头烫

## 设计师首选面料

# BOZE & CIGNO

LEATHER

It is made of pure silicone oil and is a highly inert product with exceptional stability. It is not easily corroded by acids or alkalis and has excellent resistance to aging and weathering, which can last up to 10 years.

It has excellent resistance to cold and heat changes and excellent thermal conductivity, Under 300 °C and -60 °C , it still maintaining good elasticity.

It has smooth surface, good flexibility, baby-like touch, safety and environmental protection, and can pass the EU Reach lab test!

It is non-toxic, odorless, easy to clean, anti-oil stain, fireproof, heat-resistant, tear-resistant, scratch-resistant, and does not deform or contract. It has excellent characteristics such as high tensile strength, abrasion resistance, and low shrinkage.

the waxy and juicy chenille fabric reaches the depth of vision and touch

Cream space

# FIRE RETARDANCE

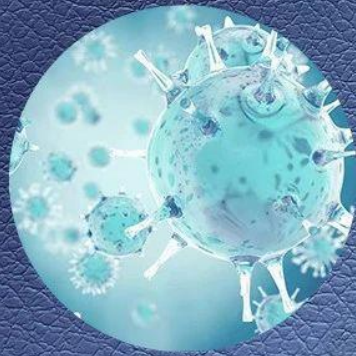

This full organic silicone Leather  
will not produce a visible flame  
when exposed to fire!

But will instead provide effective  
flame retardance.

# ANTIBACTERIAL AND MOLD PROOF

The antibacterial rate  
is more than 99%.

Staphylococcus aureus  
Escherichia coli  
Candida albicans  
Pseudomonas aeruginosa  
Klebsiella pneumoniae

Prevent burns  
from cigarettes.

Flame-resistant

Anti-mildew and  
antibacterial

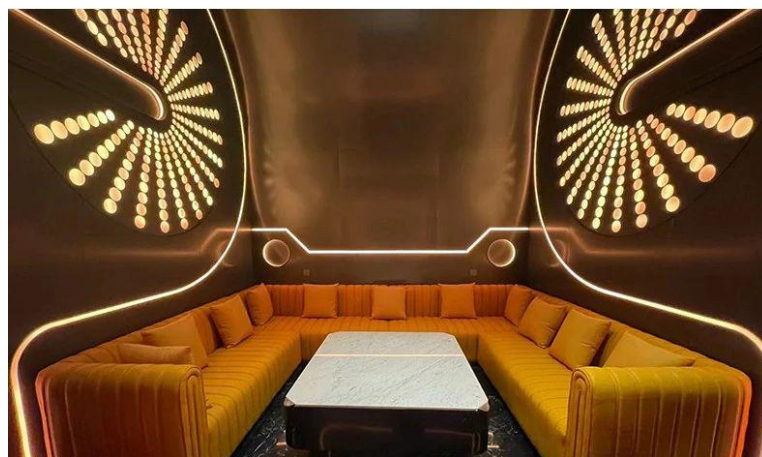

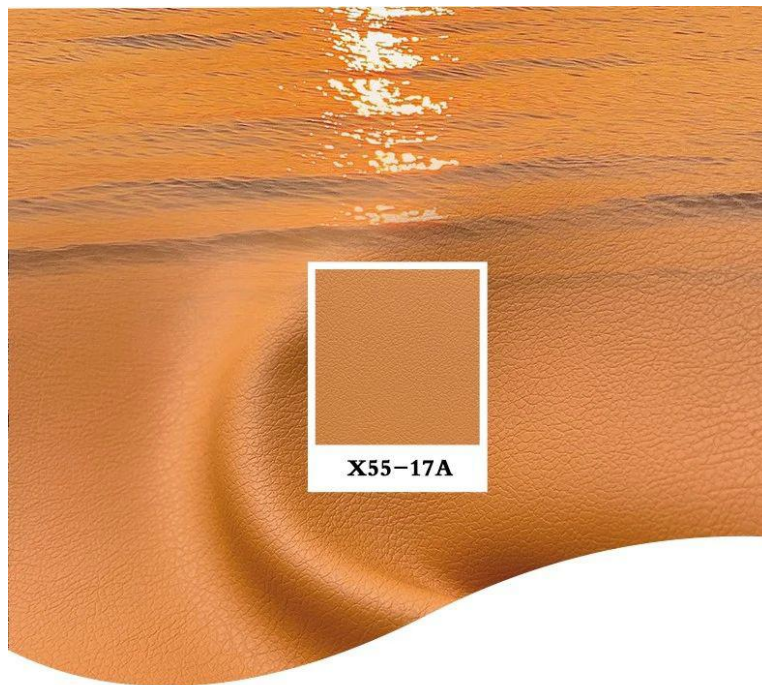

Waterproof and  
UV-resistant

Resistant to acid  
and alkali corrosion

Stain-resistant  
and easy care

Seemingly simple  
but not simple!
