Differ 3 Types of Printing

1, Digital Print (The Cheapest One)

No MOQ and personalized production have obvious advantages.

2, UV Print

Durability requirements, printing on dark leather → choose UV printing. Suitable for patterns requiring weather resistance.

3, Silk Screen Print

Large quantity + need special effects → choose silk screen printing. Suitable for printing patterns with fine lines and single colors.

Compare UV Printing and Digital Printing

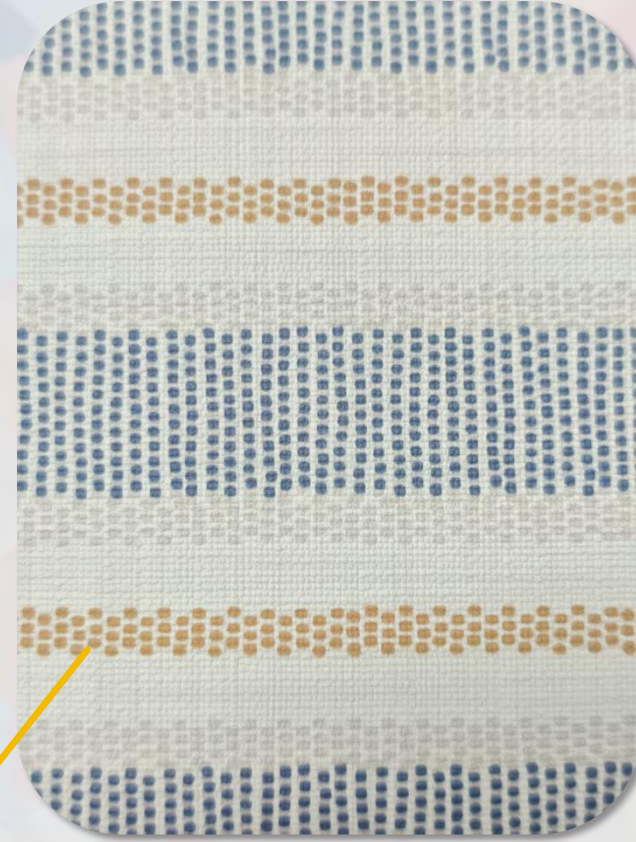

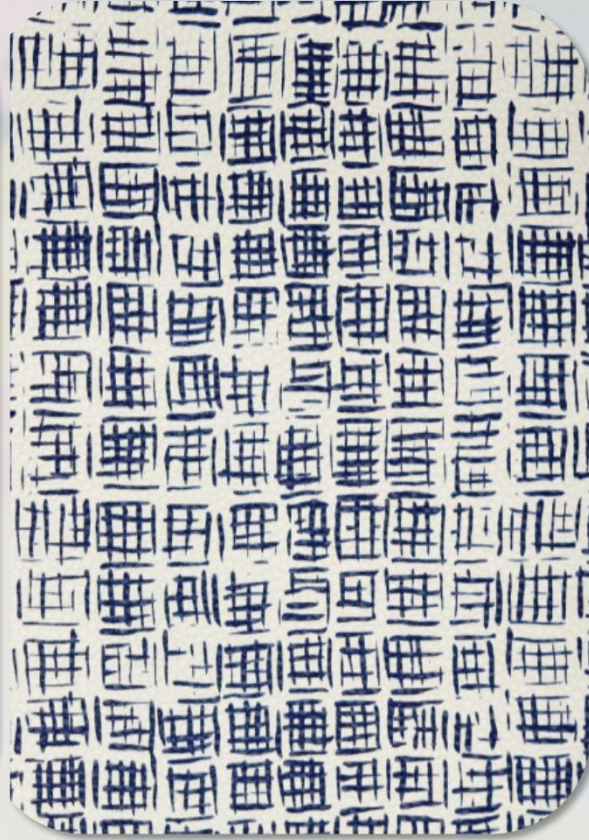

The left one is UV printing, the right one is Digital printing.

From the comparison, we can see that in the printing of complex patterns, the effect, color and clarity of UV printing are better than digital printing.

Digital Print Reference

Dear clients,

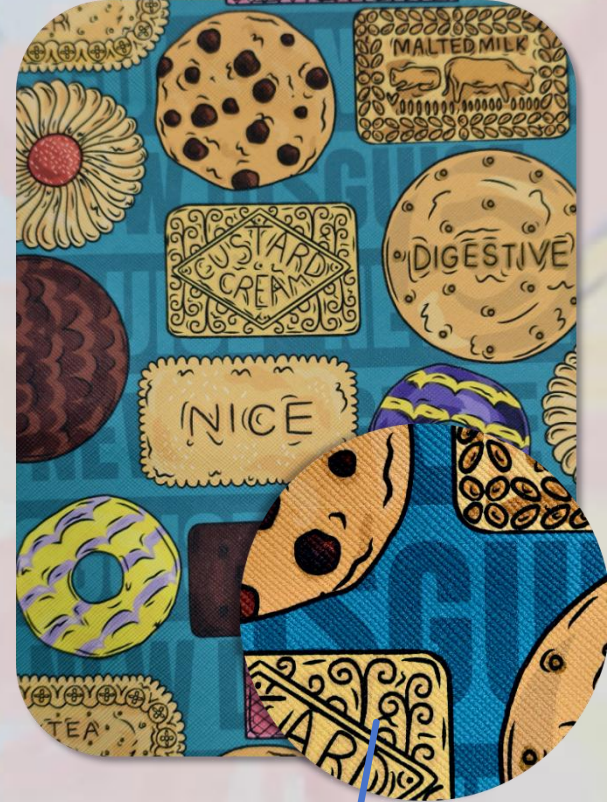

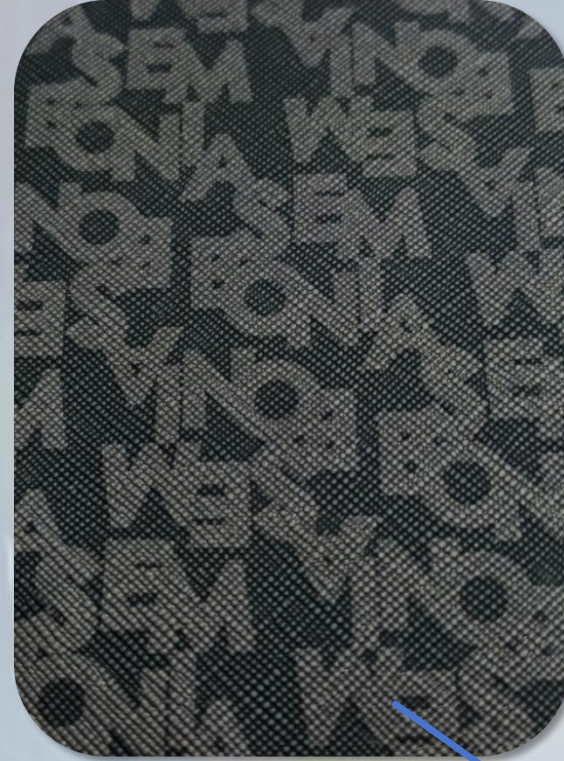

These are some of the prints we have made for our clients.

These are for your reference only and cannot be used directly! Please understand!

UV Print Reference

Dear clients,

These are some of the prints we have made for our clients.

These are for your reference only and cannot be used directly! Please understand!
