INTRODUCNON

”

Let our products
Appear on all occasions as you like

PVC for automobile

- 1) Flame resistance is working, USA standard (FMVSS 302), UK standard (BS5852) and Australia standard (AS1530), etc. It can make sure won't be hurt yourself once your car get fire.
- 2) Anti-UV, it can be working in lab test about 600 hours with different light, it can make sure the color won't be change once put the material on sunshine.
- 3) Tear resistance is 4.5kg. It mean very good quality can accept your pet on seat.
- 4) Peeling strength is $\geq 2.5\text{KGS}/3\text{CM}$. It mean very good quality and can accept 200KG people seat it
- 5) Flexing-resistance, no damage after 50,000 times at room temperature, and 20,000 times at -20°C ., it mean very good quality and can be use 8-10 years
- 6) Abrasion-resistance, 30,000-50,000 turns Martin-dale Test. If you have puppy, the claws on seat is no problem
- 7) Hydrolysis resistance and durable 8-10 years. One seat one life.
- 8) It can pass the latest Reach 225 test standards. No Phthalate. Total eco friendly
- 9) It can be made GRS Recycled PVC leather, the recycled part is from the wasted plastic bottles, its composition is around 60%. We can open the GRS TC certificate. So protect the earth, protect us.

Automobile microfiber

- 1) Tear resistance 8kg/3cm. It mean very good quality can accept your puppy on seat.
- 2) Peeling strength $\geq 10\text{kg}/3\text{cm}$. It mean very good quality and can accept 200KG people seat it
- 3) Tensile strength 40-80kg/3cm, very good for seat.
- 4) Flexing-resistance, no damage after 100,000 times at 25°C ., it mean very good quality and can be use 8-10 years.
- 5) Abrasion-resistance, 30,000-50,000 turns Martin-dale Test. If you have puppy, the claws on seat is no problem.
- 6) Hydrolysis resistance, no bubble, no peeling, no crackle, no dissolution found. It's more durable 8-10 years.
Colour fastness Grade 4. won't be change color in heavy situation.
Eco-friendly, pass the latest Reach 225 test standards
DMF can be made under 100ppm! And 0 DMF for our water-borne and solvent free microfiber leather.
It can be made GRS Recycled microfiber leather, the recycled part is from the wasted plastic bottles, its composition is around 60%.
We also make Bio-Based Carbon content (Vegan) microfiber leather. It's made from bamboo, wood, corn, apple, seaweed, pineapple and grape etc. The Bio content from is 30% at present.

PVC for furniture

- 1) Flame resistance is working, USA standard (FMVSS 302), UK standard (BS5852) and Australia standard (AS1530), etc. It can make sure won't be hurt yourself once your car get fire.
- 2) Anti-UV, it can be working in lab test about 600 hours with different light, it can make sure the color won't be change once put the material on sunshine.
- 3) Tear resistance is 4.5kg. It mean very good quality can accept your pet on seat.
- 4) Peeling strength is $\geq 2.5\text{KGS}/3\text{CM}$. It mean very good quality and can accept 200KG people seat it
- 5) Flexing-resistance, no damage after 50,000 times at room temperature, and 20,000 times at -20°C ., it mean very good quality and can be use 8-10 years
- 6) Abrasion-resistance, 30,000-50,000 turns Martin-dale Test. If you have puppy, the claws on seat is no problem
- 7) Hydrolysis resistance and durable 8-10 years. One seat one life.
- 8) It can pass the latest Reach 225 test standards. No Phthalate. Total eco friendly
- 9) It can be made GRS Recycled PVC leather, the recycled part is from the wasted plastic bottles, its composition is around 60%. We can open the GRS TC certificate. So protect the earth, protect us.

Automobile microfiber

- 1) Tear resistance 8kg/3cm. It mean very good quality can accept your puppy on sofa.
- 2) Peeling strength $\geq 10\text{kg}/3\text{cm}$. It mean very good quality and can accept 200KG people seat it
- 3) Tensile strength 40-80kg/3cm, very good for furniture.
- 4) Flexing-resistance, no damage after 100,000 times at 25°C ., it mean very good quality and can be use 8-10 years.
- 5) Abrasion-resistance, 30,000-50,000 turns Martin-dale Test. If you have puppy, the claws on sofa is no problem.

“ ABOUT US ”

CICNO

Founded in 2007, Cigno leather is a professional manufacturer specialized in highly-quality faux leather China. Our main products include Vegan leather, recycled leather, PVC leather and so on.

Today, Cigno is a leader in the vegan leather markets with USDA and GRS certificate. We have 15 years manufacturing experience and provide OEM/ODM, output 200,0000 meters faux leather every month, on-time delivery time and 100% quality inspection can meet customer's request and we service over 200 customers, including famous brands, such as DIOR, CAOCH,CK. Except over 5,000 different products, we constantly develop new material and maintain high standards, durability, and workmanship.

Our new project is part of an ongoing commitment to innovation, for offering ever more creations that add value to the world across our company's offering, from true sustainability to fundamental ethical requirements. With a firm social conscience, we completely replace animal fur with artificial leather. Our leather is a material that mimics leather. It is created from artificial products instead of animal skins, therefore is cruelty-free. Furthermore, they are durable, resist scratches and are machine-washable. Good for animals, good for you.

Our perfect service, quality products and competitive price attract worldwide customer. If you can not find the products you want on our website, please do not hesitate to contact us. We will endeavor to develop for you. We are your sincere partner in China.
