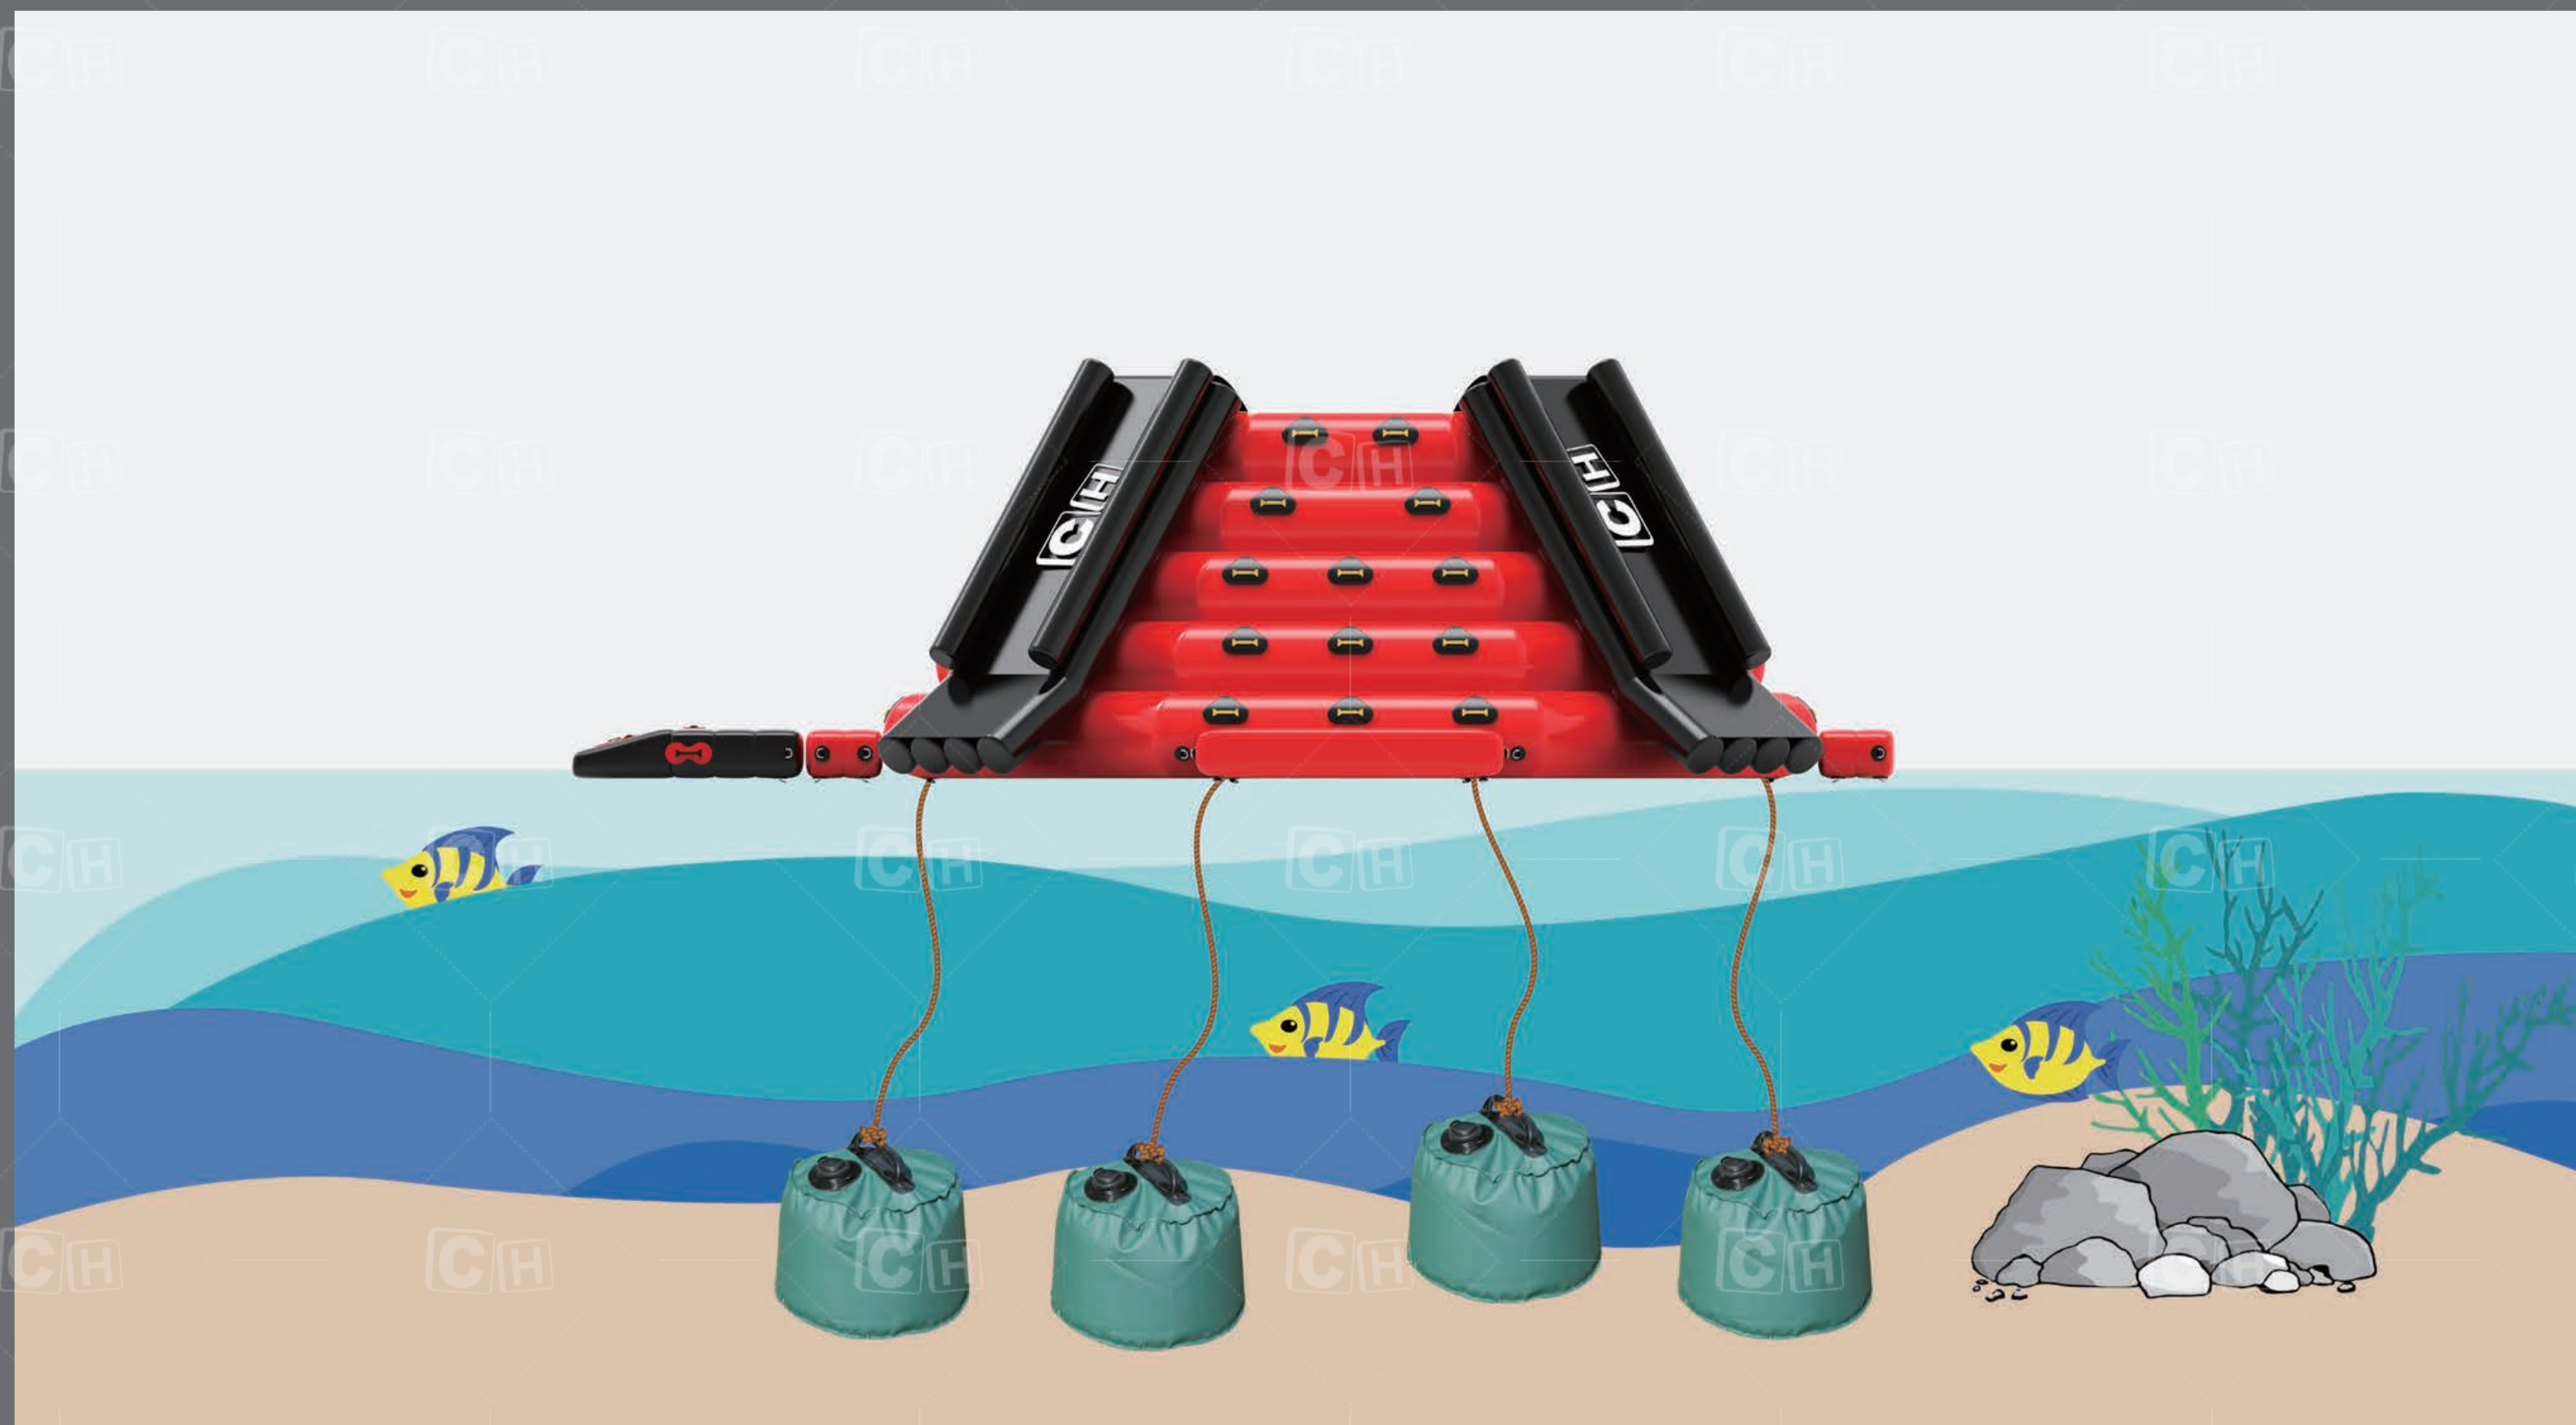

TOWER

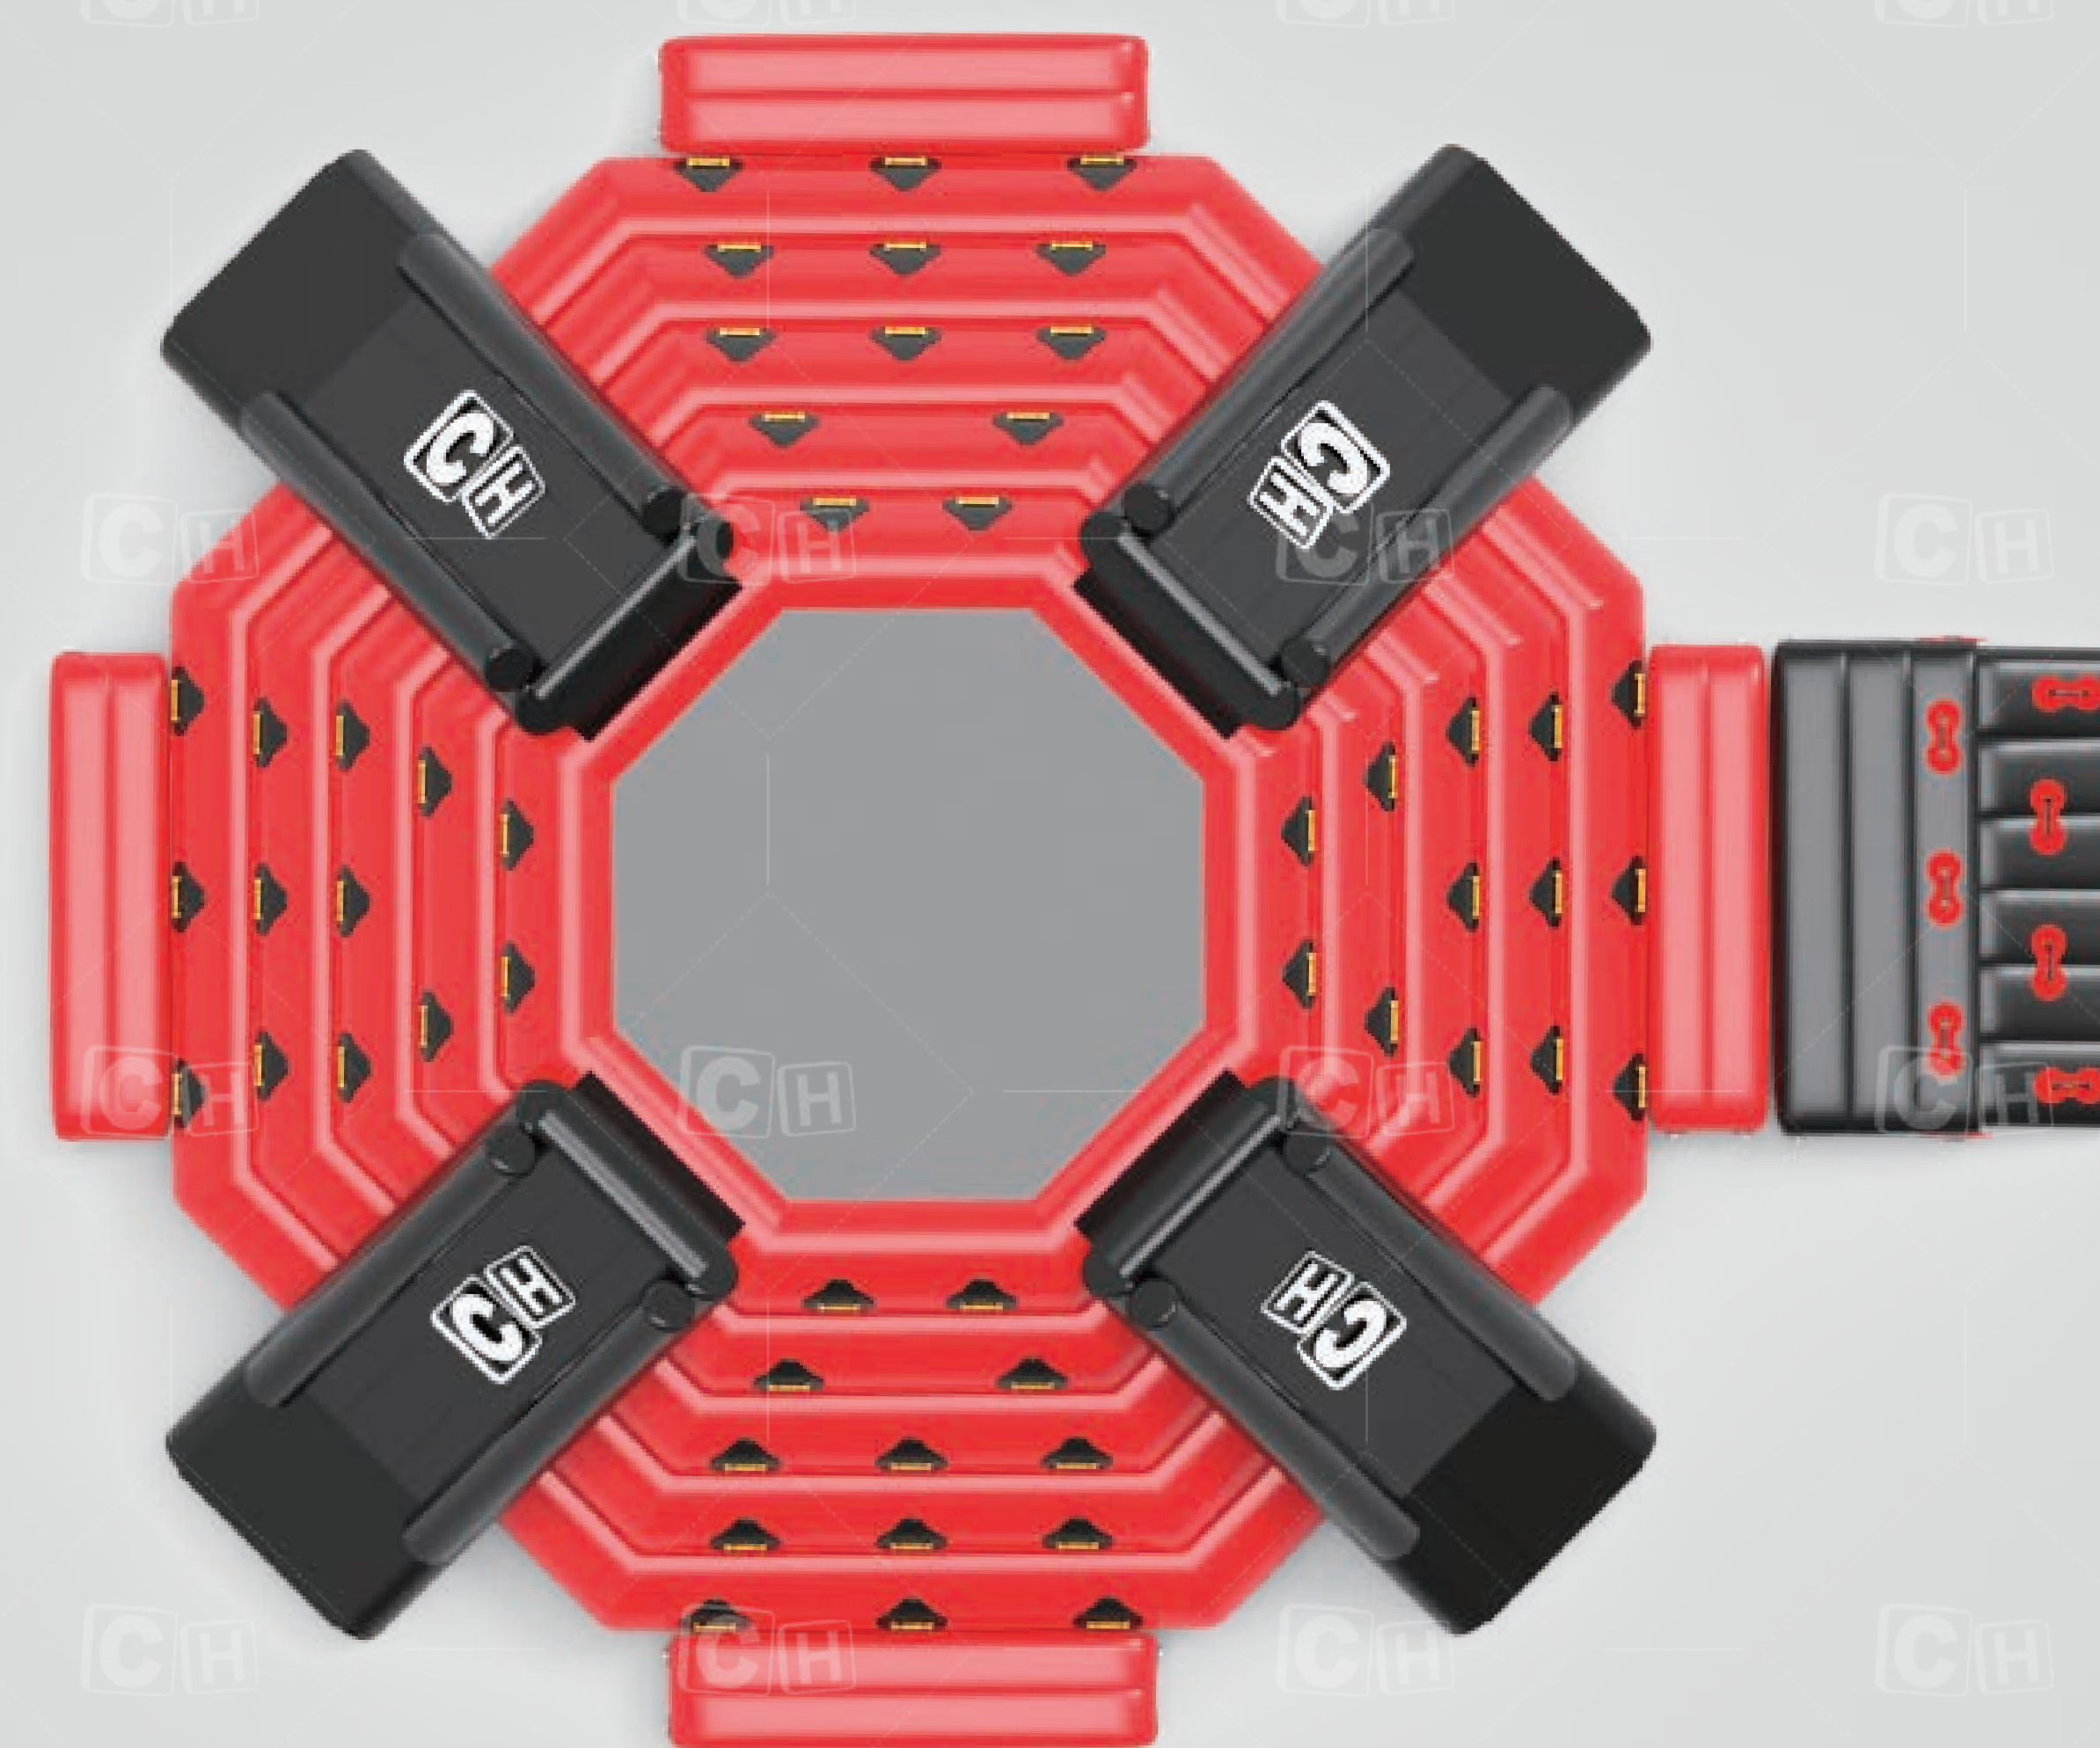

Number: CH-WP—6074

Dimensions: length 8.5mx width 7mx height 2.7m
(Length 28ft x width 23ft x height 9ft)

Tower a stable tower, can climb, slide, jumping and splash. The climbing wall slopes inwards to provide convenience and stability, while the mesh floor and climbing area form an internal splash area. It can be used alone or connected to any water park using 4 side 5D ring link fixing systems and our secure safety harness system.
